The Politics of Accounting Regulation Sebastian Botzem. 2012-01-01 'How and why do transnational regulatory bodies emerge? How do they acquire the authority and confidence to be actors in their own right? These questions preoccupy scholars in many disciplines and Sebastian Botzem's *The Politics of Accounting Regulation* makes an important contribution to the debates. Focusing on the case of the International Accounting Standards Board over a critical period of its development including the financial crisis Botzem addresses its evolution as an organization which produces accounting standards and whose efforts to be outside politics are inevitably and irredeemably political in nature. This book is essential reading for sociologists, political scientists, accountants and anyone else interested in the organization of global governance.' Michael Power, London School of Economics, UK The financial crisis underlines the relevance of accounting standards as much more than instrumental rules for corporate reporting. This important book outlines the accounting standards that embody societal and professional values and contribute to the distribution of financial benefits that put international harmonization of standards into the limelight. Sebastian Botzem reveals that international standards have emerged after decades of contest and political bargaining which resulted in closely aligned standards, voluntary consultation procedures and a network

structure comprising actors mainly stemming from global auditing firms, regulators and international organizations.

Verrocchio John K. Delaney,Charles Dempsey,Gretchen A. Hirschauer,Alison Luchs,Lorenza Melli,Dylan Smith,Elizabeth Walmsley.2021-09-28 A comprehensive survey of the work of this most influential Florentine artist and teacher Andrea del Verrocchio (c. 1435-1488) was one of the most versatile and inventive artists of the Italian Renaissance. He created art across media, from his spectacular sculptures and paintings to his work in goldsmithing, architecture, and engineering. His expressive, confident drawings provide a key point of contact between sculpture and painting. He led a vibrant workshop where he taught young artists who later became some of the greatest painters of the period, including Leonardo da Vinci, Sandro Botticelli, Lorenzo di Credi, and Domenico Ghirlandaio. This beautifully illustrated book presents a comprehensive survey of Verrocchio's art, spanning his entire career and featuring some fifty sculptures, paintings, and drawings, in addition to works he created with his students. Through incisive scholarly essays, in-depth catalog entries, and breathtaking illustrations, this volume draws on the latest research in art history to show why Verrocchio was one of the most innovative and influential of all Florentine artists. My Struggle for Freedom Hans Küng.2005-01-01 Hans Küng is undoubtedly one of the most

important theologians of our time, but he has always been a controversial figure, and as the result of a much-publicized clash over papal infallibility had his permission to teach revoked by the Vatican. Yet at seventy-five he is also something like a senior statesman, one of the 'Group of Eminent Persons' convened by the UN Secretary-General Kofi Annan, and a friend of heads of government like Tony Blair and President Mubarak of Egypt. In this fascinating autobiography he gives a frank and outspoken account of the first four decades of his life. He tells of his youth in Switzerland and his decision to become a priest; his doubts and struggles as he studied in Rome and Paris, and his experiences as a professor in Tübingen, where he received a chair at the amazingly early age of thirty-one. Most importantly, as one of the last surviving eye-witnesses he gives an authentic account of the struggles behind the scenes at the Second Vatican Council, in which he took part as a theological expert. Here it becomes clear just how major an influence he was, to the point of shaping the Council's agenda and drafting speeches for bishops to deliver in plenary sessions. With its rich thought and vivid narrative, Küng's book paints a moving picture of his personal convictions, and his struggle for a Christianity characterized not by the domination of an official church but by Jesus.

Crusading Peace Tomaz Mastnak.2002-02-19 Tomaz Mastnak's provocative analysis of the roots of peacemaking in the Western world elucidates struggles for peace that took place in the high and late Middle Ages. Mastnak traces the ways that eleventh-century peace movements, seeking to end violence among Christians, shaped not only power structures within Christendom but also the relationship of the Western Christian world to the world outside. The unification of Christian society under the banner of holy peace precipitated a fundamental division between the Christian and non-Christian worlds, and the postulated peace among Christians led to holy war against non-Christians.

