Sumerian Grammar Dietz Otto Edzard.2003-08-01 It seems safe to say that this Sumerian Grammar by Professor D.O. Edzard will become the new classic reference in the field. It is an up-to-date, reliable guide to the language of the Sumerians, the inventors of cuneiform writing in the late 4th millennium B.C., and thus essential contributors to the high cultural standard of the whole of Mesopotamia and beyond. Following traditional lines, the Grammar describes general characteristics, origins, linguistic environment, phonetics and phonology, morphology, syntax, and phraseology. Due attention is given to the symbiosis with Semitic Akkadian, with which Sumerian was to form a veritable linguistic area. With lucid explanations of all technical linguistic theory. Each transliteration carries its English translation.

Handbook of Reason Dagobert D. Runes.2022-02-22 The eminent philosopher presents a summation of his views on an encyclopedic range of topics from abstract art to Zionism. Culled from years of research and introspection, the diverse observations discussed in Handbook of Reason by Dagobert D. Runes are bound to stimulate, challenge, and at times force upon the reader a shock of recognition grounded in universal truths. In a style that moves from the aphoristic to the metaphorical, Runes offers countless gems of wisdom, often irresistibly quotable, and always profoundly moving. A humanitarian theme evolved partly from personal tragedies permeates his lifelong search for "a life of God the Spirit and the Giver/(Of) God unbound and unencumbered/By hate or prejudice/A god to love by Deeds/Not hollow hymns and vows."

Differential Equations, Dynamical Systems, and an Introduction to Chaos Morris W.

Hirsch,Stephen Smale,Robert L. Devaney.2004 Thirty years in the making, this revised text by three of the world's leading mathematicians covers the dynamical aspects of ordinary differential equations. it explores the relations between dynamical systems and certain fields outside pure mathematics, and has become the standard textbook for graduate courses in this area. The Second Edition now brings students to the brink of contemporary research, starting from a background that includes only calculus and elementary linear algebra. The authors are tops in the field of advanced mathematics, including Steve Smale who is a recipient of the Field's Medal for his work in dynamical systems. * Developed by award-winning researchers and authors * Provides a rigorous yet accessible introduction to differential equations and dynamical systems * Includes bifurcation theory throughout * Contains numerous explorations for students to embark upon NEW IN THIS EDITION * New contemporary material and updated applications * Revisions throughout the text, including simplification of many theorem hypotheses * Many new figures and illustrations * Simplified treatment of linear algebra * Detailed discussion of the chaotic behavior in the Lorenz attractor, the Shil'nikov systems, and the double scroll attractor * Increased coverage of discrete dynamical systems

Towards Openly Multilingual Policies and Practices Johanna Laakso,Anneli Sarhimaa,Sia

Spiliopoulou Åkermark,Reetta Toivanen.2016-03-03 This book investigates the maintenance of multilingualism and minority languages in 12 different minority communities across Europe, all of which are underrepresented in international minority language studies. The book presents a number of case studies covering a broad range of highly diverse minorities and languages with different historical and socio-political backgrounds. Despite current legislation and institutional and

educational support, the authors surmise there is no guarantee for the maintenance of minority languages, suggesting changes in attitudes and language ideologies are the key to promoting true multilingualism. The book also introduces a new tool, the European Language Vitality Barometer, for assessing the maintenance of minority languages on the basis of survey data. The book is based on the European Language Diversity for All (ELDIA) research project which was funded by the European Commission (7th framework programme, 2010–2013).

