The Practical Works of Richard Baxter: with a Life of the Author and a Critical Examination of His Writings by William Orme Richard Baxter. 1830

Parameters and Functional Heads : Essays in Comparative Syntax Perugia Adriana Belletti Associate Professor of Linguistics Università per Stranieri, Luigi Rizzi Professor of Linguistics University of Geneva. 1996-03-30 The essays collected in this volume, most previously unpublished, address a number of closely interconnected issues raised by the comparative syntax of functional heads within the Principles-and-Parameters approach. The general theory of head movement, the properties of derived structures created by incorporation, and the parameterization involved are the main theoretical foci. One major empirical area which is addressed concerns head movement in configurations involving certain kinds of operator-like elements, for example, the different manifestations of Verb Second phenomena in Wh and other constructions and the syntax of negative heads and specifiers. In addition, properties of functional heads and head movement in nominal and clausal structures and the causative construction are investigated.

Neuropsychology of Communication Michela Balconi. 2010-09-08 In this volume, the communicative and neuropsychological correlates of daily interactions are discussed. The predominant account on explaining the construction of meaning by humans is the inter-relational perspective, that postulates an intentional convergence of meaning arising as a consequence of the active exchanges between

people. The neural correlates of communication were illustrated in the light of new empirical results, considering the main topics of: a) language and language development; b) pragmatics and neuropragmatics of communication; c) neurocognition and the cognitive bases of intentions; d) nonverbal communication and emotion contribution to the communicative systems. New methodological approaches are considered, with particular attention to neuroimaging (such as PET and fMRI) and brain stimulation techniques (as MEG and TMS), as well as their application to the clinical field.

**Second Language Speech Learning** Ratree Wayland.2021-02-04 Including contributions from a team of world-renowned international scholars, this volume is a state-of-the-art survey of second language speech research, showcasing new empirical studies alongside critical reviews of existing influential speech learning models. It presents a revised version of Flege's Speech Learning Model (SLM-r) for the first time, an update on a cornerstone of second language research. Chapters are grouped into five thematic areas: theoretical progress, segmental acquisition, acquiring suprasegmental features, accentedness and acoustic features, and cognitive and psychological variables. Every chapter provides new empirical evidence, offering new insights as well as challenges on aspects of the second language speech acquisition process. Comprehensive in its coverage, this book summarises the state of current research in second language phonology, and aims to shape and inspire future research in the field. It is an essential resource for academic researchers and students of second language acquisition, applied linguistics and phonetics and phonology.

Language Comprehension As Structure Building Morton Ann Gernsbacher.2013-09-05 This book presents a new theoretical framework -- what Gernsbacher calls the Structure Building Framework -- for understanding language comprehension in particular, and cognitive processing in general. According to this framework, the goal in comprehending both linguistic and nonlinguistic materials is to build a coherent mental representation or structure of the information being comprehended. As such, the underlying processes and mechanisms of structure building are viewed as general, cognitive processes and mechanisms. The strength of the volume lies in its empirical detail: a thorough literature review and solid original data.

**Paper Prototyping** Carolyn Snyder.2003-05-12 Do you spend a lot of time during the design process wondering what users really need? Do you hate those endless meetings where you argue how the interface should work? Have you ever developed something that later had to be completely redesigned? Paper Prototyping can help. Written by a usability engineer with a long and successful paper prototyping history, this book is a practical, how-to guide that will prepare you to create and test paper prototypes of all kinds of user interfaces. You'll see how to simulate various kinds of interface elements and interactions. You'll learn about the practical aspects of paper prototyping, such as deciding when the technique is appropriate, scheduling the activities, and handling the skepticism of others in your organization. Numerous case studies and images throughout the book show you real world examples of paper prototyping at work. Learn how to use this powerful technique to develop products that are more useful, intuitive, efficient, and pleasing: \* Save time and money - solve key problems before implementation begins \* Get user feedback early - use it to focus the development process \* Communicate better - involve development team members from a variety of disciplines \* Be more creative - experiment with many ideas before committing to one \* Enables designers to solve design problems before implementation begins \* Five case studies provide real world examples of paper prototyping at work \* Delves into the specifics of what types of projects paper prototyping is and isn't good for.

Relational Social Work Fabio Folgheraiter.2004 In this innovative book Fabio Folgheraiter presents a systematic introduction to networking and reflexive practice in social work. The text explores how the interested parties in social care can acquire a shared power in care planning and decision making and that when this networking occurs, the efficacy of caring initiatives increases.

