Democratic Confederalism Abdullah Öcalan.2014

Application of International Humanitarian and Human Rights Law to the Armed Conflicts of the Sudan Mohamed Abdelsalam Babiker.2007 The death toll resulting from all the armed conflicts in the Sudan, including south Sudan and Darfur, has far exceeded that of the victims of many recent conflicts combined together; more than those of Rwanda, Former Yugoslavia, Sierra Leone and East Timor. Despite the tragic death toll, massive displacement, alleged genocide, crimes against humanity and war crimes, the Sudanese case has neither featured in the legal literature nor been mentioned in the practice of international Tribunals. This book aims to rectify this by focusing on the Sudans armed conflicts as a case study. Unlike the approach followed in the preponderant legal literature, which tends to focus on International Humanitarian Law as the only applicable regime in armed conflicts, this book brings on board Human Rights Law, which can be applied side by side with International Humanitarian Law. In this sense, it tries to build bridges between the two branches of international law. It focuses on the operation of both regimes at three levels: their scope of application, the protection they afford, and how they can be enforced or implemented. It critically highlights the Sudans laws and how they cohere with or contradict International Humanitarian Law and Human Rights Law. It particularly examines the Sudans military, criminal and Islamic laws and judicial practices and analyzes them in the light of International treaties ratified by the Sudan. It draws heavily on the practice of regional and UN human rights bodies and humanitarian organizations such as the ICRC. The legal materials included in the book constitute a good resource for future work in the field. Most of the materials were written in Arabic, and hence are unavailable in other jurisdictions. Thus, including them as translated materials will prove to be of great value for those who intend to familiarize themselves with the Sudans laws and practices in this field. With a preface by Jan Pronk, Former Special Representative of the Secretary General of the UN to Sudan.

Wildlife Trafficking Gian Ege,Andreas Schloenhardt,Christian Schwarzenegger.2020-10-09

Wildlife trafficking threatens the existence of many plant and animal species and accelerates the destruction of wildlife, forests, and other natural resources. It contributes to environmental degradation, destroys unique natural habitats, and deprives many countries and their populations of scarce renewable resources. Nevertheless, preventing and suppressing the illegal trade in wildlife, animal parts, and plants is presently not a priority in many countries and it remains overlooked and poorly researched. The chapters included in this volume address causes, characteristics, and actors of wildlife trafficking, analyse detection methods, and explore different international and national legal frameworks. Annihilating Difference Alexander Laban Hinton.2002-08-15 Genocide is one of the most pressing issues that confronts us today. Its death toll is staggering: over one hundred million dead. Because of their intimate experience in the communities where genocide takes place, anthropologists are uniquely positioned to explain how and why this mass annihilation occurs and the types of devastation genocide causes. This ground breaking book, the first collection of original essays on genocide to be published in anthropology, explores a wide range of cases, including Nazi Germany,

Cambodia, Guatemala, Rwanda, and Bosnia.

Of War and Law David Kennedy.2009-01-10 Modern war is law pursued by other means. Once a bit player in military conflict, law now shapes the institutional, logistical, and physical landscape of war. At the same time, law has become a political and ethical vocabulary for marking legitimate power and justifiable death. As a result, the battlespace is as legally regulated as the rest of modern life. In *Of War and Law*, David Kennedy examines this important development, retelling the history of modern war and statecraft as a tale of the changing role of law and the dramatic growth of law's power. Not only a restraint and an ethical yardstick, law can also be a weapon--a strategic partner, a force multiplier, and an excuse for terrifying violence. Kennedy focuses on what can go wrong when humanitarian and military planners speak the same legal language--wrong for humanitarianism, and wrong for warfare. He argues that law has beaten ploughshares into swords while encouraging the bureaucratization of strategy and leadership. A culture of rules has eroded the experience of personal decision-making and responsibility among soldiers and statesmen alike. Kennedy urges those inside and outside the military who wish to reduce the ferocity of battle to understand the new roles--and the limits--of law. Only then will we be able to revitalize our responsibility for war.

