Mess Keri Smith.2010-09-07 From the internationally bestselling creator of *Wreck This Journal*, a book that celebrates mistake- and mess-making like never before... Your whole life, you've been taught to avoid making a mess: try to keep everything under control, color inside the lines, make it perfect, and at all costs, avoid contact with things that stain. This book asks you to do the opposite of what you have been taught. Think of it as your own personal rumpus room. A place to let loose, to trash, to spew, to do the things you are not allowed to do in the "real world." There are only three rules you will find in this book: 1. Do not try to make something beautiful. 2. Do not think too much. (There is no "wrong.") 3. Continue under all circumstances. It's time to make a mess.

Onion and avocado skins, chamomile and birch bark, and nettles and acorns can produce lovely, ethereal colors and effects. *The Wild Dyer* demystifies this ecoconscious art, focusing on foraging and growing dying materials; repurposing kitchen trimmings; making and using long-lasting dyes; and creating stitched projects. Workspace setup, equipment, and fabric choices and care are all discussed. Beautiful photographs and easy-to-follow instructions illustrate how to make fifteen exquisite household items, from a drawstring bag to a gardener's smock and a reversible patchwork blanket. *The Wild Dyer* is a complete guide for both beginners and experienced artists seeking to expand their knowledge of this increasingly popular craft.

Natural Colorants for Dyeing and Lake Pigments Jo Kirby, Maarten van Bommel, André Verhecken, Marika Spring, Ina Vanden Berghe, Heike Stege, Mark Richter.2014 How did textile dyers manipulate the natural dyes at their disposal to obtain the colours we see on fabrics and tapestries in museum collections today? How did colour makers prepare the translucent lake pigments used by artists to give richness and volume to painted draperies and subtle modulations of colour and space in the depiction of landscape? Some of the technological factors the dyer or pigment maker could control very easily have a marked effect on the final colour: the mordant salt used on the textile

fibre; the temperature at which the dye was extracted from the raw material or dyeing was carried out; the method of extracting the during pigment preparation. These factors were explored as part of a research activity within the European project CHARISMA (Cultural Heritage Advanced Research Infrastructures -- Synergy for a Multidisciplinary Approach to Conservation/Restoration), a Research Infrastructures project founded by the European Union 7th Framework Programme (2009-2014, grant agreement no. 228330). Recipes for dyeing and lake pigment making using natural dyes, based on those found in historical documentary sources, were designed to study the effects of these and other factors and used during two CHARISMA workshops held in 2011 -- one on making traditional lake pigments, the other on dyeing. This book brings together the recipes used during these very successful workshops with discussions of the historical recipes upon which they were based and is illustrated with photographs taken during the workshops. The most widely used European natural dyes are described briefly and a short account of the chemistry of dyeing and lake pigment is included. The book is aimed primarily at those who need easily modified and reproducible recipes for teaching or scientific work: conservators, scientists and teachers. -- Provided by publisher

Make Ink Jason Logan.2018-09-11 “The pigments he concocts from these humble beginnings are as fun to make as they are eye-opening to work with . . . the world never quite looks the same.”

—MarthaStewart.com A 2018 Best Book of the Year—The Guardian The Toronto Ink Company was founded in 2014 by designer and artist Jason Logan as a citizen science experiment to make eco-friendly, urban ink from street-harvested pigments. In *Make Ink*, Logan delves into the history of inkmaking and the science of distilling pigment from the natural world. Readers will learn how to forage for materials such as soot, rust, cigarette butts, peach pits, and black walnut, then how to mix, test, and transform these ingredients into rich, vibrant inks that are sensitive to both place and environment. Organized by color, and featuring lovely minimalist photography throughout, *Make Ink* combines science, art, and craft to instill the basics of ink making and demonstrate the beauty and necessity of engaging with one of mankind’s oldest tools of communication. “Logan demystifies the process, encouraging experimentation and taking a fresh look at urban environments.” —NPR “The book is full of inspiration and takes a lot of the mystery out of ink making, at least at its simplest level. And it also reminds me why I love ink—any ink or liquid color as much as I do.” —The Well-Appointed Desk “Quite a few recipes . . . that use color from the kitchen: carrots, black beans, blueberries, turmeric, and onion skins all make beautiful ink colors.” —Design Observer “*Make Ink* opens up about methods, providing an open source guide to DIY ink.” —CityLab

A History of Communications Marshall T. Poe.2010-12-06 *A History of Communications* advances a theory of media that explains the origins and impact of different forms of communication - speech, writing, print, electronic devices and the Internet - on human history in the long term. New media are 'pulled' into widespread use by broad historical trends and these media, once in widespread use, 'push' social institutions and beliefs in predictable directions. This view allows us to see for the first time what is truly new about the Internet, what is not, and where it is taking us.

The World of Apartamento Omar Sosa,Nacho Alegre,Marco Velardi.2018-10-16 *Apartamento* is widely recognized as today's most influential interiors magazine. International, well-designed, and simply written since 2008, it is an indispensable resource for individuals who are passionate about the way they live. *Apartamento* breaks the traditional magazine boundaries that separate home design from homeowner, and offers readers a glimpse inside the lived-in, often cluttered homes of celebrities and industry legends such as REM frontman Michael Stipe and indie screen queen Chlo Sevigny. *The World of Apartamento* is a celebration of the magazine's 10th anniversary and features the best and most inspirational interiors from the publication's pages. Like the magazine itself, the book is a carefully developed editorial mix--high-quality writing and beautiful photography--that communicates genuine stories and intimate moments. With more than 300 photographs and an eclectic mix of subjects like Fran ois Halard, Yorgos Lanthimos, Ezra Koenig, Paz de la Huerta, and more, the book is an inspiring look at individual design choices.

