**Responding to Polar Questions across Languages and Contexts** Galina B. Bolden, John Heritage, Marja-Leena Sorjonen.2023-12-15 This book is about one of the most fundamental action sequences found across human societies and socio-cultural contexts: polar questions and their responses. Question-answer sequences are among the most basic building blocks for sequences of action in interaction and are ubiquitous among the languages of the world. Among different types of questions, polar questions are the most common, occurring with greater frequency in all studied languages. This volume presents a collection of conversation analytic studies into responses to polar questions across ten different, typologically diverse languages, in a range of action environments and social contexts. The studies explore different ways in which speakers can respond to polar questions, and the relationships between response design, the action implemented by the response, and the context in which it occurs. Taken together, the studies assembled in the volume present a nuanced view of polar responses as a situated social action.

**Time in Embodied Interaction** Arnulf Deppermann, Jürgen Streeck. 2018-09-13 This is the first book dedicated to the study of the complexities that arise in embodied interaction from the multiplicity of time-scales on which its component processes unfold. It shows in microscopic detail how people synchronize and sequence modal resources such as talk, gaze, gesture, and object-manipulation to accomplish social actions. The studies show that each of these resources has its own temporal trajectory, affordances and restrictions, which enable and constrain the fine-grained work of bodily self-organization and interaction with others. Focusing on extended interactional time scales, some of the contributors investigate ways in which larger interactional episodes and relationships between actions are brought about and how actions build on shared interactional histories. The book makes a strong case for the use of video in the study of social interaction. It proposes an enlarged vision of Conversation Analysis that puts the body and its interactive temporalities center stage.

*Conversation Analytic Perspectives to Digital Interaction* Aino Koivisto, Heidi Vepsäläinen, Mikko T. Virtanen. 2023-06-22 This book offers a collection of state-of-the-art conversation analytic work on the impact of different types of digital technologies and media on social interaction. It furthers our understanding of whether and to what extent the varying practices of digital interaction can be considered adaptations of the basic organisations and resources of co-present face-to-face interaction. The chapters explore the emerging practices in contemporary digital interaction and in interaction related to digital technologies. The volume is organised into four sections according to the platform or type of digital interaction: mobile messaging, social media, video conferencing, and human-computer interaction. Each of the chapters highlights an interactional or linguistic phenomenon – an action, a practice, a sequence, or a larger structure. Some of these are unique to online environments, such as emojis or hashtags, whereas some occur in both online and offline interaction, such as repair initiators and proposal sequences.
