Teaching Economics in Troubled Times Mark C. Schug,William C. Wood.2011-01-03 In the Great Recession of 2007-2010, Americans watched their retirement savings erode and the value of their homes decline while the unemployment rate increased and GDP sank. New demands emerged for unprecedented government intervention into the economy. While these changes have a dramatic impact on society at large, they also have serious implications for the content and teaching of economics. Teaching Economics in a Time of Unprecedented Change is a one-stop collection that helps pre- and in-service social studies teachers to foster an understanding of classic content as well

as recent economic developments. Part I offers clear and teachable overviews of the nature of today's complex economic crisis and the corollary changes in teaching economics that flow from revising and updating long-held economic assumptions. Part II provides both detailed best practices for teaching economics in the social studies classroom and frameworks for teaching economics within different contexts including personal finance, entrepreneurship, and history. Part III concludes with effective strategies for teaching at the elementary and secondary school levels based on current research on economic education. From advice on what every economics teacher should know, to tips for best education practices, to investigations into what research tells us about teaching economics, this collection provides a wealth of contextual background and teaching ideas for today's economics and social studies educators. The book's main focal point is on central and local government budgeting, tracing the progress of revenue aspects and expenditure allocation over time from inputs alone to matching these inputs to achieving and measuring service delivery in programmes. It also presents the assessment instruments that measure public financial management strength and weakness, with real-life illustrations of their application. All of these instruments use examples from the countries that the author has worked in, demonstrating the conditions faced - mostly stable economic environments, but at times during periods of conflict and insecurity, as well as neighbouring geopolitical tension. These experiences have been gained from the author's resident assignments and short-term visits (mainly multiple over many years) as a consultant for the IMF, World Bank, and bilateral development programmes as well as academic research.

**Taking the Lead** Mark Lax.2020-03-01 As Australia withdrew from Vietnam in 1972, few in the Australian Defence Force, none the least those in the Royal Australian Air Force could foresee the immense change that would sweep across the Service. New and emerging international relationships, changing Australian social attitudes, and a growing sense of defence self-reliance would all impact how the RAAF contributed to the application of air power in the defence of the nation and in supporting Australia's wider national interests. For the first time, *Taking the Lead* brings to the reader a comprehensive and authoritative study of how the RAAF matured over its third quarter century, how it met the challenges faced, and how it finally came of age, able to take the lead when asked. By 1996, plans were in place such that the RAAF was well on the way to becoming the world's first fifth generation air force, by making a remarkable transition. This volume also dispels the myth that the RAAF did little in the latter part of the twentieth century but train. In fact, the RAAF was at the forefront of operations as wide afield as the Sub-Continent, the Middle East, Africa and South-East Asia. Then there was aid to the civil community as well as aid to those nations seeking help in wider Asia-Pacific region. Clever force restructuring for expeditionary operations amid the stress of downsizing by almost a third, meant that future operations in the twenty-first century were to be a success. *Taking the Lead* is not just about aircraft, bases and flying. It considers the strategic environment of the era, the factors that affected personnel and training, how the RAAF's force structure advanced and how the RAAF managed its successes and failures. For those seeking to learn more about their air force, then this book is essential reading. *Taking the Lead* covers this vital part of the RAAF's unfolding narrative, and perfectly illustrates how the RAAF remained true to its motto - *Per Ardua ad Astra* - Through Adversity to the Stars.
