The Philosophical Baby Alison Gopnik.2009-08-04 For most of us, having a baby is the most profound, intense, and fascinating experience of our lives. Now scientists and philosophers are starting to appreciate babies, too. The last decade has witnessed a revolution in our understanding of infants and young children. Scientists used to believe that babies were irrational, and that their thinking and experience were limited. Recently, they have discovered that babies learn more, create more, care more, and experience more than we could ever have imagined. And there is good reason to believe that babies are actually smarter, more thoughtful, and even more conscious than adults. This new science holds answers to some of the deepest and oldest questions about what it means to be human. A new baby's captivated gaze at her mother's face lays the foundations for love and morality. A toddler's unstoppable explorations of his playpen hold the key to scientific discovery. A three-year-old's wild make-believe explains how we can imagine the future, write novels, and invent new technologies. Alison Gopnik - a leading psychologist and philosopher, as well as a mother - explains the groundbreaking new psychological, neuroscientific, and philosophical developments in our understanding of very young children, transforming our understanding of how babies see the world, and in turn promoting a deeper appreciation for the role of parents.

An unprecedented and highly original itinerary with a story of friendship and great adventure plays out in graphic-novel form that unfolds on the pages between the maps. Highly visual illustrations provide an incentive for children to explore their emotions and create their own new maps for emotional discovery.

The Architecture of Pica Ciamarra Associati Antonietta Iolanda Lima. 2019-04 Since 1970, based in an isolated building situated on the peninsula of Posillipo, Pica Ciamarra Associati (www.pcaint.eu) has acted as a laboratory of architectural and urban design which has gradually incorporated new members and new energies over the time: using a multidisciplinary approach, the roots of the architectural practice lie in the intensive theoretical and practical work begun in the early 1960s by Massimo Pica Ciamarra. Since then the practice has been marked by a continuous relationship with Le Carré Bleu Feuille internationale d'architecture and leading members of the cultural milieu of Team 10: this has led to constant attention to everything that lies beyond form, to the relationship with contexts that also include non-spatial contexts, and to high levels of integration and dialectical discussion. According to Pica Ciamarra Associati, a design transcends the approaches of a single sector, providing simultaneous solutions to contradictory requirements, combining utopia and practicality. The poetics of the fragment: it mediates between architecture and the urban dimension; some designs also have the aim of becoming absorbed within a context as 'informed fragments'. This monograph is the result of an intensive period of work and consists of two interacting parts. It stems from research into the archive of the studio Pica Ciamarra and conversation with the members of the architectural practice. Organised diachronically, the book tells the long story, unfolding over a period of over fifty years of a team of Neapolitan architects and designers, who have maintained the lively spirit of the practice which is still geared towards the future. The textual and iconographic account tells a story and offers an interpretation that highlights the vibrant atmosphere of the studio, based on a consistency of thought and action, and fuelled by an interest in many different forms of knowledge. The contextualisation of the events related to the studio, as they unfolded over time, is wide-ranging, coherent and connotative. Antonietta Iolanda Lima, professor of history of architecture at the University of Palermo, has always tried, through theory, teaching and design, to disseminate the importance of history which can embrace innovation and tradition to an equal degree, forming a new architectural language. According to her view of architecture, history and design are closely connected, a 'single entity' as is reflected by her career. Since the 1980s, her academic work has gained increasing importance, a way of avoiding narrow sectoral approaches in the training of future architects, offering a holistic stance of the history of architecture and an architecture that contributes to shaping critical thought and a thriving cultural life.
