Louisiana Creole Literature Catharine Savage

Brosman.2013-10-17 Louisiana Creole Literature is a broad-ranging critical reading of belles lettres—in both French and English—connected to and generally produced by the distinctive Louisiana Creole peoples, chiefly in the southeastern part of the state. The book covers primarily the nineteenth and twentieth centuries, the flourishing period during which the term Creole had broad and contested cultural reference in Louisiana. The study consists in part of literary history and biography. When available and appropriate, each discussion—arranged chronologically—provides pertinent personal information on authors, as well as publishing facts. Readers will find also summaries and evaluation of key texts, some virtually unknown, others of difficult access. Brosman illuminates the biographies and works of Kate Chopin, Lafcadio Hearn, George Washington Cable, Grace King, and Adolphe Duhart, among others. In addition, she challenges views that appear to be skewed regarding canon formation. The book places emphasis on poetry and fiction, reaching from early nineteenth-century writing through the twentieth century to selected works by poets still writing in the early twenty-first century. A few plays are treated also, especially by Victor Séjour. Louisiana Creole Literature examines at length the writings of important Francophone figures, and certain Anglophone novelists likewise receive extended treatment. Since much of nineteenth-century Louisiana literature was transnational, the book considers Creole-based works which appeared in Paris as well as those published locally.

Language, Truth, and Literature Richard Gaskin.2013-04-18
Richard Gaskin offers an original defence of literary humanism, according to which works of imaginative literature have an objective meaning which is fixed at the time of production and not subject to individual readers' responses. He shows that the appreciation of literature is a cognitive activity fully on a par with scientific investigation.

The Art of Graphic Design Bradbury Thompson, Jessica Helfand.2018-01-01 A revered classic of American design delights anew with the freshness and ingenuity of its approach Bradbury Thompson (1911-1995) remains one of the most admired and influential graphic designers of the twentieth century, having trained a generation of design students while on the faculty of the Yale School of Art for more than thirty years. The art director of Mademoiselle and design director of Art News and Art News Annual in the decades after World War II, Thompson was also a distinguished designer of limited-edition books, postage stamps, rationalized alphabets, corporate identification programs, trademarks, and sacred works (most notably the Washburn College Bible). Thompson also designed more than sixty issues of Westvaco Inspirations, a magazine that was published by the Westvaco Corporation and distributed to thousands of printers, designers, and teachers to show the range and versatility of printing papers. Thompson was especially revered for his ability to adapt classic typography for the modern world. Bradbury Thompson: The Art of Graphic Design is a landmark in the history of fine bookmaking. First published by Yale University Press in 1988 and designed by Thompson himself, it was praised by the New York Times as a book in which art and design are gloriously and daringly mixed. Original texts by the author and other notable designers, critics, and art historians, including J. Carter Brown, Alvin Eisenman, and Steven Heller, explore Thompson's

methods and design philosophy, and a newly commissioned afterword by Jessica Helfand attests to the enduring importance of his work. Both a retrospective and a manifesto, the book surveys Thompson's timeless contributions to American graphic design, including his experimental work and his work in magazines, typography, books, simplified alphabets, and contemporary postage stamps. Published for the first time in paperback, this classic text is now available for a new generation of designers and students.

The Survival of the Jesuits in the Low Countries, 1773-1850 Leo Kenis, Marc Lindeijer. 2019-12-20 How the Jesuits re-emerged after forty years of suppression In 1773, Pope Clement XIV suppressed the Society of Jesus. For the 823 Jesuits living in the Low Countries, it meant the end of their institutional religious life. In the Austrian Netherlands, the Jesuits were put under strict surveillance, but in the Dutch Republic they were able to continue their missionary work. It is this regional contrast and the opportunities it offered for the Order to survive that make the Low Countries an exceptional and interesting case in Jesuit history. Just as in White Russia, former Jesuits and new Jesuits in the Low Countries prepared for the restoration of the Order, with the help of other religious, priests, and lay benefactors. In 1814, eight days before the restoration of the Society by Pope Pius VII, the novitiate near Ghent opened with eleven candidates from all over the United Netherlands. Barely twenty years later, the Order in the Low Countries - by then counting one hundred members - formed an independent Belgian Province. A separate Dutch Province followed in 1850. Obviously, the reestablishment, with new churches and new colleges, carried a heavy survival burden: in the face of their old enemies and the black legends they revived, the Jesuits had to retrieve their true identity, which had been suppressed for forty years. Method and Variation Emma Gilby.2017-12-02 French philosophical and scientific writers of the early modern period made various use of forms of narrative - language that aims to tell a story - in their texts. Equally, authors of fiction often sought to appropriate the language and tools of philosophical and scientific investigation. The contributions in this collection, from some of the most distinguished and exciting scholars working in French Studies today, aim to bring into question oppositional relationships between terms such as 'philosophy' and 'fiction' when these are applied to early modern texts. They consider authors as diverse as Montaigne, Descartes, La Rochefoucauld, Mme de Villegieu and Mme de Lafayette. If we are to be true to the early modern period, they argue, we have to acknowledge it as a time when the figurative, anecdotal and fictive on the one hand, and the truth-seeking on the other, influence each other mutually. Emma Gilby is University Lecturer in French, University of Cambridge. Paul White is Research Associate in French, University of Cambridge.

