Byzantine Court Culture from 829 to 1204 Henry Maguire.2004 The imperial court in Constantinople is central to the outsider's vision of Byzantium. However, in spite of its fame in literature and scholarship, there have been few attempts to analyze the court in its entirety as a phenomenon. These studies provide a unified composition by presenting Byzantine courtly life in all its interconnected facets.

Beyond Words Jeffrey F. Hamburger,William P. Stoneman,Anne-Marie Eze,Lisa Fagin Davis,Nancy Netzer.2016 Featuring illuminated manuscripts from nineteen Boston-area institutions, Beyond Words provides a sweeping overview of the history of the book in the Middle Ages and Renaissance, as well as a guide to its production, illumination, functions, and readership. With over 150 manuscripts on display, Manuscripts for Pleasure & Piety at the McMullen Museum focuses on lay readership and the place of books in medieval society. The High Middle Ages witnessed an affirmation of the visual and, with it, empirical experience. There was an explosion of illumination. Various types of images, whether in prayer or professional books, attest to the newfound importance of visual demonstration in matters of faith and science alike.--

The Humanities Through the Arts F. David Martin, Lee A. Jacobus.1978 Humanities through the Arts is intended for introductory-level, interdisciplinary courses offered across the curriculum in the Humanities, Philosophy, Art, English, Music, and Education departments. Arranged topically by art form from painting, sculpture, photography, and architecture to literature, music, theater, film, and dance. This beautifully illustrated text helps students learn how to actively engage a work of art. The new sixth edition retains the popular focus on the arts as an expression of cultural and personal values..

Gems in the Early Modern World Michael Bycroft,Sven Dupré.2018-11-27 This edited collection is an interdisciplinary study of gems in the early modern world. It examines the relations between the art, science, and technology of gems, and it does so against the backdrop of an expanding global trade in gems. The eleven chapters are organised into three parts. The first part sets the scene by describing how gems moved around the early modern world, how they were set in motion, and how they were pulled together in the course of their travels. The second part is about value. It asks why people valued gems, how they determined the value of a given gem, and how the value of a gem was connected to its perceived place of origin. The third part deals with the skills involved in cutting, polishing, and mounting gems, and how these skills were transmitted and articulated by artisans. The common themes of all these chapters are materials, knowledge and global trade. The contributors to this volume focus on the material properties of gems such as their weight and hardness, on the knowledge involved in exchanging them and valuing them, and on the cultural consequences of the expanding trade in gems in Eurasia and the Americas.

Presidents, Populism, and the Crisis of Democracy William G. Howell,Terry M. Moe.2020-07-14 To counter the threat America faces, two political scientists offer “clear constitutional solutions that break sharply with the conventional wisdom” (Steven Levitsky, New York Times–bestselling coauthor of How Democracies Die). Has American democracy’s long, ambitious run come to an end? Possibly yes. As William G. Howell and Terry M. Moe argue in this trenchant new analysis of modern politics, the United States faces a historic crisis that threatens our system of self-government—and if democracy is to be saved, the causes of the crisis must be understood and defused. The most visible cause is Donald Trump, who has used his presidency to attack the nation’s institutions and violate its democratic norms. Yet Trump is but a symptom of causes that run much deeper: social forces like globalization, automation, and immigration that for decades have generated economic harms and cultural anxieties that our government has been wholly ineffective at addressing. Millions of Americans have grown angry and disaffected, and populist appeals have found a receptive audience. These were the drivers of Trump’s dangerous presidency, and they’re still there for other populists to weaponize. What can be done? The disruptive forces of modernity cannot be stopped. The solution lies, instead, in having a government that can deal with them—which calls for aggressive new policies, but also for institutional reforms that enhance its capacity for effective action. The path to progress is filled with political obstacles, including an increasingly populist, anti-government Republican Party. It is hard to be optimistic. But if the challenge is to be met, we need reforms of the presidency itself—reforms that harness the promise of presidential power for effective government, but firmly protect against that power being put to anti-democratic ends.

