Countering online hate speech Gagliardone, Iginio, Gal, Danit, Alves, Thiago, Martinez, Gabriela. 2015-06-17 The opportunities afforded by the Internet greatly overshadow the challenges. While not forgetting this, we can nevertheless still address some of the problems that arise. Hate speech online is one such problem. But what exactly is hate speech online, and how can we deal with it effectively? As with freedom of expression, on- or offline, UNESCO defends the position that the free flow of information should always be the norm. Counter-speech is generally preferable to suppression of speech. And any response that limits speech needs to be very carefully weighed to ensure that this remains wholly exceptional, and that legitimate robust debate is not curtailed.

Experimental IR Meets Multilinguality, Multimodality, and Interaction Avi Arampatzis, Evangelos Kanoulas, Theodora Tsirikika, Stefanos Vrochidis, Hideo Joho, Christina Lioma, Carsten Eickhoff, Aurélie Névéal, Linda Cappellato, Nicola Ferro. 2020-08-28 This book constitutes the refereed proceedings of the 11th International Conference of the CLEF Association, CLEF 2020, held in Thessaloniki, Greece, in September 2020.* The conference has a clear focus on experimental information retrieval with special attention to the challenges of multimodality, multilinguality, and interactive search ranging from unstructured to semi-structures and structured data. The 5 full papers and 2 short papers presented in this volume were carefully reviewed and selected from 9 submissions. This year, the contributions addressed the following challenges: a large-scale evaluation of translation effects in academic search, advancement of assessor-driven aggregation methods for efficient relevance assessments, and development of a new test dataset. In addition to this, the volume presents 7 “best of the labs” papers which were reviewed as full paper submissions with the same review criteria. The 12 lab overview papers were accepted out of 15 submissions and represent scientific challenges based on new data sets and real world problems in multimodal and multilingual information access. * The conference was held virtually due to the COVID-19 pandemic.

Translingual Practices and Neoliberal Policies Suresh Canagarajah. 2016-07-28 This book responds to recent criticisms that the research and theorization of multilingualism on the part of applied linguists are in collusion with neoliberal policies and economic interests. While acknowledging that neoliberal agencies can appropriate diverse languages and language practices, including resources and dispositions theorized by scholars of multilingualism, it argues that a distinction must be made between the different language ideologies informing communicative practices. Those of neoliberal agencies are motivated by distinct ideological orientations that diverge from the theorization of multilingual practices by critical applied linguists. In addressing this issue, the book draws on the author’s empirical research on skilled migration to demonstrate how sub-Saharan African professionals in English-dominant workplaces in the UK, USA, Australia, and South Africa resist the neoliberal communicative expectations and employ alternate practices informed by critical dispositions. These practices have the potential to transform neoliberal orientations on material development. The book labels the latter as informed by a postcolonial language ideology, to distinguish them from those of neoliberalism. While neoliberal agencies approach languages as being instrumental for profit-making purposes, the author’s informants focus on the synergy between languages to generate new meanings and norms, which are strategically negotiated in pursuit of ethical interests, inclusive interactions, and holistic ecological development. As such, the book clearly illustrates that the way critical scholars and multilinguals relate to language diversity is different from the way neoliberal policies and agencies use multilingualism for their own purposes.

Natural Language Processing with Python Steven Bird, Ewan Klein, Edward Loper. 2009-06-12 This book offers a highly accessible introduction to natural language processing, the field that supports a variety of language technologies, from predictive text and email filtering to automatic summarization and translation. With it, you'll learn how to write Python programs that work with large collections of unstructured text. You'll access richly annotated datasets using a comprehensive range of linguistic data structures, and you'll understand the main algorithms for analyzing the content and structure of written communication. Packed with examples and exercises, *Natural Language Processing with Python* will help you: Extract information from unstructured text, either to guess the topic or identify named entities Analyze linguistic structure in text, including parsing and semantic analysis Access popular linguistic databases, including WordNet and treebanks Integrate techniques drawn from fields as diverse as linguistics and artificial intelligence This book will help you gain practical skills in natural language processing using the Python programming language and the Natural Language Toolkit (NLTK) open source library. If you're interested in developing web applications, analyzing multilingual news sources, or documenting endangered languages -- or if you're simply curious to have a programmer's perspective on how human language works -- you'll find *Natural Language Processing with Python* both fascinating and immensely useful.

