Modern Thai House Robert Powell.2012-10-10 With rich photography and insightful commentary, this Thai architecture and interior design book showcases some of the finest modern masterpieces in Southeast Asia. A tremendous body of sophisticated and sensitively designed architectural work has been produced in Thailand in the first decade of the 21st century. The 25 houses in The Modern Thai House illustrate the radical new ideas coming from a dynamic younger generation of architects who are producing work comparable with and sometimes even surpassing the very best architecture in the world. Most of these architects were trained in the U.S. or U.K. and reflect not only American and European sensibilities but also affinities with their contemporaries in Asia—including Japan, China, Singapore, and Bali—all hotbeds for innovation in modern design. The houses in this book are readily accessible from Bangkok, Phuket, and Chiangmai. They reflect a wide variety of concerns and solutions, such as: sustainability; responses to climate; strategies for cooling with minimal electricity; openness versus security in a large metropolis such as Bangkok; cultural sensitivity and responsiveness, as evidenced in a three-generation house, built for a society in which the extended family is still prevalent; and cultural memory, as in the use of elements such as pilings, verandahs, and steeply pitched roofs with large overhangs that echo traditional Thai designs. Nurtured by an increasingly knowledgeable and wealthy clientele, modern architecture in Thailand is emerging with a variety of innovative architectural expressions.

Adobe Homes for All Climates Lisa Schroder,Vince Ogletree.2010-09-06 The lay-up of adobe bricks is an easy, forgiving way to achieve a solid masonry-wall system. Contrary to stereotypes, adobe is perfectly adaptable for use in cold, wet climates as well as hot and dry ones, and for areas prone to earthquakes. With its efficient use of energy, natural resources for construction, and minimal effort for long-term maintenance, it's clear that the humble adobe brick is an ideal option for constructing eco-friendly structures throughout the world. The book is ideal both for first-time do-it-yourselfers and for experienced adobe builders seeking to improve their craft. Drawing on the experience of more than fifty major adobe projects since 1993, Adobe Homes for All Climates describes Adobe Building Systems' patented reinforcement and scaffolding systems, showing readers how to construct adobe homes more easily and safely, and with superior strength, durability, structural integrity, and aesthetic appeal, as compared to earthen homes of the past. All aspects of adobe construction are covered, including making and laying adobe bricks, installing lintels and arches, conduits and pipes, doors and windows, top plates and bondbeams, ideal wall dimensions, adobe finishes, and other adobe construction components, such as the inexpensive use of scaffolding. These methods will produce a premium product that will meet and often exceed inspection standards. Equipped with this manual, you will be able to obtain a building permit, make adobe bricks swiftly, and confidently lay them up. You will be able to beautifully finish your adobe walls with earth plasters creating stunning colors and outstanding light effects and create a beautiful, energy-efficient home that will last for generations to come.

Casa Tropical Philip Jodidio.2020-10-20 An illustrated overview of the sleek symbiosis between modern living and tropical landscape and climate, as emphasized in the architecture of Jacobsen Arquitetura. Jacobsen Arquitetura is a leading Brazilian architecture firm created by Paulo and Bernardo Jacobsen that is known for their clean lines, union with nature, and bright spaces. This monograph features twenty-five stunning houses by the firm that are excellent examples of building with nature in mind. Each house includes a short project text by renowned architecture critic Philip Jodidio, as well as a selection of drawings and plans. The volume opens with an introductory essay focusing on the global influence of the work of Jacobsen Arquitetura and ends with a brief section featuring renderings of houses still under construction in Europe, the Middle East, and the Caribbean. Fully illustrated with photography specially commissioned for this book, Casa Tropical sets each house in the context of diverse terrains and climates, making it a welcome resource for architects and designers.

Hawaiian Modern Vladimir Ossipoff,Marc Treib.2007-01-01 At the forefront of the postwar phenomenon known as tropical modernism, Vladimir Ossipoff (1907-1998) won recognition as the master of Hawaiian architecture." Although he practiced at a time of rapid growth and social change in Hawaii, Ossipoff criticized large-scale development and advocated environmentally sensitive designs, developing a distinctive form of architecture appropriate to the lush topography, light, and microclimates of the Hawaiian islands. This book is the first to focus on Ossipoff's career, presenting significant new material on the architect and situating him within the tropical modernist movement and the cultural context of the Pacific region. The authors discuss how Ossipoff synthesized Eastern and Western influences, including Japanese building techniques and modern architectural principles. In particular, they demonstrate that he drew inspiration from the interplay of indoor and outdoor space as advocated by such architects as Frank Lloyd Wright, applying these to the concerns and vernacular traditions of the tropics. The result was a vibrant and glamorous architectural style, captured vividly in archival images and new photography. As the corporate projects and private residences that Ossipoff created for such clients as IBM, Punahou School, Linus Pauling, Jr., and Clare Boothe Luce surpass their fiftieth anniversaries, critical assessment of these structures, offered here by distinguished scholars in the field, will illuminate Ossipoff's contribution to the universal challenge of making architecture that is delightfully particular to its place and durable over time.

