*The Second Media Age* Mark Poster.2018-03-08 This book examines the implications of new communication technologies in the light of the most recent work in social and cultural theory and argues that new developments in electronic media, such as the Internet and Virtual Reality, justify the designation of a second media age.

*Ruled Britannia* Harry Turtledove.2002-11-05 The year is 1597. For nearly a decade, the island of Britain has been under the rule of King Philip in the name of Spain. The citizenry live under an enforced curfew—and in fear of the Inquisition's agents, who put heretics to the torch in public displays. And with Queen Elizabeth imprisoned in the Tower of London, the British have no symbol to unite them against the enemy who occupies their land. William Shakespeare has no interest in politics. His passion is writing for the theatre, where his words bring laughter and tears to a populace afraid to speak out against the tyranny of the Spanish crown. But now Shakespeare is given an opportunity to pen his greatest work—a drama that will incite the people of Britain to rise against their persecutors—and change the course of history.

**Marianne Werefkin and the Women Artists in Her Circle** Tanja Malycheva, Isabel Wünsche.2016 The volume traces the relationships between Marianne Werefkin and the women artists in her circle. Specifically focusing on issues of cosmopolitan culture, transcultural dialogue, gender roles, and the building of new artistic networks, it re-evaluates the contributions of these artists to the development of modern art.

**A Climate of Injustice** J. Timmons Roberts, Bradley Parks.2006-11-22 The global debate over who should take action to address climate change is extremely precarious, as diametrically opposed perceptions of climate justice threaten the prospects for any long-term agreement. Poor nations fear limits on their efforts to grow economically and meet the needs of their own people, while powerful industrial nations, including the United States, refuse to curtail their own excesses unless developing countries make similar sacrifices. Meanwhile, although industrialized countries are responsible for 60 percent of the greenhouse gas emissions that contribute to climate change, developing countries suffer the worst and first effects of climate-related disasters, including droughts, floods, and storms, because of their geographical locations. In *A Climate of Injustice*, J. Timmons Roberts and Bradley Parks analyze the role that inequality between rich and poor nations plays in the negotiation of global climate agreements. Roberts and Parks argue that global inequality dampens cooperative efforts by reinforcing the structuralist worldviews and causal beliefs of many poor nations, eroding conditions of generalized trust, and promoting particularistic notions of fair solutions. They develop new measures of climate-related inequality, analyzing fatality and homelessness rates from hydrometeorological disasters, patterns of emissions inequality, and participation in international environmental regimes. Until we recognize that reaching a North-South global climate pact requires addressing larger issues of inequality and striking a global bargain on environment and development, Roberts and Parks argue, the current policy gridlock will remain unresolved.

**Secondary Education for All** R. H. Tawney.1988-07-01 *Secondary Education for All* cannot be considered independently from the life and career of its author, R. H. Tawney. Written in 1922 in time for the general election, it is the Labour party's first major statement on adolescent education. It reflects the historical insights and ardent political convictions of an economic historian turned socialist, and helped to bring the issue of education reform from the periphery of politics to a more central position. Through the introduction of free secondary education for all, Tawney hoped to rid education of class inequality over a generation. This is a classic and influential text which acted as a springboard for educational advance which reflects the growing educational and political debate of 1920s Britain.

*The Death of Manolete* Barnaby Conrad.2007-07-01 On Thursday, August 28, 1947, in the bull ring at the Spanish town of Linares, a thirty-year-old millionaire called Manolete (Manuel Laureano Rodriguez) and a Miura bull named Islero killed each other. Conrad recounts Manolete's extraordinary life in *The Death of Manolete*, for the first time in English. He shows the breeding that made the Spanish boy, the tempering that made the young torero, the sacrifice that made the man, the girl who brought him love, the acclaim that brought him incredible success and finally its price...the undoing that began slowly and ended in one last great afternoon and in an untimely death that put out the brightest flame in Spain. Manolete fired the Latin imagination as no one had done since El Cid. He was a symbol of Latin pride, valor, and chivalry. But the crowds owned him and he did their bidding...and they had bid him to die.

**Gottfried Von Strassburg and the Medieval Tristan Legend** Adrian Stevens, Roy Albert Wisbey, University of London. Institute of Germanic Studies.1990 This volume comprises selected papers from a Tristan symposium held at the Institute of Germanic Studies in London. The symposium was conceived by the organizers as an experiment in transatlantic dialogue and the papers represent the views of scholars from a variety of North American and British universities. The main focus of attention is Gottfried's Tristan. Familiar assumptions about the text are questioned and fresh perspectives are offered on many contentious issues: those disagreements which persist are themselves a reflection posed by Gottfried's masterpiece. In addition, new light is thrown on the treatment of the Tristan theme in medieval and modern times. Contributors are: MICHAEL CURSCHMANN, W.J. MCCANN, MARGARET BROWN, C. STEPHEN JAEGER, M.H. JONES, ADRIAN STEVENS, ARTHUR GROOS, THOMAS KERTH, MICHAEL BATTS, MARIANNE WYNN, JANET WHARTON, GEORGE GILLESPIE, JOAN M. FERRANTE, LESLIE SEIFFERT, SIDNEY M. JOHNSON, PETRUS W. TAX, AUGUST CLOSS, H.B. WILLSON, ROY WISBEY.

