**Teaching and Learning Geography** Daniella Tilbury,Michael Williams.2002-11-01 This book provides a clear overview of current thinking on the teaching and learning of geography. It is an ideal companion to all students beginning a career in teaching the subject in secondary schools. The chapters are written by experienced teacher educators and bridge both theory and practice. The writers focus on the continuities, whilst setting them in the context of the changing curriculum. The book is divided into four parts. Part One examines the historical context of geography teaching. Part Two looks at issues of course planning, design, syllabuses and programmes of study. Underlying this section is the assumption that geography should not be considered in isolation from other subjects, but rather as part of a whole curriculum. Part Three concentrates on teaching and learning, and includes chapters on the use of maps, field work, IT and first hand experience within a community. The final section covers the issues associated with assessment, across the whole school age range.

**Francis Huxley and the Human Condition** Ron Roberts,Theodor Itten.2020-10-08 Focused on the life and work of Francis Huxley (1923-2016), this book offers an exploration of the search to understand the human condition, one which is simultaneously biographical, philosophical, cultural, historical, political and epistemological. A member of the illustrious Huxley dynasty, Francis Huxley

forged an unusual and innovative career, making key contributions to social anthropology, mental health care and the protection of indigenous peoples. His story reveals how the production and dissemination of ideas can be understood in an intergenerational context which is familial and sociological. The book reflects on the contemporary relevance of Huxley's work, forging links between the central philosophical, cultural, scientific and political themes that dominate the turbulent early 21st century and the enduring questions that have driven human beings in the search to understand themselves and their place in the world. It will be of interest to scholars from across the social sciences and humanities.

As a little girl, Jane has no one. Her mother, a powerful Broadway producer, makes time for her only once a week, for their Sunday trip to admire jewelry at Tiffany's. Then she meets Michael again-as handsome, smart and perfect as she remembers him to be. But not even Michael knows the reason they've really been reunited. Sunday at Tiffany's is a love story with an irresistible twist, a novel about the child inside all of us and the boundary-crossing power of love.

**My Body Given for You** Helmut Hoping .2019 The Eucharist originated at the Last Supper of Jesus

with his disciples. It is based on the prayer of thanksgiving that Jesus pronounced over the bread and wine at that meal. "Eucharist" means "thanksgiving", "praise", and "blessing". The Church celebrates the Eucharist as a memorial of the death and Resurrection of Jesus Christ, which is more than a remembrance of the Last Supper of Jesus with his disciples. In the Eucharist the sacrifice of our redemption becomes present sacramentally. In the past, dogmatic theology has treated the meaning of the Eucharist while disregarding the form of its liturgical celebration, whereas liturgical studies have been content with only the latter. Yet the two cannot be separated, any more than liturgy and dogma or pastoral practice and doctrine can be understood without the other. The Church's liturgy is not something external to Christian revelation, but rather, as Joseph Ratzinger said, "revelation accepted in faith and prayer". In this work Helmut Hoping combines the approaches of dogmatic theology and liturgy while examining the Eucharist from a historical and systematic perspective. This new English translation of the second German edition of this major work, revised and expanded, includes a comparative analysis of the Second Eucharistic Prayer and a chapter on the theology of the words of institution.

An Answer from the Silence Max Frisch. 2019-09-15 This novel by esteemed Swiss writer Max Frisch is an exploration of the question: Why don't we live when we know we're here just this one time, just one single, unrepeatable time in this unutterably magnificent world?! This outcry against the emptiness of ordinary everyday life uttered by the hero of Frisch's book is countered by an answer from the silence he meets when face-to-face with death. When *An Answer from the Silence* begins, the protagonist has just turned thirty and is engaged to be married and about to start work as a teacher. Frightened by the idea of settling down, he journeys to the Alps in a do-or-die effort to climb the unclimbed North Ridge, and by doing so prove he is not ordinary. But having reached the top he

returns not in triumph, but in frostbitten shock, having come dangerously close to death. This highly personal early novel reflects a crisis in Frisch's own life, and perhaps because of this intimate connection, he refused to allow it to be included in his Collected Works in the 1970s. Now available in English, this distinctive book will thrill fans of Frisch's other works.

