The Early Modern Dutch Press in an Age of Religious Persecution David de Boer.2023-08-29 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. For victims of persecution around the world, attracting international media attention for their plight is often a matter of life and death. This study takes us back to the news revolution of seventeenth-century Europe, when people first discovered in the press a powerful new weapon to combat religiously inspired maltreatments, executions, and massacres. To affect and mobilize foreign audiences, confessional minorities and their advocates faced an acute dilemma, one that we still grapple with today: how to make people care about distant suffering? David de Boer argues that by answering this question, they laid the foundations of a humanitarian culture in Europe. As consuming news became an everyday practice for many Europeans, the Dutch Republic emerged as an international hub of printed protest against religious violence. De Boer traces how a diverse group of people, including Waldensians refugees, Huguenot ministers, Savoyard office holders, and many others, all sought access to the Dutch printing presses in their efforts to raise transnational solidarity for their cause. By generating public outrage, calling out rulers, and pressuring others to intervene, producers of printed opinion could have a profound impact on international relations. But crying out against persecution also meant navigating a fraught and dangerous political landscape, marked by confessional tension, volatile alliances, and incessant warfare. Opinion makers had to think carefully about the audiences they hoped to reach through pamphlets, periodicals, and newspapers. But they also had to reckon with the risk of reaching less sympathetic readers outside their target groups. By examining early modern publicity strategies, de Boer deepens our understanding of how people tried to shake off the spectre of religious violence that had haunted them for generations, and create more tolerant societies, governed by the rule of law, reason, and a sense of common humanity.

Histories of Trade as Histories of Civilisation Antonella Alimento,Aris Della Fontana.2021-12-16 This edited collection explores the histories of trade, a peculiar literary genre that emerged in the context of the historiographical and cultural changes promoted by the *histoire philosophique* movement. It marked a discontinuity with erudition and antiquarianism, and interacted critically with universal history. By comparing and linking the histories of individual peoples within a common historical process, this genre enriched the reflection on civilisation that emerged during the long eighteenth century. Those who looked to the past wanted to understand the political constitutions and manners most appropriate to commerce, and grasp the recurring mechanisms underlying economic development. In this sense, histories of trade constituted a declination of eighteenth-century political economy, and thus became an invaluable analytical and practical tool for a galaxy of academic scholars, journalists, lawyers, administrators, diplomats and government ministers whose ambition was to reform the political, social and economic structure of their nations. Moreover, thanks to these investigations, a lucid awareness of historical temporality and, more particularly, the irrepressible precariousness of economic hegemonies, developed. However, as a field of tension in which multiple and even divergent intellectual sensibilities met, this literary genre also found space for critical assessments that focused on the ambivalence and dangers of commercial civilisation. Examining the complex relationship between the production of wealth and civilisation, this book provides unique insights for scholars of political economy, intellectual history and economic history.

Crisis and Renewal in the History of European Political Thought .2021-08-30 This volume advances a better, more historical and contextual, manner to consider not only the present, but also the future of 'crisis' and 'renewal' as key concepts of our political language as well as fundamental categories of interpretation.

Dear Friend, You Must Change Your Life' Ada Bronowski.2020-02-20 In *Dear Friend, you must change your life*, we see some of the most fascinating thinkers in history at their most private and profound, reaching out to a friend, sharing, testing, confirming discoveries about the complexity of life, how to rise above its hardships and enjoy its pleasures. We see writers embrace the roots of philosophical thought afresh, by grappling with real, lived experience, giving us unique insight into their ideas and worldviews that their more polished, public work often does not provide. We see artists sound the foundations of their artistic and moral integrity. Ranging from Seneca and Marcus Aurelius to Flora Tristan and Walter Benjamin, to Elizabeth of Bohemia and Giacomo Leopardi, to Mahatma Gandhi and Maurice B ejart, we see how the philosophical letter as a form of thinking, and thinking freely, spans across the ages and often forms some of the most interesting and lively of philosophical writings. Each letter is given a contextualising preface by an expert that brings out the reason this particular letter is a philosophical letter for life. As such, *Dear Friend, you must change your life* provides a unique introduction to an array of thinkers throughout history as well as an argument for philosophy as conversation, a conversation which has been ongoing for centuries.