Scandinavian Archaeology Haakon Shetelig, Hjalmar Falk. 1978

The Archaeology of Europe's Drowned Landscapes Geoff Bailey, Nena Galanidou, Hans Peeters, Hauke Jöns, Moritz Mennenga. 2020-04-09 This open access volume provides for the first time a comprehensive description and scientific evaluation of underwater archaeological finds referring to human occupation of the continental shelf around the coastlines of Europe and the Mediterranean when sea levels were lower than present. These are the largest body of underwater finds worldwide, amounting to over 2500 find spots, ranging from individual stone tools to underwater villages with unique conditions of preservation. The material reviewed here ranges in date from the Lower Palaeolithic period to the Bronze Age and covers 20 countries bordering all the major marine basins from the Atlantic coasts of Ireland and Norway to the Black Sea, and from the western Baltic to the eastern Mediterranean. The finds from each country are presented in their archaeological context, with information on the history of discovery, conditions of preservation and visibility, their relationship to regional changes in sea-level and coastal geomorphology, and the institutional arrangements for their investigation and protection. Editorial introductions summarise the findings from each of the major marine basins. There is also a final section with extensive discussion of the historical background and the legal and regulatory frameworks that inform the management of the underwater cultural heritage and collaboration between offshore industries, archaeologists and government agencies. The volume is based on the work of COST Action TD0902 SPLASHCOS, a multi-disciplinary and multi-national research network supported by the EU-funded COST organisation (European Cooperation in Science and Technology). The primary readership is research and professional archaeologists, marine and Quaternary scientists, cultural-heritage managers, commercial and governmental organisations, policy makers, and all those with an interest in the sea floor of the continental shelf and the human impact of changes in climate, sea-level and coastal geomorphology.

A History of the Czech Lands Jaroslav Pánek, Oldřich Tůma. 2009 Provides a systematic history from prehistory to the establishment of the Czech Republic.

Kay Fisker Martin Søberg. 2021-07 Kay Fisker (1893-1965) is considered one of the most influential Danish architects of the twentieth century, and yet there has existed until now no in-depth English-language study of his works and writing. Published as part of the Bloomsbury Studies in Modern Architecture series, which brings to light the work of significant yet overlooked modernist architects, this book examines Fisker's key projects - from his early railway stations and innovative housing projects to the Danish Academy in Rome - and analyses his work as a historian and writer. Fisker's output is closely associated with the functional tradition, a hybridization of international modernism and regional architectural typologies, and this book shows how his architectural poetics can be understood as an amalgamation of an ideal order with the contingent conditions of landscapes and urban sites. Hybridization is not only a valuable notion for understanding Fisker, the book argues, it can also be applied to an understanding of modernist architecture as a whole, with its various expressions, agendas and tensions both regionally and internationally.

Friedrich Rosen Amir Theilhaber. 2020-09-07 The German lacuna in Edward Said's 'Orientalism' has produced varied studies of German cultural and academic Orientalisms. So far the domains of

German politics and scholarship have not been conflated to probe the central power/knowledge nexus of Said's argument. Seeking to fill this gap, the diplomatic career and scholarly-literary productions of the centrally placed Friedrich Rosen serve as a focal point to investigate how politics influenced knowledge generated about the "Orient" and charts the roles knowledge played in political decision-making regarding extra-European regions. This is pursued through analyses of Germans in British imperialist contexts, cultures of lowly diplomatic encounters in Middle Eastern cities, Persian poetry in translation, prestigious Orientalist congresses in northern climes, leveraging knowledge in high-stakes diplomatic encounters, and the making of Germany's Islam policy up to the Great War. Politics drew on bodies of knowledge and could promote or hinder scholarship. Yet, scholars never systemically followed empire in its tracks but sought their own paths to cognition. On their own terms or influenced by "Oriental" savants they aligned with politics or challenged claims to conquest and rule.

Apuleius' Metamorphoses Stefan Tilg. 2014-06-12 This volume reveals how Apuleius' *Metamorphoses* - the only fully extant Roman novel and a classic of world literature - works as a piece of literature, exploring its poetics and the way in which questions of production and reception are reflected in its text. Providing a roughly linear reading of key passages, the volume develops an original idea of Apuleius as an ambitious writer led by the literary tradition, rhetoric, and Platonism, and argues that he created what we could call a serio-comic 'philosophical novel' *avant la lettre*. The author focuses, in particular, on the ways in which Apuleius drew attention to his achievement and introduced the Greek ass story to Roman literature. Thus, the volume also sheds new light on the forms and the literary and intellectual potential of the genre of the ancient novel.

