Metrics Vincanne Adams.2016-03-05 This volume's contributors evaluate the accomplishments, limits, and consequences of using quantitative metrics in global health. Whether analyzing maternal mortality rates, the relationships between political goals and metrics data, or the links between health outcomes and a program's fiscal support, the contributors question the ability of metrics to solve global health problems. They capture a moment when global health scholars and practitioners must evaluate the potential effectiveness and pitfalls of different metrics—even as they remain elusive and problematic. Contributors. Vincanne Adams, Susan Erikson, Molly Hales, Pierre Minn, Adeola Oni-Orisan, Carolyn Smith-Morris, Marlee Tichenor, Lily Walkover, Claire L. Wendland

The Eclipse of 'Elegant Economy' Dr Martin Cohen.2013-07-28 Elizabeth Gaskell might have been amused to learn that the Victorian 'elegant economy' she mocked so poignantly in *Cranford* reached a new apogee in the mid-twentieth century and endured the invasion of its precise antithesis, 'conspicuous consumption'. For Britons of all classes the years of austerity during and after the Second World War were years of disorientation and fears of resurgence of the worst of the interwar decades. They had never had more money in their pockets or less material things on which to spend it. Many took refuge in the 'elegant economy', its creator dubbed 'a sort of sour-grapeism, which made us very peaceful and satisfied'. Constrained by rationing, manufacturing and import controls personal finance could only be disbursed on non-material things - sometimes wisely, sometimes pragmatically and sometimes by throwing all caution to the wind. Here for the first

time is the history of these diverse reactions explored through Britain's metamorphosis from austerity to affluence, with consumerism seen through fresh eyes. Today political commentators constantly warn of the encroachment of austerity. This book is a timely reminder of the years of real austerity in Britain: when regardless of financial status everyone suffered its tribulations: when a 'sub-prime' mortgage was unimaginable: when abuse of expense claims by public figures was unthinkable: and when no one dared utter a word critical of their bank or its manager.

Global Shareholder Stewardship Dionysia Katelouzou, Dan W. Puchniak.2022-05-12 This is the first in-depth comparative and empirical analysis of shareholder stewardship, revealing the previously unknown complexities of this global movement. It highlights the role of institutional investors and other shareholders, examining how they use their formal and informal power to influence companies. The book includes an in-depth chapter on every jurisdiction which has adopted a stewardship code and an analysis of stewardship in the world's two largest economies which have yet to adopt a code. Several comparative chapters draw on the rich body of jurisdiction-specific analyses, to analyze stewardship comparatively from multiple interdisciplinary perspectives. Ultimately, this book provides a cutting-edge and comprehensive understanding of shareholder stewardship which challenges existing theories and informs many of the most important debates in comparative corporate law and governance.

Embodying the Self: Neurophysiological Perspectives on the Psychopathology of Anomalous Bodily Experiences Mariateresa Sestito, Andrea Raballo, Giovanni Stanghellini, Vittorio Gallese.2018-04-12 Since the beginning of the 20th Century, phenomenology has developed a distinction between lived body (Leib) and physical body (Koerper), a distinction well known as body-subject vs. body-object (Hanna and Thompson 2007). The lived body is the body experienced from within - my own direct experience of my body lived in the first-person perspective, myself as a spatiotemporal embodied agent in the world. The physical body on the other hand, is the body thematically investigated from a third person perspective by natural sciences as anatomy and physiology. An active topic affecting the understanding of several psychopathological disorders is the

