Internationalization in Mexican Higher Education Laura Patricia Cruz Ruiz.2016 In the era of globalization since the 1990s, international cooperation has become one of the most challenging topics of debate and research in higher education. This book attempts to provide scientific evidence on the debates and different types of internationalization found in higher education from a Mexican point of view. It identifies German and Mexican partnership collaborations in institutions of higher education as well as the experiences of German and Mexican university personnel involved in educational projects. The findings are based on qualitative research using documentary evidence, semi-structured expert interviews and qualitative content analysis. The study encompasses three levels. At the macro level, internationalization of higher education is discussed in a general way but with a focus on the Mexican situation, presenting a typology of prevailing types of internationalization. The meso level includes a secondary analysis of official data on the bilateral relations between German and Mexican institutions of higher education. The micro level presents a case study of two particular university collaborations using the experiences of those involved in both countries. Laura Patricia Cruz Ruiz (born 1972 in Chiapas, Mexico) studied in the field of education at the Business and Pedagogical Development University (UNIVDEP) in Mexico City, where she received her Master Degree (M.A.) in 2008. She has worked at the Mexican Secretariat of Health and Education as well as in the National Council of Science and

Technology (CONACyT), from which, in 2010, she obtained a scholarship for her doctoral studies in Germany. She held a German-Mexican scholarship for international capacity building in Germany from 2005-2006. In 2015, she completed her doctoral degree (Dr. phil.) at the Faculty for Philosophy and Educational Research in the field of Comparative Education at Ruhr University Bochum in Germany.

Historical Dictionary of Mesoamerica Walter Robert Thurmond Witschey, Clifford T. Brown. 2012 Mesoamerica is one of six major areas of the world where humans independently changed their culture from a nomadic hunter-gatherer lifestyle into settled communities, cities, and civilization. In addition to China (twice), the Indus Valley, the Fertile Crescent of southwest Asia, Egypt, and Peru, Mesoamerica was home to exciting and irreversible changes in human culture called the Neolithic Revolution. The changes included domestication of plants and animals, leading to agriculture, husbandry, and eventually sedentary village life. These developments set the stage for the growth of cities, social stratification, craft specialization, warfare, writing, mathematics, and astronomy, or what we call the rise of civilization. These changes forever transformed humankind. The *Historical Dictionary of Mesoamerica* covers the history of Mesoamerica through a chronology, an introductory essay, an extensive bibliography, and over 900 cross-referenced dictionary entries covering the major peoples, places, ideas, and events related to Mesoamerica. This book is an excellent access point for students, researchers, and anyone wanting to know more about Mesoamerica.

Mexico - Traveler's Companion Maribeth Mellin.1998-06 Provides the best information and guidance for exploring the country of Mexico.