Practices of Wealth Depositing in the 1st-9th Century AD, Eastern Baltic Ester Oras. 2015 This PhD thesis discusses the practices of wealth depositing in the 1st-9th century AD eastern Baltic (Estonia, Latvia, Lithuania). Wealth deposits are one or more valued object/s that is/are hidden deliberately as an intended separate deposition in a selected place in a specific, distinguishable manner. Wealth depositing is regarded as an important cultural practice which relates to and derives from various past social phenomena and changes respectively in spatial and temporal terms. It is emphasised that wealth deposits should be analysed as a cohesive corpus of material, regardless of specific artefact types, functional groups, production material, environment of concealment, and most importantly without any predetermined interpretation categorisations. The dissertation presents different patterned practices of concealing valuables in the 1st-9th century AD eastern Baltic through a detailed contextual analysis of their main material characteristics: artefacts, their assemblages and appearance, environment of concealment, chronology and location in the cultural landscape. The study demonstrates how depositional practices change in time and space, and analyses relations between specific depositional practices and developments on a wider social scale. A comparative analysis of wealth deposits and important social changes in contemporary society based on overall archaeological material is presented. The key regional and cross-regional practices of wealth depositing in the 1st-9th century AD eastern Baltic are identified. Additionally, further comparisons are drawn between depositional practices in the eastern Baltic and other parts of the Baltic Sea region, especially Scandinavia. This thesis contributes to the discussions of concepts of value and depositional practices in a long-term and cross-regional perspective. A further aim is to look beyond

the problematic 'why?'-questions posed in the studies of wealth deposits, and move instead to more comprehensible questions of 'how?' how do depositional practices change in time and space, and how are these processes related to developments in a broader social context? The book contains a catalogue of all the 1st-9th century AD Eastern Baltic deposits analysed in the dissertation with descriptions of objects, environments of concealment, find circumstances, illustrations/photos and further references.

Writings on Physics and Philosophy Wolfgang Pauli.2013-04-17 Like Bohr, Einstein and Heisenberg, Wolfgang Pauli was not only a Nobel laureate and one of the creators of modern physics, but also an eminent philosopher of modern science. This is the first book in English to include all his famous articles on physics and epistemology. They were actually translated during Pauli's lifetime by R. Schlapp and are now edited and annotated by Pauli's former assistant Ch. Enz. Pauli writes about the philosophical significance of complementarity, about space,time and causality, symmetry and the exclusion principle, but also about the role of the unconscious in modern science. His famous article on Kepler is included as well as many historical essays on Bohr, Ehrenfest,and Einstein as well as on the influence of the unconscious on scientific theories. The book addresses not only physicists, philosophers and historians of science, but also the general public.

Literature and Psychology Önder Çakırtaş.2018-12-07 This volume provides a thorough study of how psychological messages are portrayed and interpreted via the written word. It explores the interactions between text and reader, as well as affiliations within the text, with particular emphasis on emotion and affect. Featuring relevant coverage on topics such as literary production, psychology in literature, identity/self and the other, and trauma studies, the book offers an in-depth analysis that is suitable for academicians, students, professionals, and researchers interested in discovering more about the relationship between psychology and literature.

The Reception of Copernicus' Heliocentric Theory J. Dobrzycki.2013-06-29 In 1965 the International Union of the History and Philosophy of Science founded the Nicolas Copernicus Committee whose main task was to explore the means by which different nations could co-operate in celebrating the 5 centenary of the great scholar's birth. The committee initiated the publication of a collection of studies dealing with the effect that Copernicus' theory has had on scientific developments in centres of learning all over the world. An Editorial Board, consisting of J. Dobrzycki (Warsaw), J. R. Ravetz (Leeds), H. Sandblad (Goteborg) and B. Sticker (Hamburg), was nominated. We found that our initiative aroused a lively interest among Copernicus scholars; the present volume, with 11 articles by authors from nine American, Asian and European countries, contains the result of their research. It appears in the series 'Studia Copernicana' by agreement with the Polish Academy of Science, and we hope to publish a number of other contributions in a subsequent volume. We are happy to say that our efforts have been fruitful and that this volume presents not only several in-depth studies, but also a more general survey of the rules governing the evolution of science, rules set within the framework of Copernicus' theory as it developed among various nations and in various scientific institutions over the centuries. It has been shown once again that, 500 years after his birth, the work of Copernicus remains a source of scientific interest and continues to stimulate fresh study and research.

