Attracting Investment in Bangladesh—Sectoral Analyses Sanjay Kathuria, Mariem Mezghenni Malouche.2016-10-17 This is volume 3 of a three-volume publication on Bangladesh's trade prospects. Bangladesh's ambition is to build on its very solid growth and poverty reduction achievements, and accelerate growth to become a middle income country by 2021, and share

prosperity more widely amongst its citizens. This includes one of its greatest development challenges: to provide gainful employment to the over 2 million people that will join the labor force each year over the next decade. Moreover, only 54.1 million of its 94 million working age people are employed. Bangladesh needs to use its labor endowment even more intensively to increase growth and, in turn, to absorb the incoming labor. The Diagnostic Trade Integration Study identifies the following actions centered around four pillars to sustain and accelerate export growth: (1) breaking into new markets through a) better trade logistics to reduce delivery lags ; as world markets become more competitive and newer products demand shorter lead times, to generate new sources of competitiveness and thereby enable market diversification; and b) better exploitation of regional trading opportunities in nearby growing and dynamic markets, especially East and South Asia; (2) breaking into new products through a) more neutral and rational trade policy and taxation and bonded warehouse schemes; b) concerted efforts to spur domestic investment and attract foreign direct investment, to contribute to export promotion and diversification, including by easing the energy and land constraints; and c) strategic development and promotion of services trade; (3) improving worker and consumer welfare by a) improving skills and literacy; b) implementing labor and work safety guidelines; and c) making safety nets more effective in dealing with trade shocks; and (4) building a supportive environment, including a) sustaining sound macroeconomic fundamentals; and b) strengthening the institutional capacity for strategic policy making aimed at the objective of international competitiveness to help bring focus and coherence to the government's reform efforts. This third volume provides in-depth analysis of eight different manufacturing and services sectors of the Bangladeshi economy, which help to illustrate the thematic analysis of volume 2 and ground it in sector experiences. Besides pointing to cross-cutting themes, the analysis also

highlights some specific issues and actions that could help relieve constraints to faster export growth in these sectors.

Cryptography Apocalypse Roger A. Grimes.2019-10-15 Will your organization be protected the day a quantum computer breaks encryption on the internet? Computer encryption is vital for protecting users, data, and infrastructure in the digital age. Using traditional computing, even common desktop encryption could take decades for specialized 'crackers' to break and government and infrastructure-grade encryption would take billions of times longer. In light of these facts, it may seem that today's computer cryptography is a rock-solid way to safeguard everything from online passwords to the backbone of the entire internet. Unfortunately, many current cryptographic methods will soon be obsolete. In 2016, the National Institute of Standards and Technology (NIST) predicted that quantum computers will soon be able to break the most popular forms of public key

cryptography. The encryption technologies we rely on every day—HTTPS, TLS, WiFi protection, VPNs, cryptocurrencies, PKI, digital certificates, smartcards, and most two-factor authentication—will be virtually useless. . . unless you prepare. *Cryptography Apocalypse* is a crucial resource for every IT and InfoSec professional for preparing for the coming quantum-computing revolution. Post-quantum crypto algorithms are already a reality, but implementation will take significant time and computing power. This practical guide helps IT leaders and implementers make the appropriate decisions today to meet the challenges of tomorrow. This important book: Gives a simple quantum mechanics primer Explains how quantum computing will break current cryptography Offers practical advice for preparing for a post-quantum world Presents the latest information on new cryptographic methods Describes the appropriate steps leaders must take to implement existing solutions to guard against quantum-computer security threats *Cryptography Apocalypse: Preparing for the Day When Quantum Computing Breaks Today's Crypto* is a must-have guide for anyone in the InfoSec world who needs to know if their security is ready for the day crypto break and how to fix it.

Jute, Regional Focus Jayanta Bagchi.2006 Jute plays an important role in the economies of South Asian countries. In India alone it sustains some four million families. *Jute: Regional Focus* summarizes the jute sector in countries like India, Bangladesh, China, Nepal, Thailand, Myanmar, and Brazil. Starting from raw material availability, it mentions the consumption, production, export, and import of jute fibre and products. It also highlights the problems afflicting the jute sector like a stagnant yield, the lack of improvement in quality, the unremunerative price paid to the growers, the rising cost of production, the considerable competition from the synthetic sector, the demand

erosion, the obsolescence of machinery, uneconomic working, etc. The book also discusses the competitive strength of jute against synthetics, possibilities of cost reduction, jute in relation to the environment, and the achievements of the International Jute Organisation. It also offers an insight into the implications of regional cooperation among the jute producing countries. It identifies the components of regional cooperation and investigates its importance and indispensability with reference to critical issues in the jute sector, as well as highlights the specific areas where some jute producing countries have contributed significantly. Certain examples where India has performed well in the field of diversification are given too.