Tropical Style Gillian Beal.2012-05-29 Tropical Style showcases thirty-five contemporary Malaysian homes and resorts that feature the use of indigenous cultural forms and cross-cultural influences in new and exciting ways. The elegant and often breathtaking houses, apartments and resorts presented here evoke the essence of the modern tropical architecture, Malaysian style--a combination of indigenous cultural forms, organic building materials, exquisite local craftsmanship and adaptations to the sun-drenched tropical climate. Echoing trends in green architecture, Malaysian homes historically evolved to integrate environmental factors into traditional building techniques and designs that are harmonious with outdoor living. All the spaces included here have been selected for their stunning design, originality of concept and innovative fusion of age-old architectural patterns with a modern aesthetic sense. Minimalist homes in Kuala Lumpur, contemporary courtyard homes, wooden houses in lush garden settings, idyllic beach resorts and luxury homes modeled on traditional Chinese and Malay houses full of Asian decor are illuminated in this book celebrating the fascinating multicultural eclecticism of modern-day Malaysia. With over 350 stunning color photographs, Tropical Style: Contemporary Dream Houses in Malaysia will delight and inspire those who wish to apply these ideas to their own tropical homes, in any global setting.

Living Under the Sun Michelle Galindo,Robert Klanten,Sven Ehmann.2015 The tropics are a way of life. Embracing outdoor surroundings as much as indoor possibilities, tropical houses have become a source of new impulses for architecture, interiors, and furniture design worldwide.

Tropical Houses Tim Street-Porter.2000 Celebrates homes in paradise-like settings, bringing together 225 photographs of vernacular architecture by some of the world's most noted designers in jungle, volcanic cliff, and lagoon settings.

New Tropical Classics Carolyn Horwitz,Anthony Iannacci.2011 The tropical homes designed by San Francisco-based architect Shay Zak perfectly capture the spirit and culture of the islands. Subtleties of proportion,

celebration of light, and thoughtful framing of views are delicately balanced to create exceptional homes that are perfectly suited to their dramatic oceanside sites. Constructed of natural materials that are beautiful to the eye and pleasant to the touch, the structures mesh seamlessly with the landscape and age with grace. *New Tropical Classics: Hawaiian Homes* by Shay Zak features color photography, site plans, and descriptions of eight extraordinary residences that both embrace the traditional elements of tropical architecture and push it in exciting new directions.

The Tropical Modern House Raul A. Barreneche.2011 Raul A. Barreneche has searched the globe including such spectacular locales as Hawaii, St. Barts, Malaysia, Singapore, Indonesia, Australia, and India to bring together a collection of luxurious modern homes designed by such luminaries as Isay Weinfeld, Marcio Kogan, Kerry Hill, and Patrick Jouin and Sanjit Manku, among many others.

The Clockwise House System Jacques Dorsan,Wain Farrants.2011-06 Jacques Dorsan was the leading pioneer of sidereal astrology in France. Using more than eighty sidereal horoscopes, this book illustrates Dorsan's clockwise house system. Most of the charts are from the original French edition, with many more added in this edition. The book embodies one of the most important astrological discoveries of twentieth and twenty-first centuries. Astrology normally views the twelve houses in astrology in a counterclockwise direction, the direction of the zodiac signs. According to Jacques Dorsan, however, we should view them in a clockwise direction. Traditionally, Western astrologers have interpreted the houses as though they rotate in the same, counterclockwise direction as the zodiac signs. According to Jacques Dorsan, however, the houses are enumerated in a clockwise direction, following the daily diurnal motion of the Sun, for example. By using the clockwise house system together with the sidereal zodiac, everything suddenly falls into place astrologically when looking at a horoscope. This key unlocks the mystery of the horoscope. Thanks to Jacques Dorsan, we finally have access to a true form of astrology--based on the sidereal zodiac and utilizing the clockwise house system--enabling a giant leap forward in the practice of astrology. It allows us to recover the original astrology. This is possible today because of Rudolf Steiner's indications, as well as the research of the French statistician Michel Gauquelin, who investigated hundreds of thousands of horoscopes and confirmed that the astrological houses run in a clockwise direction. This English translation includes more than eighty charts, both those in the Jacques Dorsan's original work in French and more added by the editor of this edition. The clockwise house system is applied in this book using sidereal horoscopes. It can just as easily be applied using tropical horoscopes. The Clockwise House System is an invaluable addition to the literature of modern astrology, allowing open-minded readers a unique and profound look at the new and limitless possibilities of this powerful tool of spiritual growth and understanding. This book is a translation from French of *Le véritable sens des maisons astrologiques* Éditions du Rocher, Monaco, 1984.