Textermination Christine Brooke-Rose.1992 In her latest novel, *Textermination*, the eminent British novelist/critic Christine Brooke-Rose pulls a wide array of characters out of the great works of literature and drops them into the middle of the San Francisco Hilton. Emma Bovary, Emma Woodhouse, Captain Ahab, Odysseus, Huck Finn... all are gathered for the Annual Convention of Prayer for Being, to meet, to discuss, to pray for their continued existence in the mind of the modern reader. But what begins as a grand enterprise erupts into total pandemonium: with characters from different times, places, and genres all battling for respect and asserting their own hard-won fame and reputations. Dealing with such topical literary issues as deconstruction, multiculturalism, and the Salman Rushdie affair, this wild and humorous satire pokes fun at the academy and ultimately brings into question the value of determining a literary canon at all.

Social Care under State Socialism (1945-1989) Sabine Hering.2009-06-17 In the period of State Socialism in Eastern Europe (1945- 1989) Social Welfare was exercised on two levels: The dominant level was the system of governmental Social Policy, because individual and private structures of social help were considered as a dispensable bourgeois tradition. According to this perception, social welfare should include an extensive system of support and social services, although, in reality, special groups of "asocials" and "parasites" were excluded. Although - except for Yugoslavia - social work as a profession was nearly totally eliminated, modulated forms of social care had to be provided, because people like handicapped, elderly or mentally disabled still were in need. Therefore, Social Care was realised on a subordinated level - mostly allocated to proximate vocations or organisations like teachers, nurses and mass organisations. Experts from the respective countries explain what it was like. Countries under scrutiny: Bulgaria, Czechoslovakia, GDR, Hungary, Poland, Romania, Soviet Union, Yugoslavia

Young People and Everyday Peace Helen Berents.2018-03-19 Young People and Everyday Peace is grounded in the stories of young people who live in Los Altos de Cazucá, an informal peri-urban community in Soacha, to the south of Colombia's capital Bogotá. The occupants of this community have fled the armed conflict and exist in a state of marginalisation and social exclusion amongst ongoing violences conducted by armed gangs and government forces. Young people negotiate these complexities and offer pointed critiques of national politics as well as grounded aspirations for the future. Colombia's protracted conflict and its effects on the population raise many questions about how we think about peacebuilding in and with communities of conflict-affected people. Building on contemporary debates in International Relations about post-liberal, everyday peace, Helen Berents draws on feminist International Relations and embodiment theory to pay meaningful attention to those on the margins. She conceptualises a notion of embodied-everyday-peace-amidst-violence to recognise the presence and voice of young people as stakeholders in everyday efforts to respond to violence and insecurity. In doing so, Berents argues for and engages a more complex understanding of the everyday, stemming from the embodied experiences of those centrally present in conflicts. Taking young people's lives and narratives seriously recognises the difficulties of protracted conflict, but finds potential to build a notion of an embodied everyday amidst violence, where a complex and fraught peace can be found. Young People and Everyday Peace will be of interest to scholars of Latin American Studies, International Relations and Peace and Conflict Studies.

The World Says No to War Stefaan Walgrave,Dieter Rucht.2010 On February 15, 2003, the largest one-day protest in human history took place as millions of people in hundreds of cities marched in the streets, rallying against the imminent invasion of Iraq. This was activism on an unprecedented scale. The World Says No to Warstrives to understand who spoke out, why they did, and how so many people were mobilized for a global demonstration. Using surveys collected by researchers

