The Far Right Today Cas Mudde.2019-10-25 The far right is back with a vengeance. After several decades at the political margins, far-right politics has again taken center stage. Three of the world's largest democracies - Brazil, India, and the United States - now have a radical right leader, while far-right parties continue to increase their profile and support within Europe. In this timely book, leading global expert on political extremism Cas Mudde provides a concise overview of the fourth wave of postwar far-right politics, exploring its history, ideology, organization, causes, and consequences, as well as the responses available to civil society, party, and state actors to challenge its ideas and influence. What defines this current far-right renaissance, Mudde argues, is its mainstreaming and normalization within the contemporary political landscape. Challenging orthodox thinking on the relationship between conventional and far-right politics, Mudde offers a complex and insightful picture of one of the key political challenges of our time.

Three Treatises Imām Abdallāh al-Haddād.2017-03-01 This volume contains three concise treatises of the venerable Im'm al-'add'd. The first treatise, Mutual Reminding, distills the ethic and content of offering good counsel to one another. The chief elements of counsel, says the Im'm, are Taqw?, an active fear and consciousness of God, and detachment from the material world. These elements connect with the topic of the second treatise, Good Manners, which discusses the manners recommended of the spiritual wayfarer as he or she takes the path to spiritual felicity. The third treatise, The Aphorisms, is a compilation of Im'm al-'add'd's wise insights on a broad range of topics and includes the commentary of Shaykh Mu'ammad 'ay't al-Sind'.

The Human Predicament David Benatar.2017-05-05 Are our lives meaningful, or meaningless? Is our inevitable death a bad thing? Would immortality be an improvement? Would it be better, all things considered, to hasten our deaths by suicide? Many people ask these big questions -- and some people are plagued by them. Surprisingly, analytic philosophers have said relatively little about these important questions about the meaning of life. When they have tackled the big questions, they have tended, like popular writers, to offer comforting, optimistic answers. *The Human Predicament* invites readers to take a clear-eyed and unfettered view of the human condition. David Benatar here offers a substantial, but not unmitigated, pessimism about the central questions of human existence. He argues that while our lives can have some meaning, we are ultimately the insignificant beings that we fear we might be. He maintains that the quality of life, although less bad for some than for others, leaves much to be desired in even the best cases. Worse, death is generally not a solution; in fact, it exacerbates rather than mitigates our cosmic meaninglessness. While it can release us from suffering, it imposes another cost - annihilation. This state of affairs has nuanced implications for how we should think about many things, including immortality and suicide, and how we should think about the possibility of deeper meaning in our lives. Ultimately, this thoughtful, provocative, and deeply candid treatment of life's big questions will interest anyone who has contemplated why we are here, and what the answer means for how we should live.

The Fourth Industrial Revolution Klaus Schwab.2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

The Dawn of Everything David Graeber,David Wengrow.2021-11-09 INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what’s really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. *The Dawn of Everything* fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

God, Human, Animal, Machine Meghan O’Gieblyn.2022-07-12 A strikingly original exploration of what it might mean to be authentically human in the age of artificial intelligence, from the author of the critically-acclaimed *Interior States*. Meghan O’Gieblyn is a brilliant and humble philosopher, and her book is an explosively thought-provoking, candidly personal ride I wished never to end ... This book is such an original synthesis of ideas and disclosures. It introduces what will soon be called the O’Gieblyn genre of essay writing.” —Heidi Julavits, author of *The Folded Clock* For most of human history the world was a magical and enchanted place ruled by forces beyond our understanding. The rise of science and Descartes’s division of mind from world made materialism our ruling paradigm, in the process asking whether our own consciousness—i.e., souls—might be illusions. Now the inexorable rise of technology, with artificial intelligences that surpass our comprehension and control, and the spread of digital metaphors for self-understanding, the core questions of existence—identity, knowledge, the very nature and purpose of life itself—urgently require rethinking. Meghan O’Gieblyn tackles this challenge with philosophical rigor, intellectual reach,

essayistic verve, refreshing originality, and an ironic sense of contradiction. She draws deeply and sometimes humorously from her own personal experience as a formerly religious believer still haunted by questions of faith, and she serves as the best possible guide to navigating the territory we are all entering.

Man and the Universe Mostafa al-Badawi.2010 It is now obvious that something has gone very wrong in the West, and that psychological and social alternatives have become pressing issues. In this timely book, Dr Badawi reminds us that Islam has a historically verifiable track record for healing social chaos and individual tragedy. Sadly, the principles of Islam have all too often been suppressed by the deluge of educational materials, media and socio-economic strangulation from the West. Dr Badawi provides a powerful overview of Islamic metaphysics and unearths its spiritual, social and ethical values as well as a diagnosis of modern man. This is an urgent piece of writing about what we are and where we are.

The Road Cormac McCarthy.2007-03-20 WINNER OF THE PULITZER PRIZE • NATIONAL BESTSELLER • A searing, post-apocalyptic novel about a father and son's fight to survive, this tale of survival and the miracle of goodness only adds to McCarthy's stature as a living master. It's gripping, frightening and, ultimately, beautiful (San Francisco Chronicle). • From the bestselling author of *The Passenger* A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. *The Road* is the profoundly moving story of a journey. It boldly imagines a future in which no hope remains, but in which the father and his son, each the other's world entire, are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation. Look for Cormac McCarthy's latest bestselling novels, *The Passenger* and *Stella Maris*.

GUIDE FOR THE PERPLEXED E. F. Schumacher.1978-05-31 The author of the world wide best-seller, *Small Is Beautiful*, now tackles the subject of *Man, the World, and the Meaning of Living*. Schumacher writes about man's relation to the world. man has obligations -- to other men, to the earth, to progress and technology, but most importantly himself. If man can fulfill these obligations, then and only then can he enjoy a real relationship with the world, then and only then can he know the meaning of living. Schumacher says we need maps: a map of knowledge and a map of living. The concern of the mapmaker--in this instance, Schumacher--is to find for everything its proper place. Things out of place tend to get lost; they become invisible and their proper places end to be filled by other things that ought not be there at all and therefore serve to mislead. *A Guide for the Perplexed* teaches us to be our own map makers. This constantly surprising, always stimulating book will be welcomed by a large audience, including the many new fans who believe strongly in what Schumacher has to say.

However, instead of being disheartened, Arthur Dent makes the terrible mistake of starting to enjoy life a bit—and immediately all hell breaks loose. Hell takes a number of forms: there's the standard Ford Prefect version, in the shape of an all-new edition of The Hitchhiker's Guide to the Galaxy, and a totally unexpected manifestation in the form of a teenage girl who startles Arthur Dent by being his daughter when he didn't even know he had one. Can Arthur save the Earth from total multidimensional obliteration? Can he save the Guide from a hostile alien takeover? Can he save his daughter, Random, from herself? Of course not. He never works out exactly what is going on. Will you? "Douglas Adams is a terrific satirist. . . . He is anything but harmless."—The Washington Post Book World