Charlemagne's Mustache P. Dutton.2016-04-30 Charlemagne's Mustache presents the reader with seven engaging studies, 'thick descriptions', of cultural life and thought in the Carolingian world. The author begins by asking questions. Why did Charlemagne have a mustache and why did hair matter? Why did the king own peacocks and other exotic animals? Why was he writing in bed and could he write at all? How did medieval kings become stars? How were secrets kept and conveyed in the early Middle Ages? And why did early medieval peoples believe in storm and hailmakers? The answers, he found, are often surprising.

Masters Theses in the Pure and Applied Sciences Wade H. Shafer.2012-12-06 Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis (CINDAS) * at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volumes were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 36 (thesis year 1991) a total of 11,024 thesis titles from 23 Canadian and 161 United States universities. We are sure that this broader base for these titles reported will greatly enhance the value of this important annual reference work. While Volume 36 reports theses submitted in 1991, on occasion, certain universities do report theses submitted in previous years but not reported at the time.

Reading Development and Difficulties David A. Kilpatrick,R. Malatesha Joshi,Richard K. Wagner.2020-10-05 This book provides an overview of current research on the development of reading skills as well as practices to assist educational professionals with assessment, prevention, and intervention for students with reading difficulties. The book reviews the Componential Model of Reading (CMR) and provides assessment techniques, instructional recommendations, and application models. It pinpoints specific cognitive, psychological, and environmental deficits contributing to low reading skills, so educators can accurately identify student problems and design and implement appropriate interventions. Chapters offer methods for assessing problems in decoding, word and sound recognition, and comprehension. In addition, chapters emphasize the recognition of student individuality as readers and learners, from understanding distinctions between difficulties and disabilities to the effects of first-language orthography on second-language learning. Topics featured in this book include: Learning the structure of language at the word level. Reading comprehension and reading comprehension difficulties Assessing reading in second language learners. Effective prevention and intervention for word-level reading difficulties. The neurobiological nature of developmental dyslexia. Reading Development and Difficulties is a must-have resource for researchers, practitioners, and graduate students in varied fields, including child and school psychology; assessment, testing, and evaluation; social work; and special education. I think the book has the potential to be a game changer. It will certainly challenge the expectations of policy makers, not to mention the teachers of beginning readers. These chapters will enhance the knowledge base of those in our schools who are charged with the lofty task of assuring that children have the best possible opportunities to acquire the skill of reading.” Sir Jim Rose Chair and author of Independent Review of the Teaching of Early Reading: Final Report (2006)

To Know Our Many Selves Dirk Hoerder.2010 To Know Our Many Selves profiles the history of Canadian studies, which began as early as the 1840s with the Study of Canada. In discussing this comprehensive examination of culture, Hoerder highlights its unique interdisciplinary approach, which included both sociological and political angles. Years later, as the study of other ethnicities was added to the cultural story of Canada, a solid foundation was formed for the nation's master narrative Against this background, To Know Our Many Selves focuses on why Canadian studies can be used as a sound model for the study of other societies in a framework of transcultural societal studies

Sustainability Science Michael P. Weinstein,R. Eugene Turner.2012-06-05 The object of this book is to highlight how the nascent field of sustainability science is addressing a key challenges for scientists; that is, understanding the workings of complex systems especially when humans are involved. A consistent thread in the sustainability science movement is the wide acknowledgement that greater degrees of integration across what are now segmented dimensions of extant Science and Technology systems will be a key factor in matching the most appropriate science and technology solutions to specific sustainability problems in specific places.

Twelve Years a Slave Solomon Northup.2014-03-08 Now a major motion picture nominated for nine Academy Awards. Narrative of Solomon Northup, a Citizen of New-York, Kidnapped in Washington City in 1841, and Rescued in 1853. Twelve Years a Slave by Solomon Northup is a memoir of a black man who was born free in New York state but kidnapped, sold into slavery and kept in bondage for 12 years in Louisiana before the American Civil War. He provided details of slave markets in Washington, DC, as well as describing at length cotton cultivation on major plantations in Louisiana.

