Religion and Development in the Asia-Pacific Matthew Clarke,Anna Halafoff.2016-08-25 Community development is most effective and efficient when it is situated and led at the local level and considers the social behaviours, needs and worldviews of local communities. With more than eight out of ten people globally self-reporting religious belief, *Religion and Development in the Asia-Pacific: Sacred places as development spaces* argues that the role and impact of religions on community development needs to be better understood. It also calls for greater attention to be given to the role of sacred places as sites for development activities, and for a deeper appreciation of the way in which sacred stories and teachings inspire people to work for the benefit of others in particular locations. The book considers theories of 'place' as a component of successful development interventions and expands this analysis to consider the specific role that sacred places - buildings and social networks - have in planning, implementing and promoting sustainable development. A series of case studies examine various sacred places as sites for development activities. These case studies include Christian churches and disaster relief in Vanuatu; Muslim shrines and welfare provision in Pakistan; a women's Buddhist monastery in Thailand advancing gender equity; a Jewish aid organisation providing language training to Muslim Women in Australia; and Hawaiian sacred sites located within a holistic retreat centre committed to ecological sustainability. *Religion and Development in the Asia-Pacific* demonstrates the important role that sacred spaces can play in development interventions, covering diverse major world religions, interfaith and spiritual contexts, and as such will be of considerable interest for postgraduate students and researchers in development studies, religious studies, sociology of religion and geography.

Land Issues for Urban Governance in Sub-Saharan Africa Robert Home.2020-11-11 Sub-Saharan Africa faces many development challenges, such as its size and diversity, rapid urban population growth, history of colonial exploitation, fragile states and conflicts over land and natural resources. This collection, contributed from different academic disciplines and professions, seeks to support the UN Habitat New Urban Agenda passed at Habitat III in Quito, Ecuador, in 2016. It will attract readers from urban specialisms in law, geography and other social sciences, and from professionals and policy-makers concerned with land use planning, surveying and governance. Among the topics addressed by the book are challenges to governance institutions: how international development is delivered, building land management capacity, funding for urban infrastructure, land-based finance, ineffective planning regulation, and the role of alternatives to courts in resolving boundary and other land disputes. Issues of rights and land titling are explored from perspectives of human rights law (the right to development, and women's rights of access to land), and land tenure regularization. Particular challenges of housing, planning and informality are addressed through contributions on international real estate investment, community participation in urban settlement upgrading, housing delivery as a partly failing project to remedy apartheid's legacy, and complex interactions between political power, money and land. Infrastructure challenges are approached in studies of food security and food systems, urban resilience against natural and man-made disasters, and informal public transport.

Social Panorama of Latin America 2014 United Nations Economic Commission for Latin America and the Caribbean.2014-12-31 The 2014 edition of Social Panorama of Latin America presents ECLAC measurements for the analysis of income poverty, taking, as well, a multidimensional approach to poverty. Applying these two approaches to data for the countries of the region provides confirmation that despite the progress made over the past decade, structural poverty is still a feature of Latin American society. In order to contribute to a more comprehensive design of public policies aimed at overcoming poverty and socioeconomic inequality, this edition examines recent trends in social spending and sets out a deeper gap analysis focused on three areas: youth and development, gender inequality in the labour market and urban residential segregation.

Beyond Economic Efficiency in United States Tax Law David A. Brennan, Karen B. Brown, Darryll K. Jones.2014-12-09 A collection of unconventional voices, BEYOND ECONOMIC EFFICIENCY IN UNITED STATES TAX LAW articulates alternative approaches to traditional economic analysis that provide a fuller understanding of tax law. Twelve original essays shed new light on classical tax theory by demonstrating that efficiency should not be the sole mechanism for examining the merits of the U.S. tax system. Factors such as race, gender, ethics, fairness, social justice, and political theory, to name a few should play a vital role in the design of the tax system. Reliance upon the myth that markets function solely by reference to efficiency concerns can be expected to result in a poorly functioning tax regime. Covering a broad range of topics including healthcare, housing, theories of justice, wealth transfer taxation, taxation as regulation, international taxation, state and local taxation, retirement security, and the charitable tax exemption this trail-blazing anthology scrutinizes the tax code along many neglected lines of analysis, including fairness, redistribution, organizational behavior and hierarchy, and social justice.

