Science and Technology in the Global Cold War Naomi Oreskes, John Krige. 2014-10-31 Investigations of how the global Cold War shaped national scientific and technological practices in fields from biomedicine to rocket science. The Cold War period saw a dramatic expansion of state-funded science and technology research. Government and military patronage shaped Cold War technoscientific practices, imposing methods that were project oriented, team based, and subject to national-security restrictions. These changes affected not just the arms race and the space race but also research in agriculture, biomedicine, computer science, ecology, meteorology, and other fields. This volume examines science and technology in the context of the Cold War, considering whether the new institutions and institutional arrangements that emerged globally constrained technoscientific inquiry or offered greater opportunities for it. The contributors find that whatever the particular science, and whatever the political system in which that science was operating, the knowledge that was produced bore some relation to the goals of the nation-state. These goals varied from nation to nation; weapons research was emphasized in the United States and the Soviet Union, for example, but in France and China scientific independence and self-reliance dominated. The contributors also consider to what extent the changes to science and technology practices in this era were produced by the specific politics, anxieties, and aspirations of the Cold War. Contributors Elena Aronova, Erik M. Conway, Angela N. H. Creager, David Kaiser, John Krige, Naomi Oreskes, George Reisch, Sigrid Schmalzer, Sonja D. Schmid, Matthew Shindell, Asif A. Siddiqi, Zuoyue Wang, Benjamin Wilson

DSM-IV-TR in Action Sophia F. Dziegielewska. 2013-12-17 The DSM is the primary tool mental health clinicians depend upon to diagnose psychopathology in their clients. DSM-IV-TR in Action brings the DSM to life by providing clear instruction on how to plan for an assessment, accurately diagnose clients, and prepare a comprehensive treatment plan. This book explores how to incorporate DSM-5 changes into the original diagnosis and treatment model and includes DSM-5 categories that correspond to each chapter. This is a must-have resource for mental health professionals and students in social work, counseling, psychology, and psychiatry--Provided by publisher.

Foreign Direct Liability and Beyond Liesbeth F. H. Enneking. 2012 Western societies are witnessing an emerging socio-legal trend towards transnational civil litigation against multinational corporations in relation to harm caused toward people and the planet. These 'foreign direct liability cases' arise against the background of a global governance gap resulting from the rapid globalization of economic actors and activities with no global institutions to manage their worldwide impacts. The increasing reliance on private law mechanisms to realize corporate accountability for violations of human rights, health and safety, and environmental and labor norms perpetrated around the globe raises interesting and complex issues. This study sets out the legal and socio-political framework of this particular type of transnational civil litigation. The book traces the role that Western systems of tort law may play in promoting international corporate social responsibility/accountability. It focuses on the feasibility of bringing foreign direct liability claims before domestic courts in the EU Member States - the Netherlands in particular - and sets out a number of recommendations

for European policymakers.

German and Scandinavian Protestantism 1700-1918 Nicholas Hope.1999 This book is the first history in English of the Lutheran Church in Germany and Scandinavia in the eighteenth and nineteenth centuries. A period of fundamental and lasting change in the political landscape with the separation of the old twin monarchies of Sweden-Finland and Denmark-Norway in Scandinavia (1808, 1814), and the unification of Germany (1866-71), this was also a time of particular unease and upheaval for the church. Attempts to emulate the spiritual community of the early church, reform of the church establishment, and steps taken to enlighten parishioners were almost always held back by the anomalous structural legacy of the Reformation, tradition, and parish habit, sacred and profane. However, the birth of the modern nation-state and its market economy posed a fundamental challenge to the structure and ethos of the Reformation churches, as it did to the Catholic Church. The First World War deepened the crisis further: German Protestants (and the Scandinavians were not immune either, although they remained neutral), who bracketed modernity with crisis and religion with national renewal, and who saw national loyalty as a higher value than the faith, fellowship, and moral order of the church, were swept up into the maw of a modern national war machine which threatened to wipe out Protestantism altogether.

