Jonas and Kovner's Health Care Delivery in the United States, 12th Edition James R. Knickman, PhD, Brian Elbel, PhD, MPH. 2019-01-01 This fully updated and revised 12th edition of the highly acclaimed textbook on health care delivery provides graduate and undergraduate students with a comprehensive survey of health care in the United States ranging in topics from the organization of care, the politics surrounding healthcare in the United States, to population health and vulnerable populations, healthcare costs and value, health care financing, and health information technology. Chapters provide thorough coverage of the rapid changes that are reshaping our system and the extent of our nation's achievement of health care value and the Triple Aim: better health and better care at a lower cost. With an emphasis on population health and public health, this text includes a timely focus on how social and physical environments influence health outcomes. Prominent scholars, practitioners, and educators within public health, population health, health policy, healthcare management, medical care, and nursing present the most up-to-date evidence-based information on social and behavioral determinants of health and health equity, immigrant health, healthcare workforce challenges, preventative medicine, innovative approaches to control health care costs, initiatives to achieve high quality and value-based care, and much more. Designed for graduate and advanced undergraduate students of health care management and administration, nursing, and public health, the text addresses all complex core issues surrounding our health care system and health policy, such as the challenges to health care delivery, the organization and politics of care, and comparative health systems. Organized in a readable and accessible format, contributors provide an in-depth and objective appraisal of why and how we organize health care the way we do, the enormous impact of health-related behaviors on the structure, function, and cost of the health care delivery system, and other emerging and recurrent issues in health policy, healthcare management, and public health. The 12th edition features the contributions of such luminaries as former editor Anthony R. Kovner, Michael K. Gusmano, Carolyn M. Clancy, Marc N. Gourevitch, Joanne Spetz, James Morone, Karen DeSalvo, and Christy Harris Lemak, among others. Chapters include audio chapter summaries with discussion of newsworthy topics, learning objectives, discussion questions, case exercises, and new charts and tables with concrete health care data. Included for instructors are an Instructor's Manual, PowerPoint slides, Syllabus, Test Bank, Image Bank, Supplemental e-chapter on a Visual Overview of Health Care Delivery, access to an annual ACA update and health policy changes, extra cases and syllabi specifically for nurses, and a transition guide bridging the 11th and 12th editions. Key Features: Three completely revised chapters on the politics of health care, vulnerable populations, and health information technology Chapter authors with expertise in Health Administration and Management, Public Health, Health Policy, Medical Care and Nursing Expanded coverage on population health and population health management, health equity, influences of social determinants on health behavior and outcomes, health education planning, health workforce challenges, national and regional quality improvement initiatives and more Revised e-Chapters providing a Visual Overview of Health Care Delivery with image bank and Springer Publishing's annual ACA update Audio podcasts provide summaries for each chapter and provide real-world context of topics featured in the news New Appendix on Overview of U.S. Public Health Agencies Access to fully searchable eBook, including extra e-chapters and student ancillaries on Springer Connect Full Instructor Packet including Instructor's Manual, Test Bank, PowerPoint slides, Image Bank, Case Exercises for Nursing Instructors

Psychiatric and Mental Health Nursing in the UK Katie Evans, Debra Nizette, Anthony O'Brien, Catherine Johnson. 2019-06-28 Psychiatric and Mental Health Nursing in the UK is an adaptation of Australia and New Zealand's foremost mental health nursing text and is an essential resource for both mental health nursing students and qualified nurses. Thoroughly revised and updated to reflect current research and the UK guidelines as well as the changing attitudes about mental health, mental health services and mental health nursing in UK. Set within a recovery and patient framework, this text provides vital information for approaching the most familiar disorders mental health nurses and students will see in clinical practice, along with helpful suggestions about what the mental health nurse can say and do to interact effectively with patients and their families. Gives readers a thorough grounding in the theory of mental health nursing. Case studies throughout the text allow readers to understand the application of theory in every day practice. Includes critical thinking challenges and ethical dilemmas to encourage the reader to think about and explore complex issues. Exercises for class engagement complement learning and development in the classroom environment.

