Learning to Leave Michael Corbett. 2020 Published with a new preface, this innovative case study from Nova Scotia analyzes the relationship between rural communities and contemporary education. Rather than supporting place-sensitive curricula and establishing networks within community populations, the rural school has too often stood apart from local life, with the generally unintended consequence that many educationally successful rural youth come to see their communities and lifestyles as places to be left behind. They face what Michael Corbett calls a mobility imperative, which, he shows, has been central to contemporary schooling. Learning to Leave argues that if education is to be democratic and serve the purpose of economic, social, and cultural development, then it must adapt and respond to the specificity of its locale, the knowledge practices of the people, and the needs of those who struggle to remain in challenged rural places.

**Fossil Capital** Andreas Malm. 2016-02-01 How capitalism first promoted fossil fuels with the rise of steam power The more we know about the catastrophic implications of climate change, the more fossil fuels we burn. How did we end up in this mess? In this masterful new history, Andreas Malm claims it all began in Britain with the rise of steam power. But why did manufacturers turn from traditional sources of power, notably water mills, to an engine fired by coal? Contrary to established views, steam offered neither cheaper nor more abundant energy—but rather superior control of subordinate labour. Animated by fossil fuels, capital could concentrate production at the most profitable sites and during the most convenient hours, as it continues to do today. Sweeping from nineteenth-century Manchester to the emissions explosion in China, from the original triumph of coal to the stalled shift to renewables, this study hones in on the burning heart of capital and demonstrates, in unprecedented depth, that turning down the heat will mean a radical overthrow of the current economic order.

*Why Don't Students Like School?* Daniel T. Willingham. 2009-06-10 Easy-to-apply, scientifically-based approaches for engaging students in the classroom Cognitive scientist Dan Willingham focuses his acclaimed research on the biological and cognitive basis of learning. It reveals the importance of story, emotion, memory, context, and routine in building knowledge and creating lasting learning experiences. Nine, easy-to-understand principles with clear applications for the classroom Includes surprising findings, such as that intelligence is malleable, and that you cannot develop thinking skills without facts How an understanding of the brain's workings can help teachers hone their teaching skills Mr. Willingham's answers apply just as well outside the classroom. **Building Communities of Engaged Readers** Teresa Cremin, Marilyn Mottram, Fiona M. Collins, Sacha Powell, Kimberly Safford. 2014-06-20 Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. Building Communities of Engaged Readers highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.

**The Drugs Don't Work** Professor Dame Sally Davies, Jonathan Grant, Mike Catchpole. 2013-09-15 The Drugs Don't Work - A Penguin Special by Professor Dame Sally Davies, the Chief Medical Officer for England 'If we fail to act, we are looking at an almost unthinkable scenario where antibiotics no longer work and we are cast back into the dark ages of medicine where treatable infections and injuries will kill once again' David Cameron, Prime Minister Resistance to our current range of antibiotics is the new inconvenient truth. If we don't act now, we risk the health of our parents, our children and our grandchildren. Antibiotics add, on average, twenty years to our lives. For over seventy years, since the manufacture of penicillin in 1943, we have survived extraordinary operations and life-threatening infections. We are so familiar with these wonder drugs that we take them for granted. The truth is that we have been abusing them: as patients, as doctors, as travellers, in our food. No new class of antibacterial has been discovered for twenty six years and the bugs are fighting back. If we do not take responsibility now, in a few decades we may start dying from the most commonplace of operations and ailments that can today be treated easily. This short book, which will be enjoyed by readers of An Inconvenient Truth by Al Gore and Bad Pharma by Ben Goldacre, will be the subject of a TEDex talk given by Professor Dame Sally Davies at the Royal Albert Hall. Professor Dame Sally C. Davies is the Chief Medical Officer for England and the first woman to hold the post. As CMO she is the independent advisor to the Government on medical matters with particular interest in Public Health and Research. She holds a number of international advisory positions and is an Emeritus Professor at Imperial College. Dr Jonathan Grant is a Principal Research Fellow and former President at RAND Europe, a not-for-profit public policy research institute. His main research interests are on health R&D policy and the use of research and evidence in policymaking. He was formerly Head of Policy at The Wellcome Trust. He received his PhD from the Faculty of Medicine, University of London, and his B.Sc. (Econ) from the London School of Economics. Professor Mike Catchpole is an internationally recognized expert in infectious diseases and the Director of Infectious Disease Surveillance and Control at Public Health England. He has coordinated many national infectious disease outbreak investigations and is an advisor to the European Centre for Disease Prevention and Control. He is also a visiting professor at Imperial College.

