Standard Handbook of Electronic Engineering, 5th Edition Donald Christiansen, Charles Alexander, Ronald K. Jurgen. 2005 The Standard Handbook of Electronics Engineering has defined its field for over thirty years. Spun off in the 1960's from Fink's Standard Handbook of Electrical Engineering, the Christiansen book has seen its markets grow rapidly, as electronic engineering and microelectronics became the growth engine of digital computing. The EE market has now undergone another seismic shift—away from computing and into communications and media. The Handbook will retain much of its evergreen basic material, but the key applications sections will now focus upon communications, networked media, and medicine—the eventual destination of the majority of graduating EEs these days.

*The Path of the Pole* Charles H. Hapgood. 1999 Hapgood's tour de force is back in print! This riveting account of how earth's poles have flipped positions many times is the culmination of Hapgood's extensive research of Antarctica, ancient maps and the geological record. This amazing book discusses the various pole shifts in earth's history -- occurring when earth's crust slips in the inner core -- and gives evidence for each one. It also predicts future pole shifts: a planetary alignment will cause the next one on 5 May 2000! Packed with illustrations, this book is the reference other books on the subject cite over and over again. With millennium madness in full swing, this is just the book to generate even more excitement at the unknown possibilities.

**The Lure** Stephen C. Schroeder. 2012 About the sting operation used by the Dept. of Justice to catch Russian hackers who were gaining control of computers and stealing private data from victims in the United States.

**When an Echo Returns** Linda Kay Silva. 2011 Empath Echo Branson had finally found a home in the bayou, until a hurricane swept it away and left something hungry in its place.

*The Strange Hours Travelers Keep* August Kleinzahler. 2014-09-09 Those aren't stars, darling That's your nervous system Nanna didn't take you to planetariums like this --from Hyper-Berceive: 3 A.M. August Kleinzahler's new poems stretch and go places he has never gone before: they have his

signature high color and rhythmic jump, but they take on a breadth of voice and achieve registers that his earlier work only hinted at. Ranging from Vegas and Mayfair to the Asian steppes and contemporary Berlin, these poems touch down at will in tableaux where Liberace unceremoniously meets with St. Kevin and Attila with Zsa Zsa Gabor. Surprise after surprise, nothing seems to lie outside Kleinzahler's purview. This is the strongest collection to date from a poet with the vision and confident skill to make American poetry new (Clive Wilmer, *The Times* [London]).