from eight countries—Belgium, Britain, Germany, Italy, the Netherlands, Spain, Switzerland, and the United States—The World Says No to War analyzes how the new tools of the Internet were combined with more conventional means of mobilization to rally millions, many with little experience in activism, around common goals and against common targets. bin Laden Yossef Bodansky. 2011-05-04 Fascinating account. I strongly recommend it. —Jeane J. Kirkpatrick World-renowned terrorism expert Yossef Bodansky explores the transformation of Osama bin Laden from a once promising engineering student into the cold-blooded leader of the radical Islamic terrorist group, al Qaeda. With meticulous detail, Bodansky chronicles the events leading up to the international operation of hunting bin Laden. In the process, Bodansky pulls together a chilling story that is as ancient as the Crusades; a story that transcends bin Laden and any other single man, one that sweeps from Iran, Afghanistan, and Iraq to Kosovo and beyond. He takes you deep into the heart of centuries-old hatreds that have produced generations of bin Ladens and a terror network of underground armies that can strike virtually anywhere in the world. Fueled by Middle Eastern oil wealth and covertly armed by some of America's closest allies, this terror network is waging a brutal guerrilla war whose aim is nothing short of changing the course of history. The battlefields are increasingly Western city streets, and the casualties are most often innocents caught in the crossfire. Including information about al Qaeda's pursuit of chemical and nuclear weapons, covert deals between the U.S. and Islamic terrorists, and American efforts in the years-long campaign to capture Osama bin Laden, this book is a sobering wake-up call.

Masculinities R. W. Connell. 2005 This is an exciting new edition of R.W. Connell's ground-breaking text, which has become a classic work on the nature and construction of masculine identity. Connell argues that there is not one masculinity, but many different masculinities, each associated with different positions of power. In a world gender order that continues to privilege men over women, but also raises difficult issues for men and boys, his account is more pertinent than ever before. In a substantial new introduction and conclusion, Connell discusses the development of masculinity studies in the ten years since the book's initial publication. He explores global gender relations, new theories, and practical uses of masculinity research. Looking to the future, his new concluding chapter addresses the politics of masculinities, and the implications of masculinity research for understanding current world issues. Against the backdrop of an increasingly divided world, dominated by neo-conservative politics, Connell's account highlights a series of compelling questions about the future of human society. This second edition of Connell's classic book will be essential reading for students taking courses on masculinities and gender studies, and will be of interest to students and scholars across the humanities and social sciences.

What Causes Men's Violence Against Women? Michele Harway, James M. O'Neil. 1999-09-09 This book uses various theoretical perspectives to summarize what is known about the multiple causes of men's violence against women, and stresses the importance of identifying men's risk factors. The preliminary multivariate model identifies four content areas: macrosocietal; biological; gender role socialization; and relational factors to explain men's violence against women. Within these four content areas the editors develop thirteen preliminary hypotheses about the causes of men's violence against women, which are critiqued by the contributors in the subsequent chapters.

The Good Citizen Russell J. Dalton. 2020-06-23 There has been a growing chorus of political analysts with doomsday predictions of an American public that is uncivil, disengaged, and alienated. And it's only getting worse with a younger generation of Americans who do not see the value in voting. The good news is that the bad news is wrong. In this Third Edition of *The Good Citizen*, Russell Dalton

uses current national public opinion surveys, including new evidence from 2018 Pew Center survey data, to show how Americans are changing their views on what good citizenship means. It's not about recreating the halcyon politics of a generation ago, but recognition that new patterns of citizenship call for new processes and new institutions that reflect the values of the contemporary American public. Trends in participation, tolerance, and policy priorities reflect a younger generation that is more engaged, more tolerant, and more supportive of social justice. The Good Citizen shows how a younger generation is creating new norms of citizenship that are leading to a renaissance of democratic participation. An important comparative chapter in the book showcases cross-national comparisons that further demonstrate the vitality of American democracy.

Supranational Criminal Law Roelof Haveman, Olga Kavran, Julian Nicholls (LL. M.). 2003 What exactly is the context in which all aspects of this new field of criminal law have to be interpreted? What does the principle of legality mean in the context of supranational criminal law? Which tradition lies at the basis of this new law system? Is supranational criminal law as it grows the result of a deliberate policy, tending towards a coherent system? Or is it merely the result of crisis management?