**The Psychology of Meaning in Life** Tatjana Schnell.2020-07-09 This book offers an inspiring exploration of current findings from the psychology of meaning in life, analysing cutting-edge research to propose practical, evidence-based applications. Schnell draws on psychological, philosophical and cognitive perspectives to explore basic concepts of meaning and introduce a multidimensional model of meaning in life. Written in an accessible style, this book covers a range of topics including the distinction between meaning and happiness, the impact of meaning on health and longevity, meaning in the workplace, and meaning-centred interventions. Each chapter ends with exercises to encourage self-reflection and measurement tools are presented throughout, including the author's original Sources of Meaning and Meaning in Life Questionnaire (SoMe), to inspire the reader to consider the role of meaning in their own life. The Psychology of Meaning in Life is essential reading for students and practitioners of psychology, sociology, counselling, coaching and related disciplines, and for general readers interested in exploring the role of meaning in life.

**Going to the Mountain** Ndaba Mandela.2018-06-28 'You empower yourself and then you reach out to others.' Uplifting life lessons from one of the greatest leaders the world has ever known... through the eyes of the grandson whose life he changed forever. In his book Going to the Mountain, Ndaba Mandela shares the story of his coming-of-age alongside South Africa's rebirth. It is a remarkable journey, and one that took him from the violent, segregated Soweto ghettos to his grandfather's

presidential home. As a young boy, Ndaba was constantly shunted from place to place. But at eleven years old he was unexpectedly invited to live with his grandfather, Nelson Mandela, even though he had met him only once before, during a prison visit. And, slowly, they built a relationship that would affect both of them profoundly. Ndaba's teenage years were complicated, but as he approached his twenty-first birthday, Mandela decided that Ndaba was finally ready to 'go to the mountain' - a test of courage during which you become a man. At the end of this gruelling ritual journey, the elders of the Mandelas' tribe gathered and Ndaba's grandfather was there, as ever, to share his greatest life lessons. From Nelson Mandela, Ndaba learned the spirit of endurance, the triumph of forgiveness, the power of resistance and the beauty of reconciliation. And as Mandela grew older, Ndaba had the chance to repay his grandfather's love and support by demonstrating the ways in which he'd understood all that he had taught him. Intimate and inspirational, *Going to the Mountain* is a powerful reminder of how one person can impact profoundly on another, and a testament to the awesome power within us to change ourselves and our world.

The Mirror in the Mirror Michael Ende.2022-09-13 "The Mirror in the Mirror" - in the E-Book now also with illustrations by his father Edgar Ende, to whom Michael Ende dedicated this book. It is a fantastic story labyrinth of a very special kind. For the author himself, this work was of great importance: in interviews, he liked to call it his "never-ending story for adult readers." The reader is taken into a mysterious narrative world, full of bizarre situations and mysterious fates, surreal images and philosophical thoughts. Those who open themselves in amazement to these enigmatic visions and allow themselves to be drawn into the fantastic stories will emerge from Michael Ende's magic labyrinth with a new perspective. The core question is: What is reflected in a mirror that is reflected in a mirror? If two readers read the same book, they are still not reading the same thing.

For both people immerse themselves into the reading. The book becomes a mirror in which the reader is reflected. But in the same way, the reader is also a mirror in which the book is reflected: The mirror in the mirror refers the reader back to himself. The FAZ, one of the major newspapers in Germany, writes that Michael Ende shows with the book “how much darkness, wildness and rawness is inherent in dreams. He does not trivialize. His dreams make reference to reality because in dreams, Cicero wrote, ‘the remnants of those objects roll and tumble about in the souls which we have thought and impelled while awake’.”

**The Cerebellum Revisited** Rodolfo Llinas, Constantino Sotelo. 2012-12-06 This book is organized into three parts that correspond with the main groups of chapters delivered during the Cajal Centenary Meeting on The Neutron Doctrine. These chapters represent important aspects of the morphology, development, and function of the cerebellum and related structures. Clearly an exhaustive analysis of all aspects of the cerebellar system, as they relate to the legacy of Ramon y Cajal, would be impossible to contain in just one volume, given its far-reaching impact. Instead, we deliberately steered away from the traditional handbook approach that some of us have taken in the past and selected those aspects of cerebellar research currently under vigorous study that would also represent the widest scope of interest for neuroscientists in general and for cerebellar specialists in particular. In particular, we felt that as the discrete anatomy of the cerebellum is quite well known, only certain aspects of the structure should be discussed here. For example, the organization of the pontocerebellar pathways, we felt, would be particularly interesting given the enormity of the system in higher vertebrates. Also of interest is the distribution and development of the synaptology and neurotransmitter properties in this cortex. Indeed, from the point of view of cerebellar development, this may represent one of the clearest paradigms in the understanding of

rules for neurogenesis for the central nervous system.