relatively unknown dynamic existing between aspects related to the body-object (that comprises the neurobiological substrate of the disease) and the body-subject (the experiences reported by patients) (Nelson and Sass 2017). A clue testifying the need to better explore this dynamic in the psychopathological context is the marked gap that still exists between patients' clinical reports (generally entailing disturbing experiences) and etiopathogenetic theories and therapeutic practices, that are mainly postulated at a bodily/brain level of description and analysis. The phenomenological exploration typically targets descriptions of persons' lived experience. For instance, patients suffering from schizophrenia may describe their thoughts as alien ("thoughts are intruding into my head") and the world surrounding them as fragmented ("the world is a series of snapshots") (Stanghellini et al., 2015). The result is a rich and detailed collection of the patients' qualitative self-descriptions (Stanghellini and Rossi, 2014), that reveal fundamental changes in the structure of experiencing and can be captured by using specific assessment tools (Parnas et al. 2005; Sass et al. 2017; Stanghellini et al., 2014). The practice of considering the objective and the subjective levels of analysis as separated in the research studies design has many unintended consequences. Primarily, it has the effect of limiting actionable neuroscientific progress within clinical practice. This holds true both in terms of availability of evidence-based treatments for the disorders, as well as for early diagnosis purposes. In response to this need, this collection of articles aims to promote an interdisciplinary endeavor to better connect the bodily, objective level of analysis with its experiential corollary. This is accomplished by focusing on the convergence between (neuro) physiological evidence and the phenomenological manifestations of anomalous bodily experiences present in different disorders.

The Professional Standards of Executive Remuneration

Consultants Calvin Jackson.2023-05-01 Love them or hate them, executive remuneration consultants are key players in remuneration committees' pay determination processes. This book concerns the professional standards of executive remuneration consultants (and their 'in-house' counterparts; for example, Human Resources Director and Head of Reward) in providing remuneration committee advisory services. The author is a 25-year 'veteran' executive remuneration consultant, having worked around the world in this capacity (particularly in the financial services sector). This book is based on a qualitative empirical doctoral research exercise, involving 53 participants in the UK executive pay scene (including regulators, institutional shareholder bodies, proxy advisors, remuneration committees' chairs/members, executive remuneration consultants and in-house executive reward specialists). The objective was to formulate conclusions that could be used to the benefit of UK practice and contribute to the relevant academic scholarship on executive remuneration consultants. The research covered 18 aspects, ranging from an examination of the independence of such consultants to whether there might be a specialised accreditation/qualification and/or licence to practise regime covering their services. It provides novel insights into this previously under-researched area of corporate governance/financial regulation. This book will be of interest to those involved in the UK executive remuneration scene, whether government, regulators or any of the other parties mentioned already (plus academics in universities and business schools). It is hoped too that overseas remuneration regimes that have respects in common with the UK's will find this book useful.

compelling and unprecedented evidence, *Political Standards: Accounting for Legitimacy* documents how in subtle ways the rules of corporate accounting a critical institution in modern market capitalism have been captured to benefit industrial corporations, financial firms, and audit firms. In what is perhaps the only independent overview of the accounting industry, Karthik Ramanna begins with a history of corporate accounting and an accessible explanation of how it works today, including the essential roles it plays in defining the fundamental notion of profitability, facilitating asset allocation, and ensuring the accountability of corporations and their managers. From the evidence, Ramanna shows how accounting rule-makers selectively co-opt conceptual arguments from academia and elsewhere to advance the views of the special-interest groups. From this, Ramanna moves on to develop more broadly a new type of regulatory challenge that of producing public policy in a thin political market. His argument is that accounting rules cannot be determined without the substantial expertise and experience of groups that by definition also have strong commercial interests in the outcome. *Political Standards* concludes with an exploration of possible solutions to the problem in accounting and that of thin political markets in general, charting avenues for scholarship and practice. Certain to be an eye-opening account of a massive industry central to the modern business world, *Political Standards* will be an essential resource in understanding how the rules of the game business are set, whom they inevitably favor, and how they can be changed for the better of society.

Financial Crises Explanations, Types, and Implications

Mr.Stijn Claessens,Mr.Ayhan Kose.2013-01-30 This paper reviews the literature on financial crises focusing on three specific aspects. First, what are the main factors explaining financial crises? Since many theories on the sources of financial crises highlight the importance of sharp fluctuations in asset and credit markets, the paper briefly reviews theoretical and empirical studies on developments in these markets around financial crises. Second, what are the major types of financial crises? The paper focuses on the main theoretical and empirical explanations of four types of financial crises—currency crises, sudden stops, debt crises, and banking crises—and presents a survey of the literature that attempts to identify these episodes. Third, what are the real and financial sector implications of crises? The paper briefly reviews the short- and medium-run implications of crises for the real economy and financial sector. It concludes with a summary of the main lessons from the literature and future research directions.