The Nation-State in Question T. V. Paul, G. John Ikenberry, John A. Hall. 2020-11-10 Has globalization forever undermined the state as the mighty guarantor of public welfare and security? In the 1990s, the prevailing and even hopeful view was that it had. The euphoria did not last long. Today the return of the state is increasingly being discussed as a desirable reality. This book is the first to bring together a group of prominent scholars from comparative politics, international relations, and sociology to systematically reassess--through a historical lens that moves beyond the standard focus on the West--state-society relations and state power at the dawn of the twenty-first century. The contributors examine the sources and forms of state power in light of a range of welfare and security needs in order to tell us what states can do today. They assess the extent to which international social forces affect states, and the capacity of states to adapt in specific issue areas. Their striking conclusion is that states have continued to be pivotal in diverse areas such as nationalism, national security, multiculturalism, taxation, and industrial relations. Offering rich insights on the changing contours of state power, *The Nation-State in Question* will be of interest to social scientists, students, and policymakers alike. John Hall's introduction is followed by chapters by Peter Baldwin, John Campbell, Francesco Duina, Grzegorz Ekiert, Jeffrey Herbst, Christopher Hood, Anatoly Khazanov, Brendan O'Leary, T. V. Paul, Bernard Yack, Rudra Sil, and Minxin Pei. The conclusion is by John Ikenberry.

Timeless Experience Nancy Amendt-Lyon, Philip Brownell. 2016-05-11 For years, psychotherapists have known that Laura Perls was actively involved in the development of what today is known as Gestalt therapy, although her husband, Frederick Perls, officially authored the foundational texts. Laura Perls's own professional publications are succinct and appreciated, but they are not numerous. The present volume, comprising Laura Perls's heretofore unpublished writing, including journal entries, letters, poems, translations, short stories, and drafts for lectures and publications, offers a very personal perspective on one of the founders of Gestalt therapy. The extensive interview that Daniel Rosenblatt conducted with Laura Perls in 1972, published here for the first time in English, complements her literary texts, and provides valuable background information. Laura Perls's history spans two world wars, flight from Nazi persecution, life on three continents, and many new beginnings. Together with her known works, these literary texts reflect the emergence of women into professional and public life during the 20th century by giving the reader insight into this time period and the influence of a woman on the development of a major school of Humanistic Psychology. The rich cultural background from which Laura Perls benefited and the authors whose works inspired her resonate in her literary texts, a treasure chest of personal reflections during the

decades of her life from 1946 to 1985. In addition, a general overview of her life is provided, her theoretical and practical contributions to the origins and development of Gestalt therapy are described, and her legacy to the field of Gestalt therapy is elucidated. Laura Perls was known for making the New York Institute for Gestalt Therapy a viable and important teaching community. For decades, she was the keeper of the flame of this foundational Gestalt institute. Best known for her concepts of contact and support, the creative use of experiments, and productive use of embarrassment, Laura Perls's literary texts are finally made available here.

Civilizing Security Ian Loader, Neil Walker. 2007-04-19 Security has become a defining feature of contemporary public discourse, permeating the so-called 'war on terror', problems of everyday crime and disorder, the reconstruction of 'weak' or 'failed' states and the dramatic renaissance of the private security industry. But what does it mean for individuals to be secure, and what is the relationship between security and the practices of the modern state? In this timely and important book, Ian Loader and Neil Walker outline and defend the view that security remains a valuable public good. They argue that the state is indispensable to the task of fostering and sustaining liveable political communities in the contemporary world and thus pivotal to the project of civilizing security. This is a major contribution by two leading scholars in the field and will be of interest to anyone wishing to deepen their understanding of one of the most significant and pressing issues of our times.

