**Dialogue and Technology: Art and Knowledge** Bo Göranson, Magnus Florin. 2012-12-06 This book springs from a conference held in Stockholm in May/June 1988 on Culture, Language and Artificial Intelligence. It assembled more than 300 researchers and practitioners in the fields of technology, philosophy, history of ideas, literature, linguistics, social science, etc. The conference was an initiative from the Swedish Center for Working Life, based on the project AI-Based Systems and the Future of Language, Knowledge and Responsibility in Professions within the COST 13 programme of the European Commission. Participants in the conference, or in some cases researchers in areas related to its aims, were chosen to contribute to this book. It was preceded by *Knowledge, Skill and Artificial Intelligence* (ed. B. Göranson and I. Josefson, Springer-Verlag, London, 1988) and *Artificial Intelligence, Culture and Language* (ed. B. Göranson and M. Florin, Springer-Verlag, 1990). The latter book springs, as this one, from the 1988 conference, and one further book will follow: *Skill and Education: Reflection and Experience* (Springer Verlag, planned autumn 1991). The philosophical and aesthetic interest of the contributions in the present volume is in large part due to the framework of the Dialogue Seminar, held regularly at the Royal Dramatic Theatre in Stockholm, in which several of the contributors have participated.

**Lost Libraries** J. Raven. 2004-01-31 This pioneering volume of essays explores the destruction of great libraries since ancient times and examines the intellectual, political and cultural consequences of loss. Fourteen original contributions, introduced by a major re-evaluative history of lost libraries, offer the first ever comparative discussion of the greatest catastrophes in book history from Mesopotamia and Alexandria to the dispersal of monastic and monarchical book collections, the Nazi destruction of Jewish libraries, and the recent horrifying pillage and burning of books in Tibet, Bosnia and Iraq.

Contemporary analyses of culture, politics, techno-science, and psychology insist on this. They often suggest remedies for it, or ways to capitalize on it. Yet they almost never investigate the meaning and history of distraction itself. This book corrects this lack of attention. It inquires into the effects of distraction, defined not as the opposite of attention, but as truly discontinuous intellect. Human being has to be reconceived, according to this argument, not as quintessentially thought-bearing, but as subject to repeated, causeless blackouts of mind. *The Problem of Distraction* presents the first genealogy of the concept from Aristotle to the largely forgotten, early twentieth-century efforts by Kafka, Heidegger, and Benjamin to revolutionize the humanities by means of distraction. Further, the book makes the case that our present troubles cannot be solved by recovering or enhancing attention. Not-always-thinking beings are beset by radical breaks in their experience, but in this way they are also receptive to what has not and cannot yet be called experience.

**Arbitri Nugae** Aldo Setaioli. 2011 *Arbitri Nugae* This book aims to provide a comprehensive inquiry into the short metrical intermezzos inserted in the prose narrative of Petronius' *Satyrice*. The text of each poem has been thoroughly investigated; in addition, special attention has been devoted to their function in the context and to the aspects connecting Petronius with the literature and culture of his time. Numerous contacts with other ancient authors have been pointed out to illustrate Petronius' attitude to the cultural and literary heritage on the one hand, and the character of his own work on the other.

**Teaching Japanese Popular Culture** Deborah Michelle Shamo, Chris McMorran. 2016 Interest in Japanese popular culture is high among students at all levels, driving enrollment in Japanese Studies programs. However, there has been little reflection on the pedagogy of teaching Japanese popular culture. Now is the time for critical reflection on teaching practices related to teaching about and with Japanese popular culture. This volume encompasses theoretical engagement with pedagogy of popular culture as well as practical considerations of curriculum design, lesson planning, assessment, and student outcomes. While the main focus is undergraduate teaching, there is also discussion of K-12 teaching, with authors discussing their experiences teaching Japanese popular culture not only in North America, but also in Australia, Germany, Singapore, and Japan, both in Japanese-language and English-language institutions.

**Literary Culture in the Holy Roman Empire, 1555-1720** James A. Parente, Richard E. Schade, George C. Schoolfield. 1991 These essays discuss approaches to early modern literature in central Europe, focusing on four pivotal areas: connections between humanism and the new scientific thought; the relationship of late sixteenth- and early seventeenth-century literature to ancient and Renaissance European traditions; the social and political context of early modern writing; and the poets' self-consciousness about their work. As a whole, the volume argues that early modern writing in central Europe should not be viewed solely as literature but as the textual product of specific social, political, educational, religious, and economic circumstances. The contributors are Judith P. Aikin, Barbara Becker-Cantarino, Thomas W. Best, Dieter Breuer, Barton W. Browning, Gerald Gillespie, Anthony Grafton, Gerhart Hoffmeister, Uwe-K. Ketelsen, Joseph Leighton, Ulrich Mache, Michael M. Metzger, James A. Parente, Jr., Richard Erich Schade, George C. Schoolfield, Peter Skrine, and Ferdinand van Ingen.