Banking Law Andreas Kokkinis,Andrea Miglionico.2021-03-16 Banking regulation and the private law governing the bank-customer relationship came under the spotlight as a result of the global financial crisis of 2007–2009. More than a decade later UK, EU and international regulatory initiatives have transformed the structure, business practices, financing models and governance of the banking sector. This authoritative text offers an in-depth analysis of modern banking law and regulation, while providing

an assessment of its effectiveness and normative underpinnings. Its main focus is on UK law and practice, but where necessary it delves into EU law and institutions, such as the European Banking Union and supervisory role of the European Central Bank. The book also covers the regulation of bank corporate governance and executive remuneration, the promises and perils of FinTech and RegTech, and the impact of Brexit on UK financial services. Although detailed, the text remains easy to read and reasonably short; pedagogic features such as a glossary of terms and practice questions for each chapter are intended to facilitate learning. It is a useful resource for students and scholars of banking law and regulation, as well as for regulators and other professionals who are interested in reading a precise and evaluative account of this evolving area of law.

Predicting Pandemics in a Globally Connected World,

Volume 1 Nicola Bellomo, Mark A. J. Chaplain. 2022-09-22 This contributed volume investigates several mathematical techniques for the modeling and simulation of viral pandemics, with a special focus on COVID-19. Modeling a pandemic requires an interdisciplinary approach with other fields such as epidemiology, virology, immunology, and biology in general. Spatial dynamics and interactions are also important features to be considered, and a multiscale framework is needed at the level of individuals and the level of virus particles and the immune system. Chapters in this volume address these items, as well as offer perspectives for the future.

Technological Transformation in the Global Pulp and Paper Industry 1800-2018

Timo Särkkä, Miquel Gutiérrez-Poch, Mark Kuhlberg. 2018-10-24 This contributed volume provides 11 illustrative case studies of technological transformation in the global pulp and paper industry from the inception of mechanical papermaking in early nineteenth century Europe until its recent developments in today's business environment with rapidly changing market dynamics and consumer behaviour. It deals with

the relationships between technology transfer, technology leadership, raw material dependence, and product variety on a global scale. The study itemises the main drivers in technology transfer that affected this process, including the availability of technology, knowledge, investments and raw materials on the one hand, and demand characteristics on the other hand, within regional, national and transnational organisational frameworks. The volume is intended as a basic introduction to the history of papermaking technology, and it is aimed at students and teachers as course material and as a handbook for professionals working in either industry, research centres or universities. It caters to graduate audiences in forestry, business, technical sciences, and history.

Advancing the Frontiers of Heterodox Economics Tae-Hee Jo,Zdravka Todorova.2015-07-30 This collection of essays honors the life and work of one of the most prominent and fervent heterodox economists, Frederic S. Lee, who has been at the heart

of the heterodox economics movements for the past three decades. Authors in this book demonstrate that heterodox economic has transcended the criticism of mainstream economics and, more importantly, that constructive developments are in the making by way of cross-communications among various heterodox economics traditions. Frederic S. Lee's contributions to heterodox economics are centered on three themes: the making of a history and identity of heterodox economics, heterodox microeconomics, and the heterodox analysis of social provisioning. Part I addresses the importance of history, theory, research methods, and institutions in the making of the identity of heterodox economics as an alternative to mainstream economics. Part II delves into heterodox microeconomic theories—in particular, investment, pricing, competition, markets, and market governance—as foundations of heterodox macroeconomic analyses. Part III expands the analysis of the capitalist social provisioning process with an emphasis on its subsystems and their relationships over historical time. Part IV encapsulates the life and work of Frederic S. Lee. Throughout his intellectual life Frederic S. Lee has shown to many that the development of heterodox economics is rendered possible by unselfish and ceaseless efforts to build both theory and institutions. Essays in this book attest that establishing an alternative critical theory to the status quo is not only possible but also serviceable to the majority of the population.