Prison Writings - The PKK and the Kurdish Question in the 21st Century (International Initiative Edition) Abdullah Ocalan. 2013-03-13 Abdullah Ocalan was the leader of the Kurdistan Workers Party, the PKK, and the most wanted man in Turkey for almost two decades. He was eventually kidnapped while in Kenya in 1999, and has been in prison in Turkey ever since. From 1984, under his leadership, the PKK fought for an independent Kurdish state in the south east of Turkey. In a sustained popular uprising, tens of thousands of PKK guerrillas took on the second largest army in NATO. The conflict has remained unsolved till today and the fighting still goes on. While in prison, Mr. Ocalan has written a number of books, in which he analyses the situation in Kurdistan and offers proposals for a peaceful solution to the conflict.

Trust and Violence Jan Philipp Reemtsma. 2012-04-22 A philosophical investigation into the connections between trust and violence The limiting of violence through state powers is one of the central projects of the modern age. Why then have recent centuries been so bloody? In *Trust and Violence*, acclaimed German intellectual and public figure Jan Philipp Reemtsma demonstrates that the aim of decreasing and deterring violence has gone hand in hand with the misleading idea that violence is abnormal and beyond comprehension. We would be far better off, Reemtsma argues, if we acknowledged the disturbing fact that violence is normal. At the same time, Reemtsma contends that violence cannot be fully understood without delving into the concept of trust. Not in violence, but in trust, rests the foundation of true power. Reemtsma makes his case with a wide-ranging history of ideas about violence, from ancient philosophy through Shakespeare and Schiller to Michel Foucault, and by considering specific cases of extreme violence from medieval torture to the Holocaust and beyond. In the midst of this gloomy account of human tendencies, Reemtsma shrewdly observes that even dictators have to sleep at night and cannot rely on violence alone to ensure their safety. These authoritarian leaders must trust others while, by means other than violence, they must convince others to trust them. The history of violence is therefore a history of the peculiar relationship between violence and trust, and a recognition of trust's crucial place in humanity. A broad and insightful book that touches on philosophy, sociology, and political theory, *Trust and Violence* sheds new, and at times disquieting, light on two integral aspects of our society.

On the Origins of Cognitive Science Jean-Pierre Dupuy. 2009-04-17 An examination of the fundamental role cybernetics played in the birth of cognitive science and the light this sheds on current controversies. The conceptual history of cognitive science remains for the most part unwritten. In this groundbreaking book, Jean-Pierre Dupuy—one of the principal architects of cognitive science in France—provides an important chapter: the legacy of cybernetics. Contrary to popular belief, Dupuy argues, cybernetics represented not the anthropomorphization of the machine

but the mechanization of the human. The founding fathers of cybernetics—some of the greatest minds of the twentieth century, including John von Neumann, Norbert Wiener, Warren McCulloch, and Walter Pitts—intended to construct a materialist and mechanistic science of mental behavior that would make it possible at last to resolve the ancient philosophical problem of mind and matter. The importance of cybernetics to cognitive science, Dupuy argues, lies not in its daring conception of the human mind in terms of the functioning of a machine but in the way the strengths and weaknesses of the cybernetics approach can illuminate controversies that rage today—between cognitivists and connectionists, eliminative materialists and Wittgensteinians, functionalists and anti-reductionists. Dupuy brings to life the intellectual excitement that attended the birth of cognitive science sixty years ago. He separates the promise of cybernetic ideas from the disappointment that followed as cybernetics was rejected and consigned to intellectual oblivion. The mechanization of the mind has reemerged today as an all-encompassing paradigm in the convergence of nanotechnology, biotechnology, information technology, and cognitive science. The tensions, contradictions, paradoxes, and confusions Dupuy discerns in cybernetics offer a cautionary tale for future developments in cognitive science.

Gender in Political Theory Judith Squires. 2013-05-28 This wide-ranging and accessible book provides a thorough overview of the key debates in gender and political theory.