Multilingual Information Retrieval Carol Peters, Martin Braschler, Paul Clough. 2012-01-05 We are living in a multilingual world and the diversity in languages which are used to interact with information access systems has generated a wide variety of challenges to be addressed by computer and information scientists. The growing amount of non-English information accessible globally and the increased worldwide exposure of enterprises also necessitates the adaptation of Information Retrieval (IR) methods to new, multilingual settings. Peters, Braschler and Clough present a comprehensive description of the technologies involved in designing and developing systems for Multilingual Information Retrieval (MLIR). They provide readers with broad coverage of the various issues involved in creating systems to make accessible digitally stored materials regardless of the language(s) they are written in. Details on Cross-Language Information Retrieval (CLIR) are also covered that help readers to understand how to develop retrieval systems that cross language boundaries. Their work is divided into six chapters and accompanies the reader step-by-step through the various stages involved in building, using and evaluating MLIR systems. The book concludes with some examples of recent applications that utilise MLIR technologies. Some of the techniques described have recently started to appear in commercial search systems, while others have the potential to be part of future incarnations. The book is intended for graduate students, scholars, and practitioners with a basic understanding of classical text retrieval methods. It offers guidelines and information on all aspects that need to be taken into consideration when building MLIR systems, while avoiding too many ‘hands-on details’ that could rapidly become obsolete. Thus it bridges the gap between the material covered by most of the classical IR textbooks and the novel requirements related to the acquisition and dissemination of information in whatever language it is stored.

One People, One Blood Don Seeman. 2009-08-11 Little by little, an egg will come to walk upon its own leg. Ethiopian-Israelis fondly quote this bit of Amharic folk wisdom, reflecting upon the slow, difficult history that allowed them to fulfill their destiny far from the Horn of Africa where they were born. But today, along with those Ethiopians who have been recognized as Jews by the State of Israel, many who are called Feres Mura, the descendants of Ethiopian Jews whose families converted to Christianity but have now reasserted their Jewish identity, still await full acceptance in Israel. Since the 1990s, they have sought homecoming through Israel's Law of Return, but have been met with reticence and suspicion on a variety of fronts. *One People, One Blood* expertly documents this tenuous relationship and the challenges facing the Feres Mura. Distilling more than ten years of ethnographic research, Don Seeman depicts the rich culture of the group, as well as their social and cultural vulnerability, and addresses the problems that arise when immigration officials, religious leaders, or academic scholars try to determine the legitimacy of Jewish identity or Jewish religious experience.

Translation and Relevance Ernst-August Gutt.2014-07-16 From the outset, this book has evoked strong responses. Its central claim is that given a comprehensive theory of inferential communication, there is no need for a special theory of translation. This has been praised by some as wise and right (Dell Hymes) and condemned by others as astonishing, not to say perverse (Kirsten Malmkjaer). Gutt's call to move from semiotics to an inferential paradigm of communication remains a challenge for many. The debate continues and so does the demand for the book, resulting in this second edition. There is a 'Postscript' entitled 'A decade later', where the author addresses peer criticism, especially from those involved in the movement of 'translation studies', and attempts to bring out more clearly the unique mandate of translation. New perspectives, such as authenticity, are also introduced. Marginal notes, some tongue-in-cheek, liven up the discussion and new references ensure its currency.