We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

**Johann Peter Hebel and the Rhetoric of Orality** Elin Mererid Hopwood. 1994

**The Politics of Friendship** Jacques Derrida. 2020-10-13 The most influential of contemporary philosophers, Jacques Derrida, explores the idea of friendship—and its political consequences, past and future—through writings by Aristotle, Nietzsche, Cicero, and more. Until relatively recently, Jacques Derrida was seen by many as nothing more than the high priest of Deconstruction, by turns stimulating and fascinating, yet always somewhat disengaged from the central political questions of our time. Or so it seemed. Derrida's "political turn," marked especially by the appearance of *Specters of Marx*, has surprised some and delighted others. In *The Politics of Friendship* Derrida renews and enriches this orientation through an examination of the political history of the idea of friendship pursued down the ages. Derrida's thoughts are haunted throughout the book by the strange and provocative address attributed to Aristotle, "my friends, there is no friend" and its inversions by later philosophers such as Montaigne, Kant, Nietzsche, Schmitt and Blanchot. The exploration allows Derrida to recall and restage the ways in which all the oppositional couples of Western philosophy and political thought—friendship and enmity, private and public life—have become madly and dangerously unstable. At the same time he dissects genealogy itself, the familiar and male-centered notion of fraternity and the virile virtue whose authority has gone unquestioned in our culture of friendship and our models of

democracy The future of the political, for Derrida, becomes the future of friends, the invention of a radically new friendship, of a deeper and more inclusive democracy. This remarkable book, his most profoundly important for many years, offers a challenging and inspiring vision of that future.

**The International status of education about the Holocaust** Carrier, Peter,Fuchs, Eckhardt,Messinger, Torben,Georg Eckert Institute for International Textbook Research (Germany).2015-01-14 How do schools worldwide treat the Holocaust as a subject? In which countries does the Holocaust form part of classroom teaching? Are representations of the Holocaust always accurate, balanced and unprejudiced in curricula and textbooks? This study, carried out by UNESCO and the Georg Eckert Institute for International Textbook Research, compares for the first time representations of the Holocaust in school textbooks and national curricula. Drawing on data which includes countries in which there exists no or little information about representations of the Holocaust, the study shows where the Holocaust is established in official guidelines, and contains a close textbook study, focusing on the comprehensiveness and accuracy of representations and historical narratives. The book highlights evolving practices worldwide and thus provides education stakeholders with comprehensive documentation about current trends in curricula directives and textbook representations of the Holocaust. It further formulates recommendations that will help policy-makers provide the educational means by which pupils may develop Holocaust literacy.

Teachers' Beliefs and Strategies when Teaching Reading in Multilingual Settings Monica Bravo Granström.2019 Globalization has not only changed our society, it has also had a profound effect on education. Many schools deal with student populations that due to migration have become increasingly multilingual. Politically, few would argue against the importance of multilingualism; rather, it is promoted to the fullest. However, in practical terms the challenges associated with teaching and educational policies have increased manifold as a result of the linguistic diversity among student bodies. Reading is certainly regarded as a key learning skill, however, the question arises as to how the students' life-world multilingualism is taken into consideration. Furthermore, being considered part of teachers' professional competence, teachers' mental processes and perceptions (beliefs) have been the focus in several different academic fields. Previous research suggests that there are significant links between teachers' beliefs and practices. This thesis explores the aforementioned aspects in greater detail, with the overall aim to gain a deeper understanding of teachers' beliefs and strategies when teaching reading in multilingual settings. Using a cross-disciplinary, qualitative research approach, the empirical inquiry is based on case studies within different, linguistically diverse settings. The case studies include classroom observations as well as teacher interviews in German, Swedish and Chilean grade 4 classrooms.

*German Operetta on Broadway and in the West End, 1900-1940* Derek B. Scott.2022-06-23 Academic attention has focused on America's influence on European stage works, and yet dozens of operettas from Austria and Germany were produced on Broadway and in the West End, and their impact on the musical life of the early twentieth century is undeniable. In this ground breaking book, Derek B. Scott examines the cultural transfer of operetta from the German stage to Britain and the USA and offers a historical and critical survey of these operettas and their music. In the period 1900-1940, over sixty operettas were produced in the West End, and over seventy on Broadway. A study of these stage works is important for the light they shine on a variety of social topics of the period - from modernity and gender relations to new technology and new media - and these are investigated in the individual chapters. This book is also available as Open Access on Cambridge Core.