Human Rights in Europe Malte Brosig. 2006 The book represents an insight into current human rights developments in Europe and gives an overview of the complex, juridical and political dimensions. The contemporary development and institutionalisation of European human rights norms takes place within the structures of the European Union, OSCE, Council of Europe and a multilayered court system. Chapter II «European Organisations and Human Rights» delivers an up to date introduction into the organisation's different approaches to human rights. Geographically the volume has a strong focus on human rights developments in Central Eastern and South Eastern Europe. Russia and Turkey are challenging cases for European human rights organisations and are dealt with in separate articles. The issue of minority rights protection forms another challenge for many Central and Eastern European Countries. The protection of Roma people is only one pressing example. Finally the book devotes a whole chapter to the EU's external relations and human rights. The volume closes with a chapter written by David Chandler who reminds us of the limits of the human rights conception.

Evil Julia Shaw. 2019-02-26 An expert in criminology and psychology uses science to understand evil in today's society. What is it about evil that we find so compelling? From our obsession with serial killers to violence in pop culture, we seem inescapably drawn to the stories of monstrous acts and the aberrant people who commit them. But evil, Dr. Julia Shaw argues, is largely subjective. What one may consider normal, like sex before marriage, eating meat, or working on Wall Street, others find abhorrent. And if evil is only in the eye of the beholder, can it be said to exist at all? In *Evil*, Shaw uses an engrossing mix of science, popular culture, and real-life examples to break down timely and provocative issues. How similar is your brain to a psychopath's? How many people have murder fantasies? Can artificial intelligence be evil? Do your sexual proclivities make you a bad person? Who becomes a terrorist? If you could travel back in time, would you kill baby Hitler? In asking these questions, Shaw urges readers to discover empathy and to rethink and reshape what it means to be bad. *Evil* is a wide-ranging exploration into a fascinating, darkly compelling subject from wickedly smart and talented writer. Praise for *Evil* "A brilliant panorama that elucidates humanity's dark side. . . . This science-based foundation for studying the minds of sadists, mass murderers, freaks and creeps, as well the new role of tech in promoting evil is presented in a totally engaging fashion." —Philip Zimbardo, PhD; Professor Emeritus, Stanford University; author of *The Lucifer Effect* "This overview of various kinds of aberrant behavior grouped under the umbrella term evil is well backed up by the expertise of Shaw. . . . Shaw's work will be particularly appropriate for college and high school libraries for its sober-minded, academically rigorous examination of an oft-sensationalized subject." —Publishers Weekly "Capably written with a smooth mix of scientific insight and theoretical thought, the book will hopefully inspire empathy and understanding rather

than hysteria and condemnation. A consistently fascinating journey into the darker sides of the human condition that will push on the boundaries of readers' comfort zones." —Kirkus Reviews

The Revolution Was Televised Alan Sepinwall.2013-02-19 A phenomenal account, newly updated, of how twelve innovative television dramas transformed the medium and the culture at large, featuring Sepinwall's take on the finales of *Mad Men* and *Breaking Bad*. In *The Revolution Was Televised*, celebrated TV critic Alan Sepinwall chronicles the remarkable transformation of the small screen over the past fifteen years. Focusing on twelve innovative television dramas that changed the medium and the culture at large forever, including *The Sopranos*, *Oz*, *The Wire*, *Deadwood*, *The Shield*, *Lost*, *Buffy the Vampire Slayer*, *24*, *Battlestar Galactica*, *Friday Night Lights*, *Mad Men*, and *Breaking Bad*, Sepinwall weaves his trademark incisive criticism with highly entertaining reporting about the real-life characters and conflicts behind the scenes. Drawing on interviews with writers David Chase, David Simon, David Milch, Joel Surnow and Howard Gordon, Damon Lindelof and Carlton Cuse, and Vince Gilligan, among others, along with the network executives responsible for green-lighting these groundbreaking shows, *The Revolution Was Televised* is the story of a new golden age in TV, one that's as rich with drama and thrills as the very shows themselves.