The Well Spring of the Goths Ingemar Nordgren.2004 The Goths-a rumored people first known by history around the river Vistula in present Poland-was the people that more than other contributed to the fall of the Roman Empire. It was however also the Goths who preserved the Roman culture against other Germanic tribes. Earlier it has been generally assumed the Goths originated in Scandinavia but during the 20th c. many scholars have grown skeptical. The author has, using both Classical and Nordic sources and supplementary sciences, made probable there is an intimate connection between the Goths and the Nordic countries. Consequently it is quite possible that at least part of the Goths have a Nordic origin. The book rests on the basic hypothesis that the Goths are not a people but a number of tribes and peoples united through a common religious/cultic origin. The old dispute concerning the relationship between Svear and Gautar also gets quite a new meaning. The book is interdisciplinary and embraces history, religion, arts, linguistics and archaeology. In 1999 Ingemar Nordgren received his Ph.D. at Odense University, Denmark The book builds to a considerable extent on his dissertation but has been updated and partly rewritten with brand new material.

The Royal Physician's Visit Per Olov Enquist.2002-11-19 An international sensation,The Royal Physician's Visitmagnificently recasts the dramatic era of Danish history when Johann Friedrich Struensee -- court physician to mad young King Christian -- stepped through an aperture in history and became the holder of absolute power in Denmark. His is a gripping tale of power, sex, love, and the life of the mind, and it is superbly rendered here by one of Sweden's most acclaimed writers. A charismatic German doctor and brilliant intellectual, Struensee used his influence to introduce hundreds of reforms in Denmark in the 1760s. He had a tender and erotic affair with Queen Caroline Mathilde, who was unsatisfied by her unstable, childlike husband. Yet Struensee lacked the subtlety of a skilled politician and the cunning to choose enemies wisely; these flaws proved fatal, and would eventually lead to his tragic demise.

Runes and Germanic Linguistics Elmer H. Antonsen.2011-04-20 The older runic inscriptions (ca. AD 150 - 450) represent the earliest attestation of any Germanic language. The close relationship of these inscriptions to the archaic Mediterranean writing traditions is demonstrated through the linguistic and orthographic analysis presented here. The extraordinary importance of these inscriptions for a proper understanding of the prehistory and early history of the present-day Germanic languages, including English, becomes abundantly clear once the accumulation of unfounded claims of older mythological and cultic studies is cleared away.

Weary Men Arne Garborg.1999 With its angst-ridden, sensualist hero, Arne Garborg's classic invites comparison with the classic European decadent novels of the turn of the century--Huysmans's *Against the Grain* and Wilde's *The Picture of Dorian Gray*. Unlike the protagonists of those novels, however, the hero of *Weary Men* is treated with irony. And while it is a brilliant novel of ideas, *Weary Men* has endured primarily because of the acuity with which Garborg explores the roguish main character's psychological makeup.

Society After Money Project Society After Money.2020-10-29 Project Society After Money is an interdisciplinary project between commons theory, evolutionary political economy, media studies and sociology, that enter into a dialogue with one another in order to look at their specific theories

and criticisms of money. Conceived as the beginning of a necessary interdisciplinary dialogue, the possibilities of post-monetary forms of organization and production are taken into account and examined. On one hand there is a lot of talk about 'digital revolution', 'mediatized society', 'networks', 'Industry 4.0'. On the other hand the present is described in terms of crisis: 'financial crisis', 'economic crisis', 'planetary boundaries'. At once there is the description of a media-technological change along with massive social and ecological disruptions. *Society After Money* is based on the premise that there might be a conflict between digital media/digital technology and the medium of money - and perhaps new digital possibilities that allow alternative forms of economy. It criticizes what is normally seen as self-evident and natural, namely that social coordination has to be done by the medium of money. We're left with a highly innovative collection of contributions that initiates a broader social discourse on the role of money in the global society of the 21st century.

Sigurd Lewerentz, Architect Janne Ahlin. 2014 Sigurd Lewerentz (1885-1975) was initially educated as mechanical engineer in Gothenburg. Yet it was his architectural apprenticeship in Munich 1909-10 that set him on his path as an architect, opening his own office in Stockholm in 1911. Although his built work is relatively small, Lewerentz is revered as one of Sweden's most eminent architects. Cemeteries and sacred buildings became a core part of Lewerentz's oeuvre, including Stockholm's South Cemetery (1914-17), Malmo Eastern Cemetery (1916), St. Mark's Church, Bjorkhagen (1956), and Petri Church, Klippan (1963). In association with Gunnar Asplund, he was also the main architect for the Stockholm International Exhibition (1930), and in collaboration with Erik Lallerstedt and David Hellden he created a masterpiece of functionalist architecture, the Malmo City Theatre (1935). *Sigurd Lewerentz, Architect* is a reprint of the first ever monograph on his work, originally published in English 1987 and long out of print. It tells the story of Lewerentz's life and presents his entire work in text and many photographs, drawings and plans.