Metaphysics of Human Rights 1948-2018 Luca Di Donato,Elisa Grimi.2019-12-20 The 1948 Declaration of Human Rights demanded a collaboration among exponents from around the world. Embodying many different cultural perspectives, it was driven by a like-minded belief in the importance of finding common principles that would be essential for the very survival of civilization. Although an arduous and extensive process, the result was a much sought-after and collective endeavor that would be referenced for decades to come. Motivated by the seventieth anniversary of the 1948 Universal Declaration of Human Rights and enriched by the contributions of eminent scholars, this volume aims to be a reflection on human rights and their universality. The underlying question is whether or not, after seventy years, this document can be considered universal, or better yet, how to define the concept of "universality." We live in an age in which this notion seems to be guided not so much by the values that the subject intrinsically perceives as good, but rather by the demands of the subject. Universality is thus no longer deduced by something that is objectively given, within the shared praxis. Conversely, what seems to have to be universal is what we want to be valid for everyone. This volume will be of interest to those currently engaged in research or studying in a variety of fields including Philosophy, Politics and Law.

The Internationalization of Intellectual Exchange in a Globalizing Europe, 1636-1780 Robert Mankin.2017-12-18 This book studies the phenomenon of cultural transfer via a gallery of case studies from Europe's early modernity. Perhaps its most original feature is to relate the European phenomenon to events in Europe's East (Central Europe) and developing practices of European Orientalism in the Middle East and India.

Revolution as Reformation Peter C. Messer,William Harrison Taylor.2021-01-19 Essays that explore how Protestants responded to the opportunities and perils of revolution in the transatlantic age *Revolution as Reformation: Protestant Faith in the Age of Revolutions, 1688-1832* highlights the role that Protestantism played in shaping both individual and collective responses to revolution. These essays explore the various ways that the Protestant tradition, rooted in a perpetual process of recalibration and reformulation, provided the lens through which Protestants experienced and understood social and political change in the Age of Revolutions. In particular, they call attention to how Protestants used those changes to continue or accelerate the Protestant imperative of refining their faith toward an improved vision of reformed religion. The editors and contributors define faith broadly: they incorporate individuals as well as specific sects and denominations, and as much of "life experience" as possible, not just life within a given church. In this way, the volume reveals how believers combined the practical demands of secular society with their personal faith and how, in turn, their attempts to reform religion shaped secular society. The wide-ranging essays highlight the

exchange of Protestant thinkers, traditions, and ideas across the Atlantic during this period. These perspectives reveal similarities between revolutionary movements across and around the Atlantic. The essays also emphasize the foundational role that religion played in people's attempts to make sense of their world, and the importance they placed on harmonizing their ideas about religion and politics. These efforts produced novel theories of government, encouraged both revolution and counterrevolution, and refined both personal and collective understandings of faith and its relationship to society.

A Philosophy for Europe Roberto Esposito.2018-06-11 Amid a devastating economic crisis, two tragic events coming from the outside - the wave of immigration and Islamic terrorism - have radically changed the profile and significance of the space we call Europe. Given a paradigm leap of this sort, philosophical reflection is in a position to exert its creative power more than other types of knowledge. But this can only happen if it is able to go beyond its own lexical boundaries, by turning its gaze outside itself. Here the leading Italian philosopher Roberto Esposito looks at how various strands of German, French, and Italian thought have achieved this outward turn and successfully captured international attention by breaking with the language of early nineteenth-century crisis philosophies. When analyzed from this novel perspective, the great texts of Adorno, Derrida, Foucault, and Deleuze, as well as works by the latest Italian thinkers, are cast in a new light. From the relationship and tension between them, reconstructed here with extraordinary theoretical sensitivity, a form of thought can arise that is equal to the challenges faced by Europe today. This erudite and wide-ranging analysis of European thought in the light of the crises facing the continent today will appeal to students and scholars of philosophy, critical theory, and beyond.

