The Creative World of Mozart  Paul Henry Lang. 1963 Every phase of his career and output, the workings of his mind, and his relations with other composers are being studied by scholars in various countries. This collection of articles were written for the Musical Quarterly by internationally known authorities who examine various aspects of Mozart's style, his works, and his life. The introduction is an essay on the special nature of Mozart's genius. Erich Hartzmann leads us into the composer's workshop; Edward E. Lowinsky and Hans T. David analyze his rhythm and harmony; Nathan Broder describes the instrument for which the piano works were written; Ernst Fritz Schmid contrasts Mozart's personality and output with those of his friend and older contemporary, Haydn; Friedrich Blume unravels the tangled skein of the creation of the requiem; Frederick W. Sternfeld establishes the relationship between Papageno's song and Bach's motet Singet dem Herren ein neues lied; Nathan Broder assesses A. E. Muller's Guide to the accurate performance of Mozartean Piano Concertos; and Otto Erich Deutsch investigates the errors and fallacies in Mozart biography.

**TransArea** Ottmar Ette.2016-07-11 Ottmar Ette’s TransArea proceeds from the thesis that globalization is not a recent phenomenon, but rather, a process of long duration that may be divided into four main phases of accelerated globalization. These phases connect our present, across the world’s widely divergent modern eras, to the period of early modern history. Ette demonstrates how the literatures of the world make possible a tangible perception of that which constitutes Life, both of our planet and on our planet, which may only be understood through the application of multiple logics. There is no substitute for the knowledge of literature: it is the knowledge of life, from life. This English translation will be of great interest to English-speaking scholars in the fields of Global and Area Studies, Literary Studies, Cultural Studies, History, Political Science, and many more.

About the author Ottmar Ette has been Chair of Romance Literature at the University of Potsdam, Germany, since 1995. He is Honorary Member of the Modern Language Association of America (MLA) (elected in 2014), member of the Berlin-Brandenburg Academy of Sciences and Humanities (elected in 2013), and regular member of the Academia Europaea (since 2010).

**Sustainable Smart Cities** Marta Peris-Ortiz, Dag R. Bennett, Diana Pérez-Bustamante Yábar.2016-10-05 This volume provides the most current research on smart cities. Specifically, it focuses on the economic development and sustainability of smart cities and examines how to transform older industrial cities into sustainable smart cities. It aims to identify the role of the following elements in the creation and management of smart cities:

- Citizen participation and
empowerment • Value creation mechanisms • Public administration • Quality of life and sustainability • Democracy • ICT • Private initiatives and entrepreneurship Regardless of their size, all cities are ultimately agglomerations of people and institutions. Agglomeration economies make it possible to attain minimum efficiencies of scale in the organization and delivery of services. However, the economic benefits do not constitute the main advantage of a city. A city’s status rests on three dimensions: (1) political impetus, which is the result of citizens’ participation and the public administration’s agenda; (2) applications derived from technological advances (especially in ICT); and (3) cooperation between public and private initiatives in business development and entrepreneurship. These three dimensions determine which resources are necessary to create smart cities. But a smart city, ideal in the way it channels and resolves technological, social and economic-growth issues, requires many additional elements to function at a high-performance level, such as culture (an environment that empowers and engages citizens) and physical infrastructure designed to foster competition and collaboration, encourage new ideas and actions, and set the stage for new business creation. Featuring contributions with models, tools and cases from around the world, this book will be a valuable resource for researchers, students, academics, professionals and policymakers interested in smart cities.

Crossing Languages to Play with Words Sebastian Knospe, Alexander Onysko, Maik Goth 2016-09-26 Wordplay involving several linguistic codes is an important modality of ludic language. This volume offers a multidisciplinary approach to the topic, discussing examples from different epochs, genres, and communicative situations. The contributions illustrate the multi-dimensionality, linguistic make-up, and the special interactive potential of wordplay across linguistic and cultural boundaries, including the challenging practice of translation.
Argentina's Angel Erich Hackl.2014-03 Mendoza - a conservative provincial town in Argentina at the foot of the Andes. April 8, 1977 - the last day that Gisela Tenenbaum was seen alive. How does a family come to terms with the fact that their twenty-two-year-old daughter disappeared so many years ago? Was she kidnapped, tortured, murdered? How have her friends and companions fared? Gisi is gone and yet still present. Argentina's Angel tells the story of her family - Austrians of Jewish origin who fled to Argentina in 1939 -, of her committed struggle against injustice, and of her desperate, underground work for a cause that would ultimately be lost. Born in Steyr, Austria, in 1954, Erich Hackl is a prolific writer whose nonfiction novels elucidate issues of social injustice. He resides in Vienna and Madrid. Edward Larkin is a professor of German and the Humanities at the University of New Hampshire. Thomas Ahrens is a teacher, translator, and artist who works in international education at Berea College, Kentucky.

