A-Z of Herbal Remedies Emeritus Professor of Prenatal Medicine and Child Health Peter Dunn, (Wr,Peter Dunn.2015-07-06 This book will provide you with herbal remedies that have been used successfully for generations to treat numerous common ailments. Remedies for 170 Health problems How to prepare Herbal Infusions and Decoctions Home and Holiday First-Aid The ailments are listed alphabetically; this book investigates each of the ailments and their causes, describes symptoms and provides herbal treatments that are cheap, safe and effective. There is a rich age-old tradition of healing human ailments with wild plants, a tradition that has not died over thousands of years. The uses of healing plants have not varied, though today, with increasing knowledge of the origins of disease and of the pharmacology of plants, their uses have become better defined and understood. Herbs are a natural medicine, part of our inheritance. An interest in plants may begin in childhood when we learn quickly to distinguish garden plants from weeds and may return from a walk in the country clutching a handful of wild flowers. Enlightened education may open our eyes to the profound wonder of plant life, and if we are more fortunate we may incorporate in this wonder an understanding of the medicinal uses of plants. We should make a study of plant remedies, although it must be said that the use of herbs is a skill and an art, and the most successful herbalist, in addition to studying intensively, must surely have some inherited gift of healing. Plants draw sustenance from the soil and manufacture chlorophyll from sunlight. They contain many constituents: essential oils which give the plant its perfume and have medicinal properties (i.e., to aid digestion, to stimulate the nervous system, or if used as liniments, to increase the flow of blood to a given area); tannins, which have an astringent action on the mucosa; glycosides, some of which are anti-inflammatory, while some have -a regulating influence on heart action; mucilage's, which are used to soothe irritation and inflammation in the digestive tract; bitter principles which stimulate the secretion of digestive juices and improve the appetite. Numerous other constituents include resins, gums, minerals (notably sodium, potassium and silica), acids, vitamins and hormone precursors.

Soap Making for Beginners Jessica Jacobs.2014-10-12 DISCOVER.: Soap Making for Beginners: Proven Secrets to Making All Natural Homemade Soaps that Will Rejuvenate, Refresh and Revitalize Your Skin What makes this book different from other books available on this topic? This book has a number of things that make it stand out from the crowd. Here are a few of the highlights: 1. Key Takeaways: This section allows you to briefly go back and summarize what this book is about at anytime -- you don't have to re-read the entire book again. 2. Resources List: This well researched list provides you with a number of further references and ideas if you'd like to continue looking into this subject. 3. High-quality information and a professionally edited book Why Would You Want to Make Your Own Soap? Most soap available in stores today are not really soaps at all, but, they are detergents. Detergents are a petroleum based product, like gasoline and kerosene. Detergents tend to leave your skin feeling dry, itchy and tight. Alkali, the most common irritant in soap, is commonly blamed for this effect. Other ingredients in mass-marketed soap have been proven harmful to human health and can cause severe skin irritations in many people. These include ingredients such as DEA, Isopropyl Alcohol, BHT and Triclosan. The most common ingredient in conventional bar soaps is sodium tallowate. Some very famous brands of soaps use chemicals which are of an inferior quality and could prove harmful for a person's skin. Here's a look at some of the benefits and reasons for using handmade, chemical free soaps: *Handmade Soaps are generally made using cold process method which lets the ingredients take their own time to interact with each other in as natural way as possible. *Handmade Soap has a major advantage in that glycerine is not removed from the soap and therefore has a powerful moisturizing effect. *Glycerin soap is especially good for sensitive, delicate skin and for children. *Because it is a high quality by-product in the soap making process, a number of commercial soap manufacturers extract the glycerin and sell it as a by-product to be used in high priced beauty products e.g. lotions and skin creams. *Unlike conventional soap, homemade soap may even contain healing properties due to the lack of chemicals in the ingredients. *People who suffer from skin conditions such as psoriasis and eczema can find relief by switching to an all-natural and chemical free handmade soap. Soap Making for Beginners contains a number of quick and easy recipes including: *Tea Tree Oil Soap *Shea Butter Marvel Soap *Soothing Ginger Soap *Banana Cream Smoothie Soap *Deluxe Olive Castile Soap *Goats Milk and Lavender Soap *Oat and Honey Soap *And much, much more! The commission of the European Communities' Directorate General (XII) for Science, Research and Development is currently implementing, on a cost-sharing basis, a solar energy R+D program through contracts with European industry, research institutions and universities. This program includes a very strong activity on Biomass. Besides general R+D work on all aspects of Biomass growth and utilization which is reported elsewhere in this series, the Commission is currently starting a new activity on Pilot Plants based on the use of Biomass for energy purposes, and in particular on methanol production from wood. The commission considers that the subject of methanol production from wood offers important prospects for application within the European Community and in other parts of the world, in particular some of the developing countries & The state of art in Europe in this field is still considered to be very high as a result of related work which was performed in Europe during ~world War II and the time before.