Papal Economics Maciej Zieba.2023-07-18 Papal Economics corrects the record about one of the most important—but least understood—authorities on capitalism and democracy: the Catholic Church. Maciej Zieba, OP—a leading interpreter of the thought of Pope John Paul II—takes readers on an enlightening tour through the Catholic Church's social teaching on economics and governance. Examining papal pronouncements from the late nineteenth century to the present, Zieba shows that the Church displays a profound understanding of democracy and support for free markets. But this praise is not unqualified—a major reason why secular commentators of all stripes misinterpret Catholic social teaching. Updated with a brand-new afterword explaining the controversial economic teachings of Pope Francis, Papal Economics is the essential book for understanding the proper path forward.

The Idea of Semitic Monotheism Guy G. Stroumsa.2021-05-20 The Idea of Semitic Monotheism examines some major aspects of the scholarly study of religion in the long nineteenth century—from the Enlightenment to the First World War. It aims to understand the new status of Judaism and Islam in the formative period of the new discipline. Guy G. Stroumsa focuses on the concept of Semitic monotheism, a concept developed by Ernest Renan around the mid-nineteenth century on the basis of the postulated and highly problematic contradistinction between Aryan and Semitic families of peoples, cultures, and religions. This contradistinction grew from the Western discovery of Sanskrit and its relationship with European languages, at the time of the Enlightenment and Romanticism. Together with the rise of scholarly Orientalism, this discovery offered new perspectives on the East, as a consequence of which the Near East was demoted from its traditional status as the locus of the Biblical revelations. This innovative work studies a central issue in the modern study of religion. Doing so, however, it emphasizes the new dualistic taxonomy of religions had major consequences and sheds new light on the roots of European attitudes to Jews and Muslims in the twentieth century, up to the present day.

Turning Points Mark A. Noll,David Komline,Han-luen Kantzer Komline.2022-10-18 Now in its fourth edition, this bestselling textbook (over 125,000 copies sold) isolates key events that provide a framework for understanding the history of Christianity. The book presents Christianity as a worldwide phenomenon rather than just a Western experience. This popular textbook is organized around 14 key moments in church history, providing contemporary Christians with a fuller understanding of God as he has revealed his purpose through the centuries. The new edition includes a new preface, updates throughout the book, revised further readings for each chapter, new sidebar content, and study questions. It also more thoroughly highlights the importance of women in Christian history and the impact of world Christianity. Turning Points is well suited to introductory courses on the history of Christianity as well as study groups in churches. Additional resources for instructors are available through Textbook eSources.

A Cultural History of Democracy in the Age of Enlightenment Michael Mosher,Anna Plassart.2022-12-15 This volume surveys the burst of political imagination that created multiple Enlightenment cultures in an era widely understood as an age of democratic revolutions. Enlightenment as precursor to liberal democratic modernity was once secular catechism for generations of readers. Yet democracy did not elicit much enthusiasm among contemporaries, while democracy as a political system remained virtually nonexistent through much of the period. If seventeenth- and eighteenth-century ideas did underwrite the democracies of succeeding centuries, they were often inheritances from monarchical governments that had encouraged plural structures of power competition. But in revolutions across France, Britain, and North America, the republican integration of constitutional principle and popular will established rational hope for public happiness. Nevertheless, the tragic clashes of principle and will in fraught revolutionary projects were also democratic legacies. Each chapter focuses on a distinct theme: sovereignty; liberty and the rule of law; the "common good"; economic and social democracy; religion and the principles of political obligation; citizenship and gender; ethnicity, race, and nationalism; democratic crises, revolutions, and civil resistance; international relations; and the transformations of sovereignty—a synoptic survey of the cultural entanglements of "enlightenment" and "democracy."

The European Mind Paul Hazard.1990 A study of Enlightenment thought between 1690 and 1715, this book covers the subject in such a way as to be an introduction to the wide range of radical, reactionary and controversial ideas which so characterize this period of history. The book was originally published in 1935 in French and accounts for the crisis of the European mind by describing the religious, philosophical, moral, scientific and artistic literature of the period.

