Le coût des travaux de bâtiment - Équipements pour les bâtiments connectés Batiprix.2022-09-21 Le coût des travaux de bâtiment, en plusieurs volumes complémentaires, permet de réaliser rapidement et simplement une estimation prévisionnelle, que ce soit pour les travaux en neuf ou en rénovation. L'ouvrage propose ainsi des ouvrages préétablis accompagnés du détail des prestations à réaliser, chacune d'elles étant préquantifiée sous une même unité de valeur afin de simplifier les métrés quantitatifs. Il est alors aisé, à partir de quelques ouvrages composés, de définir rapidement le coût approximatif des travaux puis de le comparer avec le budget prévisionnel. Cette estimation ne se substitue pas au devis quantitatif estimatif détaillé, établi avant de commencer les travaux, mais permet de gagner un temps précieux pour lister les prestations à réaliser et construire le cadre des études. Afin que les entreprises puissent adapter facilement les prix publiés en fonction de leurs paramètres (taux horaire, coefficients de frais généraux), sont présentés distinctement le prix unitaire de chaque ouvrage composé, le temps unitaire nécessaire à la mise en oeuvre ainsi que le déboursé « fournitures ». Cet ouvrage est réalisé à partir de la Bibliothèque Batiprix, la bibliothèque d'ouvrages de référence pour les professionnels de la construction. Ce contenu ainsi que l'ensemble de la bibliothèque Batiprix sont également disponibles au format numérique sur web.batiprix.com.

Zythom : Dans la peau d'un informaticien expert judiciaire Zythom.2012-03-01 Sur un ton impertinent et plein d'humour, le blog de Zythom fourmille d'anecdotes vécues, tant sur sa vie personnelle ou professionnelle que sur ses activités d'expert judiciaire. Elles sont réunies dans cet essai pour participer à l'éclairage du public à travers le point de vue rarement exprimé de l'homme de l'art. Simple citoyen au service de la Justice, l'auteur nous fait vivre de l'intérieur quelques unes des affaires judiciaires auxquelles il a participé. Il nous donne également quelques clefs sur notre monde parfois ubuesque.

Architects' Data Ernst Neufert, Peter Neufert.1991-01-15 This is an essential aid in the initial design and planning of a project. The relevant building type is located by a comprehensive index and cross reference system, a condensed commentary covers user requirements, planning criteria, basic dimensions and other considerations of function, siting aspect etc. A system of references based on an extensive bibliography supports the text. In every section plans, sections, site layouts, design details and graphs illustrated key aspects of a building type's design. Most illustrations are dimensioned or scaled - the metric system of measurement is used throughout, and the equivalent in feet/inches can easily be read either off a graphic scale on the page or from the built-in conversion table. The illustrations are international in origin and include both well know and less

famous designers. Architects Data is primarily a handbook of building types rather than of construction techniques and details. However its treatment of components (such as doors and windows) and of spaces for building services is extremely thorough, since consideration of this data is an essential element of the planning process. The opening pages of basic data on man and his buildings cover critical subjects such as scale, drawing practice, noise, light and space for the same reason. Particular attention has also been paid to the implications of energy conservation, means of escape from fire and the needs of the elderly and the disabled.

Montreal's Expo 67 Bill Cotter.2020-02-03 In 1967, Canada celebrated the 100th anniversary of its founding with a spectacular party, and the whole world was invited. Montreal's Expo 67 was the first world's fair held in Canada, and it was a huge success, attracting over 50 million visitors. The 1,000-acre site was built on two man-made islands in the St. Lawrence River and incorporated 90 futuristic pavilions created by some of the world's greatest architects and designers. Over 60 countries were represented, along with many private, corporate and thematic pavilions, all brought together under the theme Man and his World. With performers and entertainers of all varieties, restaurants, cultural attractions, exhibitions and a world-class amusement park, Expo 67 was literally the party of the century, exceeding all expectations.
