Essays on Professions Robert Dingwall.2016-05-13 Over the past 30 years Robert Dingwall has published an influential series of articles on the professions, especially law and medicine. This represents a substantial and coherent body of work in an important sub-discipline of sociology. This volume assembles the best of these writings in one single accessible place. The ten essays are republished in their original form, each bearing the traces of the time and place it was written. In sum, they provide a fascinating account of an academic journey. They are introduced with a foreword from the author, who places the work in context and offers some thoughts about how the work might be used by scholars in developing the field, to evaluate, for example, the effects of the New Labour period on professional autonomy. The essays will be indispensable to sociologists with a general interest in the professions and to scholars of law, medicine and business.

Safeguarding And Child Protection For Nurses, Midwives And Health Visitors: A Practical

Guide Powell, Catherine.2011-09-01 All nurses have a duty to inform and alert appropriate personnel if they suspect a child has been abused, and to know where they can seek expert advice and support if they have concerns. This comprehensive text providing the link between legislation, policy, research and practice will enable students and practitioners to expand their knowledge and understanding of the key issues involved in safeguarding children and young people. Fiona Smith, Adviser in Children and Young People's Nursing, Royal College of Nursing, UK Once again, Catherine Powell has produced a superbly useful text which will prove invaluable to students and health practitioners. The organisation and layout is highly user-friendly and it represents an up to the minute guide absolutely rooted in practice. The case studies are an excellent addition and enable the reader to really absorb the concepts within the context of their practice experience. It is first rate. Jan Nelmes, Senior Lecturer, University of Brighton, UK Nurses, midwives and health visitors have a statutory duty to safeguard and promote the welfare of children and young people. In this clear and invaluable guide, Catherine Powell focuses on the practical aspects of safeguarding and how healthcare professionals should respond to safeguarding children concerns. The book covers the full spectrum of safeguarding children work; from prevention and early help through to statutory

intervention and serious case review. The book includes: Realistic case scenarios, concerning unborn babies, infants, toddlers, school-age children and adolescents, with examples of physical, emotional and sexual abuse and neglect The roles and responsibilities of nurses, midwives and health visitors working in a range of settings, including those working primarily with adult clients Crucial chapters on integrated working and supervision and support in safeguarding 'Points for Practice', 'Practice Questions' and 'Markers of Good Practice' to stimulate further thinking and application to real-life practice The book also offers an insight into the inter-agency aspects of safeguarding and child protection and the roles of other key players such as children's social care, the police and education services. The safety and welfare of the child or young person is placed at the centre of care delivery. Written by a leading expert, Safeguarding and Child Protection for Nurses, Midwives and Health Visitors is an essential tool for all nursing, midwifery and health visiting students and will be invaluable for practising nurses, midwives and health visitors who face an array of complex and sensitive issues in the field of safeguarding.

Delivering Cancer and Palliative Care Education Lorna Foyle, Janis Hostad. 2018-12-12 The quality of cancer and palliative care is going through unprecedented change and development as a result of policy initiatives. The impact of these policies on education is unparalleled and it is essential that clinicians and educationalists are aware of the policy formation processes and educational strategies that meet the demands of these changing times. This book takes a holistic approach to patient care and draws on the diverse experience in hospices and highlights best practice to present a comprehensive and practical guide. However, it does more. New topics are given an educational perspective; those with limited educational experience are given sound advice; the implication of policy change is outlined. This is an important book and one which should be read

by all clinicians, educators and managers responsible for improving services in cancer and palliative care.

Routledge International Handbook of Nurse Education Sue Dyson, Margaret McAllister. 2019-11-26

While vast numbers of nurses across the globe contribute in all areas of healthcare delivery from primary care to acute and long-term care in community settings, there are significant differences in how they are educated, as well as the precise nature of their practice. This comprehensive handbook provides a research-informed and international perspective on the critical issues in contemporary nurse education. As an applied discipline, nursing is implemented differently depending on the social, political and cultural climate in any given context. These factors impact on education, as much as on practice, and are reflected in debates around the value of accredited programmes, and on-the-job training, apprenticeship, undergraduate and postgraduate pathways into nursing. Engaging with these debates amongst others, the authors collected here discuss how, through careful design and delivery of nursing curricula, nurses can be prepared to understand complex care processes, complex healthcare technologies, complex patient needs and responses to therapeutic interventions, and complex organizations. The book discusses historical perspectives on how nurses should be educated; contemporary issues facing educators; teaching and learning strategies; the politics of nurse education; education for advanced nursing practice; global approaches; and educating for the future. Bringing together leading authorities from across the world to reflect on past, present and future approaches to nurse education and nursing pedagogy, this handbook provides a cutting-edge overview for all educators, researchers and policy-makers concerned with nurse education.

