The Lost Dream of Equality Alan Scott, D. John Freeman-Moir. 2007 This book examines the international hopes for equality in education over the past 60 years by looking at the current evidence and theory on social class and schooling. For more than half a century the relation between social class and education has been the subject of intense debate and political struggle, as well as the focus for the aspirations of millions of citizens and their children in Western democracies. This book will be relevant to teachers, advanced undergraduates and graduate students in the areas of the history, sociology and politics of education as well as policy analysis and applied social theory.

Wrongful Enrichment Nahel Asfour. 2017-09-21 This book analyses enrichment law and its development and underpinning in social culture within three geographical regions: the United States, western members of the European Union and the late Ottoman Empire. These regions correspond, though imperfectly, with three different legal traditions: the American, continental and Islamic traditions. The book argues that we should understand law as a mimetic artefact. In so doing, it explains how typical patterns and exemplary articulations of wrongful enrichment law capture and reiterate vocal cultural themes found in the respective regions. The book identifies remarkable affinities between poetic tendencies, structures and default dispositions of wrongful enrichment law and cultural world views. It offers bold accounts of each region's law and culture providing fertile grounds for external and comparative elucidations of the legal doctrine.

Beyond Consumer Capitalism Justin Lewis.2014-01-24 Consumer capitalism dominates our economy, our politics and our culture. Yet there is a growing body of research from a range of disciplines that suggests that consumer capitalism may be past its sell-by date. Beyond Consumer Capitalism begins by showing how, for people in the developed world, consumer capitalism has become economically and environmentally unsustainable and is no longer able to deliver its abiding promise of enhancing quality of life . This cutting-edge book then asks why we devote so little time and effort to imagining other forms of human progress. The answer, Lewis suggests, is that our cultural and information industries limit rather than stimulate critical thinking, keeping us on the treadmill of consumption and narrowing our vision of what constitutes progress. If we are to find a way out of this cul de sac, Lewis argues, we must begin by analysing the role of media in consumer capitalism and changing the way we organize media and communications. We need a cultural environment that encourages rather than stifles new ideas about what guides our economy and our society. Timely and compelling, Beyond Consumer Capitalism will have strong appeal to students and scholars of media studies, cultural studies and consumer culture.

Education Redux Eli Fishman. 2010-02-01 Education Redux is a timely and incisive work answering the myriad of questions about the future of America. It is a general interest book of particular consequence to the current political and education debate. The U.S. is facing a surfeit of crises—social, political, economic and environmental. These challenges continue to be met with traditional shortterm, feel-good, snake oil remedies. None of these actions begin to address the real structural problems in the U.S. economy or in its schools. Education Redux examines the evolution of our economic despair. The popular perception is that the definitive cure is better education. There is a problem. K-12 schools do not work. Per student spending, on a constant dollar basis, is up 600% over the past few decades. Yet, standardized test scores remain flat. The proposed solutions never change—more money, better teacher performance, more parental involvement. Researchers dependably provide nothing more than minor variations on these themes, reiterating hackneyed

predicaments and fixes. The school problem is essentially twofold. First, school curriculum and instructional design are incompatible with the predisposition of the New Kids (Millennial cohort). Second, schools are perceived by students as not relevant. Education professionals treat schools as though they operate in a vacuum, which is a lethal error. School reform agendas have to be responsive to students within the context of social and economic realities. The loss of gainful employment opportunities in our economy is directly related to the dismantling of the American manufacturing sector. The restoration of a 21st century manufacturing economy is predicated on our ability to infuse young people with the technical and entrepreneurial skills necessary to pursue productive careers. For the New Kids, video games define their reality. Games are based on skill, not following orders. Education Redux offers an operational guide, predicated on the use of up-to-date video game technology, for making schools both relevant and enjoyable. The requirement for individual expression and building a community through the development of group skills can be attained using a program called the e-OneRoom Schoolhouse. Education Redux is the product of comprehensive research by the author, who has extensive formal training and experience in manufacturing, finance, teaching and community affairs. The book answers questions most people are afraid to ask.

The SAGE Handbook of Child Research Gary B Melton,Asher Ben-Arieh,Judith Cashmore,Gail S. Goodman,Natalie K. Worley.2013-12-06 It is refreshing to see a book such as this which is both broad in its conceptualization of the field of child research and deep in its focus. Social Development as Preference Management Rachel Karniol.2010-04-12 Karniol engagingly

presents social development in children through the language of preference management. Conversational excerpts garnered from around the world trace how parents talk about preferences, how infants' and children's emergent language conveys their preferences, how children themselves are impacted by others' preferences, and how they in turn influence the preferences of adults and peers. The language of preferences is used to crack into altruism, aggression, and morality, which are ways of coming to terms with other people's preferences. Behind the scenes is a cognitive engine that uses transformational thought - conducting temporal, imaginal, and mental transformations - to figure out other people's preferences and to find more sophisticated means of outmanoeuvring others by persuading them and playing with one's own mind and other people's minds when preferences are blocked. This book is a unique and sometimes amusing must-read for anyone interested in child development, language acquisition, socialisation, and communication.

