**Jung and Steiner** Gerhard Wehr.2003-02 A series of extraordinary questions begin to hover when we consider C.G. Jung and Rudolf Steiner together. What is the relationship between their views of psychology? How can we compare their views on evil, East and West, life after death, technology, clairvoyance, the Christ, alchemy, spiritual practice? Is Jung's individuation process the same as Steiner's development of individuality? How does the Jung's Self relate to Steiner's I? To answer these questions, Gerhard Wehr--an anthroposophist and Jung biographer, as well as author of books on the Western spiritual tradition--visualizes Jung and Steiner and the essential elements of their thinking together. This opens us to new insights and forms a basis for a spiritual psychology that integrates both approaches. Wehr's skilled and articulate understanding of Jung and Steiner takes us into many themes. He clarifies the difference between soul consciousness and spiritual consciousness. He shows how meditation relates to the image work of the soul; and he compares the soul and spiritual views of sexuality. The author also considers the Grail stream as a way of uniting

Jung and Steiner. He discusses the significance of a therapeutic perspective large enough to address the cultural problems of our time. By approaching two such important worldviews with depth, they are enlarged, strengthened, and revitalized. If taken to heart, this work can free both spiritual science of Steiner and the analytic psychology of Jung from the dangers of dogmatism. This work marks a significant step toward genuine spiritual psychology.

In this revised and updated edition of *Grasp the Nettle* Peter Proctor tells the reader how to apply biodynamic methods of farming and gardening to a wide range of conditions in New Zealand and in other countries. The book provides practical observations and techniques, and relates these to the spiritual scientific knowledge upon which that biodynamic practice is based. Peter gives tips on how to recognise healthy soil and pasture, and on how to make your own biodynamic preparations. He also gives examples of farms that are successfully using biodynamic methods. This book aims to assist biodynamic farmers and gardeners to observe the processes of life and growth, and to understand how these processes are governed by cosmic forces, so they can use this knowledge in applying their practical skills. Peter Proctor, past national field advisor for the NZ Bio Dynamic Farming and Gardening Association, now teaches and advises farmers on biodynamic methods around the world.

Muck and Mind Jonathan Michael Code.2014 There is a profound, qualitative difference between the approach of biodynamic agriculture and mainstream factory farming or genetic modification. However, Jonathan Code argues that the most significant difference is not between the practical methods employed, but in the consciousness behind those methods. This insightful book examines how the biodynamic approach to land stewardship, and a deeper understanding of how to work with the land, plants and animals, can become a catalyst not only for the transformation of compost and soil, but also for the transformation of consciousness. This is a book for anyone interested in not only healthy agriculture, but how it feeds a healthy culture - Publisher's description.

Die denkwürdigen Begleitumstände des Koberwitzer Kurses kommen durch Schilderungen der Gräfin Johanna von Keyserlingk und ihrem Sohn Adalbert voll zur Geltung.