Literary Translation, Reception, and Transfer Norbert Bachleitner.2020-09-21 The three concepts mentioned in the title of this volume imply the contact between two or more literary phenomena; they are based on similarities that are related to a form of 'travelling' and imitation or adaptation of entire texts, genres, forms or contents. Transfer comprises all sorts of 'travelling', with translation as a major instrument of transferring literature across linguistic and cultural barriers. Transfer aims at the process of communication, starting with the source product and its cultural context and then highlighting the mediation by certain agents and institutions to end up with inclusion in the target culture. Reception lays its focus on the receiving culture, especially on criticism, reading, and interpretation. Translation, therefore, forms a major factor in reception with the general aim of reception studies being to reveal the wide spectrum of interpretations each text offers. Moreover, translations are the prime instrument in the distribution of literature across linguistic and cultural borders; thus, they pave the way for gaining prestige in the world of literature. The thirty-eight papers included in this volume and dedicated to research in this area were previously read at the ICLA conference 2016 in Vienna. They are ample proof that the field remains at the center of interest in Comparative Literature.

*Narratology and Interpretation* Jonas Grethlein,Antonios Rengakos.2009-08-17 The categories of classical narratology have been successfully applied to ancient texts in the last two decades, but in the meantime narratological theory has moved on. In accordance with these developments, Narratology and Interpretation draws out the subtler possibilities of narratological analysis for the interpretation of ancient texts. The articles make a contribution to the theory of narrative as well as to our understanding of ancient literature including epic, lyric, tragedy and historiography.

Max Weber and the Culture of Anarchy S. Whimster.2016-07-27 This is a specially commissioned set of essays on the themes of Max Weber, culture, anarchy and politics. It presents the first complete publication (in both English and German) of a series of letters written by Max Weber in 1913 and 1914 during his stays at the anarchist settlement of Ascona. The letters show Weber debating with the issues of free love, eroticism, patriarchy, anarchism, terrorism, pacifism, political and personal convictions and power. These themes are taken up by the contributors in a wider discussion of the relation of culture and politics.

*Roman Questions II* Jerzy Linderski.2007 The first volume of Roman Questions appeared in 1995 and was received very positively by the scholarly community. The present collection contains 71 papers written mostly in English (with one paper in German and one in Latin) and predominantly published in the last 20 years in various leading journals in Europe and America. They are all reset, and supplied with addenda. There are also 5 inedita, and addenda to the previous volume. They deal with Roman republican and imperial history and constitutional law, prosopography, epigraphy, Latin philology, Roman religion, and the history of classical scholarship. They ask questions, try to answer them, and do not avoid polemic. They uphold the unity of Altertumswissenschaft: history cannot be understood without philology, and philology is blind without history; and

history, law and literature are infused with ideology and religion. And the tool to knowledge is the painstaking linguistic dissection of texts.

The Cambridge History of Japanese Literature Haruo Shirane,Tomi Suzuki.2015-12-31 The Cambridge History of Japanese Literature provides, for the first time, a history of Japanese literature with comprehensive coverage of the premodern and modern eras in a single volume. The book is arranged topically in a series of short, accessible chapters for easy access and reference, giving insight into both canonical texts and many lesser known, popular genres, from centuries-old folk literature to the detective fiction of modern times. The various period introductions provide an overview of recurrent issues that span many decades, if not centuries. The book also places Japanese literature in a wider East Asian tradition of Sinitic writing and provides comprehensive coverage of women's literature as well as new popular literary forms, including manga (comic books). An extensive bibliography of works in English enables readers to continue to explore this rich tradition through translations and secondary reading.

Dialogue Analysis: Units, relations and strategies beyond the sentence Edda Weigand,Eckhard Hauenherm.2011-07-13 The topic of this volume was discussed at a Round Table of the International Association for Dialogue Analysis (IADA) at the University of Bologna in March 1995. The Round Table was intended to make a scientific contribution in honour of the president's 65th birthday. The topic refers on the one hand to the central problem of 'Dialogue Analysis' which is to discover a new, communicatively functioning unit after having left behind the unit of the sentence which can be considered the unit par excellence of structural linguistics. On the other hand, it includes the manifold units, relations, and strategies, i.e. the specific problems of dialogue analysis.

bookdown Yihui Xie.2016-12-12 bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

**Restoration of Motion Picture Film** Paul Read,Mark-Paul Meyer.2000-08-14 This is the first book to bring together the work of a modern motion picture film laboratory together with the specialist techniques for preservation and restoration of archival film. The book's data has its origins in a training programme called FILM which was written by members of the Gamma Group with funding from the EU fund Force. The committee comprised senior film archivists and technicians in charge of film conservation departments or working film laboratories within national film archives, together with technicians from commercial laboratories which specialise in archival film conservation and who do not work for national and local archives. The final group consisted of many of the most experienced individuals in their fields. Restoration of Motion Picture Film is an extremely informative, well-researched book which is an unmissable addition to the bookshelves of conservators, archivists and curators worldwide. Film history and film conservation students will also find it of great interest and use. \* Only book in English on this subject \* Prepared by leading specialists in their field \* Includes coverage of digital technology

