Man and Nature in the Renaissance Allen G. Debus.1978-10-31 An introduction to science and medicine during the earlier phases of the scientific revolution.

Quas Primas Pope Pius, M. Egan, Rev M Egan S.J.2015-03-13 THE Encyclical of our Holy Father, Pius XI., on the Institution of the Feast of Christ Our King is a fitting crown to the devotion and the vast spiritual awakening which marked the Holy Year, 1925. In fulfilment of the commission of Our Lord to St. Peter, and aided by the light and grace that are given to every man according to his need, the Vicar of Christ addresses words of timely guidance and help to the Catholic world. We need that guidance today. In their greed for wealth, the senseless hurry of business, and the rush for pleasure men forget, then reject, Divine things. Our superficial education, the shallow science and the sensationalism of the newspapers bewilder men's minds. They cannot think steadily and soundly; they are tossed about by every wind of doctrine. They lose Christ - not from rebellion, but from indifference. Man-made religions and scientific theories come and go like the leaves from spring to winter, and as they pass they leave men more and more confused. Outside the Catholic Church, there is no centre of spiritual authority, no institution that can claim to possess that body of truths which was the legacy of Christ to His Apostles, to be guarded by them for men through all time. There is no other infallible teacher. Man's life must be reasonable, founded on true philosophy. For very many of those who do not recognise the Divine claims of Christ there is a philosophy of life - but it is a destructive philosophy. Its authority is unstable and uncertain, that of a learning which imposes itself on the less learned. It changes as new theories are born, but always leaves greater uncertainty, as it saps the foundations of faith and drives men to religious indifference or to scepticism. Truth is put farther and farther away. Religion, then, and philosophy for such men come to be no more than a collection of words, of hazy definitions, of vague counsels of morality, with no firm foundation. Consequently, the law of sacrifice and the Christian moral code, so clearly stated in the teaching of Our Lord, are rejected, and men accept gladly those theories of conduct only which demand no moral effort and impose no burden of sacrifice. The God of the new philosophies is not real: He is not personal; He does not command. Christ for them is not the Divine Christ, who knew Himself to be God, who loved men, and lived and taught in Galilee with an authority which He claimed as Divine; who confirmed the Divine law and made laws as His own; whose praise and blame are for eternity; whose Kingdom we must enter by the way which He has appointed, through faith, baptism, sacrifice and good works.

A Global Alliance Against Forced Labour International Labour Office.2005 This report is an account of contemporary forced labour to date. It provides the first global and regional estimates by an international organization of forced labour in the world today, including the number of people affected and how many of them are victims of trafficking, as well as of the profits made by the criminals exploiting trafficked workers. Based on these data, the report highlights the gravity of the problem of forced labour. From this data emerges three major categories of forced labour: forced labour imposed by the State for economic, political or other purposes, forced labour linked to poverty and discrimination and forced labour that arises from migration and trafficking of workers across the world, often associated with globalization. The report provides evidence that the abolition of forced labour represents a challenge for virtually every country in the world industrialized, transition and developing countries alike. It assesses experience at the national level in taking up this challenge, with particular emphasis on the importance of sound laws and policies and their rigorous enforcement, as well as effective prevention strategies. The report also reviews the actions against forced labour taken over the past four years by the ILO and its tripartite partners governments, employers and workers. It calls for a new global alliance to relegate forced labour to history.

Social Anthropology in Perspective I. M. Lewis.1981 Social anthropology is, in the classic definition, dedicated to the study of distant civilizations in their traditional and contemporary forms. But there is a larger aspiration: the comparative study of all human societies in the light of those challengingly unfamiliar beliefs and customs that expose our own ethnocentric limitations and put us in our place within the wider gamut of the world's civilizations. Thematically guided by social setting and cultural expression of identity, *Social and Cultural Anthropology in Perspective* is a dynamic and highly acclaimed introduction to the field of social anthropology, which also examines its links with cultural anthropology. A challenging new introduction critically surveys the latest trends, pointing to weaknesses as well as strengths.

