Cain and Abel in Syriac and Greek Writers (4th-6th Centuries)

Johannes Bartholdy Glenthøj.1997

Dutch Decorated Bookbinding in the Eighteenth Century, Volume III Jan Storm van Leeuwen.2022-12-05 Awarded with the 15th ILAB Breslauer Prize for Bibliography 2010. This classic can be ranked among the well-known international standard works on the subject of bookbinding. The author, Dr. Jan Storm van Leeuwen, gives in this work an elaborate general historical introduction to his subject. It also contains a general introduction to each province, as they were known in the eighteenth century, and an extensive overall picture of the towns where luxury bindings were manufactured, describing the bookbinder's workshops and binderies of each town. The historical introduction is completed with a catalogue of the approximately 2000 relevant bindings in the collections of the Koninklijke Bibliotheek (National Library of the Netherlands) and its sister institution the Museum Meermannno-Westreenianum. About 1500 other bindings that the author studied over time in other collections are also described. But the most important feature of this work is that all (nearly 10.000) stamps on these bindings are represented by a picture. Never before so many bindings (3500) have been recorded, described and discussed in such detail and with the benefit of an established model and terminology. The print edition is available as a set of four volumes (9789061943693).

Wetting: Theory and Experiments, Two-Volume Set Eli

Ruckenstein,Gersh Berim.2019-12-17 Wetting: Theory and Experiments collates papers published by Professor Eli Ruckenstein and his coworkers on the theoretical and experimental investigation of wetting of solid surfaces. It contains six chapters, each of which is preceded by a short introduction.

The papers are selected according to the specific features being considered and they are arranged in logical rather than chronological order. The book focuses on wetting on the nanoscale (nanodrops on solid surfaces, liquid in the nanoslit) considered on the basis of microscopic density functional theory and to dynamics of fluid on the solid surface considered on the basis of hydrodynamic equations. Along with this, experimental studies of wetting related to various applications are presented. *Cumulated Index Medicus* .1996

International Straits Ana G. López Martín.2010-08-14 The four 1958 Geneva Conventions on the Law of the Sea, which codified and progressively developed this sector of our legislation, were rather ephemeral despite the fact that they were constituent Conventions. In fact, the 1982 United Nations Convention on the Law of the Sea (UNCLOS) again undertook the same task with the same spirit 20 years later after a long drawn out global negotiation process in which all the marine areas and problems pending were analysed and discussed by the countries attending, and an apparently strengthened majority was attained, including the essential agreement between the principal naval powers and the third world countries, symbolised most grossly in the recognition of exclusive economic areas which were 200 miles wide in exchange for a significant alteration to the legal rules applicable to the international straits. From 1973 to 1982, the negotiations showed that there were a number of particular factors affecting the seas: "strait" countries, user countries, long range fishing countries, embedded countries, archipelagic countries, broad platform countries, etc. In 1982 when the UNCLOS was adopted, it seemed to be a text with justified pretensions to be in force for a long period of time as the nine years of negotiations required for its adoption had taken into account the main problems pending agreement although not absolutely all.

Every day, eBookDaily adds three new free Kindle books to several different genres, such as Nonfiction, Business & Investing, Mystery & Thriller, Romance, Teens & Young Adult, Children's Books, and others. Project Gutenberg is one of the largest sources for free books on the web, with over 30,000 downloadable free books available in a wide variety of formats. Project Gutenberg is the oldest (and

quite possibly the largest) library on the web, with literally hundreds of thousands free books available for download. The vast majority of books at Project Gutenberg are released in English, but there are other languages available. Authorama.com features a nice selection of free books written in HTML and XHTML, which basically means that they are in easily readable format. Most books here are featured in English, but there are quite a few German language texts as well. Books are organized alphabetically by the author's last name. Authorama offers a good selection of free books from a variety of authors, both current and classic. The split between "free public domain ebooks" and "free original ebooks" is surprisingly even. A big chunk of the public domain titles are short stories and a lot of the original titles are fanfiction. Still, if you do a bit of digging around, you'll find some interesting stories. Read Your Google Ebook. You can also keep shopping for more books,