Rilke's Book of Hours Anita Barrows.2005-11-01 A FINALIST FOR THE PEN/WEST TRANSLATION AWARD The 100th Anniversary Edition of a global classic, containing beautiful translations along with the original German text. While visiting Russia in his twenties, Rainer Maria Rilke, one of the twentieth century's greatest poets, was moved by a spirituality he encountered there. Inspired, Rilke returned to Germany and put down on paper what he felt were spontaneously received prayers. Rilke's Book of Hours is the invigorating vision of spiritual practice for the secular world, and a work that seems remarkably prescient today, one hundred years after it was written. Rilke's Book of Hours shares with the reader a new kind of intimacy with God, or the divine—a reciprocal relationship between the divine and the ordinary in which God needs us as much as we
need God. Rilke influenced generations of writers with his Letters to a Young Poet, and now Rilke's Book of Hours tells us that our role in the world is to love it and thereby love God into being. These fresh translations rendered by Joanna Macy, a mystic and spiritual teacher, and Anita Barrows, a skilled poet, capture Rilke's spirit as no one has done before.

**River Cafe Cook Book Green** Rose Gray, Ruth Rogers. 2013-04-26 Ruth Rogers and Rose Gray have an unswervingly clear vision of how food should be cooked: they take immense care over the ingredients and cook them as simply as possible. But one vitally important element in the art of preparing good food is one which we have increasingly lost sight of: seasonality. If you cook food in its right season it will inevitably taste better. And that's what River Cafe Cookbook Green is all about. Divided into months, the twelve chapters look at which vegetables, herbs, leaves, fungi and fruits are at their best at any given time, with information on how they are grown, which varieties to select and how to prepare them. The focus is also on organic produce, something in which Ruth and Rose have come to believe passionately. Meat and fish recipes are certainly included in the book, but the emphasis here is much more on vegetables, pasta recipes etc, in line with the way we are increasingly eating today. Fully illustrated throughout, and even larger than before, this cookbook is an education as well as a culinary treasure-trove.

The three concepts mentioned in the title of this volume imply the contact between two or more literary phenomena; they are based on similarities that are related to a form of ‘travelling’ and imitation or adaptation of entire texts, genres, forms or contents. Transfer comprises all sorts of ‘travelling’, with translation as a major instrument of transferring literature across linguistic and cultural barriers. Transfer aims at the process of communication, starting with the source product and its cultural context and then highlighting the mediation by certain agents and institutions to end up with inclusion in the target culture. Reception lays its focus on the receiving culture, especially on criticism, reading, and interpretation. Translation, therefore, forms a major factor in reception with the general aim of reception studies being to reveal the wide spectrum of interpretations each text offers. Moreover, translations are the prime instrument in the distribution of literature across linguistic and cultural borders; thus, they pave the way for gaining prestige in the world of literature. The thirty-eight papers included in this volume and dedicated to research in this area were previously read at the ICLA conference 2016 in Vienna. They are ample proof that the field remains at the center of interest in Comparative Literature.

Nonnus of Panopolis in Context Konstantinos Spanoudakis.2014-07-16 Nonnus of Panopolis (fifth century CE) composed two poems once thought to be incompatible: the Dionysiaca, a mythological long epic with a marked interest in astrology, the occult, the paradox and not least the beauty of the female body, and a pious and sublime Paraphrase of the Gospel of St John. Little is known about the
man, to whom sundry identities have been attached. The longer work has been misrepresented as a degenerate poem or as a mythological handbook. The Christian poem has been neglected or undervalued. Yet, Nonnus accomplished an ambitious plan, in two parts, aiming at representing world-history. This volume consists mainly of the Proceedings of the First International Conference on Nonnus held in Rethymno, Crete in May 2011. With twenty-four essays, an international team of specialists place Nonnus firmly in his time's context. After an authoritative Introduction by Pierre Chuvin, chapters on Nonnus and the literary past, the visual arts, Late Antique paideia, Christianity and his immediate and long-range afterlife (to modern times) offer a wide-ranging and innovative insight into the man and his world. The volume moves on beyond stereotypes to inaugurate a new era of research for Nonnus and Late Antique poetics on the whole.

Philosophy of the Sign Josef Simon.1995-01-01 In this book, Simon wields Ockham's razor like a scythe to argue historically and systematically for a coherent philosophy of the sign as sign with an unprecedented minimum of ontological and semantical commitments. Deconstructing Plato, Frege, and Husserl, he accounts for signs without positing the existence either of meanings which they express or of things to which they refer. Indeed, he shows that one cannot understand anything that is not a sign, so that one never gets to meanings without signs or things beyond signs.