Perspectives in Paediatric Oncology Nursing Faith Gibson, Louise Soanes, Beth Sepion. 2006-06-14

Originally emanating from presentations at an international conference, this text brings together research and practice development from three perspectives: practice, management and education. Within these three sections the book presents a series of chapters written mainly by practitioners, but some in collaboration with academics. At the end of each section there is a commentary by a practitioner, manager or researcher, which aims to offer a helpful critique on the papers in their section, guiding the reader to consider other areas of research and practice development. At a time when practitioners are being called to produce and use evidence in their practice, this book should offer a valuable contribution to that evidence base.

Continuing Professional Development in Nursing Francis M. Quinn.1998 This handbook offers practical guidance for everyone involved in professional development. Expert advice is provided on relevant aspects of nursing practice such as reflective practice and clinical supervision.

Health Visiting Patricia Burrows, Jean Cowie.2022-04-12 This book is an essential resource for health visiting students that reflects the key changes required of health visiting practice at the beginning of the new millennium. It is a key text for specialist practitioner programmes and also for existing practitioners who are furthering their practice and academic development. It brings together the elements of theory and practice which are essential to health visiting practice. The book is research based and uses relevant evidence to support discussions. A particular strength is the use of case studies and practice examples to illustrate the theoretical discussions.

Comprehensive coverage of all areas of health visiting practice will give the new practitioner confidence Case studies help to relate the theory to practice The up to date evidence base includes the latest research The wide range of contributors ensures that the content is written by experts in their field Coverage of aggression and violence, the needs of ethnic minorities, and complementary

Clinical Supervision in Mental Health Nursing Graham Sloan.2006-06-14 Nursing research has focused on evaluating the effectiveness of clinical supervision, but there remains uncertainty as to what facets of clinical supervision are potent in realising effectiveness. This book reports on an investigation on the practice of clinical supervision in mental health nursing. Incorporating three case studies, it illuminates the reciprocal interactions between clinical supervisor and supervisee. While the book uncovers a number of limitations in the process of clinical supervision and gaps in mental health nurses' level of competence in interpersonal relations it provides a basis for a more critical approach to this important element of professional development.

Essentials of Nursing Children and Young People Jayne Price, Orla McAlinden, Zoë Veal. 2023-12-15

This book is a one-stop shop for the vast majority of children and young people's nursing students. The editors for the new edition are Jayne Price from Kingston University, Orla McAlinden from Queen's University Belfast, and Zoë Veal from UWE Bristol, all with vast experience in nursing children and young people. A high level of research has gone into developing and refining the key features for this edition, such as updated voices and implementing new NMC standards. This book maps to the content of the majority of pre-registration child nursing programmes, and by adopting a 5 part structure it clearly covers the core parts of training and practice that you will need: Part 1): Principles of nursing children and young people Part 2): Wellbeing and development Part 3): Caring for children and young people with acute health care needs and injury Part 4): Caring for children and young people with complex and high dependency needs Part 5): Being a professional children and young people's nurse

Business Education and Training Samuel M. Natale. 1997 Co-published with the Oxford Philosophy Trust, this is the second volume in a landmark series from the Oxford University Centre for the

Study of Values in Education and Business. Volume II emphasizes the conflicts and issues associated with training in applied professional fields. The physician-patient relationship, management issues, business decision-making, the training of psychologists, and the teaching of ethics to medical students are among the areas examined.