Innovations in Global Mental Health Samuel O. Okpaku. 2021-11-02 Over the course of the last decade, political and mental entities at large have embraced global mental health: the idea that psychiatric health is vital to improved quality of life. Physicians globally have implemented guidelines recommended by the National Institute of Mental Health (NIMH) in 2007, thereby breaking down barriers to care and improving quality of life in areas where these practices have been implemented. Programs for training and education have expanded as a result. Clinicians benefit more from both local resources in some regions as well as in international collaboration and technological advancements. Even amidst all of these positive outcomes, clinicians still face some stumbling blocks. With worldwide statistics estimating that 450 million people struggle with mental, neuropsychiatric, and neurological disorders—25 percent of the world's non-communicable disease burden—rising to these challenges prove to be no small feat, even in wealthy Western nations. Various articles and books have been published on global mental health, but few of them thoroughly cover the clinical, research, innovative, and social implications as they pertain to psychiatry; often, only one of these aspects is covered. A comprehensive text that can keep pace with the rapidly evolving literature grows more and more valuable each day as clinicians struggle to piece together the changes around the world that leave open the possibility for improved outcomes in care. This book seeks to boldly rectify this situation by identifying innovative models of service delivery, training, education, research funding, and payment systems that have proven to be exemplary in implementation and scalability or have potential for scalability. Chapters describe specific barriers and challenges, illuminating effective strategies for improved outcomes. This text is the first peer-reviewed resource to gather prestigious physicians in global mental health from around the world and disseminate their expertise in the medical community at large in a format that is updateable, making it a truly cutting-edge resource in a world constantly changed by medical, scientific, and technological advances. *Innovations in Global Mental Health* is the ultimate resource for psychiatrists, psychologists, primary care physicians, hospitalists, policy makers, and all medical professionals at the forefront of global mental health and its implications for the future.

Emergencies of the Orbit and Adnexa Bipasha Mukherjee, Hunter Yuen. 2016-12-15 This handbook on orbital, lacrimal and eyelid emergencies deals with such situations in a practical manner guiding the ophthalmologists in accurate handling and making them more proficient and confident in managing vision and life-threatening emergencies. With 51 chapters and more than 350 images, this book covers all the eye emergencies that generalist and specialist ophthalmologists can expect to come across in their day to day practices. It can be argued that the orbit can no more be called 'Pandora's Box' because of the unpredictable nature of its contents. This perception has changed over the years due to the advent of improved diagnostic, in particular, imaging techniques. However, since medical residency provides very little exposure to orbital and adnexal disorders, most clinicians are inexperienced and unsure about their management. Facing an emergency situation where improper management can rapidly worsen the condition leading to blindness or even death of the patient is every ophthalmologist's nightmare. The emergent nature of these conditions does not always provide for a leeway to refer these patients to an orbit and oculoplasty specialist, who are few and far between. By the time the patient reaches his destination, his vision maybe irrevocably lost. The legal implications of such mismanagement can be significant too. This book is a quick and essential resource to manage and refer eye emergencies with confidence.

Medical Conditions in the Athlete Katie Walsh Flanagan, Micki Cuppett. 2017-05-02 Medical Conditions in the Athlete, Third Edition With Web Study Guide, equips health care providers with the information they need to develop a framework for decision making when working with injured and recovering athletes and active populations. The updated and streamlined third edition provides comprehensive medical information that assists health care providers and athletic trainers in recognizing and identifying underlying and potentially serious medical conditions that may affect their chosen course of treatment. The highly esteemed authors, Katie Walsh Flanagan and Micki Cuppett, have combined their professional skills and educational expertise to revitalize the content of Medical Conditions in the Athlete, Third Edition, with current, research-driven assessment and treatment information for medical conditions that affect the physically active population. The updated content aligns with Board of Certification (BOC) and Commission on Accreditation of Athletic Training Education (CAATE) standards. The book addresses medical conditions by body system, their mechanism of acquisition, signs, symptoms, differential diagnoses, referral, treatment, and return-to-participation criteria. The 18 comprehensive chapters are organized into three sections: Introduction to Medical Conditions, Pharmacology and Interventions, and Medical Conditions by System. Throughout the text, more than 380 updated, full-color illustrations and photographs visually enhance readers' comprehension of anatomy, physiology, and pathophysiology. Pharmacological tables organize drugs by categories that include generic and trade names, therapeutic uses, adult dosage information, and possible adverse effects. Important terminology is highlighted throughout the chapters, and a glossary appears at the end of the text. At the beginning of the text, a Condition Finder serves as a quick reference so health care providers can easily flip to the information they need on specific conditions. Throughout the book, learning aids draw attention to important facts and figures, presented in three practical categories: • Red Flags are warning signs that health care providers should look for when working with clients. • Clinical Tips discuss information that is critically important to professionals. • Condition Highlights cover specific medical conditions common to athletes that require special attention or medical care. New to this edition is an accompanying web study guide that houses case studies corresponding to specific chapters. Each case study is followed by questions to help students apply the strategies covered in the text. Instructors who adopt the text will have access to a comprehensive collection of ancillary materials: chapter quizzes, a presentation package of slides, and an image bank that can be used to enhance presentation slides or student handouts. Medical Conditions in the Athlete, Third Edition With Web Study Guide, provides readers with research-driven assessment and treatment information for medical conditions that affect all types of athletes. It is a comprehensive textbook and an important reference for health care providers such as athletic trainers and physical therapists who work with active populations.