The Enlightenment in Iberia and Ibero-America Brian Hamnett.2017-03-23 This book discusses responses to the challenges faced by two different Iberian imperial systems in their struggle to sustain territorial integrity and economic interests in the face of international competition. During a so-called period of 'Enlightened Despotism', absolutist governments in Spain and Portugal sought to harness Enlightenment ideas to their policies of reform. The Iberian Enlightenment, however, did not rely exclusively on government sponsorship - it had existing foundations in sixteenth-century Spanish humanism and subsequent attempts at reform, and educated individuals in major cities frequently operated independently of government. The Enlightenment contributed greatly to the availability of potential political solutions to the urgent matter of political status, in the attempt to transform absolutist governments into constitutional systems and drawing in the process on the structures of medieval foundations, contemporary revolutions or less radical constitutional monarchies, or a combination of sources more closely aligned with Ibero-American realities.

The Idea of Europe Shane Weller.2021-06-03 This book offers a new critical history of the idea of Europe from classical antiquity to the present day.

The Consumer Revolution, 1650-1800 Michael Kwass.2022-02-03 The production, acquisition, and use of consumer goods defines our daily lives, and yet consumerism is seen as increasingly controversial. Movements for sustainable and ethical consumerism are gaining momentum alongside an awareness of how our choices in the marketplace can affect public issues. How did we get here? This volume advances a bold new interpretation of the 'consumer revolution' of the eighteenth century, when European elites, middling classes, and even certain labourers purchased unprecedented quantities of clothing, household goods, and colonial products. Michael Kwass adopts a global perspective that incorporates the expansion of European empires, the development of world trade, and the rise of plantation slavery in the Americas. Kwass analyses the emergence of Enlightenment material cultures, contentious philosophical debates on the morality of consumption, and new forms of consumer activism to offer a fresh interpretation of the politics of consumption in the

age of abolitionism and the Atlantic Revolutions.

What Nostalgia Was Thomas Dodman.2018-01-05 In *What Nostalgia Was*, historian Thomas Dodman traces the history of clinical nostalgia from when it was first coined in 1688 to describe deadly homesickness until the late nineteenth century, when it morphed into the benign yearning for a lost past we are all familiar with today. Dodman explores how people, both doctors and sufferers, understood nostalgia in late seventeenth-century Swiss cantons (where the first cases were reported) to the Napoleonic wars and to the French colonization of North Africa in the latter 1800s. A work of transnational scope over the longue duree, the book is an intellectual biography of a transient mental illness that was successively reframed according to prevailing notions of medicine, romanticism, and climatic and racial determinism. At the same time, Dodman adopts an ethnographic sensitivity to understand the everyday experience of living with nostalgia. In so doing, he explains why nostalgia was such a compelling diagnosis for war neuroses and generalized socioemotional disembeddedness at the dawn of the capitalist era and how it can be understood as a powerful bellwether of the psychological effects of living in the modern age.

Anglican Enlightenment William J. Bulman.2015-05-12 An original interpretation of the early European Enlightenment and the politics of religion in later Stuart England and its global empire. William J. Bulman provides a novel account of how the onset of globalization and the end of Europe's religious wars transformed English intellectual, religious and political life.

Four Fools in the Age of Reason Dorinda Outram.2019-04-12 Unveiling the nearly lost world of the court fools of eighteenth-century Germany, Dorinda Outram shows that laughter was an essential instrument of power. Whether jovial or cruel, mirth altered social and political relations. Outram takes us first to the court of Frederick William I of Prussia, who emerges not only as an administrative reformer and notorious militarist but also as a master of fools, a ruler who used fools to prop up his uncertain power. The autobiography of the itinerant fool Peter Prosch affords a rare insider's view of the small courts in Catholic south Germany, Austria, and Bavaria. Full of sharp observations of prelates and princes, the autobiography also records episodes of the extraordinary cruelty for which the German princely courts were notorious. Joseph Fröhlich, court fool in Dresden, presents more appealing facets of foolery. A sharp salesman and hero of the Meissen factories, he was deeply attached to the folk life of fooling. The book ends by tying the growth of Enlightenment skepticism to the demise of court foolery around 1800. Outram's book is invaluable for giving us such a vivid depiction of the court fool and especially for revealing how this figure can shed new light on the wielding of power in Enlightenment Europe.

