It is about the fictional Captain Nemo and his submarine, *Nautilus*, as seen by one of his passengers, Professor Pierre Aronnax. The novel was originally serialized from March 1869 through June 1870 in Pierre-Jules Hetzel's periodical, the *Magasin d'Éducation et de Récréation*. The deluxe illustrated edition, published by Hetzel in November 1871, included 111 illustrations by Alphonse de Neuville and Édouard Riou.[1] The book was highly acclaimed when released and still is now; it is regarded as one of the premiere adventure novels and one of Verne's greatest works, along with *Around the World in Eighty Days* and *Journey to the Center of the Earth*. The description of Nemo's ship, called the *Nautilus*, was considered ahead of its time, as it accurately describes features on submarines, which at the time were very primitive vessels. The title refers to the distance traveled while under the sea and not to a depth, as 20,000 leagues is over six times the diameter, and nearly twice the circumference of the Earth.[2] The greatest depth mentioned in the book is four leagues. The book uses metric leagues, which are four kilometres each.[3] A literal translation of the French title would end in the plural seas, thus implying the seven seas through which the characters of the novel travel; however, the early English translations of the title used sea, meaning the ocean in general.

There, they are taken on an undersea adventure which they really enjoy, but still kind of resent being held virtual prisoners by Nemo. The 20,000 Leagues in the title refers not to the depth but to the distance they travel, even going as far as the South Pole. An enjoyable romp under the oceans. Jules Gabriel Verne (8 February 1828 - 24 March 1905) was a French novelist, poet, and playwright. Verne was born to bourgeois parents in the seaport of Nantes, where he was trained to follow in his father's footsteps as a lawyer, but quit the profession early in life to write for magazines and the stage. His collaboration with the publisher Pierre-Jules Hetzel led to the creation of the *Voyages extraordinaires*, a widely popular series of scrupulously researched adventure novels including *Journey to the Center of the Earth* (1864), *Twenty Thousand Leagues Under the Sea* (1870), and *Around the World in Eighty Days* (1873).

*Twenty Thousand Leagues Under the Sea (English French Edition Illustrated)* Jules Verne.2017-09-20 During the year 1866, ships of several nations spot a mysterious sea monster, which some suggest to be a giant narwhal. The United States government assembles an expedition in New York City to find and destroy the monster. Professor Pierre Aronnax, a French marine biologist and narrator of the story, who happens to be in New York at the time, receives a last-minute invitation to join the expedition which he accepts. The ship finds the monster after a long search and then attacks the beast, which damages the ship's rudder. The three protagonists are then hurled into the water and grasp hold of the hide of the creature, which they find, to their surprise, to be a submarine very far ahead of its era. They are quickly captured and brought inside the vessel, where they meet its enigmatic creator and commander, Captain Nemo. L'apparition d'une bête monstrueuse en 1866 dans plusieurs mers du globe défraie la chronique. L'animal, rapide, fusiforme et phosphorescent, est responsable de plusieurs naufrages, brisant le bois des navires avec une force colossale. De retour d'une expédition dans le Nebraska, Pierre Aronnax, professeur suppléant au Muséum national d'histoire naturelle, émet l'hypothèse d'un narval géant. Les compagnies d'assurances maritimes menacent d'augmenter leurs prix et demandent que le monstre soit éliminé. Une grande chasse est alors organisée à bord de l'Abraham Lincoln, fleuron de la marine américaine, menée par le commandant Farragut. Aronnax reçoit une lettre du secrétaire de la Marine lui demandant de rejoindre l'expédition pour représenter la France. Le scientifique embarque avec son fidèle domestique flamand, Conseil. Après des mois de navigation, la confrontation avec le monstre a enfin lieu, et l'Abraham Lincoln est endommagé. Un choc entre le monstre et la frégate projette Aronnax, Conseil et Ned par-dessus bord. Ils échouent finalement sur le dos du monstre, qui n'est autre qu'un sous-marin en tôle armée. Les naufragés sont faits prisonniers et se retrouvent à bord du mystérieux appareil. Ils font alors connaissance du capitaine Nemo, qui refuse de leur rendre la liberté.

