The Case Against Homework Sara Bennett,Nancy Kalish.2007-08-28 Does assigning fifty math problems accomplish any more than assigning five? Is memorizing word lists the best way to increase vocabulary—especially when it takes away from reading time? And what is the real purpose behind those devilish dioramas? The time our children spend doing homework has skyrocketed in recent years. Parents spend countless hours cajoling their kids to complete such assignments—often without considering whether or not they serve any worthwhile purpose. Even many teachers are in the dark: Only one of the hundreds the authors interviewed and surveyed had ever taken a course specifically on homework during training. The truth, according to Sara Bennett and Nancy Kalish, is that there is almost no evidence that homework helps elementary school students achieve academic success and little evidence that it helps older students. Yet the nightly burden is taking a serious toll on America’s families. It robs children of the sleep, play, and exercise time they need for proper physical, emotional, and neurological development. And it is a hidden cause of the childhood obesity epidemic, creating a nation of “homework potatoes.” In *The Case Against Homework*, Bennett and Kalish draw on academic research, interviews with educators, parents, and kids, and their own experience as parents and successful homework reformers to offer detailed advice to frustrated parents. You’ll find out which assignments advance learning and which are time-wasters, how to set priorities when your child comes home with an overstuffed backpack, how to talk and write to teachers and school administrators in persuasive, nonconfrontational ways, and how to rally other parents to help restore balance in your children’s lives. Empowering, practical, and rigorously researched, *The Case Against Homework* shows how too much work is having a negative effect on our children’s achievement and development and gives us the tools and tactics we need to advocate for change. Micromachined Ultrasonic Transducers .1997 Microfabricated ultrasonic transducers have been generated which operate in both liquids and gases. Air coupled through transmission of aluminum was observed for the first time using a pair of 2.3 MHz transducers. The dynamic range of the transducers was 110 dB, and the received signal had an SNR of 30 dB. Air coupled through transmission of steel and glass has also been observed. A theoretical model for the transducers has been refined and agrees well with experimental results. A robust microfabrication process has been developed and was used to generate air transducers which resonate from 2 to 12 MHz, as well as immersion transducers that operate in water from 1 to 20 MHz with a 60 dB dynamic range. Optimized immersion and air transducers have been designed and a dynamic range above 110 dB is anticipated. This development effort finds applications in hydrophones, medical ultrasound, nondestructive evaluation, ranging, flow metering, and scanning tip force sensing and lithography.

Handbook of Industrial Chemistry and Biotechnology James A. Kent.2013-01-13 Substantially revising and updating the classic reference in the field, this handbook offers a valuable overview and myriad details on current chemical processes, products, and practices. No other source offers as much data on the chemistry, engineering, economics, and infrastructure of the industry. The Handbook serves a spectrum of individuals, from those who are directly involved in the chemical industry to others in related industries and activities. It provides not only the underlying science and technology for important industry sectors, but also broad coverage of critical supporting topics. Industrial processes and products can be much enhanced through observing the tenets and applying the methodologies found in chapters on Green Engineering and Chemistry (specifically, biomass conversion), Practical Catalysis, and Environmental Measurements; as well as expanded treatment of Safety, chemistry plant security, and Emergency Preparedness. Understanding these factors allows them to be part of the total process and helps achieve optimum results in, for example, process development, review, and modification. Important topics in the energy field, namely nuclear, coal, natural gas, and petroleum, are covered in individual chapters. Other new chapters include energy conversion, energy storage, emerging nanoscience and technology. Updated sections include more material on biomass conversion, as well as three chapters covering biotechnology topics, namely, Industrial Biotechnology, Industrial Enzymes, and Industrial Production of Therapeutic Proteins.

The Ideological Origins of Nazi Imperialism Woodruff D. Smith.1989-02-09 This study traces the evolution of imperialist ideology in Germany from Bismarck in the mid-19th century through Hitler and the Third Reich. Although much has been written about the virulently racist and anti-communist ideologies of the Nazi party, this is the first book to treat Nazi imperialism as a separate ideology and set it within a sturdy theoretical framework. Smith contends that Nazi imperialism represented the last, ambitious attempt to integrate two century-old ideologies--the elite, pro-industrial Weltpolitik and the popular-based, pro-agrarian Lebensraum--into a single system. In fact, Smith argues that it was largely the way in which the Nazis attempted to reconcile these contradictory ideologies that explains Germany's disastrous policies during World War II. This wide-ranging study also contributes to the debates over several other aspects of German history, including German military aims in World War II, the continuity--or discontinuity--of German policy from Bismarck to Hitler, and the relation between ideology and social-political life.

