Empowering Teachers to Build a Better World Fernando M. Reimers.2020-03-23 This open access book presents a comparative study on how large-scale professional development programs for teachers are designed and implemented. Around the world, governments and educators are recognizing the need to educate students in a broad range of higher order cognitive skills and socio-emotional competencies, and providing effective opportunities for teachers to develop the expertise needed to teach these skills is a crucial aspect of effective implementation of curricula which include those goals. This study examines how large-scale efforts to empower teachers for deeper instruction have been designed, how they have been implemented, and their outcomes. To do so, it investigates six programs from England, Colombia, Mexico, India, and the United States. Though all six are intended to broaden and deepen students' curricular aspirations, each takes this expansion of curricular goals in a different direction. The ambitious education reforms studied here explicitly focus on building teachers' capacity to teach on a broader set of goals. Through a discerning analysis of program documents, evaluations, and interviews with senior leaders and participants in the programs, the book identifies the various theories of action used in these programs, examines how they were implemented, and discusses what they achieved. As such, it offers an indispensable resource for education leaders interested in designing and implementing professional development programs for teachers that are aligned with ambitious instructional goals.

The Asian American Educational Experience Donald Nakanishi,Tina Yamano.2014-04-04 The contributions to The Asian American Educational experience examine the most significant issues and concerns in the education of Asian Americans. Contributors, all leading experts in their fields, provide theoretical discussions, practical insights and recommendations, historical perspectives and an analytical context for the many issues crucial to the education of this diverse population--controversies in higher education over alleged admissions quotas, stereotypes of Asian American students as whiz kids, Asian Americans as the model minority, bilingual education, education of refugee and immigrant populations, educational quality and equity. Special emphasis is given to both the historic debates which have shaped the field, and the concerns and challenges facing educators of Asian American students at both the K-12 and university level.

The Rise of External Actors in Education Christopher Lubienski,Miri Yemini,Claire Maxwell.2022-06-28 Increasingly, it is not just the state that determines the content, delivery, and governance of education. The influence of external actors has been growing, but the boundaries between internal and external have become blurred and their partnerships have become more complex. This book considers how schooling systems are being influenced by the rise of external actors, including private companies, non-governmental organisations, parent organisations, philanthropies, and international assessment frameworks. It explores how the public, private, and third sectors are becoming increasingly intertwined. Introducing new theoretical frameworks, it examines diverse sites - including Cambodia, Israel, Poland, Chile, Australia, Brazil, and the United States - to study the role of policies, institutions, and contextual factors shaping the changing relationships between those seeking to influence schooling.

State Assessment Policy and Practice for English Language Learners Charlene Rivera,Eric Collum.2014-05-12 State Assessment Policy and Practice for English Language Learners presents three significant studies, each examining a different aspect of states' strategies for including English language learners in state assessments. *an Analysis of State Assessment Policies Regarding Accommodations for English Language Learners; *a Survey and Description of Test Translation Practices; and *an Examination of State Practices for Reporting Participation and Performance of English Language Learners in State Assessments. With the rise in population of English language learners and the subsequent stepped-up legislative focus on this student population over the past decade, states have been challenged to include English language learners in state assessment programs. Until now, the little data available on states' policies and practices for meeting this challenge has been embedded in various reports and professional journals and scattered across the Internet. This volume offers, for the first time, a focused examination of states' assessment policies and practices regarding English language learners. The three studies were supported by OELA, the U.S. Department of Education's Office of English Language Acquisition, Language Enhancement, and Academic Achievement for Limited English Proficient Students. State Assessment Policy and Practice for English Language Learners is of interest to researchers and professionals involved with the assessment of English language learners; state- and district-level policy makers; and academics, teacher educators, and graduate students in a number of fields, including educational and psychological assessment, testing and measurement, bilingual education, English as a second language, and second

language acquisition.

The Miseducation of English Learners Grace P. McField.2014-01-01 Sometimes you need to hear the story from the beginning. The Miseducation of English Learners examines the initial policy impact of Structured English Immersion (SEI), an English-only program mandated for English Learners (ELs) in California, Arizona, and Massachusetts in the United States. The book features analyses of: the legal context and parameters of SEI; research history on SEI; SEI language policy and policy implementation according to situated context; and the educational priorities and legal rights of ELs. The book examines the history of SEI in the educational research literature and as it has been interpreted in the context of the legal requirement for schools to take "appropriate action" to meet the needs of ELs following the historic Lau v. Nichols (1974) court decision. The Miseducation of English Learners also presents and considers the implementation of SEI in comparative contexts from various perspectives including teacher education, the classroom, and legal. In several of the chapters, SEI implementation is examined in concert with other factors that have effected the teaching and progress of ELs such as Senate Bill 2042 (2001) that overhauled the teacher education process in California, and the federal No Child Left Behind legislation (signed into law on January 8, 2002). Moreover, the book provides implications and recommendations for teaching, research, advocacy, and policy change. The Miseducation of English Learners addresses and invites the readers to consider the following key questions: • How "appropriate" is the mandated SEI program for ELs, both in substance and in the one-year duration as specified in the three voter-initiated propositions (Proposition 227, Proposition 203, and Question 2)? • What issues, themes, and patterns can be noted in the implementation of SEI in California, Arizona, and Massachusetts? • Why might the student outcomes not show the desired results in measures such as achievement test scores or dropout rates? • What necessary changes are called for in order to enhance (or in some cases supplant) the SEI programs and services in place for ELs? • Are ELs, parents, and other stakeholders able to thoughtfully select desired and optimal instructional programs, and participate meaningfully in the educational process of language minority students under the SEI mandates?