Diversification of Mexican Spanish Margarita Hidalgo.2016-10-24 This book offers a diversification model of transplanted languages that facilitates the exploration of external factors and internal changes. The general context is the New World and the variety that unfolded in the Central Highlands and the Gulf of Mexico, herein identified as Mexican Colonial Spanish (MCS). Linguistic corpora provide the evidence of (re)transmission, diffusion, metalinguistic awareness, and select focused variants. The tridimensional approach highlights language data from authentic colonial documents which are connected to socio-historical reliefs at particular periods or junctions, which explain language variation and the dynamic outcome leading to change. From the Second Letter of Hernán Cortés (Seville 1522) to the decades preceding Mexican Independence (1800-1821) this book examines the variants transplanted from the peninsular tree into Mesoamerican lands: leveling of sibilants of late medieval Spanish, direct object (masc. sing.) pronouns LO and LE, pronouns of address (vos, tu, vuestra merced plus plurals), imperfect subjunctive endings in -SE and -RA), and Amerindian loans. Qualitative and quantitative analyses of variants derived from the peninsular tree show a gradual process of attrition and recovery due to their saliency in the new soil, where they were identified with ways of speaking and behaving like Spanish speakers from the metropolis. The variants analyzed in MCS may appear in other regions of the Spanish-speaking New World, where change may have proceeded at varying or similar rates. Additional variants are classified as optimal residual (e.g. dizque) and popular residual (e.g. vide). Both types are derived from the medieval peninsular tree, but the former are vital across regions and social strata while the latter may be restricted to isolated and / or marginal speech communities. Each of the ten chapters probes into the pertinent variants of MCS and the stage of development by century. Qualitative and quantitative analyses reveal the trails followed by each select variant from the years of the Second Letter (1520-1522) of Hernán Cortés to the end of the colonial period. The tridimensional historical sociolinguistic model offers explanations that shed light on the multiple causes of change and the outcome that eventually differentiated peninsular Spanish tree from New World Spanish. Focused-attrition variants were selected because in the process of transplantation, speakers assigned them a social meaning that eventually differentiated the European from the Latin American variety. The core chapters include narratives of both major historical events (e.g. the conquest of Mexico) and tales related to major language change and identity change (e.g. the socio-political and cultural struggles of Spanish speakers born in the New World). The core chapters also describe the strategies used by prevailing Spanish speakers to gain new speakers among the indigenous and Afro-Hispanic populations such as the appropriation of public posts where the need arose to file documents in both Spanish and Nahuatl, forced and free labor in agriculture, construction, and the textile industry. The examples of optimal and popular residual variants illustrate the trends unfolded during three centuries of colonial life. Many of them have passed the test of time and have survived in the present Mexican territory; others are also vital in the U.S. Southwestern states that once belonged to Mexico. The reader may also identify those that are used beyond the area of Mexican influence. Residual variants of New World Spanish not only corroborate the homogeneity of Spanish in the colonies of the Western Hemisphere but the speech patterns that were unwrapped by the speakers since the beginning of colonial times: popular and cultured Spanish point to diglossia in monolingual and multilingual communities. After one hundred years of study in linguistics, this book contributes to the advancement of newer conceptualization of diachrony, which is concerned with the development and evolution through history. The additional sociolinguistic dimension offers views of social significant and its thrilling links to social movements that provoked a radical change of identity. The amplitude of the diversification model is convenient to test it in varied contexts where transplantation occurred.

City Indians in Spains American Empire Dana Velasco Murillo, Mark Lentz, Margarita R Ochoa. 2013-11-01 This volume, the first of its genre in English, brings together the pioneering work of scholars of urban Indians of colonial Latin America. An important, but understudied segment of colonial society, urban Indians composed a majority of the population of Spanish America's most important cities. The geographic range, chronological scope, and thematic content of urban native studies is addressed by examining such topics as the role of natives in settling frontier regions, interethnic relations, notaries and chroniclers, and the continuation of indigenous governance. In spanning the entirety of the colonial period, the persistence and the creation of urban Indian identities and their contributions to colonial society is brought to the fore. Scholarly contributions include chapters by Susan Schroeder, Whither Tenochtitlan? Chimalpahin and Mexico City, 1593-1631 and David Cahill, Urban Mosaic: Indigenous Ethnicities in Colonial Cuzco. The volume opens with commentary by John K Chance, pioneer scholar of urban Indians in Latin America and author of the highly praised Race and Class in Colonial Oaxaca and is summed up in Concluding Remarks by Kevin Terraciano, author of the widely acclaimed The Mixtecs of Colonial Oaxaca: Nudzahui History. The diverse themes, time periods, and geographic regions discussed herein make this illustrated book essential reading for all those engaged in colonial and indigenous studies.

Architectural Rhetoric and the Iconography of Authority in Colonial Mexico C. Cody Barteet. 2019-06-11 This book investigates the Casa de Montejo and considers the role of the building's Plateresque façade as a form of visual rhetoric that conveyed ideas about the individual and communal cultural identities in sixteenth-century Yucatán. C. Cody Barteet analyzes the façade within the complex colonial world in which it belongs, including in multicultural Yucatán and the transatlantic world. This contextualization allows for an examination of the architectural rhetoric of the façade, the design of which visualizes the contestations of autonomy and authority occurring among the colonial peoples.