The Oxford Handbook of Names and Naming Carole Hough. 2016-05-03 In this handbook, scholars from around the world offer an up-to-date account of the state of the art in different areas of onomastics, in a format that is both useful to specialists in related fields and accessible to the general reader. Since Ancient Greece, names have been regarded as central to the study of language, and this has continued to be a major theme of both philosophical and linguistic enquiry throughout the history of Western thought. The investigation of name origins is more recent, as is the study of names in literature. Relatively new is the study of names in society, which draws on techniques from sociolinguistics and has gradually been gathering momentum over the last few decades. The structure of this volume reflects the emergence of the main branches of name studies, in roughly chronological order. The first Part focuses on name theory and outlines key issues about the role of names in language, focusing on grammar, meaning, and discourse. Parts II and III deal with the study of place-names and personal names respectively, while Part IV outlines contrasting approaches to the study of names in literature, with case studies from different languages and time periods. Part V explores the field of socio-onomastics, with chapters relating to the names of people, places, and commercial products. Part VI then examines the interdisciplinary nature of name studies, before the concluding Part presents a selection of animate and inanimate referents ranging from aircraft to animals, and explains the naming strategies adopted for them.

Aamir Mufti scrutinizes these claims and critiques the continuing dominance of English as both a literary language and the undisputed cultural system of global capitalism.

Nilpotent Orbits, Primitive Ideals, and Characteristic Classes Walter Borho,J.-L. Brylinski,R.

MacPherson.2012-12-06 1. The Subject Matter. Consider a complex semisimple Lie group G with Lie algebra \mathfrak{g} and Weyl group W . In this book, we present a geometric perspective on the following circle of ideas: polynomials The vertices of this graph are some of the most important objects in representation theory. Each has a theory in its own right, and each has had its own independent historical development. - A nilpotent orbit is an orbit of the adjoint action of G on \mathfrak{g} which contains the zero element of \mathfrak{g} in its closure. (For the special linear group $G = \mathrm{SL}(n, \mathbb{C})$, whose Lie algebra is all $n \times n$ matrices with trace zero, an adjoint orbit consists of all matrices with a given Jordan canonical form; such an orbit is nilpotent if the Jordan form has only zeros on the diagonal. In this case, the nilpotent orbits are classified by partitions of n , given by the sizes of the Jordan blocks.) The closures of the nilpotent orbits are singular in general, and understanding their singularities is an important problem. - The classification of irreducible Weyl group representations is quite old.

Noble Lies, Slant Truths, Necessary Angels Ellis Shookman.1997 A study of how the novels by Christoph Martin Wieland explore the notion of fictionality, both as a feature of the stories themselves and as a distinguishing characteristic of the fanciful notions, moral laws, political utopias, religious beliefs and artistic concepts that they describe.

Salt in Prehistoric Europe Anthony Harding.2013-11-01 Salt was a commodity of great importance in the ancient past, just as it is today. Its roles in promoting human health and in making food more palatable are well-known; in peasant societies it also plays a very important role in the preservation of foodstuffs and in a range of industries. Uncovering the evidence for the ancient production and use of salt has been a concern for historians over many years, but interest in the archaeology of salt has been a particular focus of research in recent times. This book charts the history of research on archaeological salt and traces the story of its production in Europe from earliest times down to the Iron Age. It presents the results of recent research, which has shown how much new evidence is now available from the different countries of Europe. The book considers new approaches to the archaeology of salt, including a GIS analysis of the oft-cited association between Bronze Age hoards and salt sources, and investigates the possibility of a new narrative of salt production in prehistoric Europe based on the role of salt in society, including issues of gender and the control of sources. The book is intended for both academics and the general reader interested in the prehistory of a fundamental but often under-appreciated commodity in the ancient past. It includes the results of the author's own research as well as an up-to-date survey of current work.
