The Blue Compendium Jane Lubchenco, Peter M. Haugan. 2023-05-24 Home to over 80 percent of all life on Earth, the ocean is the world's largest carbon sink and a key source of food and economic security for billions of people. The relevance of the ocean for humanity's future is undisputed. However, the ocean's great potential to drive economic growth and equitable job creation, sustain healthy ecosystems, and mitigate climate change is not yet fully recognised. Lack of awareness of this potential as well as management and governance challenges pose

impediments. Until these impediments are removed, ocean ecosystems will continue to be degraded and opportunities for people lost. A transition and a clear path to a thriving and vibrant relationship between humans and the ocean are urgently needed. This open access collection of papers and reports identifies a path that is inspired by science, energised by engaged people, and emboldened by visionary leaders. These assessments of knowledge are commissioned by the High Level Panel for a Sustainable Ocean Economy (Ocean Panel), which was established in September 2018 as a unique initiative led by heads of state and government from around the world, to showcase the latest leading-edge science, knowledge and state-of-the-art thinking on key ocean issues. Altogether, The Blue Compendium offers innovative ocean solutions in technology, policy, governance, and finance realms, that could help accelerate a transition to a more sustainable and prosperous relationship with the ocean. The comprehensive assessments have already informed policy making at the highest levels of government and motivated an impressive array of responsive and ambitious action across a growing network of leaders in business, finance and civil society.

Transformational Change in Environmental and Natural Resource Management Mike Young,Christine Esau.2016-10-04

The aim of this book is to catalyse global interest in the pursuit of transformational changes in natural resource and environmental management. It is shown that transformational policy reforms involve fundamental shifts in strategy with far-reaching consequences for the structure of industries, the way people behave and the resources they use. Transformational reforms typically involve a decision to change a suite of institutional arrangements that will result, within a short period of time, in a paradigm shift and the emergence of an approach that will be recognised as being totally different to the arrangements that were previously in place. Transformational change is well established in business and can deliver outstanding results. In the world of policy development, however, many transformational policy reforms flounder. Unlike incremental policy reforms, they are often seen to be politically risky and prone to failure. Using examples of success and failure, coupled with insights from practitioners and academics who have succeeded in getting transformational reforms implemented, this book presents a set of guidelines for excellence in the pursuit of transformational policy reforms. It includes detailed case studies from Australia, China, Europe, New Zealand, South-east Asia and the USA.

Statebuilding and State Formation in the Western Pacific

Matthew Allen, Sinclair Dinnen.2018-04-19 This book provides a rigorous and cross-disciplinary analysis of this Melanesian nation at a critical juncture in its post-colonial and post-conflict history, with contributions from leading scholars of Solomon Islands. (RAMSI) provides a departure point for considering other transformations – social, political and economic – under way in the archipelagic nation. Organised around a central tension between change and continuity, two of the book’s key themes are the contested narratives of changing state–society relations and the changing social relations around land and natural resources engendered by ongoing processes of globalisation and urbanisation. Drawing heuristically on RAMSI’s genesis in the ‘state- building moment’ that dominated international relations during the first decade of this century, the book also examines the critical distinction between ‘state-building’ and ‘state formation’ in the Solomon Islands context. It engages with global scholarly and policy debates on issues such as peacebuilding, state-building, legal pluralism, hybrid governance, globalisation, urbanisation and the governance of natural resources. These themes resonate well beyond Solomon Islands and Melanesia, and the book will be of interest to a wide range of students, scholars and development practitioners. This book was previously published as a special issue of *The Journal of Pacific History*.

Granular, Fuzzy, and Soft Computing Tsau-Young Lin, Churn-Jung Liau, Janusz Kacprzyk. 2023-03-29 The first edition of the *Encyclopedia of Complexity and Systems Science (ECSS, 2009)* presented a comprehensive overview of granular computing (GrC) broadly divided into several categories: Granular computing from rough set theory, Granular Computing in Database Theory, Granular Computing in Social Networks, Granular Computing and Fuzzy Set Theory, Grid/Cloud Computing, as well as general issues in granular computing. In 2011, the formal theory of GrC was established, providing an adequate infrastructure to support revolutionary new approaches to computer/data science, including the challenges presented by so-called big data. For this volume of *ECSS, Second Edition*, many entries have been updated to capture these new developments, together with new chapters on such topics as data clustering, outliers in data mining,

qualitative fuzzy sets, and information flow analysis for security applications. Granulations can be seen as a natural and ancient methodology deeply rooted in the human mind. Many daily things are routinely granulated into sub things: The topography of earth is granulated into hills, plateaus, etc., space and time are granulated into infinitesimal granules, and a circle is granulated into polygons of infinitesimal sides. Such granules led to the invention of calculus, topology and non-standard analysis. Formalization of general granulation was difficult but, as shown in this volume, great progress has been made in combing discrete and continuous mathematics under one roof for a broad range of applications in data science.

The Two Degrees Dangerous Limit for Climate Change

Christopher Shaw. 2015-09-16 This book is about the history, present and future of one the most important policy ideas of the modern era - that there is a single, global dangerous amount of climate change. That dangerous amount of climate change is imagined as two degrees centigrade of global warming above the pre-industrial average. Though the two degree idea is based on the value system of elite policy actors, it is been constructed in public discourses as scientific fact. This false representation of the concept undermines opportunities for positive public engagement with the climate policy debate, yet it is strong public

engagement which is a recurring aspiration of climate policy discourses and is considered essential if climate mitigation strategies are to work. Alongside a critical analysis of how the idea of a single dangerous limit has shaped our understanding of what sort of problem climate change is, the book explains how the public have been kept out of that decision making process, the implications of this marginalisation for climate policy and why the dangerous limit idea is undermining our ability to mitigate climate change. The book concludes by exploring possibilities for a deliberation about the future of the two degree limit which allows for public participation in the decision making process. This book illustrates why, at this critical juncture in the climate policy debate, the two degree limit idea has failed to achieve any of the policy goals intended. This is the first book dedicated to questioning the issue of the two degree limit within a social science framework and should be of interest to students and scholars of environmental policy and politics, climate change communication, and science, technology and society studies.