On the Animal Trail Baptiste Morizot.2021-06-11 From the forests of Yellowstone to the steppes of the Haut-Var, the French philosopher and environmentalist Baptiste Morizot invites us to develop a different relationship to nature: to become detectives of nature and to follow the footprints of the many wonderful and extraordinary animals with which we share the Earth. By deciphering and interpreting an animal's footprints and other signs, we gradually discover not only which animal it is, but the animal's motives too. Through this kind of 'philosophical tracking', we come to see the world from the animal's point of view, to learn to live in this world from the perspective of another species. We begin to let go of our anthropocentric point of view and to recapture the kind of perspective that our ancestors once had when they had no choice but to adopt an animal point of view if they wanted to survive. In short, by following animal trails, we learn how to pay increased attention to the living world around us and how to cohabit this world with others, thereby enriching our understanding of

other species, of the world we share with them and of ourselves.

Challenging De Gaulle Alexandr Harrison.1989-02-03 This unique volume tells the story of the Algerian counterrevolution from the viewpoint of the ordinary foot soldier in the O.A.S. (Organisation Armee Secrete). In a series of interviews with former O.A.S. participants, and using many unpublished documents and personal diaries, Harrison examines the motives of these defenders of French Algeria. Were they criminals, sociopaths, or honorable men more sensitive to their country's fate than were many of their contemporaries? Harrison poses this question in the book's introduction and then seeks the answer with an objective eye. Challenging De Gaulle tells the story of the Algerian counterrevolution from the viewpoint of the ordinary foot soldier in the O.A.S. (Organisation Armee Secrete). In a series of interviews with former O.A.S. participants, and using many unpublished documents and personal diaries, Alexander Harrison examines the motives of these defenders of French Algeria. Were they criminals, sociopaths, or honorable men more sensitive to their country's fate than were many of their contemporaries? Harrison poses this question in the book's introduction and then seeks the answer with an objective eye. Students and scholars of twentieth century history, as well as the general reader interested in this fascinating period, will find this volume superb reading. The book begins with a historical view of French colonization of Algeria, outlining the roots of the counter-revolution. Further chapters discuss the three abortive efforts to grant native Algerians their independence. The O.A.S. emerged in the wake of these defeats. Harrison also examines the evolution of counter-terrorism into a full-fledged coalition, under the O.A.S. label, to challenge DeGaulle. Finally, those who fought give personal accounts of the movement's defeat.

Citizen, State, and Social Welfare in Britain is, in addition, an intellectual study of the concept of citizenship over the last two centuries, tracing developing notions of the duties and obligations implicit in the idea of the citizen, as well as the rights and entitlements.

Textbook of Vascular Medicine Rhian M. Touyz,Christian Delles.2019-08-02 This textbook focuses on the vascular biology and physiology that underlie vascular disorders in clinical medicine. Vascular biomedicine is a rapidly growing field as new molecular mechanisms of vascular health and disease are unraveled. Many of the major cardiovascular diseases including coronary artery disease, heart failure, stroke and vascular dementia are diseases of the vasculature. In addition vascular injury underpins conditions like kidney failure and cardiovascular complications of diabetes. This field is truly multidisciplinary involving scientists in many domains such as molecular and vascular biology, cardiovascular physiology and pharmacology and immunology and inflammation. Clinically, specialists across multiple disciplines are involved in the management of patients with vascular disorders, including cardiologists, nephrologists, endocrinologists, neurologists and vascular surgeons. This book covers a wide range of topics and provides an overview of the discipline of vascular biomedicine without aiming at in-depth reviews, but rather offering up-to-date knowledge organized in concise and structured chapters, with key points and pertinent references. The

structure of the content provides an integrative and translational approach from basic science (e.g. stem cells) to clinical medicine (e.g. cardiovascular disease). The content of this book is targeted to those who are new in the field of vascular biology and vascular medicine and is ideal for medical students, graduate and postgraduate students, clinical fellows and academic clinicians with an interest in the vascular biology and physiology of cardiovascular disease and related pathologies.
