How to Ace Your Business Finance Class: Essential Knowledge and Techniques to Master the Material and Ace Your Exams Timothy Falcon Crack.2016-08-06 Why buy notes from a fellow student who met the material for the first time last year? This inexpensive book contains notes written by an award-winning professor who taught the material for 25 years! This pocket-sized book is aimed at students in their first finance class at the undergraduate, MBA, or executive education level. The class is usually called Business Finance or Financial Management. (A list of topics covered appears below.) The author's sole goal is to lift your grades. He approaches this goal from two different angles. First, he uses 25 years of experience teaching this material to explain carefully the stumbling blocks that have consistently tripped up students year after year. Addressing these common sources of confusion gives every student every opportunity to master the material. Second, he presents safe strategies he has developed to help you solve numerical problems in finance. Although these strategies take only an extra minute to implement, they frame each numerical problem so as to increase the likelihood that you detect and fix any errors, while reducing the likelihood that you make any errors in the first place. These techniques also increase the likelihood that you earn partial credit. Note that because the author focuses on stumbling blocks, he necessarily skips over some simpler material that does not usually cause problems. As such, he does not cover the fine detail of every topic in the class. Similarly, he gives only enough worked examples to explain concepts and techniques. Different students have different needs. For example, you might have no real interest in finance, but you need to pass the class to get your degree. Alternatively, you might be a gung-ho finance major who wants to ace the class, or an MBA or exec-ed student who does not care about grades and just wants to master the material. Prof. Crack has been meeting different needs in the classroom for 25 years, and his presentation is pitched simultaneously at these different clienteles. Although this book is aimed primarily at students, the fact that Prof. Crack focuses on essential knowledge and techniques also makes this book useful to instructors. For example, an instructor who is new to the class can use this book to quickly improve his or her understanding and teaching of the trickiest parts. The chapters of the book are as follows: Foundations, Financial Statements, TVMI (One Cash Flow), TVM II (Multiple Cash Flows), Inflation and Indices, Bonds and Interest Rates, Equities and Dividend Discount Models, Capital Budgeting I (Decision Rules), Capital Budgeting II (Cash Flows), Capital Budgeting III (Cost of Capital), Capital Budgeting IV (A Paradox), The CAPM and Interest Rates, Risk and Return, Market Efficiency, Capital Structure, and Dividends.

Advances in Entrepreneurial Finance Rassoul Yazdipour.2010-12-17 *Advances in Entrepreneurial Finance* brings together contributions from researchers from the fields of entrepreneurship, behavioral finance, psychology, and neuroscience to shed new light on the dynamics of decision making and risk taking by entrepreneurs and venture capitalists (VCs). Every new venture requires access to capital at competitive interest rates, and much has been written on general entrepreneurship by management scholars and financial contracting by financial economists using traditional finance theory with all its highly restrictive assumptions regarding decision makers' cognitive capabilities and behavior. But recent developments in behavioral finance can now be applied to understand how entrepreneurs and VCs perceive risk and uncertainty and how they

decide and act accordingly. Showcasing the latest research, this volume demonstrates that findings from the behavioral and neuroscience arenas can and do explain decision making by entrepreneurs and venture investors in the real world. Consequently, such findings have practical implications not only for entrepreneurs, venture capitalists, and their advisors, but also all government agencies and NGOs that want to support product and technological innovation, capital formation, job creation, and economic development.

Entrepreneurial Finance Dr. Disha Shah, Dr. Jyoti Chandwani, Dr. Brijesh Sharma, Dr. Anju Motwani. 2022-10-21 Entrepreneurial finance is a relatively new subfield of finance that combines elements of both traditional finance and business. Entrepreneurship is the discovery for, assessment of, and pursuit of chances to create and commercialise novel products, services, organisational structures, market niches, manufacturing techniques, or supplies via the use of initiative and resourcefulness. Opportunities may come from a variety of places, and studying where they come from, what shape they take, how they are discovered and evaluated, how resources are gathered and used to capitalise on them, and the people who do these things are all part of the study of entrepreneurship. Entrepreneurs require access to funding to launch a new venture. In reality, studies on how to get resources are among the most studied topics in the field of entrepreneurship. Moreover, financial support is a crucial asset for every entrepreneur to have at their disposal. Financial matters include the acquisition, investment, and management of capital, as well as their respective costs and benefits. It is discussed in the context of states and nations, markets and businesses, and individuals themselves, as in the term 'personal finance'. The focus of this book is 'corporate finance', a subfield of finance devoted to business concerns. Coverage in this book ranges from an overview of the entrepreneur and the entrepreneurial spectrum to specifics on creating a business plan, analysing financial accounts, management of cash flow, valuing a company, and securing venture capital and debt financing.

Strategic Entrepreneurial Finance Darek Klonowski.2014-11-27 Entrepreneurial finance is a discipline that studies financial resource mobilization, resource allocation, risk moderation, optimization in financial contracting, value creation, and value monetization within the context of entrepreneurship. However, without proper strategic consideration the discipline is incomplete. This book examines how the activity of entrepreneurial finance can be enhanced via a concentration on value creation and through improved strategic decision-making. The most unique feature of the book is its focus on value creation. For entrepreneurs, value creation is not a one-off activity, but rather a continuous cycle of incremental improvements across a wide range of business activities. Entrepreneurial value creation is described in four comprehensive stages: value creation, value measurement, value enhancement, and value realization, referred to as the C-MER model. This book focuses on what creates value rather than merely presenting value creation in a straight accounting framework. At the same time, deliberate and tactical planning and implementation ensure that the firm does not ignore the components necessary for it to survive and flourish. Vigorous strategic deliberations maximize the entrepreneurial firm's chances of making the right business decisions for the future, enable the firm to manage its available financial and non-financial resources in the most optimal manner, ensure that the necessary capital is secured to progress the development of the firm to its desired development level, and build value. While financial considerations are important, the field of strategic entrepreneurial finance represents a fusion of three disciplines: strategic management, financial management, and entrepreneurship. This orientation represents a natural evolution of scholarship to combine specific domains and paradigms of naturally connected business disciplines and reflects the need to simultaneously examine business topics from different perspectives which may better encapsulate actual entrepreneurial practices.