Memoirs of My Nervous Illness Daniel Paul Schreber.2000-01-31 In 1884, the distinguished German jurist Daniel Paul Schreber suffered the first of a series of mental collapses that would afflict him for the rest of his life. In his madness, the world was revealed to him as an enormous architecture of nerves, dominated by a predatory God. It became clear to Schreber that his personal crisis was implicated in what he called a crisis in God's realm, one that had transformed the rest of humanity into a race of fantasms. There was only one remedy; as his doctor noted: Schreber considered himself chosen to redeem the world, and to restore to it the lost state of Blessedness. This, however, he could only do by first being transformed from a man into a woman....

Ethics of Hospitality Daniel Innerarity.2017-01-12 The source of hospitality lies in the fundamental ethical experiences that make up the fabric of the social lives of people. Therein lies a primary form of humanity. Whether we are guests or hosts, this reveals our situation in a world made up of receiving and meeting, leaving room for the liberty to give and receive beyond the imperatives of reciprocity. This book proposes an ethic that

promotes the possibility of stirring emotion before that of protecting ourselves from unexpected encounters. Fundamental ethical competence consists of opening up to the wholly other and to others, to be accessible to the world's solicitations. There is moral superiority of vulnerable love over control and moderation, of generous passion over rational prudence and of excess over exchange. Constructing an ethic of hospitality is essential at a time when we are torn between the imperatives of modernization and growth and the demands of concern and protection. The experience we all have today, that of the fragility of the world, is giving rise to a powerful tendency toward solicitude. From such a perspective, the duty of individuals no longer consists of protecting themselves from society, but of defending it, taking care of a social fabric outside of which no identity can be formed.

Considerations on Western Marxism Perry Anderson.2016-02-23 This synoptic essay considers the nature and evolution of the Marxist theory that developed in Western Europe, after the defeat of the proletarian rebellions in the West and the isolation of the Russian Revolution in the East in the early 1920s. It focuses particularly on the work of Lukcs, Korsch and Gramsci; Adorno, Marcuse and Benjamin; Sartre and Althusser; and Della Volpe and Colletti, together with other figures within Western Marxism from 1920 to 1975. The theoretical production of each of these thinkers is related simultaneously to the practical fate of working-class struggles and to the cultural mutations of bourgeois thought in their time. The philosophical antecedents of the various school within this tradition - Lukcsian, Gramscian, Frankfurt, Sartrean, Althusserian and Della Volpean - are compared, and the specific innovations of their respective systems surveyed. The structural unity of 'Western Marxism', beyond the diversity of its individual thinkers, is then assessed, in a balance-sheet that contrasts its heritage with the tradition of 'classical' Marxism that preceded it, and with the commanding problems which will confront any historical materialism to succeed it.

Yaxchilan Carolyn E. Tate.2013-08-28 As archaeologists peel away the jungle covering that has both obscured and preserved the ancient Maya cities of Mexico and Central America, other scholars have only a limited time to study and understand the sites before the jungle, weather, and human encroachment efface them again, perhaps forever. This urgency underlies *Yaxchilan: The Design of a Maya Ceremonial City*, Carolyn Tate's comprehensive catalog and analysis of all the city's extant buildings and sculptures. During a year of field work, Tate fully documented the appearance of the site as of 1987. For each sculpture and building, she records its discovery, present location, condition, measurements, and astronomical orientation and reconstructs its Long Counts and Julian dates from Calendar Rounds. Line drawings and photographs provide a visual document of the art and architecture of Yaxchilan. More than mere documentation, however, the book explores the phenomenon of art within Maya society. Tate establishes a general framework of cultural practices, spiritual beliefs, and knowledge likely to have been shared by eighth-century Maya people. The process of making public art is considered in relation to other modes of aesthetic expression, such as oral tradition and ritual. This kind of analysis is new in Maya studies and offers fresh insight into the function of these magnificent cities and the powerful role public art and architecture play in establishing cultural norms, in education in a semiliterate society, and in developing the personal and community identities of individuals. Several chapters cover the specifics of art and iconography at Yaxchilan as a basis for examining the creation of the city in the Late Classic period. Individual sculptures are attributed to the hands of single artists and workshops, thus aiding in dating several of the monuments. The significance of headdresses, backracks, and other costume elements seen on monuments is tied to specific rituals and fashions, and influence from other sites is traced. These analyses lead to a history of the design of the city under the reigns of Shield Jaguar (A.D. 681-741) and Bird Jaguar IV (A.D. 752-772). In Tate's view, Yaxchilan and other Maya cities were designed as both a theater for ritual activities and a nexus of public art and social structures that were crucial in defining the self within Maya society.