Understanding and Teaching the Intuitive Mind Bruce Torff,Robert J. Sternberg.2001-01-01 The intuitive mind is a powerful force in the classroom and often an undetected one. Intuitive conceptions--knowledge or knowledge-structures that individuals acquire and use largely without conscious reflection or explicit instruction--sometimes work to facilitate learning in the classroom and other contexts. But learning may also be impeded by intuitive conceptions, and they can be difficult to dislodge as needed. The literatures in psychology and education include a large and diverse body of theory and research on intuitive conceptions, but this work is limited in some respects. This volume contributes in four ways to overcome these limitations. Understanding and Teaching the Intuitive Mind: Student and Teacher Learning: \* pulls together diverse theoretical and methodological approaches to the origin, structure, function, and development of intuitive conceptions; \* explores a diversity of academic disciplines--paying equal attention not only to mathematics and science, the fields in which intuitive concepts have been studied most extensively, but also to the social sciences, arts, and humanities; \* explicitly links theory and research to educational implications and classroom applications; and \* focuses not only on students' intuitive conceptions but also on teachers' intuitive beliefs about learning and teaching. Although the viewpoints of the contributors are diverse, they share the belief that educational practices have much to gain by systematic studies of the intuitive learner and teacher. This volume offers state-of-the-art, research-based information and support for psychologists, teacher educators, educational

administrators, teachers, prospective teachers, and others who seek to develop educational practices that are cognizant of (and responsive to) the intuitive conceptions of students and teachers.

**The Specter of Capital** Joseph Vogl.2014-10-22 In his brilliant interdisciplinary analysis of the global financial crisis, Joseph Vogl aims to demystify finance capitalism—with its bewildering array of new instruments—by tracing the historical stages through which the financial market achieved its current autonomy. Classical and neoclassical economic theorists have played a decisive role here. Ignoring early warnings about the instability of speculative finance markets, they have persisted in their belief in the inherent equilibrium of the market, describing even major crises as mere aberrations or adjustments and rationalizing dubious financial practices that escalate risk while seeking to manage it. The market knows best: this is a secular version of Adam Smith's faith in the market's invisible hand, his economic interpretation of eighteenth-century providentialist theodicy, which subsequently hardened into an oikodicy, an unquestioning belief in the self-regulating beneficence of market forces. Vogl shows that financial theory, assisted by mathematical modeling and digital technology, itself operates as a hidden hand, pushing economic reality into unknown territory. He challenges economic theorists to move beyond the neoclassical paradigm to discern the true contours of the current epoch of financial convulsions.

**#Sendnudes. Ediz. Illustrata** Mendo.2018 - A visually stunning book that approaches erotic photography from a female point of view, curated by Iman Whitfield - Features young and exciting photographers from around the globe - Celebrates the diversity of female beauty and body

confidence in the 21st century If you spend a reasonable amount of time online, chances are you may have stumbled across the phrase: #SENDNUDES. A staple of millennial lingo, the term is used to request sexually explicit photographs, typically over text messaging and dating apps. Over time, #SENDNUDES has also evolved into a meme, deployed as a common punchline in image and video internet jokes. Today, #SENDNUDES is making another transition -- as the title of a carefully curated book of nude photography. In collaboration with Iman Whitfield, MENDO reached out to photographers all over the world and asked them to send their favorite shots of female sensuality and intimacy. The result is a visually stunning photo collection approaching erotic photography from a female point of view, celebrating the diversity of female beauty and body confidence, and teasing the delicate line between that which is revealed and that which remains private. The featured images were sent from all over the world, from such highly skilled erotic photographers as Dennis Swiatkowski, Fauve Bouwman, and Paul Bellaart -- each bringing a distinctive style and approach to female sensuality, intimacy, and elegance.

**Theology and Church** Walter Kasper. 1989 This new collection of essays by West Germany's most distinguished Roman Catholic theologian covers the two broad areas indicated in the title. The first

half discusses the Christian understanding of God; the place of Christianity in the modern world; the modern sense of freedom and history and the theological definition of human rights; christology and anthropology; and the possibilities of a new spiritual christology in a trinitarian setting. The second half discusses various aspects of the church: as universal sacrament of salvation; as the place of truth and as communion. Two final studies examine the continuing challenge of the Second Vatican Council and the fundamental form and meaning of the eucharist. An extended introduction considers systematic theology today and the tasks which confront it.