The Concept of Negritude in the Poetry of Leopold Sedar Senghor Sylvia Washington Ba.2015-03-08 Negritude has been defined by Léopold Sédar Senghor as the sum of the cultural values of the black world as they are expressed in the life, the institutions, and the works of black men. Sylvia Washington Bâ analyzes Senghor's poetry to show how the concept of negritude infuses it at every level. A biographical sketch describes

his childhood in Senegal, his distinguished academic career in France, and his election as President of Senegal. Themes of alienation and exile pervade Senghor's poetry, but it was by the opposition of his sensitivity and values to those of Europe that he was able to formulate his credo. Its key theme, and the supreme value of black African civilization, is the concept of life forces, which are not attributes or accidents of being, but the very essence of being. Life is an essentially dynamic mode of being for the black African, and it has been Senghor's achievement to communicate African intensity and vitality through his use of the nuances, subtleties, and sonorities of the French language. In the final chapter Sylvia Washington Bâ discusses the future of Senghor's belief that the black man's culture should be recognized as valid not simply as a matter of human justice, but because the values of negritude could be instrumental in the reintegration of positive values into western civilization and the reorientation of contemporary man toward life and love. Thrice-Greatest Hermes G. R. S. Mead.1906 This is the edition including all three books. The so-called Hermetic writings have been known to Christian writers for many centuries. The early church Fathers (Justin Martyr, Tertullian, Clement of Alexandria) quote them in defense of Christianity. Stobaeus collected fragments of them. The Humanists knew and valued them. They were studied in the sixteenth and seventeenth centuries, and in modern times have again been diligently examined by many scholars. G. R. S. Mead has issued a translation of the whole body of extant literature, with extended prolegomena, commentary, etc. There is a wide difference of opinion as to the date at which this literature was produced. Mead believes that some of the extant portions of it are at least as early as the earliest Christian writings, while von Christ assigns them to the third Christian century, and thinks that they show the influence of neo-Platonism. To affirm that they influenced New Testament usage would be hazardous, but they perhaps throw some light on the direction in which thought was moving in New Testament times.

Pathophysiology of Parasitic Infection E Soulsby.2012-12-02 Pathophysiology of Parasitic Infection covers the proceedings of the Seventh International Conference of the World Association for the Advancement of Veterinary Parasitology, held in Thessaloniki, Greece, on July 14-16, 1975. The book summarizes the developments in pathophysiology of parasitism. It includes experiments on parasitic infections and the widespread occurrences of diseases in domestic animals caused by helminths, protozoa, and arthropods. Divided into 21 chapters, the book initially examines the mechanisms of pathogenicity from the structural and physiological processes that may be expressed as the pathophysiology of parasitic infections. The subsequent chapters discuss the plasma protein kinetics; the hematological indices associated with parasitic infections; the mechanisms of the swine trichuriasis disease; and the response of sheep and rabbit to infection with *Fasciola hepatica*. The book also presents evidence on establishing a predictable population of parasites based from the ratio of mature to immature worms and the ratio of mucosal to lumen dwelling stages. A chapter focuses on the effects of nematode infection on the lymphatic system and on blood vessels. Considerable chapters are devoted to body defense against parasitic infection, including immunoglobulin E-like antibodies, vasoactive amines and peptides, and immunoglobulin M. The book further deals with the hematological aspects and treatment of trypanosomiasis. It also tackles the effects of fever as a pathophysiological factor in the course and pathogenesis of East Coast fever caused by *Theileria parva*. The concluding chapters deal with immune response to parasitic infection, including the effects of anticomplementary substances, macrophage, and lymphocytes. Veterinary parasitologists, parasitic infection researchers, immunologists, teachers, and students with courses related to parasitic infection will find this book invaluable.