Reimagining Nigeria's Educational System Joseph A. Balogun. 2023-09-20 This book assesses the challenges within the Nigerian educational system and provides a concrete plan to revitalize the low-performing system by strengthening high-stakes testing at all levels. In Nigeria, many citizens believe that the solution to the country's low performance in education is to eliminate high-stakes standardized testing. High-stakes testing refers to applying standardized student achievement tests as a primary mechanism to evaluate students, teachers, and their school's performance. This book argues that the poor quality of education and low ranking of Nigeria's educational system is not related to the negative consequences of high-stakes testing, but rather is due to many intrinsic factors. By conducting a comparative analysis of six high-performing education systems worldwide, the book offers a comparative summative evaluation of the educational system and offers recommendations. This book will be of interest to policymakers and scholars in the fields of African education, higher education, quality and global studies, African studies, management and administration, leadership, and professional development studies. Joseph Abiodun Balogun is former Dean and retired Distinguished University Professor at the College of Health Sciences, Chicago State University, USA, Visiting Professor/Program Consultant at the Centre of Excellence in Reproductive Health Innovation, University of Benin, Nigeria, and President/ CEO, Joseph Rehabilitation Center, Tinley Park, Illinois, USA.

Behavioral Medicine and Integrated Care Melanie P. Duckworth, William T. O'Donohue. 2018-10-12 This evidence-to-practice volume deftly analyzes the processes and skills of integrating mental healthcare with primary care, using multiple perspectives to address challenges that often derail these joint efforts. Experts across integrative medicine offer accessible blueprints for smoothly implementing data-based behavioral interventions, from disease management strategies to treatment of psychological problems, into patient-centered, cost-effective integrated care. Coverage highlights training and technology issues, key healthcare constructs that often get lost in translation, and other knowledge necessary to create systems that are rooted in—and contribute to—a robust evidence base. Contributors also provide step-by-step guidelines for integrating behavioral health care delivery in treating cancer, dementia, and chronic pain. Among the topics covered: The epidemiology of medical diseases and associated behavioral risk factors. Provider training: recognizing the relevance of behavioral medicine and the importance of behavioral health consultations and referrals. Screening for behavioral health problems in adult primary care. Health care transformation: the electronic health record. Meeting the care needs of patients with multiple medical conditions. Smoking cessation in the context of integrated care. This depth of clinical guidance makes Behavioral Medicine and Integrated Care an essential reference for practitioners on all sides of the equation, including health psychologists and other professionals in health promotion, disease prevention, psychotherapy and counseling, and primary care medicine.

Narrative Matters Jessica Bylander. 2020-03-03 Drawn from the popular Narrative Matters column in the journal Health Affairs, these essays embody a vision for a health care system that centers the humanity of patients and doctors alike. Health care decision making affects patients and families first and foremost, yet their perspectives are not always factored into health policy deliberations and discussions. In this anthology, Jessica Bylander brings together the personal stories of the patients, physicians, caregivers, policy makers, and others whose writings add much-needed human context to health care decision making. Drawn from the popular Narrative Matters column in the leading health policy journal Health Affairs, this collection features essays by some of the leading minds in health care today, including Pulitzer Prize-winner Siddhartha Mukherjee, MacArthur fellow Diane Meier, former Planned Parenthood president Leana S. Wen, and former secretary of health and human services Louis W. Sullivan. The collection also presents important stories from lesser-known voices, including a transgender doctor in Oklahoma who calls for better treatment of trans patients and a palliative care physician who reflects on how perspectives on hastening death have changed in recent years. A foreword written by National Humanities Medal recipient Abraham Verghese, MD, further rounds out the book. The collection of thirty-two essays is organized around several themes: • the practice of medicine • medical innovation and research • patient-centered care • the doctor-patient relationship • disparities and discrimination • aging and end-of-life care • maternity and childbirth • opioids and substance abuse Contributors: Louise Aronson, Laura Arrowsmith, Cheryl Bettigole, Cindy Brach, Gary Epstein-Lubow, Jonathan Friedlaender, Patricia Gabow, Katti Gray, Yasmin Sokkar Harker, Timothy Hoff, Carla Keirns, Raya Elfadel Kheirbek, Katy B. Female Doctors in Canada Earle H. Waugh, Shirley Schipper, Shelley Ross.2019-01-01 *Female Doctors in Canada* is an accessible collection of articles by experienced physicians and researchers exploring how systems, practices, and individuals must change as medicine becomes an increasingly female-dominated profession. As the ratio of practicing physicians shifts from predominately male to predominately female, issues such as work hours, caregiving, and doctor-patient relationships will all be affected. Canada's medical education is based on a system that has always been designed by and for men; this is also true of our healthcare systems, influencing how women practice, what type of medicine they choose to practice, and how they wish to balance their personal lives with their work. With the intent to open a larger conversation, *Female Doctors in Canada* reconsiders medical education, health systems, and expectations, in light of the changing face of medicine. Highlighting the particular experience of women working in the medical profession, the editors trace the history of female practitioners, while also providing a perspective on the contemporary struggles women face as they navigate a system that was tailored to the male experience, and is yet to be modified.

