Get the Damn Story Thomas W. Lippman.2023 In the decades between the Great Depression and the advent of cable television, when daily newspapers set the conversational agenda for the people of the United States, the best reporter in the business was a rumpled, hard-drinking figure named Homer Bigart. His reporting left marks on history. In 26 years at the New York Herald Tribune and 17 more at the New York Times, Bigart chronicled and brought to life the events that defined the era - wars in Europe, the Pacific, Korea, and Vietnam, the civil rights movement, the creation of Israel, the end of colonialism in Africa, and the Cuban revolution. He was one of the first reporters to visit and describe Hiroshima after the atomic bomb. He was the first correspondent to penetrate the Haganah, the militant Zionist underground in Palestine. He recounted the trial of Adolf Eichmann, the Army-McCarthy hearings, and the court-martial of William Calley. A model of versatility, he also wrote with verve and compassion about strip mining in Kentucky, squalor on the Bowery and the murder of a shopkeeper in Harlem. Despite two Pulitzers and a host of other prizes, Bigart never sought fame; when he retired from the New York Times in 1972, he quickly faded from public view, and few today know the extent to which he was esteemed by his peers and those who came after, including Neil Sheehan and David Halberstam. This is the first comprehensive biography to encompass all of Bigart's reporting, not just his war reporting--

The Story Paradox Jonathan Gottschall.2021-11-23 Storytelling, a tradition that built human civilization, may soon destroy it Humans are storytelling animals. Stories are what make our societies possible. Countless books celebrate their virtues. But Jonathan Gottschall, an expert on the science of stories, argues that there is a dark side to storytelling we can no longer ignore. Storytelling, the very tradition that built human civilization, may be the thing that destroys it. In *The Story Paradox*, Gottschall explores how a broad consortium of psychologists, communications specialists, neuroscientists, and literary quants are using the scientific method to study how stories affect our brains. The results challenge the idea that storytelling is an obvious force for good in human life. Yes, storytelling can bind groups together, but it is also the main force dragging people apart. And it's the best method we've ever devised for manipulating each other by circumventing rational thought. Behind all civilization's greatest ills—environmental destruction, runaway demagogues, warfare—you will always find the same master factor: a mind-disordering story. Gottschall argues that societies succeed or fail depending on how they manage these tensions. And it has only become harder, as new technologies that amplify the effects of disinformation campaigns, conspiracy theories, and fake news make separating fact from fiction nearly impossible. With clarity and conviction, Gottschall reveals why our biggest asset has become our greatest threat, and what, if anything, can be done. It is a call to stop asking, “How we can change the world through stories?” and start asking, “How can we save the world from stories?”

Great Stories Don't Write Themselves Larry Brooks.2019-11-05 One of the most common questions new writers ask professionals is how they wrote their book—what was their process for storytelling? Did they use an outline to plan the book, or write it from the seat of their pants? But really the question should be about the general principles and nature of storycraft—does every part of a story have what it needs to keep readers turning the pages? Bestselling author and creator of StoryFix.com Larry Brooks changes the sound of the writing conversation by introducing a series of detailed criteria for novelists of every level and genre to refer to while writing, regardless of their preferred writing method. Beginning with the broadest part of the story, the early checklists help writers to ensure that their novel is based on a premise rather than an idea, and gradually hones in on other elements to keep the story moving forward including: · dramatic tension · narrative strategy · scene construction Readers won't know or care about the process. But what Brooks offers here is a chance for readers to make the most of whichever process they choose, and in doing so cut years off their learning curve.

Agile Software Requirements Dean Leffingwell.2010-12-27 “We need better approaches to understanding and managing software requirements, and Dean provides them in this book. He draws ideas from three very useful intellectual pools: classical management practices, Agile methods, and lean product development. By combining the strengths of these three approaches, he has produced something that works better than any one in isolation.” -From the Foreword by Don Reinertsen, President of Reinertsen & Associates; author of Managing the Design Factory; and leading expert on rapid product development Effective requirements discovery and analysis is a critical best practice for serious application development. Until now, however, requirements and Agile methods have rarely coexisted peacefully. For many enterprises considering Agile approaches, the absence of effective and scalable Agile requirements processes has been a showstopper for Agile adoption. In Agile Software Requirements, Dean Leffingwell shows exactly how to create effective requirements in Agile environments. Part I presents the “big picture” of Agile requirements in the enterprise, and describes an overall process model for Agile requirements at the project team, program, and portfolio levels Part II describes a simple and lightweight, yet comprehensive model that Agile project teams can use to manage requirements Part III shows how to develop Agile requirements for complex systems that require the cooperation of multiple teams Part IV guides enterprises in developing Agile requirements for ever-larger “systems of systems,” application suites, and product portfolios This book will help you leverage the benefits of Agile without sacrificing the value of effective requirements discovery and analysis. You’ll find proven solutions you can apply right now—whether you’re a software developer or tester, executive, project/program manager, architect, or team leader.