New Directions in Tropical Asian Architecture Philip Goad,Anoma Pieris.2018-07-10 From three architecture industry experts comes a book nearly as sophisticated as the luxury homes profiled within. Inspired by new architectural agendas, such as rethinking congregational spaces and promoting a minimalist lifestyle, the luxury homes from across of Southeast Asia collected in this book dazzle with a bold new perspective on modern architecture. With an additional 200 architectural plans to further inspire modern architecture aficionados, *New Directions in Tropical Asian Architecture* presents breathtaking specimens from throughout Southeast Asia, including: India Indonesia Malaysia Singapore Sri Lanka Thailand Let the luxury homes and residences in this book wow you, and open your eyes to a side of Southeast Asian architecture that you've never seen before.

Assembled in Light Alastair Gordon.2020-09-15 The first monograph illustrating the high-end contemporary residential design of Barnes Coy Architects. Throughout their twenty-five-year commitment to modern design, Barnes Coy Architects have specialized in one-of-a-kind dream houses designed for those who prefer to live in highly spatial and modern ways. *Assembled in Light* is the first exclusive look at this firm's previously unpublished body of high-end residential work. These leisure homes gleam in the sun like sleek, finely tuned machines. Everything has been custom designed, custom made, custom treated. The houses are tastefully furnished with one-of-a-kind artisanal pieces (by Wendell Castle, Chris Lehrecke, etc.) and museum-quality collections of contemporary art hanging on the walls (such as works by Anselm Kiefer, Barbara Kruger, Richard Prince, and Cindy Sherman). They feature infinity pools, outdoor and indoor kitchens, roof decks, temperature-controlled wine cellars, and numerous guest rooms, as well as ten-foot-high doorways and floor-to-ceiling swathes of tempered glass to better gaze out at the dunes and ocean views. The new photography beautifully captures the architects' attention to detail and love of specialized materials, whether it's Carrara marble from Italy or teak from Bali. While most of the houses are located in the Hamptons in New York, a few are found as far afield as Costa Rica, California, Georgia, and Westchester County. All but three homes were built on commanding waterfront sites.

Colonialism and Modern Architecture in Germany Itohan Osayimwese.2017-08-11 Over the course of the nineteenth century, drastic social and political changes, technological innovations, and exposure to non-Western cultures affected Germany's built environment in profound ways. The economic challenges of Germany's colonial project forced architects designing for the colonies to abandon a centuries-long, highly ornamental architectural style in favor of structural technologies and building materials that catered to the local contexts of its remote colonies, such as prefabricated systems. As German architects gathered information about the regions under their influence in Africa, Asia, and the Pacific—during expeditions, at international exhibitions, and from colonial entrepreneurs and officials—they published their findings in books and articles and organized lectures and exhibits that stimulated progressive architectural thinking and shaped the emerging modern language of architecture within Germany itself. Offering in-depth interpretations across the fields of architectural history and postcolonial studies, Itohan Osayimwese considers the effects of colonialism, travel, and globalization on the development of modern architecture in Germany from the 1850s until the 1930s. Since architectural developments in nineteenth-century Germany are typically understood as crucial to the evolution of architecture worldwide in the twentieth century, this book globalizes the history of modern architecture at its founding moment.

