The Multivoices of Kenyan Primary School Children Learning to Read and Write Esther Mukewa Lianza.2020-03-18 This book provides a rich and nuanced examination of children learning to read and write a second language in primary schools in Kenya, taught by teachers who themselves have often learned English as a second or third language. The author uses two case studies, of an urban and a rural school, to explore how different socioeconomic and cultural contexts can affect the enactment of language policies and their effect on literacy. This book contributes a unique perspective to studies in language and literacy education due to its distinctive exploration of young children learning to read and write in the English language in Kenya, and it will be of particular interest to students and scholars of applied linguistics, language education, bilingualism and language policy.

Learning to Live Together in Africa through History Education Denise Bentrovato.2017-11-13 This study sheds light on the current state of history education in Africa and reflects on its potential to prepare this continent's learners for the challenges of learning to live together. Drawing on an examination of school curricula and the experiences of educational stakeholders, it identifies trends in the processes and outcomes of recent curricular revisions, and discerns key challenges relating to the teaching and learning of history across Africa. It scrutinises the place afforded to history within African education systems, and surveys related contents and pedagogies. While it identifies African history as a fundamental yet sensitive and controversial subject, it also illustrates examples of present-day curricular strategies to integrating a concern for promoting a culture of peace.

Benefiting from Basic Education, School Quality and Functional Literacy in Kenya T. O. Eisemon.2014-06-28 Studies of the retention of literacy and numeracy by adults who have only obtained primary schooling have given little encouragement to the belief that the cognitive effects of schooling are enduring for many school leavers. How these findings can be reconciled with the claims made for the importance of schooling as an instrument of social and economic change is the subject of investigation in this volume. The cognitive outcomes of literacy acquisition and secular schools in coastal Kenya are the focus of this ethnographic study, which stresses the relevance of an international understanding of the particular problems and dilemmas that face the educational systems of individual countries.

This volume aims to take stock of the substantial amount of information and experience generated through the use of EGRA, and to share this knowledge with practitioners, policymakers, and international donors. Chapters cover not only particular applications of the instrument but also put EGRA in the context of broader issues and developments in literacy and education.
