International Manual of Oncology Practice Ramon Andrade De Mello, Giannis Mountzios, Álvaro A. Tavares. 2019-10-15 Cancer is a very aggressive disease and currently it has been considered a challenge to oncologists and cancer patients worldwide. Nowadays, several therapeutic strategies had improved toward last decades. Surgery is many times still the best curative treatment, mainly in early stage disease. However, Radiotherapy and chemotherapy acquired a main role in this scenario. Target therapies were introduced for medical oncology practice and are demonstrating a hallmark of a new era in cancer treatment. More recently, immunotherapy has been considered the novel cornerstone in cancer treatment. The 2nd edition of the International Manual of Oncology Practice (iMOP) emerged after the great success of the iMOP 1st edition as a reference for medical oncologists and medical residents in the field. In this edition, several chapters were revised and its addresses from the molecular issues of cancer sciences to the clinical practice in medical oncology. In addition, multiple choice questions and clinical cases were included in the main chapters in order to improve the reader learning. The book focuses systemic

Delawan.2024-05-01 This book is the first review book that uses the multiple-choice question format in neurosurgical oncology which mirrors the format of the majority of shelf and board examinations. The mission of the book is to help readers understand the content and maintain the knowledge, rather than merely finding answers for complicated questions. It provides more than 800 MCQs in a convenient format that is suitable for self-study. Answers and definitions appear immediately below the questions to facilitate information retention. The chapters provide comprehensive coverage of the core concepts in neurosurgical oncology. They provide a step-by-step, thorough explanations of each disease from the definition, associated anatomy, pathology, clinical features, radiology to surgical decision-making, and surgical tricks, providing a comprehensive and concise overview. This book is an adjunct to the existing texts and does not intend to be the primary source of information; it rather aims to help readers identify their relevant strengths and weaknesses in the area. The book is an important asset for residents across neurosurgical disciplines as it includes much of the neuro-oncology knowledge that neurosurgical residents need to prepare for their certification tests. It is also useful for those seeking ways to solidify their knowledge or maintain their current certification.

Cancer Consult Syed A. Abutalib, Maurie Markman. 2014-06-16

The field of oncology benefits from several large-scale reference books and a host of monographs dedicated to specific cancers. However, truly excellent practice and review books are, surprisingly, quite scarce. Outside of a scant handful of books and online reference tools that offer clinical response practice and board review in a basic question and answer format, there are no resources that offer a robust, engaging, fully referenced tool for these vital activities in every oncologist's and oncology trainee's work. This print and electronic book seeks to fill that void, offering comprehensive question-and-answer style content that covers the entire specialty of oncology and provides practicing oncologists with a fascinating and immediately applicable compendium of vital information dealing with a well-balanced selection of common and uncommon cancers. At the heart of this book is the editor's and authors' desire to overcome the controversies and barriers to practice that usually emerge following the appearance of new data. In every section, the user is guided toward collaboration in ongoing clinical research - for example, via discussions of well-designed ongoing clinical trials in each specific area. Developed with both the teacher and learner in mind, this book also offers trainees and fellows an excellent opportunity to enhance their preparation for the ABIM oncology fellowship exam as well as for the oncology boards. It will also be an extremely useful tool for oncologists working toward the recertification exam. This comprehensive, beefy book includes hundreds of painstakingly developed multiple-choice and mini-case-based questions covering the principles of medical oncology, malignant hematology, surgical oncology, and radiation oncology. It also contains mini-cases and questions dealing with the biology, diagnosis, classification, staging, and multidisciplinary treatment of cancers at every anatomic site. The very latest topics are

included, such as molecular techniques, targeted therapies, and translational cancer research. Concise but detailed answers are referenced to key journals and books, and evidence-based wherever possible. NCCN guidelines are also referenced as appropriate. With its powerful focus on take-home messages from and for actual clinical work, this book will help keep oncologists up to date, bridging the gaps between journal and reference literature, conferences, and their existing knowledge base.

Lecture Notes: Oncology Mark Bower,Jonathan Waxman.2015-10-01 Cancer is one of the most exciting specialties in medicine. This book aspires to convey the authors' enthusiasm for oncology and this new edition of Oncology Lecture Notes is a must for students and trainees. There has been a revolution in the practice of oncology. The changes are due to amazing advances in basic science, and the development of new drugs and successful immunisation programmes that have followed. Cancer death rates have fallen and this is in part due to radical new treatments, effective screening programmes, and also, as a result of popular movements for change in patient care, and decreased exposure to carcinogens. Completely revised and updated, this new edition of Oncology Lecture Notes describes advances in molecular biology research and highlights the importance of patient perspectives in cancer care. The text includes many new figures and tables, an update of molecular biology and highlights new treatments. With learning objectives and key point summaries in each chapter, Oncology Lecture Notes is an ideal introduction to the biological

Radiation Oncology - Answers Based on Board Review Questions

Michael Braham. 2017-02-21 Ace the oncology boards with our most up-to-date, comprehensive self-paced review books! Based on dialogue and exchange of ideas and opinions of previous exam sitters, this in-depth question-and-answer review book and workbook covers the entire specialty of oncology and provides thorough preparation for anyone planning on taking the oncology boards for the first time or just for CME. Inside, readers will discover hundreds of multiple-choice and logical case-based questions along with the biology, diagnosis, staging, and multimodality and inter-disciplinary approach to standardize treatment of cancers at every anatomic site. Included are different chapters on molecular techniques, targeted therapies, and current approaches to correct cancer prevention. Detailed answers and explanations follow the questions to help our readers grasp the 'how and 'why' behind each correct response. We have found since 1996, when we first introduced our reviews, that this is the ideal way to maximize exam scores for today's student and residents, and practising Oncologists to freshen up their knowledge base in an easy-to-follow format. Please peruse the sample pages before you buy, to make sure this is what you require.

Tumor Board Review, Second Edition Kathleen A. Cooney, MD, Teresa G. Hayes, MD, PhD, Martha Pritchett Mims, MD, PhD, Robert F. Todd III, MD, PhD, Francis P. Worden, MD. 2015-02-12 Praise for the First Edition “As everyone in oncology fellowship training knows, there is a huge [information] gap in this field. Most oncology books are massive and loaded with information...by the time the book is [published]...it is outdated.” [Tumor Board Review] is fresh and just out of the oven...I haven’t seen any book in oncology like this so far...I think my investment in this book was wise and worth it.” — Humaid Al-Shamsi, MB(Hon), BMedSc, MRCP(UK), FRCP, FACP, Assistant Professor, The University of Texas, MD Anderson Cancer Center

Culling the knowledge and expertise of respected oncology specialists, this is a concise yet comprehensive review of all areas of oncology practice for medical oncologists, radiation oncologists, and pathologists — both students and practitioners. The second edition of Tumor Board Review has been thoroughly revised to encompass recent scientific advances in assessment and treatment, new clinical guidelines, and new FDA-approved drugs and indications. It also contains approximately 250 multiple-choice questions and answers to assist readers in testing their knowledge, especially those preparing for the MOC exam. The book features case presentations and evidence-based management discussions that clearly demonstrate how to apply new information in daily practice. In a consistent format, each chapter addresses epidemiology, risk factors, natural history, and pathology of each major organ-specific tumor type; an abbreviated display of relevant staging; and several “tumor board style” illustrative patient case studies. This is followed by an evidence-based case discussion, which reinforces current guidelines and explains the rationale for the diagnostic and therapeutic steps taken. Algorithms and decision-tree graphics further illuminate the decision process. **NEW TO THE SECOND EDITION OF TUMOR BOARD REVIEW:** Presents the most recent