Famine and Foreigners: Ethiopia Since Live Aid Peter Gill.2010-07-08 The terrible 1984 famine in Ethiopia focused the world's attention on the country and the issue of aid as never before. Anyone over the age of 30 remembers something of the events - if not the original TV pictures, then Band Aid and Live Aid, Geldof and Bono. Peter Gill was the first journalist to reach the epicentre of the famine and one of the TV reporters who brought the tragedy to light. This book is the story of what happened to Ethiopia in the 25 years following Live Aid: the place, the people, the westerners who have tried to help, and the wider multinational aid business that has come into being. We saved countless lives in the beginning and continued to save them now, but have we done much else to transform the lives of Ethiopia's poor and set them on a 'development' course that will enable the country to do without us?

Recognizing Textual Entailment Ido Dagan,Dan Roth,Fabio Zanzotto,Mark Sammons.2022-06-01 In the last few years, a number of NLP researchers have developed and participated in the task of Recognizing Textual Entailment (RTE). This task encapsulates Natural Language Understanding capabilities within a very simple interface: recognizing when the meaning of a text snippet is contained in the meaning of a second piece of text. This simple abstraction of an exceedingly complex problem has broad appeal partly because it can be conceived also as a component in other NLP applications, from Machine Translation to Semantic Search to Information Extraction. It also avoids commitment to any specific meaning representation and reasoning framework, broadening its appeal within the research community. This level of abstraction also facilitates evaluation, a crucial component of any technological advancement program. This book explains the RTE task formulation adopted by the NLP research community, and gives a clear overview of research in this area. It draws out commonalities in this research, detailing the intuitions behind dominant approaches and their theoretical underpinnings. This book has been written with a wide audience in mind, but is intended to inform all readers about the state of the art in this fascinating field, to give a clear understanding of the principles underlying RTE research to date, and to highlight the short- and long-term research goals that will advance this technology.

Challenges for Arabic Machine Translation Abdelhadi Soudi,Ali Farghaly,Günter Neumann,Rabih Zbib.2012-08-01 This book is the first volume that focuses on the specific challenges of machine translation with Arabic either as source or target language. It nicely fills a gap in the literature by covering approaches that belong to the three major paradigms of machine translation: Example-based, statistical and knowledge-based. It provides broad but rigorous coverage of the methods for incorporating linguistic knowledge into empirical MT. The book brings together original and extended contributions from a group of distinguished researchers from both academia and industry. It is a welcome and much-needed repository of important aspects in Arabic Machine Translation such as morphological analysis and syntactic reordering, both central to reducing the distance between Arabic and other languages. Most of the proposed techniques are also applicable to machine translation of Semitic languages other than Arabic, as well as translation of other languages with a complex morphology.

Ecology of Language Acquisition J.H. Leather,Jet van Dam.2013-03-09 This volume emphasizes the emergence of linguistic development through children's and learners' interactions with their environment - spatial, social, cultural, educational - bringing to light commonalities between primary language development, child and adult second-language learning, and language acquisition by robots. The studies presented here challenge a number of dominant ideas in language acquisition theory. It is of interest to language acquisition researchers and professionals.

Homo Deus Yuval Noah Harari.2017-02-21 Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? *Homo Deus* explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is *Homo Deus*. With the same insight and clarity that made *Sapiens* an international hit and a New York Times bestseller, Harari maps out our future.

An Introduction to the Languages of the World Anatole Lyovin,Brett Kessler,William Ronald Leben.2017 Unique in scope, *An Introduction to the Languages of the World* introduces linguistics students to the variety of world's languages. Students will gain familiarity with concepts such as sound change, lexical borrowing, diglossia, and language diffusion, and the rich variety of linguistic structure in word order, morphological types, grammatical relations, gender, inflection, and derivation. It offers the opportunity to explore structures of varying and fascinating languages even with no prior acquaintance. A chapter is devoted to each of the world's continents, with in-depth analyses of representative languages of Europe, Asia, Africa, Oceania, and America, and separate chapters cover writing systems and pidgins and creoles. Each chapter contains exercises and recommendations for further reading. New to this edition are eleven original maps as well as sections on sign languages and language death and revitalization. For greater readability, basic language facts are now organized in tables, and language samples follow international standards for phonetic transcription and word-by-word glossing. There is an instructor's manual available for registered instructors on the book's companion website.