Tropical House Elizabeth Reyes.2012-04-02 *Tropical House* celebrates a growing trend toward stylish globalization in interior design. More than 25 stunning houses and condos in and around Manila, the Philippines, evoke a distinctive tropical-modern-fusion style that is gaining popularity around the world. All these fine residences comprise a synthesis of East-West trends and contemporary furnishings—as Filipino designers merge sleek modernist furniture with local designers' soulful creations in natural hardwoods and other tropical materials. Over 250 full-color photographs of outstanding Filipino residences will inspire readers with their diverse and contemporary looks. From vintage glamour to classic modern with bold artful accents, to the clean, glam look known as contemporary chic, this design book showcases the myriad tastes of the Philippines. The selection features modernist designs referred to as Zen or Minimalist; admires the modern Global Eclectics, those well-traveled collectors of beautiful objects from East and West; and celebrates the individualists who mix European furniture with acutely creative accents from local designers or who frame edgy artworks by Filipino artists with iconic design inspired by Japanese architecture. Such are the global interiors and architecture of today's tropical Asia.

Traditional Japanese Architecture Mira Locher.2012-04-17 By examining the Japanese history of buildings and building designs from prehistory to modern day, lovers of Japan will develop a deeper understanding and appreciation of this island country. Simplicity, sensitivity to the natural environment, and the use of natural materials are the hallmarks of Japanese architecture. The Art of Japanese Architecture provides a broad overview of traditional Japanese architecture in its historical and cultural context. It begins with a discussion of prehistoric dwellings and concludes with a description of modern Japanese buildings. Important historical influences and trends—notably the introduction of Buddhist culture from Korea and China, the development of feudalism, and the influence of modern Western styles of building—are all discussed in detail as facets of Japanese design. Through all of these changes, a restrained architectural tradition developed in marked contrast to an exuberant tradition characterized by monumentality and the use of bold colors. The book provides tremendous insights into the dynamic nature of Japanese architecture and how it reflects an underlying diversity within Japanese culture. The book is profusely illustrated with over 370 color photographs, woodblock prints, maps, diagrams, and specially commissioned watercolors.

Living Modern Tropical Phyllis Richardson.2012-09-11 A colorful resource influenced by life in the tropics that applies modern concerns— balance, proportion, space, and light—to a variety of settings and environments Published in 2010, Living Modern is the ultimate resource for contemporary living. Defining the “modern” space as much more than “modernist,” the book showcases global interiors with clean lines, sophisticated color combinations, outdoor rooms, great design objects, and open areas for relaxing and eating. Now, with a new selection of photography and houses, Living Modern Tropical applies these attributes to tropical climates, where the expression of modern living has found its natural home. The book is organized into ten sections: nature, architecture, outdoors, elements, function, light, furniture, details, materials, and water. Each features themed subsections that focus on the attributes most enjoyed in tropical spaces. But regardless of where you live, here are hundreds of design ideas that will provide inspiration for every room in the house.

Modern Tropical Byron Hawes.2018-06-19 Warm, inviting, embracing the indoor-outdoor lifestyle with a touch of the exotic, tropical modern homes are a dream of paradise realized. Contemporary tropical residential architecture has risen from a geographically specific homegrown aesthetic to a source of inspiration for the world’s great modern architects and designers. Set in exotic locales, with pools, lush foliage, colorful gardens, these homes define a way of life. Frequently elegant and uncluttered, the houses serve as models of smart and beautiful design with lots of ideas for homeowners who do not necessarily live in a tropical or subtropical climate, but who wish to have something of that appeal and sensitivity in their own home. This book presents some of the most innovative interpretations of the genre from the past five years by internationally recognized architects and interior decorators, such as Tadao Ando, as well the work of young up-and-comers of great talent, including German-born, Bali-based Alexis Dornier, and Mexico’s Roof Arquitectos. Selected residences span the globe, from the southern United States, the Caribbean, and tropical regions of Latin America, to Southeast Asia, northern Australasia, and Africa. Modern Tropical explores the exotic material, color, cultural, environmental, and aesthetic choices of some of contemporary architecture’s most beautiful residential properties. Each house is introduced with breathtaking interior and exterior photography and orientation plans, giving readers an in-depth glimpse of the rapidly evolving symbiosis between nature and shelter, indoor and outdoor, and rustic and polished, in a definitive examination of tropical modern living.

