International Organizations and Global Civil Society Daniel Laqua,Wouter Van Acker,Christophe Verbruggen.2019-03-21 The Union of International Associations (UIA) was founded in 1910, aiming to coordinate the relations and interests of international organizations across the world. Its long history makes it a prism through which to study the field of international organizations and its dynamics. Bringing together experts from fields including history, political science and international relations, architecture, historical sociology, digital humanities and information studies, International Organizations and Global Civil Society is the first scholarly book to cover both the UIA's early years and its more recent past. Key issues explored include the UIA's importance for the field of scientific internationalism, the relations between the UIA and other international organizations, and the changing position of the UIA when facing geopolitical challenges such as totalitarianism, the World Wars and the Cold War. This important book addresses a number of current scholarly concerns: the concept of global civil society; the development of international relations as a field of study; the investigation of transnational factors in modern and contemporary history; and the tracing of forerunners to the information society.

Labouring and Learning Tatek Abede,Johanna Waters,Tracey Skelton.2017-10-12 Geographies of children and young people is a rapidly emerging sub-discipline within human geography. There is now a critical mass of established academic work, key names within academia, growing numbers of graduate students and expanding numbers of university level taught courses. There are also professional training programmes at national scales and in international contexts that work specifically with children and young people. In addition to a productive journal of Children's Geographies, there's a range of monographs, textbooks and edited collections focusing on children and young people published by all the major academic presses then there is a substantive body of work on younger people within human geography and active authors and researchers working within international contexts to warrant a specific Major Reference Work on children's and young people's geographies. The volumes and sections are structured by themes, which then reflect the broader geographical locations of the research.

The Cosmic Web N. Katherine Hayles.2018-03-15 From the central concept of the field—which depicts the world as a mutually interactive whole, with each part connected to every other part by an underlying field—have come models as diverse as quantum mathematics and Saussure's theory of language. In The Cosmic Web, N. Katherine Hayles seeks to establish the scope of the field concept and to assess its importance for contemporary thought. She then explores the literary strategies that are attributable directly or indirectly to the new paradigm; among the texts at which she looks closely are Robert Pirsig's Zen and the Art of Motorcycle Maintenance, Nabokov's Ada, D. H. Lawrence's early novels and essays, Borges's fiction, and Thomas Pynchon's Gravity's Rainbow.

Playfair's Commercial and Political Atlas and Statistical Breviary William Playfair.2005 A scientific revolution began at the end of the eighteenth century with the invention and popularization of the graphic display of data by the remarkable Scot, William Playfair. His marvellous Atlas showed how much could be learned if one plotted data atheoretically and looked for suggestive patterns. Those patterns provide evidence, albeit circumstantial, on which to build new science. Playfair's work has much to teach us, but finding a copy has been almost impossible. Until now. This full colour reproduction of two of his classic works, with new explanatory material, makes Playfair's wisdom widely available for the first time in two centuries.

Networking the International System Madeleine Herren.2014-06-13 The book critically investigates the local impact of international organizations beyond a Western rationale and aims to overcome Eurocentric patterns of analysis. Considering Asian and Western examples, the contributions originate from different disciplines and study areas and discuss a global approach, which has been a blind spot in scholarly research on international organizations until now. Using the 1930s as a historical reference, the contributions question role of international organizations during conflicts, war and crises, gaining insights into their function as peacekeeping forces in the 21st century. While chapter one discusses the historicity of international organizations and the availability of sources, the second chapter deliberates on Eurocentrism and science policy, considering the converging of newly created epistemic communities and old diplomatic elites. Chapter 3 sheds light on international organizations as platforms, expanding the field of research from the diversity of organizations to the patterns of global governance. The final chapter turns to the question of how international organizations invented and introduced new fields of action, pointing to the antithetic role of standardization, the preservation of cultural heritage and the difficulties in reaching a non-Western approach.

The Relativistic Deduction Émile Meyerson.2012-12-06 When the author of Identity and Reality accepted Langevin's suggestion that Meyerson identify the thought processes of Einstein's relativity theory, he turned from his assured perspective as historian of the sciences to the risky bias of contemporary philosophical critic. But Emile Meyerson, the epistemologist as historian, could not find a more rigorous test of his conclusions from historical learning than the interpretation of Einstein's work, unless perhaps he were to turn from the classical revolution of Einstein's relativity to the non-classical quantum theory. Meyerson captures our sympathy in all his writings: . . . the role of the epistemologist is . . . in following the development of science (250); the study of the evolution of reason leads us to see that man does not experience himself reasoning . . . which is carried on unconsciously, and as the summation of his empirical studies of the works and practices of scientists, reason . . . behaves in an altogether predictable way: . . . first by making the consequent equivalent to the antecedent, and then by actually denying all diversity in space (202). If logic - and to Meyerson the epistemologist is logician - is to understand reason, then logic proceeds a posteriori. And so we are faced with an empirically based Parmenides, and, as we shall see, with an ineliminable 'irrational' within science. Meyerson's story, written in 1924, is still exciting, 60 years later.

