Multilingualism and L2 Acquisition Yolanda Ruiz de Zarobe, Leyre Ruiz de Zarobe.2018-04-19 In recent years we have witnessed a growing interest in multilingualism and its relationship with the learning and teaching of second/foreign languages. However, multilingualism is a highly complex phenomenon, which has a direct influence on how we learn languages. For instance, do we learn a second/foreign language in a similar way in a multilingual context as in a monolingual one? What is the role of the other languages spoken in the community? Do contrasting learning contexts, like CLIL or studying abroad, produce different results? Can positive emotions such as foreign language enjoyment have an active role in the foreign language learning process? These and other topics will be discussed in this book, with the aim of understanding multilingualism, how languages are learned and how to teach them better. This book was originally published as a special issue of the International Journal of Multilingualism.

Oxford Latin Reader M. G. Balme, James Morwood.1997 Used along side any Latin course, the Oxford Latin Reader will give students access to, and confidence with, a broad range of unadapted Latin texts. Helps make the transition from adapted Latin to unadapted texts Extracts are of a manageable length and a glossary of difficult vocabulary and usages aid students to approach the texts with confidence A historical timeline matches major events with the featured authors' lives The Teacher's Book provides full translations to save time as well as suggested questions and additional background information

Poetics .2020-04-17 Aristotle's Poetics is the earliest surviving work of dramatic theory and first extant philosophical treatise to focus on literary theory. In it, Aristotle offers an account of what he calls poetry.

The World of Pompeii Pedar Foss, John J. Dobbins.2009-06-02 This all embracing survey of Pompeii provides the most comprehensive survey of the region available. With contributions by well-known experts in the field, this book studies not only Pompeii, but also - for the first time - the buried surrounding cities of Campania. The World of Pompeii includes the latest understanding of the region, based on the up-to-date findings of recent archaeological work. Accompanied by a CD with the most detailed map of Pompeii so far, this book is instrumental in studying the city in the ancient world and is an excellent source book for students of this fascinating and tragic geographic region.

Privatization Joseph Prokopenko.1998

Give a Boy a Gun Todd Strasser.2020-06-09 “[H]aunting and harrowing.” —Booklist (starred review) “Vivid, distressing, and all too real.” —Kirkus Reviews In this 20th anniversary edition of Todd Strasser’s gut-wrenching and critically acclaimed Give a Boy a Gun, two boys bring guns to school in search of revenge against their classmates. For as long as they can remember, Brendan and Gary have been mercilessly teased and harassed by the jocks who rule Middletown High. But not anymore. Stealing a small arsenal of guns from a neighbor, they take their classmates hostage at a school dance. In the panic of this desperate situation, it soon becomes clear that only one thing matters to Brendan and Gary: revenge. This special 20th anniversary edition includes updated backmatter and statistics on school shootings—a topic that is now more relevant than ever.

The great verb game M... M. Oleinek.1999

Oath and State in Ancient Greece Alan H. Sommerstein, Andrew James Bayliss.2013-01-01 The oath was an institution of fundamental importance across a wide range of social interactions

throughout the ancient Greek world, making a crucial contribution to social stability and harmony; yet there has been no comprehensive, dedicated scholarly study of the subject for over a century. This volume of a two-volume study explores how oaths functioned in the working of the Greek city-state (polis) and in relations between different states as well as between Greeks and non-Greeks.

The Invention of Greek Ethnography Joseph E. Skinner. 2012-08-17 Greek ethnography is commonly believed to have developed in conjunction with the wider sense of Greek identity that emerged during the Greeks' encounter with the barbarian--Achaemenid Persia--during the late sixth to early fifth centuries BC. The dramatic nature of this meeting, it was thought, caused previous imaginings to crystallise into the diametric opposition between Hellene and barbarian that would ultimately give rise to ethnographic prose. *The Invention of Greek Ethnography* challenges the legitimacy of this conventional narrative. Drawing on recent advances in ethnographic and cultural studies and in the material culture-based analyses of the Ancient Mediterranean, Joseph Skinner argues that ethnographic discourse was already ubiquitous throughout the archaic Greek world, not only in the form of texts but also in a wide range of iconographic and archaeological materials. As such, it can be differentiated both on the margins of the Greek world, like in Olbia and Calabria and in its imagined centers, such as Delphi and Olympia. The reconstruction of this ethnography before ethnography demonstrates that discourses of identity and difference played a vital role in defining what it meant to be Greek in the first place long before the fifth century BC. The development of ethnographic writing and historiography are shown to be rooted in this wider process of positioning that was continually unfurling across time, as groups and individuals scattered the length and breadth of the Mediterranean world sought to locate themselves in relation to the narratives of the past. This shift in perspective provided by *The Invention of Greek Ethnography* has significant implications for current understanding of the means by which a sense of Greek identity came into being, the manner in which early discourses of identity and difference should be conceptualized, and the way in which so-called Great Historiography, or narrative history, should ultimately be interpreted.