**Musicians' Mobilities and Music Migrations in Early Modern Europe** Gesa Zur Nieden,Berthold Over.2016 During the 17th and 18th century musicians' mobilities and migrations are essential for the European music history and the cultural exchange of music. Adopting viewpoints that reflect different methodological approaches and diversified research cultures, the book presents studies on central scopes, strategies and artistic outcomes of mobile and migratory musicians as well as on the transfer of music. By looking at elite and non-elite musicians and their everyday mobilities to major and minor centers of music production and practice, new biographical patterns and new stylistic paradigms in the European East, West and South emerge.

**The Geography of Cinema** Chris Lukinbeal,Stefan Zimmermann.2008 This book addresses questions surrounding the constructions of space, culture, society, identity and representation. The geography of cinema extends beyond the screen, director and audience, to include the wider industrial and political complex of the cultural economy. In this sense, culture can be viewed as an economic commodity set within the broader frame of globalization and postmodernism. A cinematic world occupies a territory between our city streets, the Cineplex, the TV set, and our geographical imagination and identity. These contexts invite inquiries into the production, distribution, exhibition, and consumption of film as well as global cinema, hapticities of viewing, critical political economies, and cinematic ethno-graphies. This collection provides unique and eclectic insights into the exciting and emerging subfield of film geography.

**Skill and Education: Reflection and Experience** Bo Göranson,Magnus Florin.2012-12-06 This book has an important starting point in the conference held in Stockholm in May-June 1988 on Culture, Language and Artificial Intelligence. It assembled more than 300 researchers and practitioners in the fields of technology, philosophy, history of ideas, literature, linguistics, social science etc. The conference was an initiative from the Swedish Center for Working Life, based on the project AI-Based Systems and the Future of Language, Knowledge and Responsibility in Professions within the COST 13 programme of the European Commission. Participants in the conference and researchers related to its aims were chosen to contribute to this book. It is preceded by Knowledge, Skill and Artificial Intelligence (ed. B. Göranson and I. Josefson, Springer-Verlag, 1988), Artificial Intelligence, Culture and Language (ed. B. Göranson and M. Florin, Springer-Verlag, 1990) and Dialogue and Technology: Art and Knowledge (ed. B. Göranson and M. Florin, Springer-Verlag, 1991). The two latter books have the same conference connection as this one, and their aim is to present the contours of a research field with a multitude of issues that demands thorough investigation. The contributors' thinking in this field varies greatly; so do their styles of writing. For example: contributors have varied in their choice of he or she for the third person. No distinction is intended, but chapters have been left with the original usage to avoid extensive changes. Similarly, individual contributor's preference as to notes or reference lists have been followed.

Every reader in Germany loved and still loves Hebel for the humor and the sincere purpose of his writings, and every critic lauds and commends the classic simplicity and beauty of his style. He endeavored successfully to provide entertainment and enlightenment for the so-called middle class of his countrymen, and the grace with which he did so has not been surpassed or even attained by any other German author. One Thousand Years of Manga Brigitte Koyama-Richard.2022-07-12 This definitive illustrated history of manga is an unparalleled account of the development of a form which is an integral part of Japanese art and culture and now hugely popular throughout the world. As contemporary as this graphic art form may appear to readers outside of Japan, manga has deep roots in Japanese culture, drawing on centuries- old artistic traditions. Traces can be found in seventh-century temple paintings, folding screens decorated with comic characters, and painted medieval emakimono scrolls. The more familiar manga comics of today echo similar themes, both light-hearted and serious, and draw on narrative forms present in both sagas and skits from Japan's rich cultural heritage. This volume spans the history of manga in all its splendor and diversity. Among the many highlights included are Hokusai's seminal Hokusai Manga of 1814, the advent of the gekiga style in the 1950s, the landmark Astro Boy by Tezuka Osamu, Lady Oscar, Riyoko Ikeda's shojo manga aimed at young girls, samurai sagas, alternative productions by the review Garo, the demons that populate the works of Mizuki Shigeru, and the latest creations from Jiro Taniguchi. Each period is covered in detail by author Brigitte Koyama-Richard and illustrated with drawings and prints. One Thousand Years of Manga is both an informative account of the genesis of the form and a visual delight. Featuring more than four hundred illustrations and captivating texts, the book situates manga in its proper context, appreciating it for what it truly is: an integral part of Japanese art and culture that is as rich and revealing as it is popular.
