Twelve Years a Slave Solomon Northup.2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Getting the Best Out of Your Competencies Marie Strebler, Dilys Robinson, Paul Heron.1997 A study explored practical issues in the use of competencies in performance review and in assessment and measurement of competencies by eight leading British employers at different stages in their use of competencies. The practices of 5 organizations using competencies for performance review of their managers were evaluated through feedback from 184 employees. Respondents were satisfied that competencies would help them develop required skills but not that they reflected their technical and professional skills. Satisfaction with the use of competencies was determined by the extent to which respondents believed they would enhance their career prospects. Most agreed that the assessment process relied too heavily on managers' judgments.

Respondents were confident they could assess and develop their own competencies. When the outcome of the performance review resulted in recommended training and development for the current job, it had a negative impact. When it resulted in a pay increase, it had a positive impact. Introducing competencies without a clear business purpose raised staff suspicion. The perceived job fit and relevance of competency frameworks influenced satisfaction. Two simple interventions that employers can introduce to add the most value to their practices were using competencies to define job requirements and training staff in the use of competencies. (Appendixes contain 29 references, an annotated bibliography with 49 items, and data tables.) (YLB)