Sustainable Asian House Paul McGillick.2013-10-08 With over 350 vibrant photographs, extensive commentary and architectural plans, this architecture and design book showcases the modern luxury homes of Asia. The Sustainable Asian House celebrates modern architecture as an expression of environmental, social and cultural sustainability, as seen in some of the most breathtaking luxury homes in Southeast Asia. Gorgeous residences in Thailand, Malaysia, Singapore, Indonesia and the Philippines beautifully exemplify the trend towards sustainable architecture that engages with the natural world. The 27 houses featured in this fascinating and stunningly photographed architectural digest provide endless inspiration for architects, designers, builders and home buyers. The Sustainable Asian House illuminates the region's reinterpretation of tropical architecture and the growing interest in traditional materials and craftsmanship. There is a new emphasis on fresh air, natural light and spatial variety, reflecting the importance of well-being. Designers are considering issues such as orientation to the sun and prevailing winds to reduce energy consumption and carbon footprint. Instead of treating the tropical climate as something to overcome, the architects featured in this book present regional solutions on how to live appropriately in the contemporary tropical world.

Houses by the Shore Oscar Riera Ojeda,Byron Hawes.2018-10-16 Highlighting thirty-five spectacular recently completed houses overlooking sea, lake, river, and ocean, selected for beauty and variety across the globe, Houses by the Shore features homes that demonstrate the extraordinarily diverse ways that today's leading architects and interior designers build and design homes on the water and new approaches homeowners are taking to life on the shore. Frequently elegant and uncluttered, these houses serve as models of smart and often exquisite design with lots of ideas for homeowners who don't necessarily live in a

waterfront home, but who wish to have something of that appeal and sensitivity in their own space. A range of projects encompassing myriad geographic and cultural inspirations show some of the world's most inviting residences, built in stone and glass, in wood and steel and concrete. The houses vary in size and style, though all within the realm of the modern, from open plan homes that include terraces and rooms that flow from indoors to out, to spaces flooded with light and views. Each house is photographed comprehensively with detailed interior and exterior pictures and plans, and placed into context through the lens of widely respected editor Oscar Riera Ojeda and descriptive texts written by design critic Byron Hawes, to give readers a privileged look at the best of shore-side residential architecture. With its beautiful modernist homes set beside the golden sands of the gulf coast of Mexico or upon the romantic islands of Greece, from Finland to South Africa to New Zealand, *Houses by the Shore* is a paean to rooms with a view.

A House in the Sun Daniel A. Barber.2016 'A House in the Sun' describes a number of solar house experiments in the 1940s and 1950s. The houses relied on the materials and ideas of modern architecture for both energy efficiency and claims to cultural relevance, and also developed out of a growing concern over global resource limits--Provided by publisher.

Bright Bazaar Will Taylor.2014-04-29 The founder of the influential blog by the same name shares his secrets for choosing colors that work for different rooms in a house, demonstrating strategic applications of color shades and combinations for walls, floors, furniture, fabrics and accessories. 40,000 first printing.

Tropical Architecture Alexander Tzonis,Bruno Stagno,Liane Lefaivre.2001 The tropical region covers a significant proportion of the globe, and yet its architecture receives relatively little outside comment or exposure. Dispersed widely throughout the world, the region incorporates areas as far-flung as the Caribbean islands, India, South-East Asia, and large parts of Australia, Africa and South and Central America. Despite their great cultural diversity, these areas share both climatic and ecological factors, as well as a post-colonial condition and the pressures of modernization in the world of globalization. Architects' reactions to the tropical context are as varied as the region is diverse. *Tropical Architecture* brings together architects and critics from throughout the tropical region, examining the implications of the opposing forces of tradition and innovation and the struggle between global and local order. Among the issues covered are sustainability, bio- and cultural diversity, micro-climatic control and technology and multi-disciplinary design. The argument centres on Critical Regionalism, a concept introduced into the architectural debate in the early 1980s by two of the book's co-authors, Tzonis and Lefaivre. This is not a style but rather an approach to architecture that asks for design to be conceived in response to the needs and opportunities of a specific region - although it is not inherently opposed to global potentials. The theoretical debate is backed up by case studies of a range of projects, from small-scale designs using minimal technology to super-sophisticated, high-tech solutions, and from schemes that look to environmental comfort to ones concerned with issues of symbolism and memory. It is out of this multiplicity of approaches that the general global lesson of Critical Regionalism as applied to tropical architecture is to be found. THE PRINCE CLAUS FUND stimulates and supports activities in the field of culture and development by granting awards, funding and producing publications and by financing and promoting networks and innovative cultural activities. Support is given both to persons and to organizations in African, Asian, Latin American and Caribbearn countries.