Other Combatants, Other Fronts James Kitchen,Alisa Miller,Laura Rowe.2011-01-18 The First World War is a subject that has fascinated the public as well as the academic community since the close of hostilities in

1918. Over the past thirty years in particular, the historiography associated with the conflict has expanded considerably to include studies whose emphases range between the economic, social, cultural, literary, and imperial aspects of the war, all coinciding with revisions to perceptions of its military context. Nevertheless, much of the discussion of the First World War remains confined to the experiences of a narrow collection of European armies on the battlefields of Northern France and Belgium. This volume seeks to push the focus away from the Western Front and to draw out the multi-spectral nature of the conflict, examining forgotten theatres and neglected experiences. The chapters explore the question of what 'total war' meant for the lives of people around the world implicated in this momentous event, broadening current debates on the First World War as well as developing, reinforcing, and refining the existing categories of analysis. The chapters are grouped into sections that reflect neglected elements of the transnational interpretation of the conflict and aspects of the total war debate. These encompass alternative forms of mobilisation, issues of neutrality, ideas of racial identity, and the scope of violence. The volume thus not only expands First World War studies but also contributes to the wider discourse on the shifting nature of warfare in the nineteenth and twentieth centuries. With chapters by leading scholars and early career researchers, this volume draws on a diverse range of original archival research undertaken across disciplinary and national boundaries. The contributions to the volume provide an analysis of the conflict that draws out its full breadth and complexity. The First World War demonstrated the critically important relationship between national mobilisation and total war, and saw multiple mobilisations and re-mobilisations of European populations. This theme is explored at the national, regional, and local levels through examinations of the Sicilian province of Catania, the role of science in France and Britain, and the utilisation of the narrative of maritime heroism surrounding the British sailor Jack Cornwell. For Europe's neutrals the First World War was often as total in its effects as for those states engaged in military operations. Chapters analyse the diverse range of these experiences of neutrality, from the economy and people of the Netherlands to the attitudes of Switzerland's intellectuals. Racial interpretations of modern conflict have defined much of the historiography of total war. The complexities of racial analysis with respect to total war are highlighted in chapters dealing with white colonial internees in German East Africa, the treatment of prisoners of war in Europe, and the recruitment of India's 'primitive' peoples for service in labour units. The final section of the volume considers the scale and broad scope of the violence unleashed during the First World War. Chapters on the continuation of German naval war culture after the conflict, the shaping of personal narratives of the war in the Ottoman Empire, and anti-alien violence among veterans in Canada serve to reinforce the extent to which the conflict affected wider aspects of twentieth-century history around the globe. Other Combatants, Other Fronts sheds light on the diverse experiences of neutral and belligerent states, and their combatants and civilians, during the tumultuous events of 1914-18. This brings to the fore the extent to which the mechanisms of conflict developed during the struggle had a truly global reach, and the impact this has had ever since in defining modern conflict. The collection reinforces the notion that although the First World War was a vast and often bewildering industrial conflict, it was ultimately a very human phenomenon.

Internationalism Reconfigured Daniel Laqua.2020-06-25 Many historians have downplayed the significance of interwar internationalism. They have presented the League of Nations and the campaigns of internationally-minded groups as idealistic failures in an age that was characterised by international tension and aggressive nationalisms. This book challenges such narratives by assessing transnational projects that were launched or transformed after World War One, particularly the interaction of the League of Nations with specific groups or associations. The authors reveal the different rationales and stimuli for international cooperation in this period. With fresh research from several European countries, this book makes an original contribution to the transnational history of the interwar years.

Educational Theories and Practices from the Majority World Pierre R Dasen,Abdeljalil Akkari.2008-11-11 This work provides a healthy, comprehensive counterpoint to the ethnocentrism engrained in the widespread belief that scientific knowledge about education is typically Western. Stressing that the Western 'minority' perspective cannot hold true for the 'majority' of the world population situated outside Europe and North America, this edited volume explores traditional educational theories and practices developed in the majority world to study how they can improve modern schooling globally. Educational Theories and Practices from the Majority World probes the elements of culturally appropriate, quality schooling for various indigenous people in India, the Pacific and the Americas. One of the sections dwells on how to synergise the systems used in modern schools with the ones used in non-Western formal schools linked to religious institutions, such as Koranic, Sanskrit, Buddhist and Voodoo schools. Another section delves into educational policy issues in the context of globalization. This compilation brings together difficult-to-access theories and research by contributors from Africa, Asia, Europe, North America, Oceania, and South America. It is an invaluable resource for policy makers in Education and for students, researchers and academicians studying Education and Anthropology.

Whose Education For All? Birgit Brock-Utne.2002-06-01 Since 1990, when the phrase education for all was first coined at the World Bank conference in Jomtien, Thailand, a battle has raged over its meaning and its impact on education in Africa. In this thought-provoking new volume, Dr. Brock-Utne argues that education for all really means Western primary schooling for some, and none for others. Her incisive analysis demonstrates how this construct robs Africans of their indigenous knowledge and language, starves higher education in Africa, and thereby perpetuates Western dominion. In Dr. Brock-Utne's words, A quadrangle building has been erected in a village of round huts.