The Professional Nurse Michael Bowman.2013-11-11 Michael Bowman's book forms a useful reference source for Health Service staff interested in the role of the professional nurse and the discharge of professional accountability. I am delighted that this work competently deals with nursing's dilemmas about its therapeutic role over a crucial period in its history, especially the effects of major structural change on the profession between the period from the implementation of the Salmon and Mayston Reports up to the present time and Project 2000. The picture is in Dr Bowman's opinion not a very happy one from the viewpoint of the profession. Some of the changes that have taken place have involved some loss of professional cohesion and were independent of the organizational framework of the National Health Service. Nevertheless, it is disturbing that nurses appear during the period covered to have had a quite inadequate input to the shaping of Health Policy. There are already signs that the nursing profession has begun to absorb the warnings cited in Dr Bowman's study. However, in the wake of the National Health Service reforms and the implementing of a business culture in the National Health Service, nurses may find the message of this book only too familiar. That does not for one moment mean that the nursing input to corporate strategy and general direction should be defensive or reactionary. British nursing continues to be highly regarded by the general public.

Assessment, Supervision and Support in Clinical Practice Ci Ci Stuart.2007-01-01 A book for all the mentors and assessors of clinical practice in the nursing and midwifery professions who have

the crucial task of ensuring that the clinical practice of students attains the standards required for professional registration.

The Teacher Practitioner and Mentor in Nursing, Midwifery, Health Visiting and the Social Services Peter Jarvis, Sheila Gibson. 1997 The extensive revisions and additions to this text reflect the changes in the way in which teaching and learning take place within health-care education. The roles of the teacher-practitioner and the mentor are defined and discussed in detail, and the importance of relationships within the education process is explored. The authors also examine new developments in adult learning, and the concept of the learning experience, with particular emphasis on reflective practice and quality.

Power and Conflict Between Doctors and Nurses Maureen A. Coombs. 2004-02-24 Through observations in three intensive care units, this book draws on the reality of practice to explore how nurses and doctors work in intensive care settings. It examines: · the power held by the competing knowledge bases · the roles of the different professions · the decision-making process · the sources of conflict · the need for change. Drawing together sociological theories and clinical practice, *Power and Conflict Between Doctors and Nurses* explores the role of nurses in delivering contemporary health care. It makes a strong case for interdisciplinary working and is particularly timely when health care policy is challenging work boundaries in health care.

Healthcare Support Workers Richard Griffin. 2022-08-26 NHS support workers, such as nursing Healthcare Assistants, Maternity Support Workers, and Therapy Assistants, often provide the majority of face-to-face care to patients, clients and their families. This accessible guide explores the issues underpinning their recruitment, training, management, development and progression. NHS support workers comprise four out of ten of the clinical workforce, yet despite their importance they

have long faced barriers that mean they are not able to fully realise their potential. This is the first book to take a comprehensive look at this workforce, its history, the policy that shapes its recruitment, management and deployment, and explains clearly how their capacity and capability can be safely and effectively enhanced. Structured around the employment cycle, this text covers the introduction of Technical Levels, career changes, apprenticeships, recruitment and selection, informal learning, learning cultures, widening participation, supervision and functional skills. Providing practical, evidence-based guidance and including illustrative case studies, it suggests a range of interventions to overcome the long-standing barriers to the effective development and deployment of healthcare support workers. Drawing on the latest research, and practice, including the author's own experience, this book is an important resource for all those educating, managing or recruiting unregistered healthcare practitioners. It will also provide invaluable guidance to healthcare support workers interested in progressing their careers.

Health Visiting Karen A. Luker, Jean Orr, Gretl A. McHugh. 2012-01-30 This timely and relevant new edition of an established and well-regarded text is essential reading for those training to become health visitors and those who are practitioners working with and in the community. Health Visiting: A Rediscovery has been thoroughly revised and updated to reflect the many new developments in health policy, public health priorities and health visiting practice. The focus of the book, however, remains the same: placing the health visitor at the forefront of supporting and working with children and families, ensuring the child has the best possible start in life. The increasing importance of working with communities and reaffirming the public health role of the health visitor are discussed and debated. The new edition takes into account the challenges and increasing need for health visitors to engage with research evidence and to evaluate their practice. Key features: Incorporates the practice of public health and working with communities Includes a brand new chapter on the importance of safeguarding children and the enhanced child protection role of the health visitor Timely and topical Essential reading for all nurses working in the community, those training as Specialist Community Public Health Nurses and undergraduate students undertaking public health,