Deciphering the Proto-Sinaitic Script Paul D. LeBlanc.2017-12-01 Egypt, Judaism, and the history of the alphabet intersect in *Deciphering The Proto-Sinaitic Script*. From its initial appearance, in around the 18th century BC, the origins of proto-Sinaitic writing can be traced back to Egypt's Middle Kingdom period, when it was somehow derived from the hieroglyphs, its parent-system. The importance of proto-Sinaitic lies in the fact that it represents the alphabet's earliest developmental period—a kind of 'missing link' between the hieroglyphs and these early Semitic alphabets from which our own Latin one descends, by way of the Phoenician and Greek. However, up until now, proto-Sinaitic has remained for the most part undeciphered. The intriguing possibility of giving voice to a lost culture or civilization from thousands of years ago is tantalizing. Representing one of the most enticing problems in modern archaeology, the enigmatic allure surrounding ancient languages and the undeciphered scripts in which they are encoded is truly vexing. In his bold and original research, LeBlanc argues convincingly to have solved the mystery and uncovers some incredibly enthralling information about the people who invented it: The epigraphic evidence suggests that the Egyptianized Canaanites who first devised the proto-Sinaitic script were surprisingly instrumental in the formation of early Israelite culture and proto-Judaism.

Source Book in Bioethics Albert R. Jonsen, Robert M. Veatch, LeRoy Walters.1999-09-07 Government agencies and commissions, courts, and legislatures have during the past several decades produced reports, rendered decisions, and passed laws that have both defined the fundamental issues in the field of bioethics and established ways of managing them in our society. Providing a history of these key bioethical decisions, this Source Book in Bioethics is the first and only comprehensive collection of the critical public documents in biomedical ethics, including many hard-to-find or out-of-print materials. Covering the period from 1947 to 1995, this volume brings together core legislative documents, court briefs, and reports by professional organizations, public bodies, and governments around the world. Sections on human experimentation, care of the terminally ill, genetics, human reproduction, and emerging areas in bioethics include such pivotal works as The Nuremberg Code, The Tuskegee Report, and In the Matter of Baby M, as well as less readily available documents as The Declaration of Inuyama, the Council for International Organizations of Medical Sciences statement on genetic engineering, and The Warnock Committee Report on reproductive technologies from the United Kingdom. Three eminent scholars in the field provide brief introductions to each document explaining the significance of these classic sources. This historical volume will be a standard text for courses in bioethics, health policy, and death and dying, and a primary reference for anyone interested in this increasingly relevant field.

The Oxford Handbook of Aquinas Brian Davies, Eleonore Stump.2012-01-25 Thomas Aquinas (1224/6-1274) lived an active, demanding academic

and ecclesiastical life that ended while he was still comparatively young. He nonetheless produced many works, varying in length from a few pages to a few volumes. The present book is an introduction to this influential author and a guide to his thought on almost all the major topics on which he wrote. The book begins with an account of Aquinas's life and works. The next section contains a series of essays that set Aquinas in his intellectual context. They focus on the philosophical sources that are likely to have influenced his thinking, the most prominent of which were certain Greek philosophers (chiefly Aristotle), Latin Christian writers (such as Augustine), and Jewish and Islamic authors (such as Maimonides and Avicenna). The subsequent sections of the book address topics that Aquinas himself discussed. These include metaphysics, the existence and nature of God, ethics and action theory, epistemology, philosophy of mind and human nature, the nature of language, and an array of theological topics, including Trinity, Incarnation, sacraments, resurrection, and the problem of evil, among others. These sections include more than thirty contributions on topics central to Aquinas's own worldview. The final sections of the volume address the development of Aquinas's thought and its historical influence. Any attempt to present the views of a philosopher in an earlier historical period that is meant to foster reflection on that thinker's views needs to be both historically faithful and also philosophically engaged. The present book combines both exposition and evaluation insofar as its contributors have space to engage in both. This Handbook is therefore meant to be useful to someone wanting to learn about Aquinas's philosophy and theology while also looking for help in philosophical interaction with it.