Heirs of Flesh and Paper Tom Tölle.2022-03-07 *Heirs of Flesh and Paper* tells the story of early modern dynastic politics through subjects' practical responses to royal illness, failing princely reproduction, and heirs' premature deaths. It treats connected dynastic crises between 1699 and 1716 as illustrative for early modern European political regimes in which the rulers' corporeality defined politics. This political order grappled with the endemic uncertainties induced by dynastic bodies. By following the day-to-day practices of knowledge making in response to the unpredictability of royal health, the book shows how the ruling family's mortal coils regularly threatened to destabilize the institutionalized legal fiction of kingship. Dynastic politics was not only as a transitory stage of state formation, part of elite cooperation, or a cultural construct. It needs to be approached through everyday practices that put ailing dynastic bodies front and center. In a period of intensifying political planning, it constituted one of the most important sites for changing the political itself.

Thinking Europe MATS ANDRÉN.2022-10-14 Presenting a new historical narrative on European integration and identity this title examines how the concept of Europe has been entangled in a dynamic and dramatic tension between calls for unity and arguments for borders and division. Through an in-depth intellectual history of the idea of Europe, Mats Andren interrogates the concept of integration and more recent debates surrounding European identity across the nineteenth and early twentieth centuries and the post-war period. Applying a broad range of original sources this unique work will be key reading for students and researchers studying European History, European Studies, Political History and related fields.

Languages of Reform in the Eighteenth Century Susan Richter,Thomas Maissen,Manuela Albertone.2019-10-18 Societies perceive Reform or Reforms as substantial changes and significant breaks which must be well-justified. The Enlightenment brought forth the idea that the future was uncertain and could be shaped by human beings. This gave the concept of reform a new character and new fields of application. Those who sought support for their plans and actions needed to reflect, develop new arguments, and offer new reasons to address an anonymous public. This book aims to compile these changes under the heuristic term of languages of reform. It analyzes the structures of communication regarding reforms in the 18th century through a wide variety of topics.

The Wisdom of the Enlightenment Michael K. Kellogg.2022-02-15 Enlightenment—Aufklärung in German, Lumières in French—is more an idea than a period. But it is an idea that took hold in a particular historical context of revolutionary scientific advances, increasing economic and social freedom, rising literacy and prosperity, and a greater willingness to challenge the authoritarianism of the seventeenth and eighteenth centuries. In *The Wisdom of the Enlightenment*, author Michael K. Kellogg points to 1637, the year that gave us Rene Descartes' landmark inquiry into truth, as the beginning of a period that radically changed individual human thought and collective societal action. From Descartes' assertion of "I think, therefore I am," to the philosophies of Enlightenment thinkers like Moliere, Spinoza, Voltaire, Hume, and Kant, this book charts the new and revolutionary philosophies at a time when progress seemed possible across the whole range of human knowledge and endeavor. In sweeping aside tired superstitions and applying a new scientific methodology, the Enlightenment ideas of progress through free exercise of reason ushered us into the modern world. This engaging and comprehensive survey of Enlightenment thoughts and thinkers is a celebration of the faith that all problems are solvable by human reason.

