**Up a Road Slowly** Irene Hunt.2005-01-04 The beloved author of Across Five Aprils and No Promises in the Wind presents one of her most cherished novels, the Newbery Award-winning story of a young girl's coming of age... Julie would remember her happy days at Aunt Cordelia's forever. Running through the spacious rooms, singing on rainy nights in front of the fireplace. There were the rides in the woods on Peter the Great, and the races with Danny Trevort. There were the precious moments alone in her room at night, gazing at the sea of stars. But there were sad times too—the painful jealousy Julie felt after her sister married, the tragic death of a schoolmate and the bitter disappointment of her first love. Julie was having a hard time believing life was fair. But Julie would have to be fair to herself before she could even think about new beginnings... "Hunt demonstrates that she is a writer of the first rank...Those who follow Julie's growth—from a tantrum-throwing seven-year-old to a gracious young woman of seventeen—will find this book has added a new dimension to their lives."—The New York Times Book Review

**The Fourth Industrial Revolution** Klaus Schwab.2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development.

Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Bookyards: There are thousands upon thousands of free ebooks here. Better to search instead for a particular book title, author, or synopsis. The Advanced Search lets you narrow the results by language and file extension (e.g. PDF, EPUB, MOBI, DOC, etc). Booktastik has free and discounted books on its website, and you can follow their social media accounts for current updates. Unlike Project Gutenberg, which gives all books equal billing, books on Amazon Cheap Reads are organized by rating to help the cream rise to the surface. However, five stars aren't necessarily a guarantee of quality; many books only have one or two reviews, and some authors are known to rope in friends and family to leave positive feedback. Note that some of the "free" ebooks listed on Centsless Books are only free if you're part of Kindle Unlimited, which may not be worth the money. A few genres available in eBooks at Freebooksy include Science Fiction, Horror, Mystery/Thriller, Romance/Chick Lit, and Religion/Spirituality.