The Suasoriae of Seneca the Elder Lucius Annaeus Seneca.

An Introduction to the Ancient World Lukas de Blois, R.J. van der Spek. 2008-10-24 Integrating the results of scholarly work from the past decade, the authors of *An Introduction to the Ancient World*, Lukas de Blois and R.J. van der Spek, have fully-updated and revised all sixteen chapters of this best-selling introductory textbook. Covering the history and culture of the ancient Near East, Greece and Rome within the framework of a short narrative history of events, this book offers an easily readable, integrated overview for students of history, classics, archaeology and philosophy, whether at college, at undergraduate level or among the wider reading public. This revised second edition offers a new section on early Christianity and more specific information on the religions, economies, and societies of the ancient Near East. There is extended coverage of Greek, Macedonian and Near Eastern history of the fourth to second centuries BC and the history of the Late Roman Republic. The consequences of Julius Caesar's violent death are covered in more detail, as are the history and society of Imperial Rome. This new edition is: comprehensive: covers 3,000 years of ancient history and provides the basis for a typical one-semester course lavishly illustrated: contains maps, line drawings and plates to support and supplement the text, with updated captions clearly and concisely written: two established and respected university teachers with thirty years' experience in the subject areas well-organized: traces the broad outline of political history but also concentrates on particular topics user-friendly: includes chapter menus, an extensive and expanded bibliography organized by subject area and three appendices, an improved introduction and the addition of an epilogue.

Reading Roman Declamation Martin T. Dinter, Charles Guérin, Marcos Martinho. 2016-01-01 As a genre situated at the crossroad of rhetoric and fiction, declamatio offers the freedom to experiment with new forms of discourse. Placing the literariness of (Ps)Quintilian's oeuvre into the spotlight, this volume showcases declamation as a realm of genuine literary creation with its own theoretical underpinning, literary technique and generic conventions. It is of interest to students and scholars of rhetoric and Roman Literature.

The Ethical Crises of Civilization Leslie Lipson. 1993-08-10 According to Lipson, we are at a critical stage in our history. It is clear that there has been a lowering of ethical standards in many sectors of our society. Both promise and peril confront humanity at this time. Along with the ability to annihilate the world, we have acquired the knowledge to improve the quality of life for more people than ever before. The author examines periods in history where similar conditions have existed, seeking to comprehend what is at stake in our present age, and calls for revolution in our ethical practices. Finally, he considers whether the current moral and ethical crisis will be resolved.

Introduction to Astronomy and Astrophysics Arnold Hanslmeier. 2023-01-30 This textbook provides the basic theoretical and practical knowledge of astronomy and astrophysics. It provides an overview from classical astronomy and observational methods to solar physics and astrophysics of stars and galaxies. It concludes with chapters on cosmology, astrobiology, and mathematical and numerical methods. Numerous color illustrations, examples of calculations, and exercises with solutions make this work a useful companion to undergraduate astronomy lectures. The book is suitable for students of physics and astronomy at teacher training level or in the Bachelor's degree - but also people interested in natural sciences with appropriate basic knowledge of mathematics and physics will find here an appealing introduction to the subject. This fourth edition has been updated and revised with respect to the latest developments in astronomy. The chapter on mathematical methods has been redesigned and the software used is now exclusively Python. From the contents: Spherical astronomy - History of astronomy - Celestial mechanics - Astronomical instruments - Physics of the bodies of the solar system - The Sun - State variables of the stars - Stellar atmospheres - Stellar structure - Stellar evolution - Interstellar matter - The Galaxy - Extragalactic systems - Cosmology - Astrobiology - Mathematical methods. This book is a translation of the original German 4th edition *Einführung in Astronomie und Astrophysik* by Arnold Hanslmeier, published by Springer-Verlag GmbH Germany, part of Springer Nature in 2020. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