The Changing Face of War Martin van Creveld.2008-12-18 One of the most influential experts on military history and strategy has now written his magnum opus, an original and provocative account of the past hundred years of global conflict. The Changing Face of War is the book that reveals the path that led to the impasse in Iraq, why powerful standing armies are now helpless against ill-equipped insurgents, and how the security of sovereign nations may be maintained in the future. While paying close attention to the unpredictable human element, Martin van Creveld takes us on a journey from the last century's clashes of massive armies to today's short, high-tech, lopsided skirmishes and frustrating quagmires. Here is the world as it was in 1900, controlled by a handful of "great powers," mostly European, with the memories of eighteenth-century wars still fresh. Armies were still led by officers riding on horses, messages conveyed by hand, drum, and bugle. As the telegraph, telephone, and radio revolutionized communications, big-gun battleships like the British Dreadnought, the tank, and the airplane altered warfare. Van Creveld paints a powerful portrait

of World War I, in which armies would be counted in the millions, casualties—such as those in the cataclysmic battle of the Marne—would become staggering, and deadly new weapons, such as poison gas, would be introduced. Ultimately, Germany's plans to outmaneuver her enemies to victory came to naught as the battle lines ossified and the winners proved to be those who could produce the most weapons and provide the most soldiers. The Changing Face of War then propels us to the even greater global carnage of World War II. Innovations in armored warfare and airpower, along with technological breakthroughs from radar to the atom bomb, transformed war from simple slaughter to a complex event requiring new expertise—all in the service of savagery, from Pearl Harbor to Dachau to Hiroshima. The further development of nuclear weapons during the Cold War shifts nations from fighting wars to deterring them: The number of active troops shrinks and the influence of the military declines as civilian think tanks set policy and volunteer forces “decouple” the idea of defense from the world of everyday people. War today, van Crevald tells us, is a mix of the ancient and the advanced, as state-of-the-art armies fail to defeat small groups of crudely outfitted guerrilla and terrorists, a pattern that began with Britain's exit from India and culminating in American misadventures in Vietnam and Iraq, examples of what the author calls a “long, almost unbroken record of failure.” How to learn from the recent past to reshape the military for this new challenge—how to still save, in a sense, the free world—is the ultimate lesson of this big, bold, and cautionary work. The Changing Face of War is sure to become the standard source on this essential subject.

The Semiotics of Discourse Jacques Fontanille. 2006 Original Scholarly Monograph

Dialogue with Nietzsche Gianni Vattimo. 2006 For more than forty years, Gianni Vattimo, one of Europe's most important and influential philosophers, has been a leading participant in the postwar turn that has brought Nietzsche back to the center of philosophical enquiry. In this collection of his essays on the subject, which is a dialogue both with Nietzsche and with the Nietzschean tradition, Vattimo explores the German philosopher's most important works and discusses his views on the *Übermensch*, time, history, truth, hermeneutics, ethics, and aesthetics. He also presents a different, more Italian Nietzsche, one that diverges from German and French characterizations. Many contemporary French and poststructuralist philosophers offer literary or aesthetic readings of Nietzsche's work that downplay its political import. Shaped by the revolutionary tradition of 1968, Vattimo's interpretations take Nietzsche seriously as a political philosopher and argue for and defend his relevance to projects for social and political change. He emphasizes the hermeneutic aspect of Nietzsche's philosophy, characterizing the Nietzschean project as a political hermeneutics. Vattimo also grapples with Heidegger, a philosopher who has had a profound influence on the interpretation and understanding of Nietzsche. Vattimo examines Heidegger's philosophy through its complex relationship to Nietzsche's, and he produces a Heideggerian understanding of Nietzsche that paradoxically goes against Heidegger's own readings of Nietzsche's work. Heidegger believed Nietzsche was the ultimate metaphysician; Vattimo sees him as the founder of postmetaphysical philosophy. Throughout these essays, Vattimo draws on and quotes extensively from fragments in Nietzsche's notebooks, many of which have never before been translated into English. His writing is clear, elegant, and accessible, and, for the first time, Vattimo's own intellectual developments, shifts, and continuities can be clearly discerned. The loyal testimony and unique perspective in *Dialogue with Nietzsche* makes a convincing case for another orientation in Nietzsche scholarship.