New Brazilian House Dominic Bradbury.2014-06-17 Presents a range of beautiful and original Brazilian houses building on the country's potent legacy of modernist tropical architecture Brazil is a country blessed with natural beauty and the buzz of megalopolises and resorts. Amid glamorous beaches and lush tropical vegetation, contemporary Brazilian architects are establishing a global reputation through house and hotel design that combines a bold contemporary aesthetic with a uniquely Brazilian sensibility. Organized into three sections— Town, Country, and Coast —the carefully selected houses presented here offer new takes on indoor-outdoor living, beautifully crafted local materials, and a mastery of natural light. The locations range from stunning city homes to country retreats and tempting coastal escapes in cities including Sao Paulo, Rio de Janeiro. Featuring work by Marcos Acayaba and Pritzker-prize-winning architect Paulo Mendes da Rocha, together with homes by designers such as Fernanda Marques, Guilherme Torres, and André Piva, *New Brazilian House* reflects the vitality and verve of Brazil's architecture and design today.

The New Shingled House John Ike,Thomas A. Kligerman,Joel Barkley,Marc Kristal.2015-10-13 The architectural style of the classic American summer, the shingled house can suggest the beach, the countryside, the mountains, and even the city. AD100 architects Ike Kligerman Barkley, one of the most successful firms practicing in a traditional style today, presents 14 houses that celebrate the simple wood shingle's infinite flexibility—ranging from richly historic to sculptural and experimental. The *New Shingled House* includes examples throughout the fabled seaside resorts of New England—Martha's Vineyard, Block Island, and the Hamptons—as well as houses in California's Bay Area and Point Loma, on a pristine mountain lake in South Carolina, and a Scandinavian influenced family residence in Connecticut. All are characterized by a sense of graciousness and generosity that makes them unique spaces for the owners and enviable spaces for readers. The versatility of the shingle style allows the designers to explore formal ideas and to respond to client preferences and taste. The houses thus achieve the architects' fundamental goal: when their clients enter their new house for the first time, they should feel as though they have always lived there. This stunning visual presentation features new photography by noted interiors photographer William Waldron, who has captured the graciousness and generosity of the elegant interiors and welcoming porches and terraces that make these houses so inviting and timeless.

A Genealogy of Tropical Architecture Jiat-Hwee Chang.2016-04-28 *A Genealogy of Tropical Architecture* traces the origins of tropical architecture to nineteenth century British colonial architectural knowledge and practices. It uncovers how systematic knowledge and practices on building and environmental technologies in the tropics were linked to military technologies, medical theories and sanitary practices, and were manifested in colonial building types such as military barracks, hospitals and housing. It also explores the various ways these colonial knowledge and practices shaped post-war techno scientific research and education in climatic design and modern tropical architecture. Drawing on the interdisciplinary scholarships on postcolonial studies, science studies, and environmental history, Jiat-Hwee Chang argues that tropical architecture was inextricably entangled with the socio-cultural constructions of tropical nature, and the politics of colonial governance and postcolonial development in the British colonial and post-colonial networks. By bringing to light new historical materials through formidable research and tracing the history of tropical architecture beyond what is widely considered today as its founding moment in the mid-twentieth century, this important and original book revises our understanding of colonial built environment. It also provides a new historical framework that significantly bears upon contemporary concerns with climatic design and sustainable architecture. This book is an essential resource for understanding tropical architecture and its various contemporary manifestations. Its in-depth discussion and path breaking insights will be invaluable to specialists, academics, students and practitioners.

Tropical Modern Raul A. Barreneche.2003 Out with the cool, in with the hot. These houses by such luminaries as Oscar Niemeyer, Gio Ponti, Geoffrey Bawa, and Isay Weinfeld are a perfectly seamless continuum of indoor-outdoor space. The author has traveled the globe to bring together a collection of luxurious modern homes that combine modern technology with local, often exotic materials to produce rich designs of wood, metal, stucco, and glass. Water and breezeways figure prominently, and green eco-conscious features emerge naturally from the tropical design environment. This is a sophisticated survey of modern houses with open floor plans, exterior courtyards, sunny patios, and cool stucco surfaces all touched by the exotic flavors of their tropical locales. The combination of modern architectural form and tropical settings is extending and revitalizing modernism as never before.