The future of dialects Marie-Hélène Côté, Remco Knooihuizen, John Nerbonne. 2016-02-05 Traditional dialects have been encroached upon by the increasing mobility of their speakers and by the onslaught of national languages in education and mass media. Typically, older dialects are “leveling” to become more like national languages. This is regrettable when the last articulate traces of a culture are lost, but it also promotes a complex dynamics of interaction as speakers shift from dialect to standard and to intermediate compromises between the two in their forms of speech. Varieties of speech thus live on in modern communities, where they still function to mark provenance, but increasingly cultural and social provenance as opposed to pure geography. They

arise at times from the need to function throughout the different groups in society, but they also may have roots in immigrants' speech, and just as certainly from the ineluctable dynamics of groups wishing to express their identity to themselves and to the world. The future of dialects is a selection of the papers presented at Methods in Dialectology XV, held in Groningen, the Netherlands, 11-15 August 2014. While the focus is on methodology, the volume also includes specialized studies on varieties of Catalan, Breton, Croatian, (Belgian) Dutch, English (in the US, the UK and in Japan), German (including Swiss German), Italian (including Tyrolean Italian), Japanese, and Spanish as well as on heritage languages in Canada.

**Lingua Ex Machina** William H. Calvin, Derek Bickerton. 2000 A neuroscientist and a linguist show how evolution could have given rise to structured language. A machine for language? Certainly, say the neurophysiologists, busy studying the language specializations of the human brain and trying to identify their evolutionary antecedents. Linguists such as Noam Chomsky talk about machinelike modules in the brain for syntax, arguing that language is more an instinct (a complex behavior triggered by simple environmental stimuli) than an acquired skill like riding a bicycle. But structured language presents the same evolutionary problems as feathered forelimbs for flight: you need a lot of specializations to fly even a little bit. How do you get them, if evolution has no foresight and the intermediate stages do not have intermediate payoffs? Some say that the Darwinian scheme for gradual species self-improvement cannot explain our most valued human capability, the one that sets us so far above the apes, language itself. William Calvin and Derek Bickerton suggest that other evolutionary developments, not directly related to language, allowed language to evolve in a way that eventually promoted a Chomskian syntax. They compare these intermediate behaviors to the curb-cuts originally intended for wheelchair users. Their usefulness was soon discovered by users of

strollers, shopping carts, rollerblades, and so on. The authors argue that reciprocal altruism and ballistic movement planning were curb-cuts that indirectly promoted the formation of structured language. Written in the form of a dialogue set in Bellagio, Italy, *Lingua ex Machina* presents an engaging challenge to those who view the human capacity for language as a winner-take-all war between Chomsky and Darwin.

**Learning as a Generative Activity** Logan Fiorella, Richard E. Mayer. 2015-02-05 During the past twenty-five years, researchers have made impressive advances in pinpointing effective learning strategies (namely, activities the learner engages in during learning that are intended to improve learning). In *Learning as a Generative Activity: Eight Learning Strategies that Promote Understanding*, Logan Fiorella and Richard E. Mayer share eight evidence-based learning strategies that promote understanding: summarizing, mapping, drawing, imagining, self-testing, self-explaining, teaching, and enacting. Each chapter describes and exemplifies a learning strategy, examines the underlying cognitive theory, evaluates strategy effectiveness by analyzing the latest research, pinpoints boundary conditions, and explores practical implications and future directions. Each learning strategy targets generative learning, in which learners actively make sense out of the material so they can apply their learning to new situations. This concise, accessible introduction to learning strategies will benefit students, researchers, and practitioners in educational psychology, as well as general readers interested in the important twenty-first-century skill of regulating one's own learning.

*Universal Design in Higher Education* Sheryl E. Burgstahler, Rebecca C. Cory. 2010-01-01 *Universal Design in Higher Education* looks at the design of physical and technological environments at institutions of higher education; at issues pertaining to curriculum and instruction; and at the full

array of student services. Universal Design in Higher Education is a comprehensive guide for researchers and practitioners on creating fully accessible college and university programs. It is founded upon, and contributes to, theories of universal design in education that have been gaining increasingly wide attention in recent years. As greater numbers of students with disabilities attend postsecondary educational institutions, administrators have expressed increased interest in making their programs accessible to all students. This book provides both theoretical and practical guidance for schools as they work to turn this admirable goal into a reality. It addresses a comprehensive range of topics on universal design for higher education institutions, thus making a crucial contribution to the growing body of literature on special education and universal design. This book will be of unique value to university and college administrators, and to special education researchers, practitioners, and activists.