Embodied Politics in Visual Autobiography Sarah Brophy,Janice Hladki.2014-11-05 From reality television to film, performance, and video art, autobiography is everywhere in today's image-obsessed age. With contributions by both artists and scholars, *Embodied Politics in Visual Autobiography* is a unique examination of visual autobiography's involvement in the global cultural politics of health, disability, and the body. This provocative collection looks at images of selfhood and embodiment in a variety of media and with a particular focus on bodily identities and practices that challenge the norm: a pregnant man in cyberspace, a fat activist performance troupe, indigenous artists intervening in museums, transnational selves who connect disability to war, and many more. The chapters in *Embodied Politics in Visual Autobiography* reflect several different theoretical approaches but share a common concern with the ways in which visual culture can generate resistance, critique, and creative interventions. With contributions that investigate digital media, installation art, graphic memoir, performance, film, reality television, photography, and video art, the collection offers a wide-ranging critical account of what is clearly becoming one of the most important issues in contemporary culture.

The Global Sexual Revolution Gabriele Kuby.2019-10-24 This is the standard work on The Global Sexual Revolution. First published in 2012, it is translated into 15 languages and updated for this edition. The new ideology of gender denies the binary structure of human existence as man and woman and overthrows moral limitations of sexuality. This destroys marriage and family as the foundation of culture.

Future War and the Defence of Europe John R. Allen,Frederick Ben Hodges,Julian Lindley-French.2021 *Future War and the Defence of Europe* offers a major new analysis of how peace and security can be maintained in Europe: a continent that has suffered two cataclysmic conflicts since 1914. Taking as its starting point the COVID-19 pandemic and way it will inevitably accelerate some key global dynamics already in play, the book goes on to weave history, strategy, policy, and technology into a compelling analytical narrative. It lays out in forensic detail the scale of the challenge Europeans and their allies face if Europe's peace is to be upheld in a transformative century. The book upends foundational assumptions about how Europe's defence is organised, the role of a fast-changing transatlantic relationship, NATO, the EU, and their constituent nation-states. At the heart of the book is a radical vision of a technology-enabling future European defence, built around a new kind of Atlantic Alliance, an innovative strategic public-private partnership, and the future hyper-electronic European force, E-Force, it must spawn. Europeans should be under no illusion: unless they do far more for their own defence, and very differently, all that they now take for granted could be lost in the maze of hybrid war, cyber war, and hyper war they must face.

Youth Labor in Transition Jacqueline O'Reilly,Janine Leschke,Renate Ortlieb,Martin Seeleib-Kaiser,Paola Villa.2018-11-07 Exacerbated by the Great Recession, youth transitions to employment and adulthood have become increasingly protracted, precarious, and differentiated by gender,

ethnicity, and socioeconomic status. Youth Labor in Transition examines young people's integration into employment, alongside the decisions and consequences of migrating to find work and later returning home. The authors identify key policy challenges for the future related to NEETS, overeducation, self-employment, and ethnic differences in outcomes. This illustrates the need to encompass a wider understanding of youth employment and job insecurity by including an analysis of economic production and how it relates to social reproduction of labor if policy intervention is to be effective. The mapping and extensive analysis in this book are the result of a 3-year, European Union-funded research project (Strategic Transitions for Youth Labour in Europe, or STYLE; <http://www.style-research.eu>) coordinated by Jacqueline O'Reilly. With an overall budget of just under 5 million euros and involving 25 research partners; an international advisory network and local advisory boards of employers, unions, and policymakers; and non-governmental organizations from more than 20 European countries, STYLE is one of the largest European Commission-funded research projects to exist on this topic. Consequently, this book will appeal to an array of audiences, including academic and policy researchers in sociology, political science, economics, management studies, and more particular labor market and social policy; policy communities; and bachelor's- and master's-level students in courses on European studies or any of the aforementioned subject areas.