primary and community care course units Features case studies and learning activities
Forensic Nursing and Multidisciplinary Care of the Mentally Disordered Offender David K. Robinson, Alyson Kettles. 2000 The first comprehensive account of forensic nursing and its role within the wider professional team, the aim of this book is to provide a multidisciplinary perspective on the training needed to work with mentally disordered patients, as well as to examine the key characteristics of the forensic nursing role. An international group of contributors, from a wide range of disciplines, provides a well-rounded, comparative view of the forensic nursing profession. The chapters are a rich contribution of cross-cultural thinking on the many dilemmas and challenges facing nurses, psychiatrists, psychologists and other health care practitioners, working with specific client groups. Each contributor has utilised empirical data to analyse relevant issues, such as: professional standards; effectiveness of preparation for nurses working within secure environments; day to day and long term challenges facing nurses; clinical effectiveness; the dilemma of security versus practice; how forensic nursing differs from other kinds of nursing; and what forensic nurses can contribute to other mental health care disciplines. Examples of how research findings may be integrated into practice, will be of interest not only to forensic nurses, but also to significant sectors of the mental health care field.

Teaching Made Easy Kay Mohanna, David Wall, Ruth Chambers. 2004 The first edition of Teaching Made Easy established itself as a key text for busy professionals. Fully updated and revised it now includes and addresses the recent changes within the NHS and European Legislation that impact on teaching and learning in healthcare. It provides practical tips and suggestions that can help those with educational governance responsibilities at a personal, individual or organisational level, based on the extensive practical knowledge and experience of the authors in the changing healthcare environment. Its message to teachers is clear: make your teaching relevant to your learners' service and individual needs, be positive and supportive, be interesting and challenging. Its tips and techniques, covering the whole curriculum of the medical or health teacher, provide practical help in fulfilling these aspirations. This book will benefit everyone teaching health professionals at all levels, including nurses and training development managers working within primary and secondary care. Book jacket.

Professional Learning In Nursing Jenny Spouse. 2008-04-15 The way nurses are taught is constantly evolving and changing. Workplace learning is seen as key to developing practitioners. In this book Jenny Spouse discusses how students learn in a range of different clinical settings and how best to facilitate this process. How do students learn to become nurses? What knowledge and understanding do they need to acquire? How do their preconceptions, beliefs about the learning process, and social

needs affect their development? What do they find helpful and unhelpful? What makes clinical settings good for learning? Is it helpful for students to document their learning? What are the best ways for lecturer/ practitioners to facilitate student learning and what other factors influence their progress? The book explores how professional development can be better understood, following the progress of six nurse learners drawn from different parts of nursing and investigating both those difficulties faced by all students and those issues unique to particular students. It places these narratives in the context of nurse education today, exploring the implications of 'Fitness for practice' and 'Making a difference', and looking at the implications for the future development, organisation and funding of nurse education.

Health Visiting Anne Robotham, Doreen Sheldrake. 2000 This text covers practice from the aspiring health visitor to the higher level practitioner viewpoints. It takes a wide-ranging approach to practice. The book reflects the changes in Health Visitor practice brought about by community care legislation and the educational changes ushered in by PREP. It reflects the growing role of the HV in relation to contemporary problems such as alcohol and substance misuse, environmental pollution, and aggression and violence. In short, the book defines the new status of the health visitor as a specialist practitioner, and explores the less easily defined area of advanced practice. Reflects the changes in HV practice brought about by community care legislation and educational changes ushered in by PREP thus providing an accurate and up to date text. Features chapters on alcohol and substance misuse, environmental pollution, aggression and violence, thus reflecting the growing role of the HV in relation to contemporary problems. Complements other books on our growing Community list such as Lindsay & Craig thus strengthening our reputation in this area of nursing. Defines the new status of the HV as a specialist practitioner and explores the less easily defined area

of advanced practice Looks at new approaches to practice including models for primary care group organisation, health informatics, economics and clinical governance.

Managing in Health Care Lesley Dowding, Jill Barr. 2018-10-08 Appropriate for health administrators in departments of sociology, social policy and nursing. Students in pre-registration programmes and those meeting management theory for the first time. There can be little doubt that the reforms of the last few decades within the health service have had a major impact on the management responsibilities for nurses, midwives and health visitors. Integrating management theory and principles with nursing practice, *Managing in the Healthcare* demonstrates how the concepts and principles of management are intrinsically linked to the work that nurses do.

Histories of nursing practice Gerard Fealy, Christine E. Hallet, Susanne Malchau Dietz. 2015-10-01 Contains eleven landmark essays that explore the significance and meaning of nursing, with a wide geographic range that expands the existing literature on nursing work