**The Onset of Literacy** Paul Bertelson.1987 The Onset of Literacy addresses one of the main questions in the field of reading research - why the acquisition of skills in reading and writing appears to be so much more difficult than the earlier acquisition of speech communication. As well as posing a major theoretical puzzle, the question has important implications for both instructional practices and ways of dealing with dyslexic children. Research on the reading process has made important progress in recent years, thanks to conceptual and methodological advances in cognitive psychology, psycholinguistics, and neuropsychology, which have made it possible to deal with complex issues that in the past seemed to defy rational analysis. The Onset of Literacy presents a selective sample of work by major contemporary specialists who focus on current information processing approaches to the reading process and their interface with research on the development of reading and related skills. An introduction by the editor summarizes and places the various contributions within current analyses of reading inspired by the information processing approach. The chapters and their authors are: The Ability to Manipulate Speech Sounds Depends on Knowing Alphabetic Writing, Charles Read, Zhang Yun-Fei, Nie Hong-Yin, and Ding BaoQing. Literacy Training and Speech Segmentation, Jos♦ Morais, Paul Bertelson, Luz Cary, and Jesus Alegria. Phonological Awareness: The Role of Reading Experience, Virginia A. Mann. Word Recognition in Early Reading: A Review of the Direct and Indirect Access Hypotheses, Roderick W. Barron. The Similarities Between Normal Readers and Developmental and Acquired Dyslexics, Peter Bryant and Lawrence Impey. Language Mechanisms and Reading Disorder: A Modular Approach, Donald Shankweiler and Stephen Crain. Paul Bertelson is Professor of Experimental Psychology and Director of the Laboratory of Experimental Psychology at the Universit♦ Libre de Bruxelles. The Onset of Literacy is in a series that is derived from special issues of *Cognition: International Journal of Cognitive Science*, edited by Jacques Mehler. A Bradford Book.

*A Music Learning Theory for Newborn and Young Children* Edwin Gordon.2003 Music Learning Theory for Newborn and Young Children (2003 Edition) treats the most critical learning period in every individual's musical life: birth to age five. Written for parents and early childhood music teachers, this latest revision is the most authoritative of its kind by the man many consider the leading educator and researcher in music education. Professor Gordon shares insights and research from almost twenty-five years of guiding young children in music learning.

**Special Educational Needs and Inclusive Practices** Fabio Dovigo.2017-01-28 Today, school is becoming a rapidly changing learning environment. Thinking about students as a homogeneous population is no longer allowed, as diversity - in terms of culture, language, gender, family organisation, learning styles and so on - has emerged as a key challenge for education today. The debate on Special Educational Needs largely reflects this challenge, as working in school implies careful reconsideration of what we mean by "normal" and "special". Current educational intervention is generally based on a deficit and "within-child" model of facing SEN, whereas very little attention is given to the role of learning environments. The focus is on the child more than on the whole class, and on cognition and technical provisions more than on affective, sociocultural and community dimensions of learning. Conversely, regarding students and their needs as "hidden voices" allows us to adopt a transformative approach which sees diversity as a stimulus for the development of educational practices that might benefit all children and help school to become an inclusive and "moving" organisation. The aim of the book is twofold: on the one hand, it offers a systematic overview of the inclusive education state-of-the-art in six countries (Germany, Italy,

Norway, Sweden, UK, and USA) based on the contributions by well-known scholars such as Christy Ashby, Barbara Brokamp, Fabio Dovigo, Kari Nes, Mara Westling Allodi, Tony Booth, and Beth Ferri; on the other hand, the book analyses five cases of good practices of inclusion related to different subjects and school levels.

### **Teaching Reading in Europe** .2011

The Translation of Children's Literature Gillian Lathey.2006-01-01 In the last few decades a number of European scholars have paid an increasing amount of attention to children's literature in translation. This book not only provides a synthetic account of what has been achieved in the field, but also makes us fully aware of all the textual, visual and cultural complexities that translating for children entails.... Students of this subject have had problems in finding a book that attempted an up-to-date and comprehensive review of the field. Gillian Lathey's Reader does just this. Dr Piotr Kuhiwczak, Director, Centre for Translation and Comparative Cultural Studies University of Warwick.

*Learning from Video Games (and Everything Else)* Douglas A. Gentile,J. Ronald Gentile.2021-12-23 Video games can have many effects on players, some of which could be intentional effects (e.g., games designed to train health compliance behaviors), and most of which are unintentional (e.g., violent games, stereotypes, gaming disorder). Some of these areas of research have been seen as controversial, but many of the controversies can be at least partially resolved by considering the learning mechanisms underlying the effects. We describe the General Learning Model in greater detail than has been provided elsewhere, including short-term and long-term mechanisms, processes of learning and forgetting, and moderators of learning. Video games use many of the best practices to train for both mastery and for transfer of learning. The implications for re-interpreting the literature on violent video games and gaming disorder, as well as for applied social psychology broadly defined, are discussed.