Goethe's “Exposure of Newton's Theory” Michael Duck,Michael Petry.2016-03-11 Johann Wolfgang von Goethe, although best known for his literary work, was also a keen and outspoken natural scientist. In the second polemic part of *Zur Farbenlehre* (Theory of Colours), for example, Goethe attacked Isaac Newton's ground-breaking revelation that light is heterogeneous and not immutable, as was previously thought. This polemic was unanimously rejected by the physicists of the day, and has often been omitted from compendia of Goethe's works. Indeed, although Goethe repeated all of Newton's key experiments, he was never able to achieve the same results. Many reasons have been proposed for this, ranging from the psychological — such as a blind hatred of Newtonism, self-deceit and paranoid psychosis — to accusations of incapability — Goethe simply did not understand the experiments. Yet Goethe was never to be dissuaded from this passionate conviction. This translation of Goethe's polemic, published for the first time in English, makes it

clear that Goethe did understand the thrust of Newton's logic. It demonstrates that Goethe's resistance to Newton's theory stemmed from something quite different; his pantheism — the belief in the spiritual nature of light. This prevented him from allowing himself to think of light in physical terms and accepting that it is anything other than simple, immutable, and unknowable. This important new translation will be useful to natural scientists, historians, philosophers and theologians alike and will delight anyone hoping to add a further layer of nuance to Goethe's complex portrait. Contents: Introduction (Michael Duck) Preface to the First Edition of *Zur Farbenlehre* (1810) Exposure of Newton's Theory Appendix Readership: Goethe researchers, historians and philosophers of science, historians of Christianity and readers interested in Goethe's work. Key Features: The first English translation of Goethe's Theory of Colours Johann Wolfgang von Goethe, Germany's Shakespeare, confronts Isaac Newton, possibly the greatest scientist of all time in this well-known text

Crafting Feminism from Literary Modernism to the Multimedia Present Amy E. Elkins.2022-10 *Crafting Feminism* develops a dynamic study of craft and art-making in modern and contemporary feminist writing. In evocative readings of literary works from Virginia Woolf to Zadie Smith, this book expands our sense of transartistic modernist scholarship to encompass process-oriented and medium-specific analyses of textile arts, digital design, collage, photography, painting, and sculpture in literary culture. By integrating these craft practices into the book's enlightening archive, Elkins's theoretical argument extends a reading of craft metaphors into the material present. *Crafting Feminism* demonstrates how writers have engaged with handiwork across generations and have undertaken the crafting of a new modernity, one that is queer and feminist-threaded, messy, shattered, cut-up, pasted together, preserved, repaired, reflected, and spun out. An avant-garde work of scholarship, this book interweaves queer research methods and interdisciplinary rigor with a series of surprising archival discoveries. Making visible the collaborative, creative features of craft, Elkins captivates readers with generous illustrations and a series of *Techne* interchapters-interludes between longer chapters, which powerfully convey the symbiosis between feminist theory and method, and detail the network of archival influences that underpin this volume's hybrid approach. Foregrounding the work of decentering patriarchal and Eurocentric legacies of artistic authority, Elkins champions the diverse, intergenerational history of craft as a way to reposition intersectional makers at the heart of literary culture. An original and compelling study, *Crafting Feminism* breaks new ground in modernist and visual studies, digital humanities, and feminist, queer, and critical race theory.

Cyanotype Toning Annette Golaz.2021-09-30 Cyanotype is the most accessible and frequently used of all the alternative photographic processes. When utilized properly, it has the potential to rival other processes when it comes to detail and tonal range, but its Prussian blue color isn't always suitable for the final photograph. Throughout history, cyanotype prints have been toned not only with various—and at times hazardous—chemicals but also with more natural ingredients like tea and coffee. Since the cyanotype itself is non-toxic, Cyanotype Toning will champion an innovative process, developed by the author, of toning cyanotypes with natural material. This process, which is easy and reliable, offers a much broader range of possible colors and even beautiful black and whites. Even duotone or tricolor prints can be attained. The book consists of two parts. Part One is a step-by-step how-to section including all the information that a student at any level needs to achieve a successfully toned print. Easy-to-understand background information is provided on how and why the process works so that readers can venture on their own into the world of natural colors. The first part also has a detailed section on all the factors that can influence the outcome, like paper choice, water quality, properties of the plants, temperature of the bath and the duration of the toning. Part Two is devoted to contemporary artists who have explored toning with botanicals and integrated the process into their creative practice. The book includes: A list of equipment and supplies needed. In depth information about useful plants and the specific properties that make them suitable for toning cyanotypes. Concise step-by-step instructions for printing cyanotypes successfully. A chart of more

than 60 tested papers with recommendations on paper choice. Step-by-step generic instructions on toning with botanicals. Troubleshooting toning with botanicals. More detailed recipes for specific colors with information about the plants. Step-by-step instructions on how to print duotone and tricolor prints. A range of creative ideas on how to use the process in classrooms and with different age groups. A comprehensive list of more than 380 tested parts of plants and possible color outcomes. Using botanicals to tone cyanotypes broadens the color spectrum, enlarges creative possibilities and makes the cyanotype process even more versatile. The process is not cut and dried science but a limitless field for discovery and surprises. Cyanotype Toning provides accessible information and instructions for readers at all levels. It is comprehensive and explanatory, so that readers can expand on the subject on their own, as did the contemporary artists who share their experiences and the works they have created using this innovative toning process.

What did its artists use to paint their magnificent frescoes? Where do indigo and ochre come from? Why is purple the colour of royalty? What are pastels? How many colours are there? Why do we dye our food? Who invented ink? What is the symbolism of yellow? From cerise to crimson, from puce to periwinkle, this book is as rich, varied and delightful as a box of crayons.