America's Frozen Neighborhoods Robert C. Ellickson.2022-10-18 This book examines local zoning policies and suggests reforms that states and the federal government might adopt to counter the negative effects of exclusionary zoning In this book, Robert Ellickson asserts that local zoning policies are the most consequential regulatory program in the United States. Many localities have created barriers to the development of less costly forms of housing. Numerous economists have found that current zoning practices inflict major damage on the national economy. Using Silicon Valley, the Greater New Haven area, and the northwestern portion of Greater Austin as case studies, Ellickson shows in unprecedented detail how the zoning system works and recommends steps for its reform. Zoning regulations, Ellickson demonstrates, are hard to dislodge once localities have enacted them. He develops metrics to measure the existence and costs of exclusionary zoning, and suggests reforms that states and the federal

government could undertake to counter the detrimental effects of local policies. These include the cartelization of housing markets and the aggravation of racial and class segregation.

This timely book by journalist Mary O'Hara chronicles the real-world effects of austerity, removing it from the bland, technocratic language of politics and showing just what austerity means to ordinary lives. Drawing on hundreds of hours of first-person interviews with a wide range of people and, in the paperback edition, featuring an updated afterword by the author, the book explores the grim reality of living amid the biggest reduction of the welfare state in the postwar era and offers a compelling corrective to narratives of shared sacrifice.

Perchance to DREAM Michael A Olivas, Bill Richardson. 2019-01-08 The first comprehensive history of the DREAM Act and Deferred Action for Childhood Arrivals (DACA) In 1982, the Supreme Court of the United States ruled in Plyler v. Doe that undocumented children had the right to attend public schools without charge or impediment, regardless of their immigration status. The ruling raised a question: what if undocumented students,

after graduating from the public school system, wanted to attend college? Perchance to DREAM is the first comprehensive history of the DREAM Act, which made its initial congressional appearance in 2001, and Deferred Action for Childhood Arrivals (DACA), the discretionary program established by President Obama in 2012 out of Congressional failure to enact comprehensive immigration reform. Michael A. Olivas relates the history of the DREAM Act and DACA over the course of two decades. With the Trump Administration challenging the legality of DACA and pursuing its elimination in 2017, the fate of DACA is uncertain. Perchance to DREAM follows the political participation of DREAMers, who have been taken hostage as pawns in a cruel game as the White House continues to advocate anti-immigrant policies. Perchance to DREAM brings to light the many twists and turns that the legislation has taken, suggests why it has not gained the required traction, and offers hopeful pathways that could turn this darkness to dawn.

The Political Origins of Inequality Simon Reid-Henry.2015-12-08 This far-reaching study examines how political policies and paradigms have deepened global inequality, and how to reframe the debate to address it. Inequality is the defining issue of our time—one in which the global 1% now owns half the world's wealth. In this magisterial study, Simon Reid-Henry rewrites the story of globalization as one about the management of inequality. Reaching back to the eighteenth century, *The Political Origins of Inequality* foregrounds the political turning points and decisions behind the making of today's uneven societies. As it weaves together insights from the Victorian city to the Cold War, from US economic policy to Europe's present migration crisis, a true picture emerges of the structure of inequality itself. Reid-Henry shows that the problem of inequality cannot be resolved by the conventional arguments of left versus right. Modern political discourse has no place for public reason or the common good. Yet, he argues, it is within our power to address this. To forge a better world, we must meet our political responsibilities to others, rather than simply offering the selective charity of the rich. We must think beyond economics and outside our national borders. But above all, we must reinvent the language of equality for a modern, global world.

A New Home: Young Adults and Transitional Housing Gerald Madsen.2014 Homeless young adults represent a failure of the U.S. social services system to prevent new generations of homeless people. However, several organizations are working in concert with communities and governments to combat this problem through transitional housing programs that target young adults ages 18 to 24. Many of these programs mirror the new urban development trend of mixed-income housing, and place transitional houses inside stable neighborhoods that are either affluent or mixed-income themselves. While these programs represent monumental commitments in terms of resources, they also represent hope for many young adults. The sense of community these young-adult residents feel toward their neighborhoods and programs have lasting effects on the residents' abilities to find normalcy inside the American culture through access to education, safety, and employment. This study examines the YMCA Young Adult Services Program (serving the greater Seattle area) for transitional housing, exploring how the program works and what is residents' psychological sense of community.