Hydrogen and Fuel Cells International Energy Agency,Organisation for Economic Co-operation and Development.2004 Hydrogen and fuel cells are vital technologies to ensure a secure and CO2-free energy future. Their development will take decades of extensive public and private effort to achieve technology breakthroughs and commercial maturity. Government research programs are indispensable for catalyzing the development process. This report maps the IEA countries' current efforts to research, develop and deploy the interlocking elements that constitute a hydrogen economy, including CO2 capture and storage when hydrogen is produced out of fossil fuels. It provides an overview of what is being done, and by whom, covering an extensive complexity of national government R & D programs. The survey highlights the potential for exploiting the benefits of the international cooperation. This book draws primarily upon information contributed by IEA governments. In virtually all the IEA countries, important R & D and policy efforts on hydrogen and fuel cells are in place and expanding. Some are fully-integrated, government-funded programs, some are a key element in an overall strategy spread among multiple public and private efforts. The large amount of information provided in this publication reflects the vast array of technologies and logistics required to build the hydrogen economy.--Publisher description.

The Owens Valley Jane Wehrey.2013 The Owens Valley is a bold and beautiful land where rugged alpine peaks tower over the deep trough of high desert that John Muir called a country of wonderful contrasts.

Inhabiting a rich and complex past are native people, miners, cattlemen, farmers, and city builders who laid claim, often violently, to its resources. By 1913, Owens River water was flowing south through the Los Angeles Aqueduct, and from the long and bitter conflicts that followed emerged an Owens Valley future far removed from the agrarian Eden envisioned by 19th-century pioneers. Today, unparalleled recreational opportunities draw millions of visitors annually to this long brown land even as reminders of a quintessential Western past linger in its open vistas, epic landscape, and enduring traditions.

Divan of Amir Khusrau Amir Khusrau. 2018-03-27 DIVAN OF AMIR KHUSRAU Translation & Introduction Paul Smith Amir Khusrau (1253-1325), the 'Parrot of India' was born at Patigali near the Ganges in India. At the age of thirty-six he was poet-laureate, serving many sultans. He was not only fluent in Persian, in which he composed the majority of his 92 books, but also in Arabic, Hindi and Sanskrit. He composed ten long masnavis, five Divans of ghazals (nearly 160 here trans.) and ruba'is, dohas, qasidas, riddles and many prose works (see appendixes). He was a Master musician and invented the sitar. The Perfect Master Nizam ud-din took him as his disciple and eventually he became God-realized. He rebelled against narrow spirituality and helped redefine the true Sufi way. He was a profound influence on Hafiz (who copied a book of his ghazals, still in existence) and is seen as the link between Sadi and Hafiz in updating the form and content of the ghazal and eroticising it. This is the largest selection of his poems in English. Introduction is on his Life & Times & Poetry and the Forms in which he wrote and on Sufism & Poetry. The correct rhyme-structure has been kept and the meaning of these beautiful, often enlightened poems. Seven Appendixes, Including: Translations of his The Tale of the Four Dervishes, Ashika, Nuh Sipahr, I'jaz-i Khusaruwi, Kiranu-s Sa'dain, Ghurratu-i-Kamal, Miftahu-i Futuh, Campaigns of 'Ala'u'd-Din Khilji Large Format Paperback 7 x 10 670 pages COMMENTS ON PAUL SMITH'S TRANSLATION OF HAFIZ'S 'DIVAN'. It is not a joke... the English version of ALL the ghazals of Hafiz is a great feat and of paramount importance. I am astonished. Dr. Mir Mohammad Taghavi (Dr. of Literature) Tehran. Superb translations. 99% Hafiz 1% Paul Smith. Ali Akbar Shapurzman, translator of works into Persian and knower of Hafiz's Divan off by heart. Smith has probably put together the greatest collection of literary facts and history concerning Hafiz. Daniel Ladinsky (Penguin Books author). I was very impressed with the beauty of these books. Dr. R.K. Barz. Faculty of Asian Studies, Australian National University. Paul Smith (b. 1945) is a poet, author and translator of many books of Sufi poets of the Persian, Arabic, Urdu, Turkish, Pashtu and other languages including Hafiz, Sadi, Nizami, Rumi, 'Attar, Sana'i, Jahan Khatun, Obeyd Zakani, Mu'in, Amir Khusrau, Nesimi, Kabir, Anvari, Ansari, Jami, Omar Khayyam, Rudaki, Yunus Emre, Shah Latif, Bulleh Shah, Iqbal, Ghalib, Dara Shikoh, Lalla Ded Seemab, Jigar, Mu'in, Abu Nuwas and many others, and his own poetry, fiction, plays, biographies, children's books and 12 screenplays. www.newhumanitybooks.com