Nietzsche und die antike Philosophie Daniel W. Conway. 1992

The Greater Poems of Virgil Virgil. 1893

Latein-Lernvokabular Ciceros Reden Gottfried Bloch. 2011

Ancient Ethnography Eran Almagor, Joseph Skinner. 2013-10-24 Ethnographic writing has become all but ubiquitous in recent years. Although now considered a thoroughly modern and increasingly

indispensable field of study, Ethnography's roots go all the way back to antiquity. This volume brings together eleven original essays exploring the wider intellectual and cultural milieu from which ancient ethnography arose, its transformation and development in antiquity, and the way in which 19th century receptions of ethnographic traditions helped shape the modern study of the ancient world. Finally, it addresses the extent to which all these themes remain inextricably intertwined with shifting and often highly contested notions of culture, power and identity. Its chapters deal with the origins of the term 'barbarian', the role of ethnography in Tacitus' *Germania*, Plutarch's *Lives*, Xenophon's *Anabasis*, and Athenaeus' *Deipnosophistae*, Herodotean storytelling, Henry and George Rawlinson, and Megasthenes' treatise on India. At a time when modern ethnographies are becoming increasingly prevalent, wide-ranging, and experimental in their approach to describing cultural difference, this book encourages us to think about ancient ethnography in new and interesting ways, highlighting the wealth of material available for study and the complexities underpinning ancient and modern notions of what it meant to be Greek, Roman or 'barbarian'.

Logic for Computer Scientists Uwe Schöning.2009-11-03 This book introduces the notions and methods of formal logic from a computer science standpoint, covering propositional logic, predicate logic, and foundations of logic programming. The classic text is replete with illustrative examples and exercises. It presents applications and themes of computer science research such as resolution, automated deduction, and logic programming in a rigorous but readable way. The style and scope of the work, rounded out by the inclusion of exercises, make this an excellent textbook for an advanced undergraduate course in logic for computer scientists.

Reshaping Museum Space Suzanne Macleod.2005-10-09 Reshaping Museum Space pulls together the views of an international group of museum professionals, architects, designers and academics highlights the complexity, significance and malleability of museum space, and provides reflections upon recent developments in museum architecture and exhibition design. Various chapters concentrate on the process of architectural and spatial reshaping, and the problems of navigating the often contradictory agendas and aspirations of the broad range of professionals and stakeholders involved in any new project. Contributors review recent new build, expansion and exhibition projects questioning the types of museum space required at the beginning of the twenty-first century and highlighting a range of possibilities for creative museum design. Essential reading for anyone involved in creating, designing and project managing the development of museum exhibits, and vital reading for students of the discipline.

The School of Rome W. Martin Bloomer.2011-04-27 This fascinating cultural and intellectual history focuses on education as practiced by the imperial age Romans, looking at what they considered the value of education and its effect on children. W. Martin Bloomer details the processes, exercises, claims, and contexts of liberal education from the late first century BCE to the third century CE—the epoch of rhetorical education. He examines the adaptation of Greek institutions, methods, and texts by the Romans, and traces the Romans' own history of education. Bloomer argues that while Rome's enduring educational legacy includes the seven liberal arts and a canon of school texts, its practice of competitive displays of reading, writing, and reciting were intended to instill in the young social as well as intellectual ideas.

Introduction to Ancient History Hermann Bengtson.1975-01-01 Our translation is made especially for students who have not yet acquired facility in German. It departs from Professor Bengtson's text mainly in that the general bibliographical appendix has been reorganized to conform with the plan of the Cambridge Ancient History and also has been revised with the English-reading student in mind.

Mother to Mother Sindiwe Magona.2022-08-23 A searing novel, told in letter form, that explores the South African legacy of apartheid through the lens of a woman whose Black son has just murdered a white woman. *Mother to Mother* is a novel with depth, at once an emotional plea for compassion and understanding, and a sharp look at the impacts of colonialism and apartheid on South African families. Inspired by the true story of Fulbright scholar Amy Biehl's murder, the book takes the form of a letter to the victim's mother. The murderer's mother, Mandisa, speaks of a life marked by oppression and injustice. Through her writing, Mandisa reveals a colonized society that not only allowed but perpetuated violence against women and impoverished Black South Africans under the reign of apartheid. This book is not an apology for the murder but rather something more. It seeks to connect, through empathy and storytelling, one pained mother with another who is grief-stricken and in mourning. A beautifully written exploration of the society that bred such violence, *Mother to Mother* will resonate with readers interested in understanding and ending racial injustice, as well as the lasting colonial foundations of oppression.

Formal Linguistics and the Teaching of Latin Giuliana Giusti, Rossella Iovino, Renato Oniga.2011-05-25 This volume offers a coherent collection of 26 papers presented at an international conference held in November 2010, exploring the latest achievements of formal and comparative linguistics applied to the teaching of Latin. The three sections (syntax and morphology, semantics and pragmatics, history and theory of teaching) compare Latin with different ancient and modern languages, aiming to represent grammar rules as the product of mental processes. The book is addressed to linguists, teachers and students, who are looking for new perspectives to update their approach to classical Latin.