The Greatest Salesman in the World Og Mandino.2011-01-05 The runaway bestseller with more than four million copies in print! You too can change your life with the priceless wisdom of ten ancient scrolls handed down for thousands of years. "Every sales manager should read The Greatest Salesman in the World. It is a book to keep at the bedside, or on the living room table—a book to dip into as needed, to browse in now and then, to enjoy in small stimulating portions. It is a book for the hours and for the years, a book to turn to over and over again, as to a friend, a book of moral, spiritual and ethical guidance, an unfailing source of comfort and inspiration."—Lester J. Bradshaw, Jr., Former Dean, Dale Carnegie Institute of Effective Speaking & Human Relations "I have read almost every book that has ever been written on salesmanship, but I think Og Mandino has captured all of them in The Greatest Salesman in the World. No one who follows these principles will ever fail as a salesman, and no one will ever be truly great without them; but, the author has done more than present the principles—he has woven them into the fabric of one of the most fascinating stories I have ever read."—Paul J. Meyer, President of Success Motivation Institute, Inc. "I was overwhelmed by The Greatest Salesman in the World. It is, without doubt, the greatest and the most touching story I have ever read. It is so good that there are two musts that I would attach to it: First, you must not lay it down until you have finished it; and secondly, every individual who sells anything, and that includes us all, must read it."—Robert B. Hensley, President, Life Insurance Co. of Kentucky

Apache Solr Dikshant Shahi.2015-12-26 Build an enterprise search engine using Apache Solr: index and search documents; ingest data from varied sources; apply various text processing techniques; utilize different search capabilities; and customize Solr to retrieve the desired results. Apache Solr: A Practical Approach to Enterprise Search explains each essential concept-backed by practical and industry examples--to help you attain expert-level knowledge. The book, which assumes a basic knowledge of Java, starts with an introduction to Solr, followed by steps to setting it up, indexing your first set of documents, and searching them. It then introduces you to information retrieval and its implementation in Apache Solr; this will help you understand your search problem, decide the approach to build an effective solution, and use various metrics to evaluate the results. The book next covers the schema design and techniques to build a text analysis chain for cleansing, normalizing and enriching your documents and addressing different types of search queries. It describes various popular matching techniques which are generally applied to improve the precision and recall of searches. You will learn the end-to-end process of data ingestion from varied sources, metadata extraction, pre-processing and transformation of content, various search components, query parsers and other advanced search capabilities. After covering out-of-the-box features, Solr expert Dikshant Shahi dives into ways you can customize Solr for your business and its specific requirements, along with ways to plug in your own components. Most important, you will learn about implementations for Solr scoring, factors affecting the document score, and tuning the score for the application at hand. The book explains why textual scoring is not sufficient for practical ranking of documents and ways to integrate real-world factors for contributing to the document ranking. You'll see how to influence user experience by providing suggestions and recommendations. You'll also see integration of Solr with important related technologies such as OpenNLP and Tika. Additionally, you will learn about scaling Solr using SolrCloud. This book concludes with coverage of semantic search capabilities, which is crucial for taking the search experience to the next level. By the end of Apache Solr, you will be proficient in designing and developing your search engine.

Start-up Nation Dan Senor,Saul Singer.2011-09-07 What the world can learn from Israel's meteoric economic success. Start-Up Nation addresses the trillion dollar question: How is it that Israel -- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality-- all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to re-create the Israel effect, there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.