*Materialist Feminism* Rosemary Hennessy, Chrys Ingraham.1997 During the 1980s, capitalism triumphantly secured its global reach, anti-communist ideologies hammered home socialism's inherent failure, the New Left increasingly moved into the professional middle class—and many of feminism's earlier priorities were marginalized. Identity politics, often formulated in terms of social reconstructionism or multiculturalism, has increasingly suppressed materialist feminism's systematic perspective, replacing it with discourse analysis or cultural politics. *Materialist Feminism: A Reader* argues against the retreat to multiculturalism for keeping invisible the material links among the explosion of meaning-making practices in highly industrialized social sectors, the exploitation of women's labor, and the appropriation of women's bodies that continues to undergird the scramble for profits and state power in multinational capitalism.

**Effi Briest** Theodor Fontane.2010-07-01 *Effi Briest*, the classic German realist novel, follows a young woman through her life and marriage. She is an innocent when she is married to the social climbing Instetten, and longs for worldly things. When she is left alone by her husband, who is pursuing his political career, she succumbs to the flattery of another man. Her adultery has wide and tragic consequences on the rest of her life.

Through his photography Jordy Meow explores these forgotten places and sheds light on a lost world that was thriving just a few decades ago

*Enlargement of the European Union* Allan F. Tatham.2009-01-26 The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty. A significant upshot of these issues is that the concept of European identity – defined in terms of such factors as culture, history and economics – has supplanted the long-dominant theme of ‘widening and deepening,’ particularly since the Union's expansion has become primarily eastward. The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view, focusing on the concerns of stakeholders and the ‘identity’ conflicts and uncertainties incurred by enlargement initiatives. In the course of its presentation, it details the actual pre-accession Europeanization process and its complex history. Among the key elements discussed are the following: the conflict between ‘widening’ and ‘deepening’ and the effect on EU institutional reform; institutional requirements on candidate countries; pre-accession criteria and negotiations; administrative capacity, judicial capacity, and legal approximation in accession states; capacity of the EU to absorb new Member States; and EC law as part of European identity. Also covered are specific historical details of particular pre-accession negotiations (e.g., Greece, Spain, Portugal, Malta, and Cyprus), the still inconclusive negotiations with Turkey and the Western Balkan states, and political factors involved in the non-accession of Norway, Iceland and Switzerland. Assembling powerful evidence and

applying incisive analysis, the author's conclusion shows that, absent further (and major) EU institutional reform, it will be difficult for an enlarging Union to continue to 'deliver the goods.' A watershed in the continuing great debate on the fulfilment of the EC Treaty's determination to foster and promote 'an ever closer union of the peoples of Europe,' this book will prove invaluable to anybody interested in the European integration project, particularly lawyers, academics, officials and policymakers in the EU Member States.

Climate Change and Society John Urry.2011-06-20 This book explores the significance of human behaviour to understanding the causes and impacts of changing climates and to assessing varied ways of responding to such changes. So far the discipline that has represented and modelled such human behaviour is economics. By contrast Climate Change and Society tries to place the 'social' at the heart of both the analysis of climates and of the assessment of alternative futures. It demonstrates the importance of social practices organised into systems. In the fateful twentieth century various interlocking high carbon systems were established. This sedimented high carbon social practices, engendering huge population growth, increasing greenhouse gas emissions and the potentially declining availability of oil that made this world go round. Especially important in stabilising this pattern was the 'carbon military-industrial complex' around the world. The book goes on to examine how in this new century it is systems that have to change, to move from growing high carbon systems to those that are low carbon. Many suggestions are made as to how to innovate such low carbon systems. It is shown that such a transition has to happen fast so as to create positive feedbacks of each low carbon system upon each other. Various scenarios are elaborated of differing futures for the middle of this century, futures that all contain significant costs for the scale, extent and richness of social life. Climate Change and Society thus attempts to replace economics with sociology as the dominant discipline in climate change analysis. Sociology has spent much time examining the nature of modern societies, of modernity, but mostly failed to analyse the carbon resource base of such societies. This book seeks to remedy that failing. It should appeal to teachers and students in sociology, economics, environmental studies, geography, planning, politics and science studies, as well as to the public concerned with the long term future of carbon and society.

**Become Who You Are** Hedwig Dohm.2006-01-01 Hedwig Dohm (1831-1919) was a thinker and writer significantly ahead of her time. She championed women's rights in Germany and criticized with acerbic wit the social, political, and familial inequities inherent in gender relationships at the time of the first wave of the women's movement. Her novella Become Who You Are is about a woman, Agnes Schmidt, whose husband has died and who is grappling with finding an identity for herself as an aging widow--reflecting the restrictions imposed especially on aging, widowed women who often yearn for a life and identity of their own. Also included here is the English translation of Dohm's essay, The Old Woman, which is a compelling call for women to resist the social, intellectual, psychological, and physical restraints placed on women of Dohm's time.

**Print for Victory** Valerie Holman.2008 This is the first in-depth study of British publishing during the Second World War. Despite increasingly severe paper-rationing and a constant shortage of manpower, it was a period marked by innovation in book design, the advent of new readers in the UK and overseas, and a profound conviction in the power of print. Extraordinary efforts were made to salvage paper and books, and to supply Allied servicemen, prisoners-of-war and citizens of formerly-occupied countries with new publications from Britain.--BOOK JACKET.