Mastering the Art of French Cooking, Volume 1 Julia Child, Louisette Bertholle, Simone Beck.2011-10-05 NEW YORK TIMES BESTSELLER • The definitive cookbook on French cuisine for
American readers: What a cookbook should be: packed with sumptuous recipes, detailed instructions, and precise line drawings. Some of the instructions look daunting, but as Child herself says in the introduction, 'If you can read, you can cook.' —Entertainment Weekly “I only wish that I had written it myself.” —James Beard Featuring 524 delicious recipes and over 100 instructive illustrations to guide readers every step of the way, Mastering the Art of French Cooking offers something for everyone, from seasoned experts to beginners who love good food and long to reproduce the savory delights of French cuisine. Julia Child, Simone Beck, and Louisette Bertholle break down the classic foods of France into a logical sequence of themes and variations rather than presenting an endless and diffuse catalogue of dishes—from historic Gallic masterpieces to the seemingly artless perfection of a dish of spring-green peas. Throughout, the focus is on key recipes that form the backbone of French cookery and lend themselves to an infinite number of elaborations—bound to increase anyone’s culinary repertoire. “Julia has slowly but surely altered our way of thinking about food. She has taken the fear out of the term ‘haute cuisine.’ She has increased gastronomic awareness a thousandfold by stressing the importance of good foundation and technique, and she has elevated our consciousness to the refined pleasures of dining. —Thomas Keller, The French Laundry

Island Rivers John R. Wagner, Jerry K. Jacka. 2018-06-19 Anthropologists have written a great deal about the coastal adaptations and seafaring traditions of Pacific Islanders, but have had much less to say about the significance of rivers for Pacific island culture, livelihood and identity. The authors of this collection seek to fill that gap in the ethnographic record by drawing attention to the deep historical attachments of island communities to rivers, and the ways in which those attachments are changing in response to various forms of economic development and social change. In addition to making a unique contribution to Pacific island ethnography, the authors of this volume speak to a global set of issues of immense importance to a world in which water scarcity, conflict, pollution and the degradation of riparian environments afflict growing numbers of people. Several authors take a political ecology approach to their topic, but the emphasis here is less on hydro-politics than on the cultural meaning of rivers to the communities we describe. How has the cultural significance of rivers shifted as a result of colonisation, development and nation-building? How do people whose identities are fundamentally rooted in their relationship to a particular river renegotiate that relationship when the river is dammed to generate hydro-power or polluted by mining activities? How do blockages in the flow of rivers and underground springs interrupt the intergenerational transmission of local ecological knowledge and hence the ability of local communities to construct...

**Expanding the Lexicon** Sabine Arndt-Lappe, Angelika Braun, Claudine Moulin, Esme Winter-Froemel. 2018-01-22 The creation of new lexical units and patterns has been studied in different research frameworks, focusing on either system-internal or system-external aspects, from which no comprehensive view has emerged. The volume aims to fill this gap by studying dynamic processes in the lexicon – understood in a wide sense as not being necessarily limited to the word level – by bringing together approaches directed to morphological productivity as well as approaches analyzing general types of lexical innovation and the role of discourse-related factors. The papers deal with ongoing changes as well as with historical processes of change in different languages and reflect on patterns and specific subtypes of lexical innovation as well as on their external conditions and the speakers’ motivations for innovating. Moreover, the diffusion and conventionalization of innovations will be addressed. In this way, the volume contributes to understanding the complex interplay of structural, cognitive and functional factors in the lexicon as a highly dynamic domain.

**Theology and Church** Walter Kasper. 1989 This new collection of essays by West Germany's most distinguished Roman Catholic theologian covers the two broad areas indicated in the title. The first half discusses the Christian understanding of God; the place of Christianity in the modern world; the modern sense of freedom and history and the theological definition of human rights; christology and anthropology; and the possibilities of a new spiritual christology in a trinitarian setting. The second half discusses various aspects of the church: as universal sacrament of salvation; as the place of truth and as communion. Two final studies examine the continuing challenge of the Second Vatican Council and the fundamental form and meaning of the eucharist. An extended introduction considers
systematic theology today and the tasks which confront it.

**Expressionism and Film** Rudolf Kurtz.2016-03-21 Expressionism and Film, originally published in German in 1926, is not only a classic of film history, but also an important work from the early phase of modern media history. Written with analytical brilliance and historical vision by a well-known contemporary of the expressionist movement, it captures Expressionism at the time of its impending conclusion—as an intersection of world view, resoluteness of form, and medial transition. Though one of the most frequently-cited works of Weimar culture, Kurtz’s groundbreaking work, which is on a par with Siegfried Kracauer’s From Caligari to Hitler and Lotte Eisner’s The Haunted Screen, has never been published in English. Its relevance and historical contexts are analyzed in a concise afterword by the Swiss scholars Christian Kiening and Ulrich Johannes Beil.