Last Lectures Émile Benveniste.2019-10-31 Benveniste's lectures had a shaping influence on a generation of scholars that includes Barthes, Deleuze, Foucault, Derrida, Kristeva and Todorov and here, for the first time, these are made available in English for a new generation of linguists and philosophers of language. This book includes the full course of fifteen lectures which Benveniste gave in the Collège de France on the rue des Écoles in Paris between December 1968 and December 1969. Benveniste's work as offered here presents the first serious attempt at reconciling the sign theories of Saussure and Peirce and draws together, language, writing and society into a comprehensive theory of signifying. Benveniste's philosophy of language considers key concepts such as utterance, enunciation, speaker, discourse, subjectivity and as such is central to the areas of discourse analysis, text linguistics, pragmatics, semantics, conversational analysis, stylistics and semiotics.

Anatomy of a Typeface Alexander S. Lawson.1990 To the layman, all printing types look the same. what shape they assume, and how they have evolved remains one of passionate and continuing concern. Lawson explores the vast territory of types, their development and uses, their antecedents and offspring, with precision, insight, and clarity. Written for the layman but containing exhaustive research, drawings and synopses of typefaces, this book is an essential addition to the library of anyone's typographic library. It is, as Lawson states, not written for the printer convinced that there are already too many typefaces, but rather for that curious part of the population that believes the opposite; that the subtleties of refinement as applies to roman and cursive letters have yet to be fully investigated and that the production of the perfect typeface remains a goal to be as much desired by present as by future type designers. Anyone aspiring to typographic wisdom should own and treasure this classic.--Amazon description.

Souza. 2014-10-16 Migration is both a demographic and a cultural phenomenon. As such, it both reshapes the global village and subverts the all-encompassing vision of the city, a space split between the blending of all new cultures and the need felt by many migrants to maintain their traditions and thereby contribute to a multicultural mosaic. This series of essays explores how the concepts of the melting-pot and the mosaic have shaped the representation of Paris and Montreal in francophone literatures. Migrant movements to these cities from the Caribbean, the Maghreb, Sub-Saharan Africa, Quebec, Indochina, and the Indian

Ocean have produced new groups of intersecting cultures. Under the dual influences of their native and host countries, migrants have produced an innovative and multifaceted literature that reflects their composite world-view. Their writing poses pressing questions of ethnicity, immigration, integration, and citizenship, and challenges longstanding notions both of the concept of the city and of how its spaces embody and articulate Frenchness in the face of ongoing change. Such shifts produce changes not only in the diasporic culture, but in the national culture as well, through creolization processes. These shifting identities increasingly destabilize current notions of national membership and social and cultural belonging, since we can no longer presume a direct correspondence between place, culture, language and identity. They also pose new questions of national identity and difference as the immigrant presence expands and inflects the cosmopolitan pluralism of today's societies.

Nineteenth-century American Designers & Engravers of Type

William Edward Loy. 2009 In 1896 William E. Loy, a San Francisco printing equipment salesman and scholar, had the idea of writing a series of profiles of type designers. Loy took a long view of history, and realized that it was important to document the men in the background who created the nineteenth century's fanciful types, even as the furiously competing type foundries got the credit for introducing them to the printing trade. His work was serialized in *The Inland Printer* over the next three years and included biographies, photographs of the artists, and lists of the type they had designed or cut, which Loy had painstakingly compiled through correspondence with the type founders and other craftsmen. Unfortunately, due to the technical limitations of a monthly periodical, it was not possible to show the typefaces mentioned. Finally here is the work as Loy envisioned it, with over 800 illustrations of typefaces designed by the craftsmen he discusses. Loy traces their personal stories adding much incidental detail about the politics & business practices of the time and the innovations of each of these thirty men. Now, a century later, typographical historians Alastair Johnston and Stephen Saxe have realized Loy's vision, fully illustrated and annotated. This is one of the first reference books on nineteenth-century American type design, and as such is an important addition to typographical history.

Colonizer or Colonized Sara E. Melzer.2011-11-29 *Colonizer or Colonized* introduces two colonial stories into the heart of France's literary and cultural history. The first describes elite France's conflicted relationship to the Ancient World. As much as French intellectuals aligned themselves with the Greco-Romans as an us, they also resented the Ancients as an imperial them, haunted by the memory that both the Greeks and Romans had colonized their ancestors, the Gauls. This memory put the elite on the defensive—defending against the legacy of this colonized past and the fear that they were the barbarian other. The second story mirrored the first. Just as the Romans had colonized the Gauls, France would colonize the New World, becoming the New Rome by creating a New France. Borrowing the Roman strategy, the French Church and State developed an assimilationist stance towards the Amerindian barbarian. This policy provided a foundation for what would become the nation's most basic stance towards the other. However, this version of assimilation, unlike its subsequent ones, encouraged the colonized and the colonizer to engage in close forms of contact, such as mixed marriages and communities. This book weaves these two different stories together in a triangulated dynamic. It asks the Ancients to step aside to include the New World other into a larger narrative in which elite France carved out their nation's emerging cultural identity in relation to both the New World and the Ancient World.

