Non-Soil Fumigation: A Pesticide Applicator Study Guide
.2023-08-10 This study manual will prepare individuals for the

Department of Pesticide Regulation's (DPR's) commercial applicator Non-Soil Fumigation category (Category M) examination. Fumigants are a type of pesticide with unique physical and chemical characteristics. Fumigants are gases, or turn into gases, after application. Fumigants may be odorless and usually cannot be seen. DPR's Non-Soil Fumigation category is intended for individuals who perform pest control using a pesticide labeled as a fumigant. This category does not include structural pest control required to be licensed under Chapter 14 (commencing with Section 8500) of Division 3 of the Business and Professions Code. This study manual covers important aspects of pesticides used for non-soil fumigations. However, the study manual is not a substitute for reading and understanding the label of the specific fumigant product you will be using.

Thoroughly read the label prior to purchase and application. Each chapter ends with review questions. After reading each chapter, test your understanding of the information presented in the chapter by answering the review questions. The review questions are similar to those that will be on the exam.