Word of the Day Marilyn Horowitz.2024-04-26 Offering a unique creativity-and-time-management technique, Word of the Day is a practice that assists writers to create at will, write as much as they want, and acquire accurate self-acknowledgement in the process. The practice immediately connects writers with their innate storytelling ability as reflected in their dreams. The techniques synthesize the right and left sides of the brain so that writers can draw upon the entirety of their creative tools, fusing the verbal and visual mind, unleashing structural instincts and creativity, allowing them to dance together. Writers are asked to put a notebook by their bed so they can write first thing in the morning when they wake up and just before bedtime. Studies have shown that our most creative moments happen immediately upon waking and just before falling asleep. Writing adjacent to these moments, even briefly, gives writers access to their unlimited imagination, powerful tools of imagery, and the full scope of their memory.

The Recovering Leslie Jamison.2018-04-03 From the New York Times bestselling author of *The Empathy Exams* comes this transformative work showing that sometimes the recovery is more gripping than the addiction. With its deeply personal and seamless blend of memoir, cultural history, literary criticism, and reportage, *The Recovering* turns our understanding of the traditional addiction narrative on its head, demonstrating that the story of recovery can be every bit as electrifying as the train wreck itself. Leslie Jamison deftly excavates the stories we tell about addiction -- both her own and others' -- and examines what we want these stories to do and what happens when they fail us. All the while, she offers a fascinating look at the larger history of the recovery movement, and at the complicated bearing that race and class have on our understanding of who is criminal and who is ill. At the heart of the book is Jamison's ongoing conversation with literary and artistic geniuses whose lives and works were shaped by alcoholism and substance dependence, including John Berryman, Jean Rhys, Billie Holiday, Raymond Carver, Denis Johnson, and David Foster Wallace, as well as brilliant lesser-known figures such as George Cain, lost to obscurity but newly illuminated here. Through its unvarnished relation of Jamison's own ordeals, *The Recovering* also becomes a book about a different kind of dependency: the way our desires can make us all, as she puts it, broken spigots of need. It's about the particular loneliness of the human experience--the craving for love that both devours us and shapes who we are. For her striking language and piercing observations, Jamison has been compared to such iconic writers as Joan Didion and Susan Sontag, yet her utterly singular voice also offers something new. With enormous empathy and wisdom, Jamison has given us nothing less than the story of addiction and recovery in America writ large, a definitive and revelatory account that will resonate for years to come.

When Writers Drive the Workshop Brian Kessel.2023-10-10 With increasing school mandates and pressure to perform well on standardized tests, writing instruction has shifted to more accountability, taking the focus away from the writer. In his engaging book, *When Writers Drive the Workshop: Honoring Young Voices and Bold Choices*, author Brian Kessel asks teachers to go back to the roots of the writing workshop and let the students lead the conference. What happens when students, not tests, determine what they learned through reflection and self-evaluation? In *When Writers Drive the Workshop*, you'll find practical ideas, guiding beliefs, FAQs, and Digital Diversions to help visualize digital possibilities in the classroom. Written in an engaging, teacher-to-teacher style, this book focuses on four key components of writing workshop: Student-led conferring sessions where the teachers are the listeners, The Author's Chair, where students set the agenda and gather feedback, Structured reflection time for students to set goals and expectations for themselves, and Mini lessons that allow for detours based on students' needs, not teacher or curricula goals. All students have the powerful, shared need to be heard; when they choose their writing topics, they can see their lives unfold on the page. Teachers are educated by the bold choices of these young voices.

Story Engineering Larry Brooks. 2011-01-27 What makes a good story or a screenplay great? The vast majority of writers begin the storytelling process with only a partial understanding where to begin. Some labor their entire lives without ever learning that successful stories are as dependent upon good engineering as they are artistry. But the truth is, unless you are master of the form, function and criteria of successful storytelling, sitting down and pounding out a first draft without planning is an ineffective way to begin. *Story Engineering* starts with the criteria and the architecture of storytelling, the engineering and design of a story--and uses it as the basis for narrative. The greatest potential of any story is found in the way six specific aspects of storytelling combine and empower each other on the page. When rendered artfully, they become a sum in excess of their parts. You'll learn to wrap your head around the big pictures of storytelling at a professional level through a new approach that shows how to combine these six core competencies which include: • Four elemental competencies of concept, character, theme, and story structure (plot) • Two executional competencies of scene construction and writing voice The true magic of storytelling happens when these six core competencies work together in perfect harmony. And the best part? Anyone can do it!

Classroom Reading to Engage the Heart and Mind: 200+ Picture Books to Start SEL Conversations Nancy Boyles.2020-04-01 Storybook characters and situations are perfect for launching discussions of social emotional learning—why not let them help? In picture books, well-loved characters deal with many of the same problems students face in their own lives. What better resource could there be for encouraging students to think about their actions and responses? Using classroom texts to start SEL conversations— during an interactive read- aloud or an extension of shared close- reading lessons— weaves social emotional learning organically into the fabric of an existing curriculum rather than adding a new block to the day. In a book perfect for a study group or for immediate use in the classroom, literacy educator Nancy Boyles connects the dots between the competencies identified by leaders in the SEL field with the rich content of children’s literature. More than 200 award- winning picture books are profiled along the way as she unpacks each SEL skill, sketches typical classroom situations in which teachers might not see that skill demonstrated, discusses what to look for in books that address it, and provides carefully crafted sets of questions to explore with students.
