The Courts of Pre-Colonial South India Jennifer Howes.2003-09-02 This book investigates how the material culture of South Indian courts was perceived by those who lived there in the pre-colonial period. Howes peels away the standard categories used to study Indian palace space, such as public/private and male/female, and replaces them with indigenous descriptions of space found in court poetry, vastu shastra and painted representations of courtly life. Set against the historical background of the events which led to the formation of the Ramnad Kingdom, the Kingdom's material circumstances are examined, beginning with the innermost region of the palace and moving out to the Kingdom via the palace compound itself and the walled town which surrounded it. An important study for both art historians and South India specialists. The volume is richly illustrated in colour.

Monsoon as Method Lindsay Bremner, Beth Cullen, Christina Leigh Geros, Harshavardhan Bhat, Anthony Powis. 2022-05-25 An edited volume by Monsoon Assemblages, a European Research Council funded research project. The book presents the methods that Monsoon Assemblages has evolved for engaging the monsoon, a globally connected weather system, as a coproducer of urban life and space in South and Southeast Asian cities. It challenges views of climate as an inert backdrop to urban life, instead suggesting that it is materially and spatially active in shaping urban politics, ecologies, infrastructures, buildings and bodies. It combines critical texts with cartography, photography and ethnography to present the project's methodology and its outcomes and invites urban practitioners to think differently about space, time, representation and human and non-human agency. It offers intra-disciplinary, intra-active methods for rethinking human and non-human relations with weather in ways that meet the challenges of climate change and the Anthropocene.

The Bungalow in Twentieth-Century India Madhavi Desai, Miki Desai.2016-12-05 The primary era of this study - the twentieth century - symbolizes the peak of the colonial rule and its total decline, as well as the rise of the new nation state of India. The processes that have been labeled 'westernization' and 'modernization' radically changed middle-class Indian life during the century. This book describes and explains the various

technological, political and social developments that shaped one building type - the bungalow - contemporaneous to the development of modern Indian history during the period of British rule and its subsequent aftermath. Drawing on their own physical and photographic documentation, and building on previous work by Anthony King and the Desais, the authors show the evolution of the bungalow's architecture from a one storey building with a verandah to the assortment of house-forms and their regional variants that are derived from the bungalow. Moreover, the study correlates changes in society with architectural consequences in the plans and aesthetics of the bungalow. It also examines more generally what it meant to be modern in Indian society as the twentieth century evolved.

MAINTENANCE, REPAIR & REHABILITATION AND MINOR WORKS OF BUILDINGS P. C. VARGHESE.2014-04-04 The term Maintenance of a building refers to the work done for keeping an existing building in a condition where it can perform its intended functions. Usually, the buildings last only for 40 to 50 years in a good shape just because of regular inspection and maintenance that enable timely identification of deteriorated elements. Overlooked dilapidation, inadequate maintenance and lack of repair works may lead to limited life span of a building. This comprehensive book, striving to focus on the maintenance, repair & rehabilitation and minor works of a building, presents useful guidelines that acquaint the readers with the traditional as well as modern techniques for upkeep and repairing of buildings already constructed. Dexterously organised into five parts, this book in Part I deals with the maintenance of buildings. Description of the construction chemicals, concrete repair chemicals, special materials used for repair, and repair of various parts of a building is given in Part II. Strengthening of reinforced concrete members by shoring, underpinning, plate bonding, RC jacketing and FRP methods are explored in Part III, which also highlights rebuilding of RC slabs and protection of earth slopes. Part IV of the book exposes the reader to the minor works done in a building such as construction of compound walls, gates, water sumps, house garage, relaying of floors, joining two adjacent rooms and so on. Part V is based on some allied topics involving control on termites and fungus in buildings as well as introduction of Vaastu Shastra and its main recommendations for a single house in a plot. Using an engaging style, this book will prove to be a must-read for the undergraduate and postgraduate students of civil engineering as well as for the polytechnic and ITI diploma students. Besides, the book will also be of immense benefit to the technical professionals across the country. **KEY FEATURES** • The text displays several figures to make the concepts clear. • Chapter-end references make the text suitable for further study. • Appendices at the end of the text provide extra information on non-destructive field tests for survey of the condition of concrete buildings and rough estimation of the construction and maintenance costs of buildings.