New Departures in Marxian Theory Stephen Resnick,Richard Wolff.2006-09-27 Over the last twenty-five years, Stephen Resnick and Richard Wolff have developed a groundbreaking interpretation of Marxian theory generally and of Marxian economics in particular. This book brings together their key contributions and underscores their different interpretations. In facing and trying to resolve contradictions and lapses within Marxism, the authors have confronted the basic

incompatibilities among the dominant modern versions of Marxian theory, and the fact that Marxism seemed cut off from the criticisms of determinist modes of thought offered by post-structuralism and post-modernism and even by some of Marxism's greatest theorists.

The Mercedes-Benz G-Class Jörg Sand.2021-11-28 Mercedes-Benz G-Class specialist Jörg Sand has written the ultimate book on this all-wheel-drive legend, from its design and development to its extraordinary and diverse career up to the present day. Very few automobiles remain as faithful in their character and appearance as the hardcore, all-wheel-drive Mercedes-Benz G-Class luxury SUV. Even when it comes to the most recent series, the W 463 A, with its technically profound changes, the designers at Mercedes have barely changed the classic look. And for good reason. From its first year, 1979, the G-Class has always been one of the very few off-road legends. Tourists, firefighters, foresters, race drivers, and boat owners all appreciate the unique qualities of this indestructible force, the G Wagon, from Graz, Austria.

The book of the Lamborghini Murciélago Thillainathan Pathmanathan.2021-10-21 The wedge-shaped V12 Lamborghini flagships were always spectacular - in shape, sound and performance.The Murciélago was an evolution of the Countach and the Diablo, and was as iconic in its time as its illustrious predecessors were in theirs. This book examines the Murcielago in detail, while casting a look back through Lamborghini's troubled history, to understand how the Murciélago came into being. Ferruccio Lamborghini, Patrick Minram, Megatech, Chrysler, and finally VW-Audi, all played their part in the birth of this modern classic. The book touches on the people and organisations involved in the production of this iconic car, before examining each of the model variants, and discusses the joys and tribulations of ownership.

Lotus Europa - Colin Chapman's mid-engined masterpiece Matthew Vale.2022-04-13 The Lotus Europa was Colin Chapman and Lotus's first mid-engined road car, and was produced from 1966 through to 1975. Originally designed to slot into the Lotus range below the Elan as a low cost replacement for the Lotus 7, the Europa eventually sat alongside the Elan and Plus 2 as a comparable sports car in its own right. Starting with the design philosophy behind the development of the Europa, this book provides detailed technical descriptions of all the major versions of the model, starting with the Renault-powered Series 1 through to the Lotus Twin Cam powered Special. It looks at the cars on the road, and the racing Type 47 derived from the road cars which competed in the small capacity Group 6 class, as well as featuring in historic racing today. With owners' impressions and interviews with ex-Lotus employees, the book provides a valuable insight into owning, running, and racing these iconic cars.

Women Who Buy Sex Sarah Kingston,Natalie Hammond,Scarlett Redman.2020-05-10 Drawing on empirical data from women who pay for sexual services and those who provide services to women, this ground-breaking study is the first of its kind in the UK, detailing the experiences of women who pay for sex in an explicit, direct, prearranged way. Unlike previous research on clients, which has predominantly focused on men who buy sex or women who engage in romance tourism in places such as the Caribbean, this innovative research offers new and original insights into the demand side of commercial sex. Too often, it is assumed that only men pay for sex from women or other men. Women are assumed to be service providers and are unimaginable as clients. This book therefore offers a radical departure from existing scholarship on commercial sex. In addition, the book examines the experiences of couples who pay for commercial sex, a client group that has received scant investigation. The book explores women's reasons for their engagement in commercial sex

services, their backgrounds and characteristics, their strategies for remaining safe and managing potential risks, as well as their sexual health strategies. The nature of sexual service bookings with women clients is also examined, exploring the types of services women seek, the places where bookings occur and the fees they pay. Finally, the experiences of men, women and trans sex workers who provide sexual services to women are examined. By drawing on our unique data and comparing it to the literature on men clients, we present our theory 'Converging Sexualities'. We argue that commercial sex is a site of behavioural convergence and that women clients are behaving in ways that could be described as masculine or feminine. Our study therefore offers new ways to understand sexuality. This book will be of interest to researchers in the field of sexuality, sex work and women's behaviour.