**Performance Standards and Authentic Learning** Allan A. Glatthorn.1999 This practical guide for classroom teachers demonstrates how to implement a standards-based curriculum, develop performance tasks, teach to those tasks, and use performance assessments.

**Musical Perceptions** Annette Aiello.1994 This introduction to the perception and cognition of music has been designed for both psychology and music students. The chapters are prefaced by editorial comments that give readers a background to the research discussed by the contributors.

**English Medium Instruction** Ernesto Macaro.2018-02-19 Ernesto Macaro brings together a wealth of research on the rapidly expanding phenomenon of English Medium Instruction. Against a backdrop of theory, policy documents, and examples of practice, he weaves together research in both secondary and tertiary education, with a particular focus on the key stakeholders involved in EMI: the teachers and the students. Whilst acknowledging that the momentum of EMI is unlikely to be diminished, and identifying its potential benefits, the author raises questions about the ways it has been introduced and developed, and explores how we can arrive at a true cost-benefit analysis of its future impact. "This state-of-the-art monograph presents a wide-ranging, multi-perspectival yet coherent overview of research, policy, and practice of English Medium Instruction around the globe. It gives a thorough, in-depth, and thought-provoking treatment of an educational phenomenon that is spreading on an unprecedented scale." Handbook of Early Literacy Research David K. Dickinson,Susan B. Neuman.2007-05-02 Current research increasingly highlights the role of early literacy in young children's development--and informs practices and policies that promote success among diverse learners. The Handbook of Early Literacy Research presents cutting-edge knowledge on all aspects of literacy learning in the early years. Volume 2 provides additional perspectives on important topics covered in Volume 1 and addresses critical new topics: the transition to school, the teacher-child relationship, sociodramatic

play, vocabulary development, neuroimaging work, Vygotskian theory, findings from international studies, and more.

**The Oxford Handbook of Eye Movements** Simon Liversedge, Iain Gilchrist, Stefan Everling. 2011-08-18 In the past few years, there has been an explosion of eye movement research in cognitive science and neuroscience. This has been due to the availability of 'off the shelf' eye trackers, along with software to allow the easy acquisition and analysis of eye movement data. Accompanying this has been a realisation that eye movement data can be informative about many different aspects of perceptual and cognitive processing. Eye movements have been used to examine the visual and cognitive processes underpinning a much broader range of human activities, including, language production, dialogue, human computer interaction, driving behaviour, sporting performance, and emotional states. Finally, in the past thirty years, there have been real advances in our understanding of the neural processes that underpin eye movement behaviour. The Oxford Handbook of Eye Movements provides the first comprehensive review of the entire field of eye movement research. In over fifty chapters, it reviews the developments that have so far taken place, the areas actively being researched, and looks at how the field is likely to develop in the coming years. The first section considers historical and background material, before moving onto section 2 on the neural basis of eye movements. The third and fourth sections look at visual cognition and eye movements and eye movement pathology and development. The final sections consider eye movements and reading and language processing and eye movements. Bringing together cutting edge research from an international team of leading psychologists, neuroscientists, and vision researchers, this book is the definitive reference work in this field.

In the years since this book was first published, the Internet profile and reputation have grown more important in the vital human activities of work, school and relationships. The authors look into the Edward Snowden revelations and the government's voracious appetite for personal data. A new chapter on the right to be forgotten explores the origins and current effects of this new legal concept, and shows how the new right could affect us all. Timely information helping to protect your children on the Internet and guarding your business's online reputation has also been added. The state of Internet anonymity has been exposed to scrutiny lately, and the authors explore how anonymous you can really choose to be when conducting activity on the web. The growth of social networks is also addressed as a way to project your best image and to protect yourself from embarrassing statements. Building on the first book, this new edition has everything you need to know to protect yourself, your family, and your reputation online.

*Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition* Dina Di Giacomo, Pierpaolo Vittorini, Pilar Lacasa. 2019-03-01 Recently, technology and aging have been key research areas in human cognition. The Research Topic “Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition” investigated technology's impact on cognitive and intellectual processes, highlighting how intensively technology can change and/or enhance the cognitive functioning throughout one's lifespan. The aim of this Research Topic was to provide an outlook through multidisciplinary research and development while addressing the dynamic intersection of cognition, mind, and technology. Our scope was 1) to favor the cognitive technology debate, 2) to overcome the dichotomies of technology and psychology, 3) to emphasize the advances in knowledge and well-being. This Research Topic comprises review studies and original articles, focused on digital skills that enhance human potential. Transversal approaches and cross-sectorial analysis were encouraged, leading to investigation areas related to cognitive and mental processing—in educational, rehabilitation, clinical settings—across aging. Articles of high relevance to the Research Topic were submitted on the subjects of a) research in human performance and human factors, b) new research and technologies addressing the needs of a growing populace, and c) cognitive aging and cognitive rehabilitation research.