National Human Development Report 2014 United Nations Publications.2015 Over the 15 years since the country's last National Human Development Report (NHDR) was published Ethiopia has undergone significant economic and social changes and has recorded some of the highest growth rates in the world-over 10 per cent in some years. However, Ethiopia's Human Development Index (HDI) and its relative ranking have not moved appreciably during the past decade. Even though Ethiopia is one of the 10 countries globally that has attained the largest absolute gains in its HDI over the last several years, it still ranks 173rd out of 186 countries in the latest UNDP Human Development Report. It is this development challenge that underlines the fact that the preparation of the NHDR is so opportune now and why the focus of the report on inclusive growth for sustainable human development is so apposite. In 1998, when the last NHDR was written, the development challenges facing the country were considerably different.

Key Features Comprehensively covers the breadth of subjects identified by RCGP's work to formulate a curriculum for health inequalities The first book to address the urgent area of causes and consequences of health inequalities in clinical practice. Chapters are authored by expert practitioners with proven experience in each aspect of health care. Applied, practical focus, demonstrating approaches that will work and can be applied in 'every' situation of inequality. Provides evidence of how community based primary care can make a change.

'Singapore's Health Care System' Chien Earn Lee, K Satku. 2015-11-13 ' How did Singapore's health care system transform itself into one of the best in the world? It not only provides easy access, but its standards of health care, not only in curative medicine but also in prevention, are exemplary. Fifty years ago, the infant mortality rate (IMR) was 26 per thousand live births; today the IMR is 2. Life expectancy was 64 years then; today, it is 83. The Singapore Medicine brand is trusted internationally, and patients are drawn to Singapore from all over the world. And while many countries struggle to finance their health care, Singapore has developed a health care financing framework that makes health care affordable for its people and gives sustainability to the health care system. Reliability is provided by a professional workforce that seeks to continually learn, improve and become ever more proficient with cutting edge technology while emphasizing the relational aspects of health care by nurturing compassion and maintaining high standards of integrity. Convenience and safety are enhanced by a unifying IT system that enables the portability of medical records across health care institutions. All these have been achieved not by chance but by careful planning, strong leadership and dedicated people who are prepared to learn from Singapore's own experience while adapting best practices from around the world. But the system is not without challenges — not least those of an aging population, and an increasing market influence. This book provides a fascinating insight into the development of Singapore's health care system from the early days of fighting infections and providing nutrition supplementation for school children, to today's management of lifestyle diseases and high-end tertiary care. It also discusses how the system must adapt to help Singaporeans continue to live well, live long, and with peace of mind. Inequality and Exclusion in Southeast Asia Lee Hwok Aun, Christopher Choong. 2021-10-11 Inequality is a defining global issue of our times. Southeast Asia stands out in some ways; the 2010s have seen most countries in the region reduce income gaps. Nonetheless, inequality levels remain high, especially in the middle-income to high-income countries, and popular disaffection and economic anxiety prevail, even while official statistics may paint more buoyant scenarios. The age-old problem of group-based exclusion in the development process manifests in new ways. This book provides up-to-date overviews of inequality levels and trends, primarily related to income, but also wealth and other socio-economic variables pertaining to education and health. The country chapters also examine salient themes of inequality, especially structural changes and public policies to redress inequality and exclusion, labour market developments, population groups, regional dynamics, and informal economies. We gain an appreciation for the unique conditions and diverse experiences of each country, and draw comparative insights across the region. "This is an impressive collection of papers written by scholars from Southeast Asia and addressing an important set of issues which deserve serious attention from policymakers. Inequality and social exclusion are problems which never seem to go away, even in the high-income countries, and this collection will be valuable for all those seeking to understand how serious the situation is in eight Southeast Asian states. The editors are to be congratulated on bringing together such a timely book." Anne Booth, Emeritus Professor of Economics, School of Oriental and African Studies "This compilation of recent research on Southeast Asian economic inequalities by Lee and Choong underscores the rapid progress being made. The authors from the region underscore the global shift in research and policy attention in this century. Reflecting data and methodological diversity, the book variedly captures some 'intersectionality' of inequalities beyond the old focus on interpersonal and household income distribution." Jomo KS, Fellow, Academy of Science, Malaysia "In societies across the world, rising inequality has become a critical issue over the past generation. Besides basic issues of