World History Eric Vanhaute.2013-07-24 World History: An Introduction provides readers with the knowledge and tools necessary to understand the global historical perspective and how it can be used to shed light on both our past and our present. A concise and original guide to the concepts, methods, debates and contents of world history, it combines a thematic approach with a clear and ambitious focus. Each chapter traces connections with the past and the present to explore major questions in world history: How did humans evolve from an endangered species to the most successful of them all? How has nature shaped human history? How did agricultural societies push human history in a new direction? How has humankind organized itself in ever more complex administrative systems? How have we developed new religious and cultural patterns? How have the paths of 'The West' and 'The Rest' diverged over the last five centuries? How, at the same time, has the world become more interconnected and globalized? How is this world characterized by growing gaps in wealth, poverty and inequality? Sharp and accessible, Eric Vanhaute's introduction to this exciting field demonstrates that world history is more of a perspective than a single all-encompassing narrative: an instructive new way of seeing, thinking and doing. It is an essential resource for students of history in a global context.

Catholic Converts Patrick Allitt.2018-08-06 From the early nineteenth to the mid-twentieth century, an impressive group of English speaking intellectuals converted to Catholicism. Outspoken and gifted, they intended to show the fallacies of religious skeptics and place Catholicism, once again, at the center of western intellectual life. The lives of individual converts—such as John Henry Newman, G. K. Chesterton, Thomas Merton, and Dorothy Day—have been well documented, but Patrick Allitt has written the first account of converts' collective impact on Catholic intellectual life.

His book is also the first to characterize the distinctive style of Catholicism they helped to create and the first to investigate the extensive contacts among Catholic convert writers in the United States and Britain. Allitt explains how, despite the Church's dogmatic style and hierarchical structure, converts working in the areas of history, science, literature, and philosophy maintained that Catholicism was intellectually liberating. British and American converts followed each other's progress closely, visiting each other and sending work back and forth across the Atlantic. The outcome of their labors was not what the converts had hoped. Although they influenced the Catholic Church for three or four generations, they were unable to restore it to the central place in Western intellectual life that it had enjoyed before the Reformation.

Trade Profiles 2006 World Trade Organization.2006 This booklet is a quick source for national and trade statistics of WTO members and countries which are in the process of negotiating WTO membership. These Trade Profiles combine information on trade flows and trade policy measures of members, observers and other selected economies. The indicators are divided into five categories: (1) Basic economic indicators - population, GDP, current account balance, etc.; (2) Trade policy indicators - specific WTO relevant information, including tariff binding information, import duties collected in total tax revenue, the number of dispute rulings, notifications outstanding and contingency measures in force; (3) Merchandise trade indicators (customs-based statistics) - information on total trade flows broken down by broad product categories and major origins and destinations; (4) Commercial services indicators (balance of payments based statistics) - trends in total trade flows and a breakdown by major components; (5) Industrial property indicators - annual number of patents granted and marks registered in the name of residents and non-residents in the economy.

History of the Low Countries J. C. H. Blom,E. Lamberts.2006-06 The history of the smaller European countries is rather neglected in the teaching of European history at university level. We are therefore pleased to announce the publication of the first comprehensive history of the Low Countries - in English - from Roman Times to the present. Remaining politically and culturally fragmented, with its inhabitants speaking Dutch, French, Frisian, and German, the Low Countries offer a fascinating picture of European history en miniature. For historical reasons, parts of northern France and western Germany also have to be included in the Low Countries, a term that must remain both broad and fluid, a convenient label for a region which has seldom, if ever, composed a unified whole. In earlier ages it as even more difficult to the region set parameters, again reflecting Europe as a whole, when tribes and kingdoms stretched across expanses not limited to the present states of Belgium, Luxembourg, and the Netherlands. Nevertheless, its parts did demonstrate many common traits and similar developments that differentiated them from surrounding countries and lent them a distinct character. Internationally, the region often served both as a mediator for and a buffer to the surrounding great powers, France, Britain, and Germany; an important role still played today as Belgium and the Netherlands have increasingly become involved in the broader process of European integration, in which they often share the same interest and follow parallel policies. This highly illustrated volume serves as an ideal introduction to the rich history of the Low Countries for students and the generally interested reader alike.