**iRules** Janell Hofmann. 2014-05-06 Tech enlightenment and empowerment for parents so they can create iRules contracts for their own families As Janell Burley Hofmann, mother of five, wrapped her thirteen-year-old's iPhone on Christmas Eve, she was overwhelmed by questions: Will my children learn to sit and wonder without Googling? Should I know their password for online accounts? Will they experience the value of personal connection without technology? To address her concerns, she outlined boundaries and expectations in a contract for her son to sign upon receiving his first cell phone. When Hofmann's editor at the Huffington Post posted the contract, now known as iRules, it resonated on a massive scale and went viral, resulting in a tsunami of media coverage and requests. It quickly became apparent that people across the country were hungry for more. In iRules, Hofmann provides families with the tools they need to find a balance between technology and human interaction through a philosophy she calls Slow Tech Parenting. In the book, she educates parents about the online culture tweens and teens enter the minute they go online, exploring issues like cyberbullying, friend fail, and sexting, as well as help parents create and modify their own iRules contract to fit their families needs. iRules will also help parents figure out when to unplug and how to

stay in sync with the changing world of technology, while teaching teach their children self-respect, integrity, and responsibility.

**La disprassia in età evolutiva: criteri di valutazione ed intervento** Letizia Sabbadini.2005  
Come risulta evidente dalla pratica clinica e riabilitativa, il bambino disprattico non sa prevedere ed organizzare un progetto d'azione; non sa controllare cio' che sta facendo nel corso dell'azione; quindi non sa fare, ma potremmo anche ammettere che non sa ancora fare, non ha cioè ancora imparato a realizzare funzioni. Funzioni e azioni possono pero' essere rispettivamente apprese e svolte con l'aiuto di esercizi mirati e svolti in modo continuativo. E' comunque indispensabile ricordare le difficoltà del bambino disprattico, se sottoposto a compiti nuovi, inusuali. L'Autrice propone un modello di valutazione e di intervento che tenga conto di ipotesi eziologiche e neuropsicologiche, sottolineando la necessità di procedere con un'analisi su diversi livelli: percettivo, motorio e rappresentativo. Particolare importanza viene data alla diagnosi e all'intervento precoce per poter provvedere alla definizione e messa in atto di adeguati progetti terapeutici. L'opera si conclude con l'analisi e la descrizione di casi clinici riferiti ad alcune peculiari forme di disprassia: la disprassia verbale e la disgrafia. Infine, vengono illustrati esercizi mirati rispetto ai vari ambiti dello sviluppo, ideati e sperimentati dai logopedisti che hanno contribuito, insieme all'Autrice, alla stesura del presente volume.

**Simplexity** Alain Berthoz.2018-12-20 "Simplexity, as I understand it, is the range of solutions living organisms have found, despite the complexity of natural processes, to enable the brain to prepare an action and plan for the consequences of it. These solutions are simplifying principles that enable the processing of information or situations, by taking into account past experience and anticipating the future. They are neither caricatures, shortcuts, or summaries. They are new ways of asking questions, sometimes at the cost of occasional detours, in order to achieve faster, more elegant, more effective actions." A. B. As Alain Berthoz demonstrates in this profoundly original book, simplicity is never easy; it requires suppressing, selecting, connecting, thinking, in order to then act in the best way possible. And what if we, in turn, are inspired by the living world to process the complexity that surrounds us? Alain Berthoz is professor at the Collège de France where he is co-director of the Laboratoire de physiologie de la perception et de l'action. [Laboratory for the physiology of perception and action]. He is a member of the French Academy of Sciences, and is the author of *Le Sens du mouvement* [The Brain's Sense of Movement] and *La Décision* [Emotion and Reason].

**Progress in Understanding Reading** Keith E. Stanovich.2000-04-21 The last 25 years have seen tremendous advances in the study of psychological processes in reading. Our growing body of knowledge on the reading process and reading acquisition has applications to such important problems as the prevention of reading difficulties and the identification of effective instructional practices. This volume summarizes the gains that have been made in key areas of reading research and provides insights on current controversies and debates. The volume is divided into seven parts, with each part beginning with an introductory chapter presenting findings on the topic at hand, followed by one or more classic papers from the author's research program. Issues covered include phonological processes and context effects in reading, the reading wars and how they should be resolved, the meaning of the term dyslexia, and the cognitive effects and benefits of reading. --From publisher's description.