Writing and Learning in Cross-national Perspective David Foster.2017-10-03 Despite the increasingly global implications of conversations about writing and learning, U.S. composition studies has devoted little attention to cross-national perspectives on student writing and its roles in wider cultural contexts. Caught up in our own concerns about how U.S. students make the transition as writers from secondary school to postsecondary education, we often overlook the fact that students around the world are undergoing the same evolution. How do the students in China, England, France, Germany, Kenya, or South Africa--the educational systems represented in this collection--write their way into the communities of their chosen disciplines? How, for instance, do students whose mother tongue is not the language of instruction cope with the demands of academic and discipline-specific writing? And in what ways is U.S. students' development as academic writers similar to or different from that of students in other countries? With this collection, editors David Foster and David R. Russell broaden the discussion about the role of writing in various educational systems and cultures. Students' development as academic writers raises issues of student authorship and agency, as well as larger issues of educational access, institutional power relations, system goals, and students' roles in society. The contributors to this collection discuss selected writing purposes and forms characteristic of a specific national education system, describe students' agency as writers, and identify contextual factors--social, economic, linguistic, cultural--that shape institutional responses to writing development. In discussions that bookend these studies of different educational structures, the editors compare U.S. postsecondary writing practices and pedagogies with those in other national systems, and suggest new perspectives for cross-national study of learning/writing issues important to all educational systems. Given the worldwide increase in students entering higher education and the endless need for effective writing across disciplines and nations, the insights offered here and the call for further studies are especially welcome and timely.

The Ancient Egyptian Pyramid Texts James P. Allen.2007-08-30 The Pyramid Texts are the oldest body of extant literature from ancient Egypt. First carved on the walls of the burial chambers in the pyramids of kings and queens of the Old Kingdom, they provide the earliest comprehensive view of the way in which the ancient Egyptians understood the structure of the universe, the role of the gods, and the fate of human beings after death. Their importance lies in their antiquity and in their endurance throughout the entire intellectual history of ancient Egypt. This volume contains the complete translation of the Pyramid Texts, including new texts

recently discovered and published. It incorporates full restorations and readings indicated by post-Old Kingdom copies of the texts and is the first translation that presents the texts in the order in which they were meant to be read in each of the original sources.

Arabic Sociolinguistics Reem Bassiouney.2020-04-01 In this second edition of Arabic Sociolinguistics, Reem Bassiouney expands the discussion of major theoretical approaches since the publication of the book's first edition to account for new sociolinguistic theories in Arabic contexts with up-to-date examples, data, and approaches. The second edition features revised sections on diglossia, code-switching, gender discourse, language variation, and language policy in the region while adding a chapter on critical sociolinguistics—a new framework for critiquing the scholarly practices of sociolinguistics. Bassiouney also examines the impact of politics and new media on Arabic language. Arabic Sociolinguistics continues to be a uniquely valuable resource for understanding the theoretical framework of the language.

Learning to Listen, Learning to Teach Jane Vella.2008-03-11 In this updated version of her landmark book Learning to Listen, Learning to Teach, celebrated adult educator Jane Vella revisits her twelve principles of dialogue education with a new theoretical perspective gleaned from the discipline of quantum physics. Vella sees the path to learning as a holistic, integrated, spiritual, and energetic process. She uses engaging, personal stories of her work in a variety of adult learning settings, in different countries and with different educational purposes, to show readers how to utilize the twelve principles in their own practice with any type of adult learner, anywhere.

The Cambridge Handbook of Phonetics Rachael-Anne Knight,Jane Setter.2021-12-02 Phonetics - the study and classification of speech sounds - is a major sub-discipline of linguistics. Bringing together a team of internationally renowned phoneticians, this handbook provides comprehensive coverage of the most recent, cutting-edge work in the field, and focuses on the most widely-debated contemporary issues. Chapters are divided into five thematic areas: segmental production, prosodic production, measuring speech, audition and perception, and applications of phonetics. Each chapter presents an historical overview of the area, along with critical issues, current research and advice on the best practice for teaching phonetics to undergraduates. It brings together global perspectives, and includes examples from a wide range of languages, allowing readers to extend their knowledge beyond English. By providing both state-of-the-art research information, and an appreciation of how it can be shared with students, this handbook is essential both for academic phoneticians, and anyone with an interest in this exciting, rapidly developing field.

Long Walk to Freedom Nelson Mandela.2008-03-11 The book that inspired the major new motion picture Mandela: Long Walk to Freedom. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's antiapartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. LONG WALK TO FREEDOM is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph.