**The Ocean as a Creative Experience** Juergen Claus.2023-03-31 This book by artist, diver, and editor-in-chief of an underwater magazine Jürgen Claus is a milestone among the books dedicated to the planet sea. It is a knowledge-rich overview, created from facts and experiences, of three main themes that have never been described in context. Marine architectures from both the Pacific and Atlantic regions have now moved from vision to reality. Whether it is a sail-shaped architecture in Nouméa or a whale-shaped one in the Arctic region. Special attention is paid by Prof. Claus to post-disaster architecture. The book will encourage young readers to design metabolic buildings themselves. That the seascape has also become a fluid studio for visual artists may come as a surprise. The works of art, some of which the author has experienced first-hand, have intertwined with an ecological, sustainable way of working. And this is also true to a special degree for the sound artists. They realize their sonic worlds with recordings from the sounding world underwater, a concert hall of hitherto unknown dimensions. The author's experience as a professor of media art with

students flows into the description of multimedia or media-related ocean installations. Here the book becomes a stimulus for realizing one's own experiences.

**Twenty Thousand Leagues Under the Sea** Jules Verne.2014-10-25 Twenty Thousand Leagues Under the Sea - By Jules Verne. 20,000 Leagues Under the Sea. Twenty Thousand Leagues Under the Sea (French: Vingt mille lieues sous les mers: Tour du monde sous-marin, literally Twenty Thousand Leagues Under the Seas: An Underwater Tour of the World) is a classic science fiction novel by French writer Jules Verne published in 1870. It tells the story of Captain Nemo and his submarine Nautilus, as seen from the perspective of Professor Pierre Aronnax after he, his servant Conseil, and Canadian whaler Ned Land wash up on their ship. On the Nautilus, the three embark on a journey which has them going all around the world. The novel was originally serialized from March 1869 through June 1870 in Pierre-Jules Hetzel's periodical, the *Magasin d'Éducation et de Récréation*. The deluxe illustrated edition, published by Hetzel in November 1871, included 111 illustrations by Alphonse de Neuville and Édouard Riou. The book was highly acclaimed when released and still is now; it is regarded as one of the premiere adventure novels and one of Verne's greatest works, along with *Around the World in Eighty Days* and *Journey to the Center of the Earth*. The description of Nemo's ship, the Nautilus, was considered ahead of its time, as it accurately describes features on submarines, which at the time were very primitive vessels. Thus, the book has been able to age well because of its scientific theories, unlike some other of Verne's works, like *Journey to the Center of the Earth*, which are not scientifically accurate and serve more simply as adventure novels.

*Memo for Nemo* William Firebrace.2022-10-04 A cultural history of living in the undersea, both fictional and real, from Jules Verne's Captain Nemo to NASA's ECC02 project. In *Memo for Nemo*, William Firebrace investigates human inhabitation of the undersea, both fictional and real. Beginning with Jules Verne's Captain Nemo—an undersea Renaissance man with a library of 12,000 volumes on his submarine—and proceeding through aquariums, undersea photography, artificial seas on land, nuclear-powered submarines, undersea film epics, giant squid, and NASA satellites, Firebrace examines the undersea as a zone created by exploration and invention. Throughout, the history of undersea life is accompanied by an imagined undersea, envisioned by cultural figures ranging from Verne and Herman Melville to Orson Welles and Jimi Hendrix. Firebrace takes readers through the enormous sequence of rooms (impossible in real life) in Nemo's submarine, recounts the competition among nineteenth-century cities to build the most spectacular aquatic world, and explains the workings of the bathysphere—an early underwater vessel modeled on a hot-air balloon. He considers the aquarium's function in films as a sort of viewing lens, describes the chlorine-proof artificial sea life seen by passengers on the submarine ride at Disneyland, and reports that Jacques Cousteau's famous underwater documentaries were in fact highly staged. The oceans of today are not those imagined by Verne; they are changing from both natural processes and human influence. *Memo for Nemo* documents the power of the undersea in both art and life.