The Raid on Zeebrugge Carl Decaluwé,Tomas Termote.2015 This book is the fruit of the chance discovery of a series of photographic plates belonging to Alfred Carpenter, who commanded the lead ship, HMS Vindictive, during the raid. These pictures provide us with a unique insight into this daring naval operation, which was to result in the most Victoria crosses ever being awarded for a single action. The plates were used by Captain Carpenter to illustrate a lecture tour of the United States and Canada after the war. Winston Churchill called the raid on Zeebrugge 'the finest feat of arms of the Great War'. This brief, but bloody, action resulted in the highest number of Victoria Crosses ever awarded for a single action. Approximately one thousand officers and men of the Royal Navy and Royal Marines stormed the most heavily defended U-Boat base in Occupied Europe. German submarines based in Zeebrugge were responsible for a third of all allied shipping losses during the First World War. During the

Passchendaele offensive of 1917, the Allies attempted to capture these U-boat bases by means of a land-based attack. The failure of the Battle of Passchendaele made it clear that a naval assault was the only solution. As a result, on 23 April 1918, a small force of fighting vessels, towing three blockships, set out across the North Sea...

Rethinking the "Romance of the Rose" Kevin Brownlee, Sylvia Huot.2016-02-01 The Romance of the Rose has been a controversial text since it was written in the thirteenth century. There is evidence for radically different readings as early as the first half of the fourteenth century. The text provided inspiration for both courtly and didactic poets. Some read it as a celebration of human love; others as an erudite philosophical work; still others as a satirical representation of social and sexual follies. On one hand it was praised as an edifying treatise, on the other condemned as lascivious and misogynistic. Kevin Brownlee and Sylvia Huot and the contributors to this volume—Pierre-Yves Badel, Emmanuele Baumgartner, John V. Fleming, Robert Pogue Harrison, David F. Hult, Stephen G. Nichols, Lee Patterson, Daniel Poirion, Karl D. Uitti, Dieuwke E. van der Poel, and Lori Walters—represent all the major areas of current work on the Romance of the Rose, both in American and in Europe. The volume will be of value to students and scholars of medieval literature, intellectual history, and art history.

Translocality .2010-01-25 Drawing on case studies mostly from Asia and Africa, this book reconsiders the increasing interconnectedness between world regions from a perspective of 'translocality'. It suggests a more comprehensive reading of processes often simplified as 'global', very recent, unidirectional, and 'Western'-dominated.

The European Information Society Jan Servaes.2003 The globalization of social, cultural and economic relations is facilitated, and at the same time conditioned by developments in the information and communications technologies (ICT) and infrastructure. Human knowledge brought mankind from an oral to a literate culture, thanks to the invention of print media. The development of the electronic media in the 20th century paved the way for the information age, in which spatial and temporal constraints are lifted. This work explores the consequences of this revolution in human communications, which are multidimensional in character, affecting economical, political and social life on national, international and local levels. The text is part of a series of volumes arising from the intellectual work of ECCR members.

Bring on the Books for Everybody Jim Collins.2010-06-30 Bring on the Books for Everybody is an engaging assessment of the robust popular

literary culture that has developed in the United States during the past two decades. Jim Collins describes how a once solitary and print-based experience has become an exuberantly social activity, enjoyed as much on the screen as on the page. Fueled by Oprah's Book Club, Miramax film adaptations, superstore bookshops, and new technologies such as the Kindle digital reader, literary fiction has been transformed into best-selling, high-concept entertainment. Collins highlights the infrastructural and cultural changes that have given rise to a flourishing reading public at a time when the future of the book has been called into question. Book reading, he claims, has not become obsolete; it has become integrated into popular visual media. Collins explores how digital technologies and the convergence of literary, visual, and consumer cultures have changed what counts as a "literary experience" in phenomena ranging from lush film adaptations such as *The English Patient* and *Shakespeare in Love* to the customer communities at Amazon. Central to Collins's analysis and, he argues, to contemporary literary culture, is the notion that refined taste is now easily acquired; it is just a matter of knowing where to access it and whose advice to trust. Using recent novels, he shows that the redefined literary landscape has affected not just how books are being read, but also what sort of novels are being written for these passionate readers. Collins connects literary bestsellers from *The Jane Austen Book Club* and *Literacy and Longing in L.A.* to *Saturday* and *The Line of Beauty*, highlighting their depictions of fictional worlds filled with avid readers and their equations of reading with cultivated consumer taste.