Church History, Volume Two: From Pre-Reformation to the Present Day John D. Woodbridge, Frank A. James III.2013-08-08 *Church History, Volume Two* chronicles the events, the triumphs, and the struggles of the Christian movement from the years leading up to the Reformation through the next five centuries to the present-day. Looking closely at the integral link between the history of the world and that of the church, *Church History* paints a portrait of God's people within the context of the times, cultures, and developments that both influenced and were influenced by the church. FEATURES: Maps, charts, and illustrations spanning the time from the thirteenth century to today. Explanations of all the major denominational movements, traditions, and schisms during and after the Reformation. Overviews of the Christian movement in Africa, eastern Europe, Asia, and Latin America to cover the scope of the ecumenical environment of the twenty-first century. Insights into the role and influence of politics, culture and societal norms, and technology on the Western church. Unbiased details on the major theological controversies and issues of each period. AUTHORS' PERSPECTIVE: Authors John D. Woodbridge and Frank A. James III wrote this history of the church from the perspective that such a history is the story of the greatest movement and community the world has known—as imperfect as it still is. It's a human story of a divinely called people who want to live by a divine revelation. It's a story of how they succeeded and how they failed and of how they are still trying to live out their calling. From the Reformation theologians in Europe to the revivalists, apologists, and Christian thinkers all over the world, the historical figures detailed are people who have struggled with the meaning of the greatest event in history—the coming of the Son of God—and with their role in that event and in the lives of God's people.

Postsecular Feminisms Nandini Deo.2018-07-26 *Postsecular Feminisms* explores the contested relationship between feminism and secularism through a series of case studies, featuring perspectives from the global North and South. It offers insights beyond those of the Abrahamic traditions, and includes multiple examples from South Asia. By decentering the European experience, *Postsecular Feminisms* shows how secularism and feminism have been constituted in North America, South Asia, and Anglophone West Africa. The book asks: can postsecular feminism offer a way to think about religion and gender so as to support women in all the variety of their lived experiences? The contributors show that postsecular feminism is a variety of feminism that is not necessarily either secularist or anti-secular. Rather it is feminism informed by a history of secularist bias within liberal feminism. *Postsecular Feminisms* explores both the potentials and pitfalls of postsecular feminisms, with some authors arguing that a contextually grounded praxis is possible, while others make a strong case against postsecular feminism as theory and practice.

Impunity and Capitalism Trevor Jackson.2022-09-15 Whose fault are financial crises, and who is responsible for stopping them, or repairing the damage? Impunity and Capitalism develops a new approach to the history of capitalism and inequality by using the concept of impunity to show how financial crises stopped being crimes and became natural disasters. Trevor Jackson examines the legal regulation of capital markets in a period of unprecedented expansion in the complexity of finance ranging from the bankruptcy of Europe's richest man in 1709, to the world's first stock market crash in 1720, to the first Latin American debt crisis in 1825. He shows how, after each crisis, popular anger and improvised policy responses resulted in efforts to create a more just financial capitalism but succeeded only in changing who could act with impunity, and how. Henceforth financial crises came to seem normal and legitimate, caused by impersonal international markets, with the costs borne by domestic populations and nobody in particular at fault.

Rediscovering Léon Brunschvicg's Critical Idealism Pietro Terzi.2022-01-13 Léon Brunschvicg's contribution to philosophical thought in fin-de-siècle France receives full explication in the first English-language study on his work. Arguing that Brunschvicg is crucial to understanding the philosophical schools which took root in 20th-century France, Pietro Terzi locates Brunschvicg alongside his contemporary Henri Bergson, as well as the range of thinkers he taught and influenced, including Lévinas, Merleau-Ponty, de Beauvoir, and Sartre. Brunschvicg's deep engagement with debates concerning spiritualism and rationalism, neo-Kantian philosophy, and the role of mathematics in philosophy made him the perfect supervisor for a whole host of nascent philosophical ideas which were forming in the work of his students. Terzi outlines Brunschvicg's defence of neo-Kantian judgement, historical analysis and the inextricability of the natural and humanist sciences to any rigorous system of philosophy, with wide-ranging implications for contemporary scholarship.