Basquiat by Himself Dieter Buchhart, Anna Karina Hofbauer. 2019 Jean-Michel Basquiat's self-portraits are regarded as being among the most important of his radical creative works. In addition to some 50 specific portraits of himself, we can also see his series of likenesses of African-American men as concealed reproductions of the artist. Not least because Basquiat, who was affected himself by everyday racism, identified with his heroes, saints and martyrs as he portrayed them. Thus his major topics from identity, discrimination and prejudice to capitalism, the market and oppression are all to be found in these key works.

The Script of Humanism James Wardrop. 1963

Rome After Rome Joel Sternfeld. 2019-04 In his 1992 book *Campagna Romana. The Countryside of Ancient Rome* Joel Sternfeld focused on the ruins of grand structures with a clear warning: great civilizations fall, ours may too. Now in Rome after Rome, containing images from the previous book as well as numerous unpublished pictures, Sternfeld's questions multiply: who are these modern Romans? What is their relationship to the splendor that was? What is the nature of sullied modernity in relation to the Arcadian ideal? Is there, at this late moment, any chance for Utopia? The Campagna, the countryside south and east of Rome occupies a special place in Roman--and human history. With the rise of Ancient Rome, this once polluted, malarial landscape was restored by emperors and thrived with some 20 towns and numerous wealthy villas on the rolling plains among the mighty aqueducts that fed water to Rome. After the city fell, the Campagna once again became desolate and

dangerous. The gloomy tombs, broken homes and aqueducts sat in a kind of no man's land for over 1,000 years. To this landscape came the painters: Dürer, Lorrain, Poussin, and later, Corot, Turner, and Americans such as Thomas Cole. In the ruins they sought the origins of Rome's greatness and the meaning of her fall. Later they depicted a place where Roman gods cavorted and mankind lived in a golden age, an Arcadia. Central Rome was rebuilt with Baroque apartments hiding the past: in the Campagna the past was visible and all imaginings possible. Sternfeld juxtaposes the ruins of a powerful, ancient civilization with the new construction and the debris of our own time. Avoiding obvious contrasts, eschewing heavy-handed irony, this contemporary artist draws our attention to both despoliation and lasting beauty; he suggests many reasons for despair, yet he also has something to say about the nobility of the human spirit. Limes, Economy and Society in the Lower Danubian Roman Provinces Lucrețiu Mihăilescu-Bîrliba. 2019 This book presents the proceedings of a conference held by the 'Alexandru Ioan Cuza' University of Iasi in November 2017. Scholars from Iasi, Bucharest and Cluj-Napoca gathered to present not only the recent results of their work, but to discuss in which ways the river frontier has influenced economic, social and religious interchange. Roman frontiers have been studied with an emphasis on multiple intercultural dimensions. Scholarship has focused mainly on the political situation (the emergence of Roman domination and administration in the provinces), the economy (trade and traffic between Romans and Barbarians), military issues (the role of the army as a peacekeeper and as a bearer of cultures) and religious aspects (mutual impact of religious habits), etc. This volume aims to broaden the perspective on Roman riverine frontiers. The studies presented here, focusing on the provinces Dacia and Moesia inferior, investigate how rivers enhance or hamper connectivity on frontiers and thus shape

riparian areas as multifunctional spaces with different functions. The present volume therefore proposes several steps to expand our understanding of riverine settings in border regions of Roman rule. These riverine border regions are characterised by a significant presence of the Roman military, extensive economic activity and religious interchange.

Focusing on the interplay between nature and culture in landscape representation, *Literature and Painting in Quebec* contends that both have reflected and fashioned the meaning of French-Canadian nationhood. As such, *Literature and Painting in Quebec* presents a new perspective to approach the notion of national identity, a quest that few groups have engaged in more persistently than the Quebecois.

From Barbarism to Universality Christopher Coski.2011 As European vernaculars emerged from the shadow of Latin in the early modern era, the French language acquired greater prestige than any other on the continent while French culture simultaneously came to exert a disproportionately large influence across national borders. Christopher Coski closely examines landmark French texts from the period to explore the literary and philosophical forces at play in a transformation of French self-perception, as French intellectuals from the sixteenth through eighteenth centuries moved away from viewing their language and culture as barbaric and came to advocate them as universal models of cultivation and civilization. Coski examines the treatment of French linguistic and cultural evolution as a literary

theme, following the conversation as these writers envisioned an increasingly refined national language and identity. From an early notion that French was inadequate to Rivarol's conclusion of that which is not clear is not French, the idea emerged that these refinements came as natural expressions of the perceived superiority of the language itself and thus justified its rise in prominence. Complementing and expanding on existing sociohistorical studies, Coski's account weaves literary ideas, linguistic philosophy, and cultural context into a deft analysis of how the construction of French identity on individual and communal levels stemmed in part from a philosophy of language developed during the rapid transformation of an undervalued vernacular into a highly esteemed international mode of expression.