**The Habermas Handbook** Hauke Brunkhorst, Regina Kreide, Cristina Lafont.2017-10-24 Jürgen
Habermas is one of the most influential philosophers of our time. His diagnoses of contemporary society and concepts such as the public sphere, communicative rationality, and cosmopolitanism have influenced virtually all academic disciplines, spurred political debates, and shaped intellectual life in Germany and beyond for more than fifty years. In The Habermas Handbook, leading Habermas scholars elucidate his thought, providing essential insight into his key concepts, the breadth of his work, and his influence across politics, law, the social sciences, and public life. This volume offers a comprehensive overview and an in-depth analysis of Habermas’s work in its entirety. After examining his intellectual biography, it goes on to illuminate the social and intellectual context of Habermasian thought, such as the Frankfurt School, speech-act theory, and contending theories of democracy. The Handbook provides an extensive account of Habermas’s texts, ranging from his dissertation on Schelling to his most recent writing about Europe. It illustrates the development of his thought and its frequently controversial reception while elaborating the central ideas of his work. The book also provides a glossary of key terms and concepts, making the complexity of Habermas’s thought accessible to a broad readership.

Anton Amann, L. Cederbaum, Werner Gans. 2012-12-06 At the end of the workshop on New Theoretical Concepts in Physical Chemistry, one of the participants made an attempt to present a first impression of its achievements from his own personal standpoint. Apparently his views reflected a general feeling, so that the organizers thought they would be suitable as a presentation of the proceedings for future readers. That is the background from which this foreword was born. The scope of the workshop is a very broad one. There are contributions from mathematics, physics, crystallography, chemistry and biology; the problems are approached either by means of axiomatic and rigorous methods, or at an...
empirical phenomenological level. This same diversification can be found in the new basic concepts presented. Some arise from pure theoretical investigation in C*-algebra or in quantum probability theory; others from an analysis of very complex experimental data like nuclear energy levels, or processes on the frontier between classical and quantum physics; others again have their origin in the discovery of new ordered structures like the icosahedral crystal phases, or the knots of DNA molecules; others follow from the application of ideas like fractals or chaos to new fields like spectral theory or chemical reactions. It is to be expected that readers will have to face the same sort of difficulties as did the participants in understanding such diverse languages, in applying themselves to subjects possibly far from their own experience, and in grasping highly sophisticated new concepts.

**Die Berliner Presse** E. HILARIS (pseud.).1863

**Wider Die Juden** Karl Wilhelm Friedrich Grattenauer.2023-07-18 First published in Germany in 1877, Wider die Juden is a virulently anti-Semitic work that seeks to promote the idea of a Jewish conspiracy to dominate and control the world. Filled with outrageous claims and ridiculous theories, this book is a testament to the dangers of irrational and hateful thinking. While it may be of historical interest to some, readers should be warned that the ideas contained within are repugnant and deeply offensive. Ego Frank Schirrmacher.2015-11-30 Twenty-five years after the end of the Cold War, a new Cold War is being waged in our societies. During the Cold War a theoretical model of man was developed by economists and the military, an egotistical being interested only in his own benefit and in duping his opponents to achieve his ends: a modern homo oeconomicus. After his career in the Cold War ended, he was not scrapped but adapted to the needs of the twenty-first century. He became the ringmaster of a new era of information capitalism. He sought to read, control and influence thoughts; to predict, price and eliminate risks. Today stock-market trading is guided by him. He uses computer algorithms and Big Data to build up detailed pictures of our preferences and then suggest and sell goods to us. The model has become a self-fulfilling prophecy. We are no longer the masters of our own fate. The Game of Life runs without us. Schirrmacher traces the progress of this extreme rationalization of social life from the Cold War games of the 1950s Rand Corporation to the stock-market trading techniques that brought about the financial crash of 2008, showing how these developments were interwoven with the rise of game theory, rational choice theory and neoliberal economics. The state and politics increasingly submitted themselves to the logic of computerized game theory and an economistic view of the world, evading real decision-making in the process. In this brave new world individuals, alone in front of their computers, may think they are constructing a reality of their own choosing, but in fact they are being manipulated all along by others who are setting the rules of the game. This international bestseller by one of Germany's most distinguished journalists is a powerful indictment of a way of thinking that has become pervasive and threatens to undermine not only parliaments and constitutions but also the sovereignty of the individual to be the