The Crisis of the European Mind Paul Hazard.2013-04-09 Paul Hazard's magisterial, widely influential, and beloved intellectual history offers an unforgettable account of the birth of the modern European mind in all its dynamic, inquiring, and uncertain glory. Beginning his story in the latter half of the seventeenth century, while also looking back to the Renaissance and forward to the future, Hazard traces the process by which new developments in the sciences, arts, philosophy, and philology came to undermine the stable foundations of the classical world, with its commitment to tradition, stability, proportion, and settled usage. Hazard shows how travelers' tales and archaeological investigation widened European awareness and acceptance of cultural difference; how the radical rationalism of Spinoza and Richard Simon's new historical exegesis of the Bible called into question the revealed truths of religion; how the Huguenot Pierre Bayle's critical dictionary of ideas paved the way for Voltaire and the Enlightenment, even as the empiricism of Locke encouraged a new attention to sensory experience that led to Rousseau and romanticism. Hazard's range of knowledge is vast, and whether the subject is operas, excavations, or scientific experiments his brilliant style and powers of description bring to life the thinkers who thought up the modern world.

Feminist Philosophy of Mind Keya Maitra, Jennifer McWeeny.2022 This collection is the first book to focus on the emerging field of study called feminist philosophy of mind. Each of the twenty chapters of Feminist Philosophy of Mind employs theories and methodologies from feminist philosophy to offer fresh insights and perspectives into issues raised in the contemporary literature in philosophy of mind and/or uses those from the philosophy of mind to advance feminist theory. The book delineates the content and aims of the field and demonstrates the fecundity of its approach, which is centered on the collective consideration of three questions: What is the mind? Whose mind is the model for the theory? To whom is mind attributed? Topics considered with this lens include mental content, artificial intelligence, the first-person perspective, personal identity, other minds, mental attribution, mental illness, perception, memory, attention, desire, trauma, agency, empathy, grief, love, gender, race, sexual orientation, materialism, panpsychism, and enactivism. In addition to engaging analytic and feminist philosophical traditions, essays draw from resources in phenomenology, philosophy of race, decolonial studies, disability studies, embodied cognition theory, comparative philosophy, neuroscience, and psychology--

Soul Machine: The Invention of the Modern Mind George Makari.2015-11-02 A brilliant and comprehensive history of the creation of the modern Western mind. Soul Machine takes us back to the origins of modernity, a time when a crisis in religious authority and the scientific revolution led to searching questions about the nature of human inner life. This is the story of how a new concept—the mind—emerged as a potential solution, one that was part soul and part machine, but fully neither. In this groundbreaking work, award-winning historian George Makari shows how writers, philosophers, physicians, and anatomists worked to construct notions of the mind as not an ethereal thing, but a natural one. From the ascent of Oliver Cromwell to the fall of Napoleon, seminal thinkers like Hobbes, Locke, Diderot, and Kant worked alongside often-forgotten brain specialists, physiologists, and alienists in the hopes of mapping the inner world. Conducted in a cauldron of political turmoil, these frequently shocking, always embattled efforts would give rise to psychiatry, mind sciences such as phrenology, and radically new visions of the self. Further, they would be crucial to the establishment of secular ethics and political liberalism. Boldly original, wide-ranging, and brilliantly synthetic, Soul Machine gives us a masterful, new account of the making of the modern Western mind.

Write to Return Bryan A. Banks.2024-06-15 The revocation of the Edict of Nantes led more than 200,000 Huguenots to flee France after 1685. Many settled close to the country's frontiers, where their leaders published apologetic texts arguing for their right to return to France and be recognized as French citizens. By framing their refugee experiences intentionally, even using the term "refugee" to describe their diaspora, Huguenots profoundly influenced Enlightenment debates on citizenship and religious tolerance. Write to Return is a cultural history of these Huguenot apologetics in which Bryan Banks examines the work of four authors: Pierre Jurieu, Pierre Bayle, Antoine Court, and Jean-Paul Rabaut Saint-Étienne. Each author advanced his arguments using key ideas of the Enlightenment, appealing to reason to argue for freedom of conscience all while appealing to emotion in his descriptions of Huguenot victimhood. The authors' campaign succeeded. In 1789, France's revolutionary National Assembly granted repatriation to all expelled Huguenots, offering them citizenship regardless of place of birth or baptism, and even permitting them to reclaim ancestral lands. International refugees played an overlooked role in shaping discourse around the nation and nationalism in the eighteenth century. Write to Return shows how early modern refugees could advocate for their interests, build international networks, and even craft a new collective identity. By presenting themselves as loyal citizens of France, Huguenots were at the forefront of constructing a French national identity.