Ikigai Yukari Mitsuhashi.2018-10-02 Ikigai is a traditional Japanese concept that embodies happiness in living. It is, essentially, the reason that you get up in the morning. This book is about finding your ikigai - identifying your purpose or passion and using this knowledge to achieve greater happiness in your life. Your ikigai doesn't have to be some grand ambition or highly noble life's purpose - it can be something simple and humble, like tending your garden or walking your dog. Having grown up in Japan, Yukari Mitsuhashi understands first hand what ikigai means to Japanese people. Now living in Los Angeles, she has written this book to introduce the traditional concept to a new audience. This is not a 'one size fits all' book. Instead, Ikigai encourages you to look at the details of your life and appreciate the everyday moments as you learn to identify your own personal ikigai. The book includes case studies from a range of people sharing their ikigai, from university lecturers and writers to doctors. With its refreshingly simple philosophy and liberating concepts, this beautifully presented book will be a guide you will return to again and again.

The University at War, 1914-25 T. Irish.2015-04-24 Drawing on examples from Britain, France, and the United States, this book examines how scholars and scholarship found themselves mobilized to solve many problems created by modern warfare in World War I, and the many consequences of this for higher education which have lasted almost a century.

Europe in Crisis Mark Hewitson,Matthew D'Auria.2012 The period between 1917 and 1957, starting with the birth of the USSR and the American intervention in the First World War and ending with the Treaty of Rome, is of the utmost importance for contextualizing and understanding the intellectual origins of the European Community. During this time of 'crisis,' many contemporaries, especially intellectuals, felt they faced a momentous decision which could bring about a radically different future. The understanding of what Europe was and what it should be was questioned in a profound way, forcing Europeans to react. The idea of a specifically European unity finally became, at least for some, a feasible project, not only to avoid another war but to avoid the destruction of the idea of European unity. This volume reassesses the relationship between

ideas of Europe and the European project and reconsiders the impact of long and short-term political transformations on assumptions about the continent's scope, nature, role and significance.

Multi-Sited Ethnography Simon Coleman,Pauline von Hellermann.2012-10-02 Since the concept of 'multi-sited' approaches in ethnography developed over fifteen years ago, it has attracted a growing number of researchers across the social sciences. This volume examines the evolution of the concept as well as the problems and possibilities multi-sited approaches have presented to researchers.

The Second Era of Great Expansion of the Capitalist World-economy, 1730-1840s Immanuel Maurice Wallerstein.1989

Freud and the Child Woman Fritz Wittels.1995-01-01 Fritz Wittels (1880-1950) was a pioneering Viennese psychoanalyst, the first biographer of Freud (1924), and intermittently friend and rival of Freud himself, of Wilhelm Stekel, and of their famous satirical adversary, Karl Kraus. Towards the end of his life, while living and practising as an analyst in the United States, Wittels wrote a two-hundred-page memoir of his early life and career in Vienna. The typescript memoirs, held in the archives of the Abraham Brill Library, New York, are published here for the first time, accompanied by a range of little-known illustrations. Incomplete in places, they have been deftly edited, contextualised and introduced by Edward Timms, whose many valuable explanatory notes include the identification of the 'child woman' of the title. In his memoirs Wittels writes frankly and vividly about the erotic sub-culture of fin-de-siecle Vienna and about early controversies within the Psychoanalytic Society. His picture of the interaction between the two is startlingly original, and will appeal not only to historians of psychoanalysis, but to anyone interested in the Viennese cultural avant-garde. The erotic triangles in which Wittels, Kraus and Freud were involved are shown to have impinged directly on the activities of the famous Society. Freud himself plays a crucial role in the story, and the book as a whole is of exceptional importance for the origins of psychoanalysis.

Song of the Greys Nigel Kerner.1998 Of all the humanoid alien types that feature in reports of sightings and abductions, the most common is the Grey - smooth and sallow-skinned, small in stature, spindly and thin. Who are they? Where do they come from? What do they want from us?

The Analyzing Situation Jean-Luc Donnet.2018-04-17 In this book the author explores the particularities of the status of the method in psychoanalysis, linked to the specificity of unconscious psychic processes. If the method aims at ensuring a level of technical mastery, it must also make sure that analytic treatment does not become an 'application' of knowledge. A modern conception of the analytic situation implies going beyond the classical pair of 'setting-interpretation'. Starting out from the postulate of a transference dynamic of the encounter, the author brings into play the pair 'analyzing site-situation'. The 'analyzing situation' emerges from the utilization, in a found-created mode (Winnicott), of an initial site constituted by a set of means put at the patients disposal. The analyzing situation includes patient and analyst in a self-organizing structure. The notion of a site makes it possible to approach the difference between psychoanalysis and analytic psychotherapy differently: each site has a 'logic', an intrinsic functional coherence, which have their own incidence on the therapeutic process.