Songs of Ourselves Joan Shelley Rubin.2007 Listen to a short interview with Joan Shelley Rubin Host: Chris Gondek | Producer: Heron & Crane In the years between 1880 and 1950, Americans recited poetry at family gatherings, school assemblies, church services, camp outings, and civic affairs. As they did so, they invested poems--and the figure of the poet--with the beliefs, values, and emotions that they experienced in those settings. Reciting a poem together with others joined the individual to the community in a special and memorable way. In a strikingly original and rich portrait of the uses of verse in America, Joan Shelley Rubin shows how the sites and practices of reciting poetry influenced readers' lives and helped them to find meaning in a poet's words. Emphasizing the cultural circumstances that influenced the production and reception of poets and poetry in this country, Rubin recovers the experiences of ordinary people reading poems in public places. We see the recent immigrant seeking acceptance, the schoolchild eager to be integrated into the class, the mourner sharing grief at a funeral, the grandparent trying to bridge the generation gap--all instances of readers remaking texts to meet social and personal needs. Preserving the moral, romantic, and sentimental legacies of the nineteenth century, the act of reading poems offered cultural continuity, spiritual comfort, and pleasure. *Songs of Ourselves* is a unique history of literary texts as lived experience. By blurring the boundaries between high and popular poetry as well as between modern and traditional, it creates a fuller, more democratic way of studying our poetic language and ourselves.

Evangelische Missionslehre Gustav Warneck.2015 The Protestant pastor Gustav Adolf Warneck (1834-1910) is considered the father of German missiology. This even applies to the Catholic area. In 1874, together with Theodor Christlieb and Reinhold Grundemann, he founded the *Allgemeine Missions-Zeitschrift*, which essentially led the cooperation between the mission societies in conferences, etc. and finally resulted in a merger of the German evangelical missions into an umbrella organization. As a retired pastor, he was appointed professor of missiology at the University of Halle in 1896 until his retirement in 1908, the first chair of this kind in the German-speaking area. The monumental 'Mission Doctrine', which has been published since 1892, is the fruit of his life's work and is still groundbreaking today. Warneck is also a stroke of luck for German-speaking Protestant missiology, because after the emigration of the Working Group of Evangelical Missions (AEM) from the Evangelical Missionswerk (EMW) and despite the existence of the Evangelical Working Group for Mission, Religion and Culture (afem) alongside the Germans Society for Missiology (DGMW) is held in honor by both sides as the father of missiology. Due to the German adaptation of the document *Christian Witness in a Multi-Religious World*, which the Vatican, World Council of Churches and World Evangelical Alliance signed jointly in 2011, EMW and AEM, as well as DGMW and afem have come back into conversation. The memory of the common tradition, including the conversation about Warneck's 'missionary teaching', can be an encouragement

GOBI Library Solutions from EBSCO provides print books, e-books and collection development services to academic and research libraries worldwide. Authorama offers up a good selection of high-quality, free books that you can read right in your browser or print out for later. These are books in the public domain, which means that they are freely accessible and allowed to be distributed; in other words, you don't need to worry if you're looking at something illegal here. Since it's a search engine, browsing for books is almost impossible. The closest thing you can do is use the Authors dropdown in the navigation bar to browse by authors—and even then, you'll have to get used to the terrible user interface of the site overall. Scribd offers a fascinating collection of all kinds of reading materials: presentations, textbooks, popular reading, and much more, all organized by topic. Scribd is one of the web's largest sources of published content, with literally millions of documents published every month. A keyword search for book titles, authors, or quotes.