Islam, Society, and Politics in Central Asia Pauline

Jones.2017-06-23 During the 1990s, there was a general consensus that Central Asia was witnessing an Islamic revival

after independence, and that this occurrence would follow similar events throughout the Islamic world in the prior two decades, which had negative effects on both social and political development. Twenty years later, we are still struggling to fully understand the transformation of Islam in a region that's evolved through a complex and dynamic process, involving diversity in belief and practice, religious authority, and political intervention. This volume seeks to shed light on these crucial questions by bringing together an international group of scholars to offer a new perspective on Central Asian states and societies. The chapters provide analysis through four distinct categories: the everyday practice of Islam across local communities; state policies toward Islam, focusing on attempts to regulate public and private practice through cultural, legal, and political institutions and how these differ from Soviet policies; how religious actors influence communities in the practice of Islam, state policies towards the religion, and subsequent communal responses to state regulations; and how knowledge of and interaction with the larger Islamic world is shaping Central Asia's current Islamic revival and state responses. The contributors, a multidisciplinary and international group of leading scholars, develop fresh insights that both corroborate and contradict findings from previous research, while also highlighting the problem of making any generalizations about Islam in individual states or the region. As such, this volume provides new and impactful analysis for scholars, students, and policy makers concerned with Central Asia.

A-CSEAR 2015-Proceedings of the 14th Australasian Centre on Social and Environmental Accounting Research Conference Dr James Hazelton and Dr John Dumay. 2015-11-13 The 14th Australasian Centre on Social and Environmental Accounting Research Conference (A-CSEAR 2015) is being held on 10-11 December 2015 at Macquarie University, Sydney, Australia. The Conference Chair is Dr John Dumay and the Programme Chair is

Dr James Hazelton, both from Macquarie University. ACSEAR provides an opportunity for individuals researching and working in the field of social and environmental accounting in both public and private sectors, to come together to exchange ideas and discuss current research in the field. The theme for the conference this year is 'Partnerships', reflecting the belief amongst our community that achieving progress requires partnerships of all types - between academics of different disciplines, between industry and academia, between government and stakeholders, and of course between members and professional bodies. The keynote speakers for the conference are Charles de Villiers from Auckland University of Technology, New Zealand on the topic Theorising the interactions among legitimacy accountability and pro-activity in the social sphere; Helen Tregidga from Auckland University of Technology, New Zealand talking about Corporate chameleons greenwashing and counter narratives"; Markus J. Milne from the School of Business and Law at the University of Canterbury, New Zealand on the topic of Crass empiricism and the social construction of corporate environmental performance and Lee D. Parker from the School of Accounting, RMIT University, Melbourne, Australia who will address to issue of Accounting for CSR: Revisiting the agenda. ACSEAR received 60 abstract submissions. After the double-blind peer review process 21 academic research papers, have been accepted for publication in these conference proceedings. These papers represent research from around the world, including Australia, Brazil, China, Fiji, Iran, Italy, Japan, New Zealand, South Africa, UK and the USA.

Handbook of Analytical Studies in Islamic Finance and Economics

Zamir Iqbal, Tarik Akin, Nabil El Maghrebi, Abbas

Mirakhor. 2020-08-10 This handbook offers a unique and original collection of analytical studies in Islamic economics and finance, and constitutes a humble addition to the literature on new economic thinking and global finance. The growing risks