Island Style Gillian Beal.2012-06-26 With over 350 beautiful photographs and insightful commentary, *Island Style* reveals the lush, tropical architecture and interior design of Indonesia. A tropical island inspires thoughts of warm breezes, crystal clear water and white beaches stretching as far as the eye can see. But tropical islands are more than just gorgeous beaches, particularly in the vast archipelago of Indonesia, with its diverse peoples, cultures and traditions stretching from Java to Bali and beyond. In *Island Style*, the inspiration artists and designers have long found in Indonesia comes to life with a new generation of architects and designers as they discover this island paradise. Twenty-five stunning luxury homes inspired by the natural tropical settings of Indonesia are showcased in these pages, setting a new standard for tropical Asian architecture. From private beach bungalows to vacation villas to island hideaways, each of these dream houses expresses a different aspect of Indonesia's unique design heritage. Simple yet exotic, minimalist yet organic, cosmopolitan yet local and sustainable—the common denominator for all of these homes is that they are the stuff of island dreams. Be inspired by these tropical homes as the ultimate in outdoor living and sustainable architecture, fantastically decorated with modern Asian decor. Detailed descriptions of the materials used and design philosophy behind each house means you'll be able to find plenty of practical ideas for furnishing and building your own tropical island dream home anywhere in the world.

Modern Architecture and Climate Daniel A. Barber.2020-07-07 How climate influenced the design strategies of modernist architects *Modern Architecture and Climate* explores how leading architects of the twentieth century incorporated climate-mediating strategies into their designs, and shows how regional approaches to climate adaptability were essential to the development of modern architecture. Focusing on the period surrounding World War II—before fossil-fuel powered air-conditioning became widely available—Daniel Barber brings to light a vibrant and dynamic architectural discussion involving design, materials, and shading systems as means of interior climate control. He looks at projects by well-known architects such as Richard Neutra, Le Corbusier, Lúcio Costa, Mies van der Rohe, and Skidmore, Owings, and Merrill, and the work of climate-focused architects such as MMM Roberto, Olgyay and Olgyay, and Cliff May. Drawing on the editorial projects of James Marston Fitch, Elizabeth Gordon, and others, he demonstrates how images and diagrams produced by architects helped conceptualize climate knowledge, alongside the work of meteorologists, physicists, engineers, and social scientists. Barber describes how this novel type of environmental media catalyzed new ways of thinking about climate and architectural design. Extensively illustrated with archival material, *Modern Architecture and Climate* provides global perspectives on modern architecture and its evolving relationship with a changing climate, showcasing designs from Latin America, Europe, the United States, the Middle East, and Africa. This timely and important book reconciles the cultural dynamism of architecture with the material realities of ever-increasing carbon emissions from the mechanical cooling systems of buildings, and offers a historical foundation for today's zero-carbon design.

Tropical Houses Michelle Galindo.2012 The houses featured in this volume embrace the tropical lifestyle with exotic local materials and eco-conscious features.

25 Tropical Houses in Singapore and Malaysia Paul McGillick.2014-09-02 *25 Tropical Houses in Singapore and Malaysia* features top architects and designers with ideas that are stylish, contemporary, and show twenty-first century savvy. The difference between a house and a home cannot easily be explained, but anyone walking into a building that is a home, rather than a house, can almost immediately feel the difference. While called *25 Tropical Houses in Singapore and Malaysia*, this book is at its heart about buildings that share a common spirit: structures that are home to a diverse cross-section of families around Singapore and Malaysia. Positioned as a global city at the hub of South East Asia, Singapore has a thoroughly modern sensibility balanced by an inherited culture and sense of place. This new global consciousness is reflected in its architecture, which demonstrates a seamless marriage of vernacular and modernist forms. The luxury homes in this book illustrate how architects work with, rather than against, the singular landscape to generate beautiful tropical homes embellished with modern Asian decor. A new wave of highly distinctive architecture has seen Singapore recognized, for the first time, as one of the world's most dynamic architectural centers. Malaysian architecture retains a greater interest in vernacular forms, but the nation's strong economic growth has seen a push to recast the urban landscape. Architects are now working to accommodate the 'brave new world' of an affluent technocratic society within the Asian architecture vernacular currently found throughout most of the country. The most interesting new homes in Malaysia reflect a balance between traditional values and an optimistic global outlook. *25 Tropical Houses in Singapore and Malaysia* is an amazing source of home inspiration and insights, whether one seeks to know more about Singapore architecture, Malaysian traditions or tropical architecture in general. Architects featured in this book include: SCDA WOH A Bedmar and Shi CSYA Kevin Low K2LD Seksan WOW Architects John Heah
