Inspired By Nature Animals Alejandro Bahamon,Patricia Perez.2009-03-24 A look at how nature serves as a source of inspiration for contemporary architecture. Nature has always furnished stimulating ideas for the design of architecture, and the use of animal forms in contemporary architecture—whether to endow a project with symbolism, find a functional solution, or simply for aesthetic reasons—has become a commonplace practice. Inspired by Nature: Animals focuses on specific analogies, comparing and contrasting techniques and materials used in animal constructions with examples of human architecture. It gathers together the work of two dozen architects who have drawn on such structures as tortoise and snail shells, spiders' webs and birds' nests, beehives and beaver lodges. Among the built examples from around the world are inventive projects such as Elephant Skin House (PPAG Architects, Austria), Kiss the Frog! (mmw architects, Norway), Moore Apiary (Marlon Blackwell, Cashiers, North Carolina), Concrete Pod (Kazuya Morita Architecture Studio, Nagoya, Japan), and more, beautifully illustrated in colorful photographs supplemented by plans. The visual analogies underline how architects can find elegant solutions and create new, sustainable, and efficient architectonic forms by the close and understanding observation of nature.

The Battle for Home: The Vision of a Young Architect in Syria Marwa al-Sabouni.2016-05-17 An architect's gripping account of living and working in war-torn Syria, and the role architecture plays in whether a community crumbles or comes together Drawing on the author's personal experience of living and working as an architect in Syria, this timely and fascinating account offers an eyewitness perspective on the country's bitter conflict through the lens of architecture, showing how the built environment and its destruction hold up a mirror to the communities that inhabit it. From Syria's tolerant past, with churches and mosques built alongside one another in Old Homs and members of different religions living harmoniously together, the book chronicles the recent breakdown of social cohesion in Syria's cities. With the lack of shared public spaces intensifying divisions within the community, and corrupt officials interfering in town planning for their own gain, these actions are symptomatic of wider abuses of power. With firsthand accounts of mortar attacks and stories of refugees struggling to find a home, The Battle for Home is a compelling explanation of the personal impact of the conflict and offers hope for how architecture can play a role in rebuilding a sense of identity within a damaged society.