Aspects of European History 1494-1789 Stephen J. Lee.2005-06-20 First published in 1984. Lee's book takes an analytical approach to a wide range of topics in early modern European history, from the Renaissance to the French Revolution, showing a variety of methods that can be used to present a theme or argument in an essay or exam.

The Enlightenment William E. Burns.2015-11-10 Based on the most recent scholarship, this book provides students and interested lay readers with a basic introduction to key facts and current controversies concerning the Enlightenment. One of the most significant developments in world history, the Enlightenment transformed Europe by promoting reason over faith and advancing skepticism, the scientific method, and intellectual inquiry. It reshaped political and cultural history and formed the foundation for many of today's institutions. The Enlightenment: History, Documents, and Key Questions is a one-stop reference that serves high school and undergraduate students in learning about the background of the Enlightenment. The book also provides readers with key insights into the distant origins of American democracy and technology-based innovation. The text's coverage of the Enlightenment from the late 17th century to the late 18th century in both Europe and its American colonies supports Common Core critical thinking skills for English Language Arts/World History and Social Studies. The inclusion of primary source documents and original argumentative essays work in conjunction with secondary material such as topical entries to engage readers' minds and to give them a fuller understanding the myriad factors that led to the Enlightenment as well as its lasting effects.

Tolerance Re-Shaped in the Early-Modern Mediterranean Borderlands Filomena Viviana Tagliaferri.2018-03-26 This book explores perceptions of toleration and self-identity through an analysis of otherness' real experience of Italian travellers, Catholic missionaries and Maltese proto-journalists within Mediterranean border-spaces. Employing a multidisciplinary approach, which integrates the analysis of original and unpublished archival documentation with early modern European travel literature, the book shows how fluid subjects and border groups adapted to new environments, often generating information that made the

Ottomans and their system of values real and dignified to an Italian audience. The interdisciplinary combining of historical methodology with the tools of comparative literature, anthropology and folklore studies provides a fresh perspective on concepts of tolerance as experienced in the early modern Mediterranean.

New Horizons for Early Modern European Scholarship Ann Blair, Nicholas Popper. 2021-08-10 This edited collection assembles a set of essays investigating the past, present, and future historiography of scholars who write about the cultural and intellectual history of early modern Europe. Contributors examine how scholars in recent decades have broken down traditional boundaries imposed on this period by exploring shifting conceptions of periodization, geography, genre, and evidence--

The Reopening of the Western Mind Charles Freeman. 2023-02-07 A monumental and exhilarating history of European thought from the end of Antiquity to the beginning of the Enlightenment—500 to 1700 AD—tracing the arc of intellectual history as it evolved, setting the stage for the modern era. With more than 140 illustrations; 90 in full-color. Charles Freeman, lauded historical scholar and author of *The Closing of the Western Mind* (“A triumph”—*The Times* [London]), explores the rebirth of Western thought in the centuries that followed the demise of the classical era. As the dominance of Christian teachings gradually subsided over time, a new open-mindedness made way for the ideas of morality and theology, and fueled and formed the backbone of the Western mind of the late Middle Ages, the Renaissance, and beyond. In this wide-ranging history, Freeman follows the immense intellectual development that culminated in the Enlightenment, from political ideology to philosophy and theology, as well as the fine arts and literature. He writes, in vivid detail, of how Europeans progressed from the Christian-minded thinking of Saint Augustine to the more open-minded later scholars, such as Michel de Montaigne, leading to a broader, more “humanist” way of thinking. He explores how the discovery of America fundamentally altered European conceptions of humanity, religion, and science; how the rise of Protestantism and the Reformation profoundly influenced the tenor of politics and legal systems, with enormous repercussions; and how the radical Christianity of philosophers such as Spinoza affected a rethinking of the concept of religious tolerance that has influenced the modern era ever since.