stemming from higher debt, slower growth, and limited room for policy maneuver raise concerns about the ability and propensity of modern economies to find effective solutions to chronic problems. It is important to understand the structural roots of inherent imbalance, persistence-in-error patterns, policy and governance failures, as well as moral and ethical failures. Admittedly, finance and economics have their own failures, with abstract theory bearing little relation with the real economy, uncertainties and vicissitudes of economic life. Economic research has certainly become more empirical despite, or perhaps because of, the lack of guidance from theory. The analytics of Islamic economics and finance may not differ from standard frameworks, methods, and techniques used in conventional economics, but may offer new perspectives on the making of financial crises, nature of credit cycles, roots of financial system instability, and determinants of income disparities. The focus is placed on the logical coherence of Islamic economics and finance, properties of Islamic capital markets, workings of Islamic banking, pricing of Islamic financial instruments, and limits of debt financing, fiscal stimulus and conventional monetary policies, inter alia. Readers with investment, regulatory, and academic interests will find the body of analytical evidence to span many areas of economic inquiry, refuting thereby the false argument that given its religious tenets, Islamic economics is intrinsically narrative, descriptive and not amenable to testable implications. Thus, the handbook may contribute toward a redefinition of a dismal science in search for an elusive balance between rationality, ethics and morality, and toward a remodeling of economies based on risk sharing and prosperity for all humanity

China's Environmental Challenges Judith Shapiro.2013-04-17
China's huge environmental challenges are significant for us all. They affect not only the health and well-being of China but the very future of the planet. In this trailblazing book, noted China

specialist and environmentalist Judith Shapiro investigates China's struggle to achieve sustainable development against a backdrop of acute rural poverty and soaring middle class consumption. Using five core analytical concepts to explore the complexities of this struggle - the implications of globalization, the challenges of governance; contested national identity, the evolution of civil society and problems of environmental justice and equity - Shapiro poses a number of pressing questions: Do the Chinese people have the right to the higher living standards enjoyed in the developed world? Are China's environmental problems so severe that they may shake the government's stability, legitimacy and control? To what extent are China's environmental problems due to patterns of Western consumption? And in a world of increasing limits on resources and pollution sinks, is it even possible to build an equitable system in which people enjoy equal access to resources without taking them from successive generations, from the poor, or from other species? China and the planet are at a pivotal moment; the path towards a more sustainable development model is still open. But - as Shapiro persuasively argues - making this choice will require humility, creativity, and a rejection of business as usual. The window of opportunity will not be open much longer. Chapter 1 - 'The Big Picture' - is available online.

Handbook of International Climate Finance Michaelowa, Axel,Sacherer, Anne-Kathrin.2022-10-14 The concept of international climate finance channelled from developed to developing countries through public interventions for mitigation and adaptation has been developed over the last decade, but its roots date back to the early 1990s. Despite the high relevance of the topic in the international climate negotiations, illustrated by the (missed) target to mobilise USD 100 billion by 2020, there is no book that provides an overview accessible to academics and

practitioners alike.

Compensation for Wrongful Convictions Wojciech

Jasiński, Karolina Kremens. 2023-03-14 This book presents a comprehensive comparative analysis of the substantive and procedural aspects of compensation for wrongful convictions in European countries and the USA, as well as the standard derived from the case law of the European Court of Human Rights. The collection draws comparative conclusions as to the similarities and differences between selected jurisdictions and assesses the effectiveness of the national compensation schemes. This enables the designing of an optimum model of compensation, offering accessibility and effectiveness to the victims of miscarriages of justice and being acceptable to jurisdictions based on common law, and civil law traditions, as well as inquisitorial and adversarial types of criminal process. Moreover, the discussion of the minimum European standard as established in the case law of the European Court of Human Rights enables readers to identify how the Strasbourg Court can contribute to strengthening the compensation scheme. The book will be essential reading for students, academics and policymakers working in the areas of criminal law and procedure.

Downloading Accounting As 2013 Paper 22 Mark Scheme provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying,

researching, and reading on the go. Moreover, the cost-effective nature of downloading Accounting As 2013 Paper 22 Mark Scheme has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Accounting As 2013 Paper 22 Mark Scheme. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not

only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Accounting As 2013 Paper 22 Mark Scheme. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Accounting As 2013 Paper 22 Mark Scheme, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate

the legitimacy of the websites they are downloading from. In conclusion, the ability to download Accounting As 2013 Paper 22 Mark Scheme has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