In The Simpsons and Their Mathematical Secrets, Simon Singh explains how the brilliant writers, some of the mathematicians, have smuggled in mathematical jokes throughout the cartoon's twenty-five year history, exploring everything from Mersenne primes, from Euler's equation to the unsolved riddle of P vs. NP, from perfect numbers to narcissistic numbers, and much more. With wit, clarity and a true fan's zeal, Singh analyses such memorable episodes as 'Bart the Genius' and 'Homer3' to offer an entirely new insight into the most successful show in television history.

**Politics and the English Language** George Orwell.2021-01-01 George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature - his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Politics and the English Language, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's Politics and the English Language is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can - and must - be rediscovered with every age.' — Irish Times

**The Precariat** Guy Standing.2021-07-15 This book presents the new Precariat - the rapidly growing number of people facing lives of insecurity, on zero hours contracts, moving in and out of jobs that give little meaning to their lives. The delivery driver who brings your packages, the uber driver who gets you to work, the security guard at the mall, the carer looking after our elderly...these are The Precariat. Guy Standing investigates this new and growing group, finding a frustrated and angry new underclass who are often ignored by politicians and economists. The rise of zero hours contracts, encouraged by fat cat corporations as risk-free employment, and by silicon valley as a way of outsourcing costs and responsibility, has been exacerbated by the COVID pandemic. At the same time, in its experience of lockdown, the western world is realizing the true value of these nurses, carers and key workers. The answer? The return of income security and meaningful work - the principles 20th century capitalism was built on. By making the fears and desires of the Precariat central to economic thinking, Standing shows how concepts like Basic Income are not just desirable but inevitable, and plots the way to a better future.

**Sasquatch Field Guide** Jeff Meldrum.2014-12-31 Review by Cliff Barackman producer of Finding Bigfoot. Finally, a concise and well-written field guide has been published to help the Bigfoot field investigator document various types of evidence in an appropriate way. Dr. Jeff Meldrum has put together a field guide on heavy-duty, waterproof card stock that literally fits in your back pocket or backpack, adding little weight to those ounce-sensitive backpackers with an interest in collecting data from the backcountry. Seemingly thinking of everything, Dr. Meldrum has even included a ruler along the top margin of the Guide so the researcher will always have a scale item for any photos taken in the woods. The Sasquatch Field Guide not only helps researchers with identifying possible spoor left by bigfoots, but it also helps him or her reduce the possibility of misidentifying signs of other animals for those of sasquatches. Also included in the Field Guide are easy-to-understand directions on how to gather and store data in the field in preparation for future analysis. The Guide uses colors and diagrams making it easy to read and understand which could be the difference between successfully gathering data and blowing it when under the pressure of dealing with the real thing out in the field. Sections in the Sasquatch Field Guide include information on visual identification, footprint identification, track casting, gathering footprint metrics, hair samples, scat samples, tree breaks, nests, cultural signs, stacked rocks, habitat and distribution, diet, vocalizations, possible origins, and taphonomy. This hefty brochure-style guide is densely-packed with valuable information that all field researchers should be intimately acquainted with.

**2012 GCSE English results** Great Britain: Parliament: House of Commons: Education Committee.2013-06-11 The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do.

**Blue Stockings** Jessica Swale.2013 'Love or knowledge: which would you choose?' A moving, comical and eye-opening story of four young women fighting for education and self-determination against the larger backdrop of women's suffrage. 1896. Girton College, Cambridge, the first college in Britain to admit women. The Girton girls study ferociously and match their male peers grade for grade. Yet, when the men graduate, the women leave with nothing but the stigma of being a 'blue stocking' - an unnatural, educated woman. They are denied degrees and go home unqualified and unmarried. In Jessica Swale's debut play, Blue Stockings, Tess Moffat and her fellow first years are determined to win the right to graduate. But little do they anticipate the hurdles in their way: the distractions of love, the cruelty of the class divide or the strength of the opposition, who will do anything to stop them. The play follows them over one tumultuous academic year, in their fight to change the future of education. Blue Stockings received its professional premiere at Shakespeare's Globe, London, in August 2013, directed by John Dove.