Using Innovative Literacies to Develop Leadership and Agency: Inspiring Transformation and Hope Pinhasi-Vittorio, Limor, Ben-Yosef, Elite.2023-03-27 The global pandemic has caused devastating social and economic disruptions worldwide. These circumstances have widened and deepened the inequalities of access to socio-economic and academic achievement for diverse groups. This new reality compels us to look for possibilities of developing leadership and agency that will lead to transformation and hope in our communities. One of the ways to implement change is through the use of literacy practices. Utilizing diverse and innovative literacy approaches can allow for better access to educational opportunities and promote critical thinking, a better understanding of the world, and an awareness of others and self. Using Innovative Literacies to Develop Leadership and Agency: Inspiring Transformation and Hope presents multiple innovative literacy approaches that promote self-leadership and agency for individuals and communities. The work included showcases practical field experiences supported by a theoretical framework. Covering topics such as spatial literacy, digital storytelling, art literacy, and self-leadership, this premier reference source is an essential resource for business leaders and executives, community leaders, faculty and administrators of both K-12 and higher education, pre-service teachers, teacher educators, students of higher education, librarians, researchers, and academicians.

Testimonios: Stories of Latinx and Hispanic Mathematicians Pamela E. Harris.2021-08-16 Testimonios brings together first-person narratives from the vibrant, diverse, and complex Latinx and Hispanic mathematical community. Starting with childhood and family, the authors recount their own individual stories, highlighting their upbringing, education, and career paths. Their particular stories, told in their own voices, from their own perspectives, give visibility to some of the experiences of Latinx/Hispanic mathematicians. Testimonios seeks to inspire the next generation of Latinx and Hispanic mathematicians by featuring the stories of people like them, holding a mirror up to our own community. It also aims to provide a window for mathematicians (and aspiring mathematicians) from all ethnicities, with the hope of inspiring a better understanding of the diversity of the mathematical community.

Go Math!: Units of measure .2011

Efficient Learning for the Poor Helen Abadzi.2006 Large-scale efforts have been made since the 1990s to ensure that all children of the world go to school. But mere enrollment is not sufficient, students must become fluent in reading and calculation by the end of grade 2. Fluency is needed to process large amounts of text quickly and use the information for decisions that may ultimately reduce poverty. State-of-the-art brain imaging and cognitive psychology research can help formulate effective policies for improving the basic skills of low-income students. This book integrates research into applications that extend from preschool brain development to the memory of adult educators. In layman's terms, it provides explanations and answers to questions such as: Why do children have to read fast before they can understand what they read? How do health, nutrition, and stimulation influence brain development? Why should students learn basic skills in their maternal language? Is there such a thing as an untrained teacher? What signs in a classroom show whether students are getting a quality education? How must information be presented in class so that students can retain it and use it? What training techniques are most likely to help staff put their learning into use? This book would be useful to policymakers, donor agency staff, teacher trainers, supervisors, and inspectors, as well as university professors and students.

Preparing Educators to Engage Families Heather B. Weiss,M. Elena Lopez,Holly Kreider,Celina Chatman-Nelson.2013-10-17 Constant changes in education are creating new and uncertain roles for parents and teachers that must be explored, identified, and negotiated. Preparing Educators to Engage Families: Case Studies Using an Ecological Systems Framework, Third Edition encourages readers to hone their analytic and problem-solving skills for use in real-world situations with students and their families. Organized according to Ecological Systems Theory (of the micro, meso, exo, macro, and chrono systems), this completely updated Third Edition presents research-based teaching cases that reflect critical dilemmas in family-school-community relations, especially among families for whom poverty and cultural differences are daily realities. The text looks at family engagement issues across the full continuum, from the early years through pre-adolescence.

Inequality, Power and School Success Gilberto Conchas,Michael Gottfried.2015-04-10 This volume highlights issues of power, inequality, and resistance for Asian, African American, and Latino/a students in distinct U.S. and international contexts. Through a collection of case studies it links universal issues relating to inequality in education, such as Asian, Latino, and African American males in the inner-city neighborhoods, Latina teachers and single mothers in California, undocumented youth from Mexico and El Salvador, immigrant Moroccan youth in Spain, and immigrant Afro-Caribbean and Indian teenagers in New York and in London. The volume explores the processes that keep students thriving academically and socially, and outlines the patterns that exist among individuals--students, teachers, parents--to resist the hegemony of the dominant class and school failure. With emphasis on racial formation theory, this volume fundamentally argues that education, despite inequality, remains the best hope of achieving the American dream.