justice, inequality between people obstructs the collective decision-making needed for societies to progress. This book is the most comprehensive study of inequality in Southeast Asia. It stresses that each society is different, but the solutions are common—good data, proper understanding, multidimensional approaches, strong institutions and popular agency.” Pasuk Phongpaichit, Emeritus Professor, Chulalongkorn University

Policy Discourse and the Paradigm Shift in Reproductive Health in Bangladesh Tehmina Ghafur. 2017-08-21 The reproductive health care program of Bangladesh is still striving to address the very basic reproductive health issues of its people. Reproductive health services here still confronting issues surrounding ‘availability’. Equality issues like ‘accessibility’ to, and ‘quality’ of services are far away from the reach of the majority of people. This book analyses the policy discourses and the paradigm shift relating to reproductive health care in Bangladesh. It explores the extent to which the policy frameworks reflect a paradigm shift towards a rights-based reproductive health program. In so doing, it also investigates how the complementarities and inconsistencies within the policy frameworks have affected reproductive health through ‘the availability of, accessibility to, and quality of reproductive health services’ in Bangladesh.

The Role of Primary Motor Cortex as a Marker for and Modulator of Pain Control and Emotional-Affective Processing Jorge Leite, Sandra Carvalho, Linamara R. Battistella, Wolnei Caumo, Felipe Fregni. 2017-09-06 The sensory and motor cortical homunculi proposed by Walter Penfield were a major landmark for the anatomical mapping of the brain. More than 60 years after, the development of new tools to investigate brain function non-invasively has increased our knowledge about the structure and functions of the primary motor Cortex (M1) beyond motor control in both humans and animals. This book highlights the role of the motor cortex that goes way beyond motor functioning. We were interested in both theoretical and empirical contributions related to electrophysiological, pharmacological, neuroimaging, and neuromodulatory studies exploring the role of M1 on non-motor functions, such as pain, abnormal neuroplasticity that may lead to chronic pain conditions; or the relationship between M1 and mental imagery or emotion. This book is comprised of 15 articles published in this edited volume as a research topic collection in *Frontiers in Human Neuroscience* titled “The Role of Primary Motor Cortex as a Marker and Modulator of Pain Control and Emotional-Affective Processing.”

International Perspectives on Primary Care Research Felicity Goodyear-Smith, Bob Mash. 2017-04-28 International Perspectives on Primary Care Research examines how the evidence base from primary care research can strengthen health care services and delivery, tackle the growing burden of disease, improve quality and safety, and increase a person-centred focus to health care. Demonstrating the inter-professional nature of the discipline, the book also features a section on cross-nation organisations and primary care networks supporting research. National perspectives are offered from researchers in 20 countries that form part of the World Organization of Family Doctors, providing case histories from research-rich to resource-poor nations that illustrate the range of research development and capacity building. This book argues the importance of primary care research, especially to policy makers, decision makers and funders in informing best practice, training primary health care providers and achieving equitable distribution of care.

Infectious Frank Bowden. 2016-04-01 A woman’s innocuous cold symptoms mask a debilitating rare tick infection. A young man develops shingles then suffers blinding head pain later in life. After years of frustration, a family eradicates head lice forever. Infectious follows on from Frank Bowden’s 2011 *Gone Viral* but deals much more with everyday infectious diseases - the flu, colds, sore throats and head lice. It also tackles topical and critical issues in modern medical practice - the emergence of antibiotic resistance, the Ebola epidemic, the Lyme Disease controversy and the causes of chronic fatigue.
