*Plato's Conception of Justice and the Question of Human Dignity*

Marek Piechowiak.2019 In this first comprehensive study of Plato's conception of justice, apprehension of human dignity plays a crucial role for understanding an individual in relation to law and state. Plato's philosophy turns out to provide foundations for modern-day human rights protection rather than for totalitarian approaches.

*Religion and Difference* Trygve Wyller,Daria Pezzoli-

Olgiati,Stefanie Knauss,Hans-Günter Heimbrock,Hans-Joachim Sander,Carla Danani.2019-11-11 In democracies of advanced

plurality, religion is a contested and powerful part of public discussions and practices. Today, religious difference is articulated and negotiated controversially in interaction with other spheres of society. While there are clear tendencies of increasing polarization, we also encounter moments of acknowledgement and appreciation of plurality. Facing these complexities and challenges of our time, this volume scrutinizes contested practices where religious difference matters.

Committed to an interdisciplinary exchange between theology, the study of religion and political philosophy, this volume is grounded in the attention for concrete practices and phenomena as well as the conviction that difference is both a productive concept and an enriching experience. Exploring practices of shared places, sexuality, justice and the commitment to the human being in education, migration and violent conflicts, the volume as a whole contributes to the analysis of contested social and political practices in order to investigate the significance and role of religion in contemporary societies, and thus it further develops theoretical reflection about religion in contemporary research.

Neue Pflanzzüchtungstechnologien wie CRISPR/Cas haben das Potenzial zur Verbesserung der Nachhaltigkeit in der Landwirtschaft. Mit den Techniken des Genome Editing können die Erträge bei gleichzeitig reduziertem Pestizideinsatz gesteigert werden. Auch an der Verbesserung des Nährwerts von Pflanzen wird weltweit geforscht. Ob die neuen Techniken allerdings in Europa zum Einsatz kommen, ist gegenwärtig fraglich. Soll Genome Editing wie die klassische Gentechnik reguliert werden? Und wie kann eine verantwortliche Auslegung des Vorsorgeprinzips beim Einsatz der neuen Technologien aussehen? Die politische Diskussion um die Bewertung der neuen Pflanzzüchtungstechnologien ist in vollem Gange. Die Beiträge dieses Sammelbands präsentieren rechtliche, soziale und ethische Aspekte zum Thema, die auf einer Summer School des Instituts Technik-Theologie-Naturwissenschaften (TTN) an der Ludwig-Maximilians-Universität München zur Diskussion standen. *Appearance Stripped Bare* Massimiliano Gioni. 2019-06-26  
The first book to explore two of the biggest names in modern and contemporary art side by side, Marcel Duchamp and Jeff Koons. In the first half of the 20th century, Marcel Duchamp redefined what we consider art and what it means to be an artist. Many of his ideas return, transformed, in the work of Jeff Koons, born when Duchamp was 68 years old and whose own career lit up the art

world of the late 20th and early 21st centuries. This is the first book to explore the affinities between these two highly influential artists, whose creative universes similarly question the function of objects and the allure of commodities. International art historians, writers, and curators contribute their expertise on topics such as each artist's persona, as well as reflecting on the influence of technology and sexuality on their work. The publication of this intriguing book coincides with an exhibition at the Museo Jumex in Mexico City, opening in May 2019. This book is a copublication with Fundación Jumex Arte Contemporáneo.

**Edmond Richer and the Renewal of Conciliarism in the 17th century** Philippe Denis. 2019-08-12 In 1611 Edmond Richer, the syndic of the Faculty of Theology of Paris, published a short but incisive defence of the conciliarist doctrine under the title *De ecclesiastica et politica potestate*. He claimed that this doctrine had been almost uninterruptedly followed by the University of the Paris since the time of the Council of Constance in the early 15th century. Within two years, at least six Latin, French or bilingual editions of the treatise saw the light as well as an English and a Dutch translation. The book was condemned at a meeting of the French bishops in March 1612 and its author was dismissed from his position of syndic of the Faculty of Theology a few months later. He withdrew from public life but remained influential. He continued to write in defence of the conciliarist doctrine and the so-called liberties of the Gallican Church until his death in 1631. He vehemently opposed Cardinal Bellarmine's doctrine of the indirect power of popes in temporal matters but never subscribed to the doctrine of the divine power of kings. Most of his books were published posthumously. Philippe Denis retraces Edmond Richer's career and examines his ecclesiological and political thinking. Without taking all the syndic's opinions at face value, this volume commits itself to taking seriously Richer's declared intention, which was to vindicate the teaching of the School of Paris and that of Jean Gerson in particular. Philippe Denis places

the heated, sometimes aggressive, debates between Richer and his adversaries in the context of a double progression: that of the doctrine of an absolute monarchy, a form of government which had been developing since the troubles of the League, and that of the Ultramontane ideas, often disputed but supported with growing vigour, in France and elsewhere, in the context of the reception of the Council of Trent. Philippe Denis presents the English translation of his book originally published in French (Editions du Cerf in Paris, 2014).

**Re-** Christoph F. E. Holzhey, Arnd Wedemeyer.2019-01-22 What's in a prefix? How to read a prefix as short as 're-'? Does 're-' really signify? Can it point into a specific direction? Can it reverse? Can it become the shibboleth of a 'postcritical' reboot? At first glance transparent and directional, 're-' complicates the linear and teleological models commonly accepted as structuring the relations between past, present, and future, opening onto errant temporalities.
