*Creating East and West* Nancy Bisaha.2010-12-01 As the Ottoman Empire advanced westward from the fourteenth to the sixteenth centuries, humanists responded on a grand scale, leaving behind a large body of fascinating yet understudied works. These compositions included Crusade orations and histories; ethnographic, historical, and religious studies of the Turks; epic poetry; and even tracts on converting the Turks to Christianity. Most scholars have seen this vast literature as atypical of Renaissance humanism. Nancy Bisaha now offers an in-depth look at the body of Renaissance humanist works that focus not on classical or contemporary Italian subjects but on the Ottoman Empire, Islam, and the Crusades. Throughout, Bisaha probes these texts to reveal the significant role Renaissance writers played in shaping Western views of self and other. Medieval concepts of Islam were generally informed and constrained by religious attitudes and rhetoric in which Muslims were depicted as enemies of the faith. While humanist thinkers of the Renaissance did not move entirely beyond this stance, *Creating East and West* argues that their understanding was considerably more complex, in that it addressed secular and cultural issues, marking a watershed between the medieval and modern. Taking a close look at a number of texts, Bisaha expands current notions of Renaissance humanism and of the history of cross-cultural perceptions. Engaging both traditional methods of intellectual history and more recent methods of cross-cultural studies, she demonstrates that modern attitudes of Western societies toward other cultures emerged not during the later period of expansion and domination but rather as a defensive intellectual reaction to a sophisticated and threatening power to the East.

Berlin Blues Sven Regener.2012-06-30 It's 1989 and, whenever he isn't hanging out in the local bars, Herr Lehmann lives entirely free of responsibility in the bohemian Berlin district of Kreuzberg. Through years of judicious sidestepping and heroic indolence, this barman has successfully avoided the demands of parents, landlords, neighbours and women. But suddenly one unforeseen incident after another seems to threaten his idyllic and rather peaceable existence. He has an encounter with a decidedly unfriendly dog, his parents threaten to descend on Berlin from the provinces, and he meets a dangerously attractive woman who throws his emotional life into confusion. Berlin Blues is a richly entertaining evocation of life in the city and a classic of modern-day decadence.

*Aeromobilities* Saulo Cwerner, Sven Kesselring, John Urry.2009-01-13 *Aeromobilities* is a collection of essays that tackle in many different ways the growing importance of aviation and air travel in our hypermobile, globalized world. Providing a multidisciplinary focus on issues ranging from global airports to the production of airspace, from airline work to helicopters, and from movement in airports to software systems, *Aeromobilities* seeks to enhance our understanding of space, time and mobility in the age of mass air travel. From Sao Paulo to Sydney, *Aeromobilities* draws on local experiences of airspaces to generate theory and research that are global in scope. It is the first book of its kind, bringing together a wide range of theoretical and methodological approaches to aviation and air travel in the social sciences and humanities, while emphasizing the central role of aeromobilities in contemporary social relations. In a world where virtually every aspect of social life is touched upon, in one way or another, by the complex global network of airline flows, with its large passenger aircraft and iconic international airports, *Aeromobilities* provides innovative analyses of some of the most fundamental and influential mobility networks of our time.

**Moral Vision** David McNaughton.1991-01-08 This book introduces the reader to ethics by examining a current and important debate. During the last fifty years the orthodox position in ethics has been a broadly non-cognitivist one: since there are no moral facts, moral remarks are best understood, not as attempting to describe the world, but as having some other function - such as expressing the attitudes or preferences of the speaker. In recent years this position has been increasingly challenged by moral realists who maintain that there are moral facts; there is a truth of the matter in ethics, which is independent of our views, and which we seek to discover. Unfortunately much of this interesting debate found in the work of McDowell, Wiggins, Putnam, Blackburn and others is not easily accessible to undergraduates. McNaughton presents many of the major issues in ethics by way of a clear exposition of both sides of this argument and assumes no prior knowledge of philosophy. Topics discussed include: moral observation, moral motivation, amoralism and wickedness, moral weakness, cultural relativism and utilitarianism. The book concludes that a convincing case can be made out for a radical form of moral realism in which moral virtue is found, not in the following of correct moral principles, but rather in the development of moral sensitivity. *Moral Vision* is a clear and engaged introduction to an important, and often troubling, debate.

You and Me, Little Bear Martin Waddell, Barbara Firth.2005 Little Bear wants to play, but Big Bear has things to do. So they decide to do them together. They fetch wood and water and tidy the cave, but Big Bear still has things to do, so Little Bear has to go off and play on his own. Finally Little Bear's wish comes true and the day has an idyllic ending.

Iconicity in Language Raffaele Simone.1995-02-10 Several current linguistic approaches converge in rejecting the wide-spread idea that language is an autonomous system, i.e. that it is structured independently from the outside world and the natural equipment of language users. Around the world, semiotically biased linguistics (functionalism, naturalism, etc.) takes this position, which differentiates it very clearly from generative linguistics. One of the basic assumptions of such approaches is that language structure includes some non-arbitrary aspects, from the phonological through the textual level, and a great amount of research has occurred in the last decade regarding the "iconic aspects" of language(s). This volume focuses on generally neglected dimensions of language and semiotic activity, featuring contributions by philosophers, linguists, semioticians, and psychologists. After tracing the tradition of iconicity in the history of linguistic thought, the central section is devoted to specific analyses emphasizing the role of non-arbitrary phenomena in language foundation and linguistic structure. Specifically discussed are numeration systems, the gestural systems of communication among deaf people, the genesis of writing in children, and inter-ethnic communication.

**Odes** Francesco Filelfo.2009 Francesco Filelfo (1398-1481), one of the great scholar-poets of the Italian Renaissance, was the principal humanist working in Lombardy in the middle of the Quattrocento and served as court poet to the Visconti and Sforza dukes of Milan. His long life saw him as busy with politics, diplomacy, and intrigue as with literature and scholarship, leaving him very often on the run from rival factions--and even from hired assassins. The first Latin poet of the Renaissance to explore the expressive potential of Horatian meters, Filelfo adapted the traditions of Augustan literature to address personal and political concerns in his own day. The Odes, completed in the mid-1450s, constitute the first complete cycle of Horatian odes since classical antiquity and are a major literary achievement. Their themes include war, just rule, love, exile, patronage, and friendship as well as topical subjects like the plague's grim effects on Milan. This volume is the first publication of the Latin text since the fifteenth century and the first translation into English.
